Brushed
Technology

TRÉS

Maximum corrosion resistance

PBT® finishes are protected against oxidation and moisture, ensuring a long lasting life even in demanding environments.

Long-lasting adherence

The multilayer process creates a firm bond between the coating and the metal, preventing wear or detachment over time.

Fade-resistant color

PBT® pigments and treatments preserve a vibrant, uniform, and elegant color, unaffected by use or exposure.

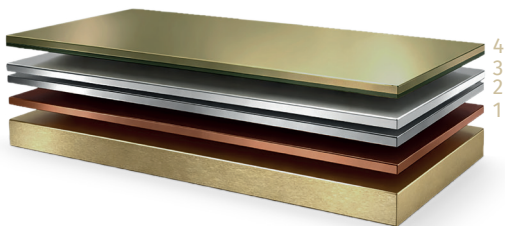

5x

times more resistant to corrosion
than required by the EN 248 standard

2x

times more resistant to
abrasion wear than chrome

4 **Thermosetting synthetic resin on sealing base**
Waterproofing, hardness and pigmentation

3 **Nickel 2**
Corrosion protection

2 **Nickel 1**

Low-lead brass

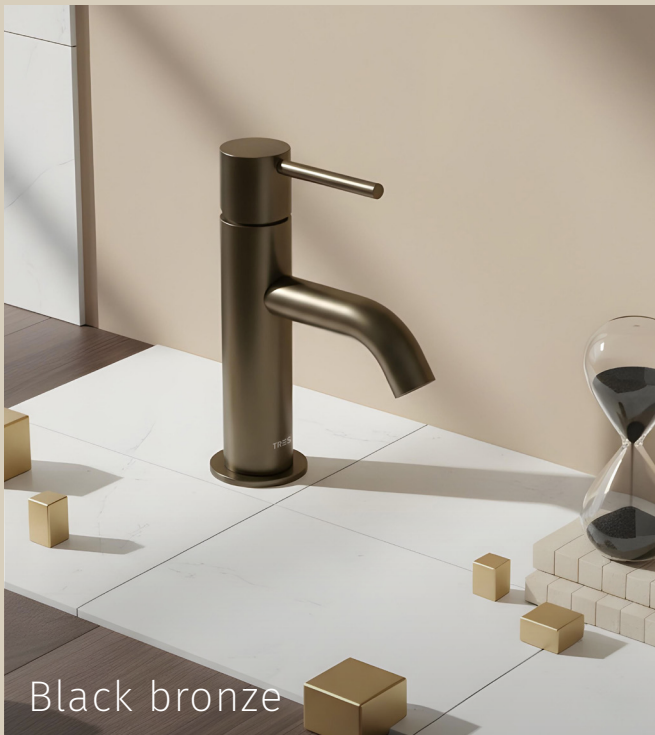

Graphite

Modernity and balance. The graphite finish combines the neutrality of grey with a silky texture, suited to minimalist and elegant styles.

Volcanic

A warm hue with copper undertones that brings character and exclusivity. Perfect for interiors seeking a cozy, distinctive aesthetic.

Sober, intense, and elegant. A black with subtle bronze undertones that shift with the light. Its matte finish adds versatility, integrating stylishly into both rustic and modern interiors.

Golden Cava

Harmony of light and luxury. This matte golden finish conveys distinction without ostentation, ideal for refined spaces with a touch of subtle brilliance.

PBT® (Protection Brushed Technology) is the exclusive multi-layer coating industrial process developed by Tres that guarantees high-quality finishes, ultra-resistant performance, and impeccable aesthetics for demanding interior design spaces.
