Contract

This catalogue brings together Tres solutions for Contract sector projects. A clear and practical guide designed for architects, interior designers and professionals seeking design, reliability and an industrial response. You will find selected collections, tailored options and services for highly demanding projects.

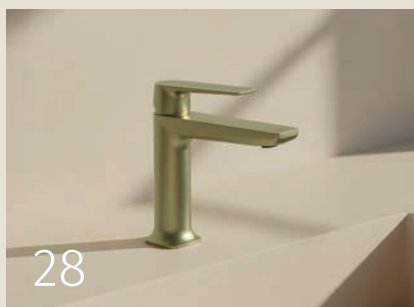

We present our selection of tapware collections for the contract sector, designed for bathrooms and shared spaces, with inspiring designs that cover all categories and styles of spaces, prioritising user experience, ease of installation and simple maintenance.

You will find more collections and water solutions at tresgriferia.com

A trusted partner for contract projects

Tres offers a comprehensive selection of tapware collections designed for hotels, restaurants, residential and public spaces, supported by the technical expertise and close involvement of a European manufacturer.

Tapware for sample rooms

We supply tapware for mock-up rooms, enabling clients to visualise how each collection integrates into hospitality and residential projects.

Supervision during installation

We oversee the installation process to ensure optimal integration and a flawless finish in every space.

Training in installation and maintenance

We provide specialised training for technical teams, ensuring the correct performance and durability of the tapware.

Technical support service

We have a network of over 160 qualified technicians across Europe and Latin America, offering responsive, professional and local assistance.

From Barcelona, with purpose

Designing and manufacturing in Barcelona is a meaningful choice. It means working close by, with control, coherence and commitment. At Tres, every tap is born here, the result of experience, innovation and a way of working that combines industry, design and Mediterranean sensibility.

Why design and manufacture in our own facilities?

- Total coherence between design, engineering and finish.
- Quality control at every stage of the process.
- Industrial agility: from idea to product without intermediaries.
- Real adaptability to market needs.
- Tangible sustainability thanks to full traceability.
- A culture of craftsmanship based on technical knowledge and conscious design.

Durable materials, real efficiency and a tangible commitment

The taps are manufactured with refined brass produced in Europe, with low lead content, in accordance with the European Standard (UNE-EN 10204).

Tres tapware is available in different finishes. All of them are applied by combining industrial processes with artisanal control to deliver a perfect and highly resistant result.

Tres offers up to a 5-year warranty on many of its best-selling products.

The state-of-the-art laboratory is equipped for acoustic testing according to the European standard EN 200-2008, analysing products to reduce water and energy consumption.

The visual and functional verification of 100% of the components, together with non-migration rubbers and non-toxic greases, ensures that the products successfully pass official European audits.

Both products and production processes are certified by the leading organisations.

Self-consumption through solar panels makes it possible to generate our own sustainable energy, reducing dependence on external sources and promoting a more responsible and efficient use of electricity.

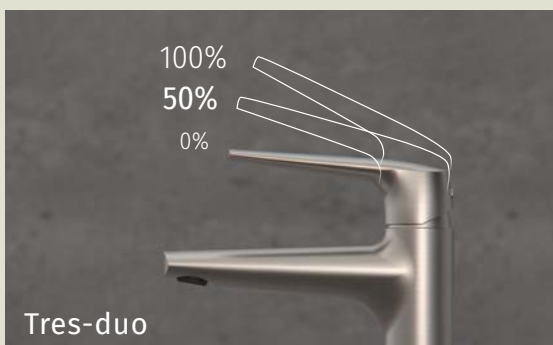

Self-produced cardboard packaging significantly reduces the use of plastics and transport, promoting more sustainable and environmentally responsible solutions throughout the supply chain.

Responsible design for conscious people

Low energy consumption system in which the tap always opens with cold water, preventing the unnecessary activation of the heater. Designed and patented by Tres since 1992.

Water-saving system with a two-position handle opening. In the intermediate position, water consumption is reduced by 50%. Designed and patented by Tres since 2010.

Adjustable aerator with a flow limiter of 5.7 lpm, reducing water consumption to less than 50% compared to conventional taps while maintaining comfort.

The taps are manufactured with refined brass produced in Europe, with low lead content, in accordance with the European Standard (UNE-EN 10204).

Trivalent chrome plating, ensuring a durable surface, resistance over time and easy cleaning of the tapware.

Cartridge with ceramic discs providing smooth handle operation. Designed and patented by Tres, with a certified service life of 200,000 cycles (Aenor-NF).

Protec-tres anti-scald system. The cartridge ring allows the maximum desired temperature to be limited.

				
BR1	5	5	7,6	7,6
BR2	1,9	3,8	6	6
BR3	-	1,9	3	

BR flow limiters in the tapware, enabling access to certifications such as LEED, BREEAM, REACH or EDGE.

PBT®

Protection
Brushed
Technology

PBT® (Protection Brushed Technology) is Tres' exclusive industrial multi-layer coating process, designed to deliver high-quality, ultra-resistant, and aesthetically flawless finishes for demanding interior design environments.

x5

more resistant to corrosion than
required by EN-248 standards

x2

more resistant to abrasion
wear than chrome

Black bronze

Golden Cava

Maximum corrosion resistance

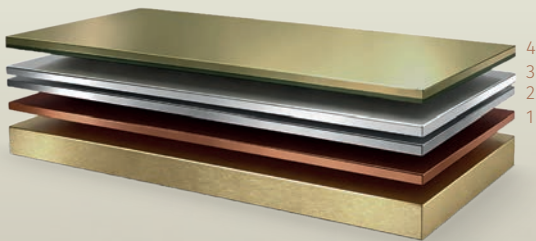

PBT® finishes protect against oxidation and moisture, ensuring long-lasting performance even in demanding environments.

Long-lasting adhesion

The multi-layer process creates a strong bond between the coating and the metal, preventing wear or peeling over time.

Color stability

PBT® pigments and treatments preserve a vibrant, uniform, and elegant color, unaffected by use or exposure.

- 4 **Thermosetting synthetic resin over sealing base**
Impermeability, hardness, and pigmentation
- 3 **Nickel 2**
Corrosion protection
- 2 **Nickel 1**
Corrosion protection
- 1 **Copper**
Anchoring and leveling
- Faucet base material**
Low lead brass

Volcanic

Graphite

Chrome3 Technology® (Cr^{3+}) is Tres' exclusive trivalent chrome plating process that redefines chrome finishes: maximum resistance, flawless aesthetics, and industrial responsibility for demanding, future-ready projects.

Maximum corrosion resistance

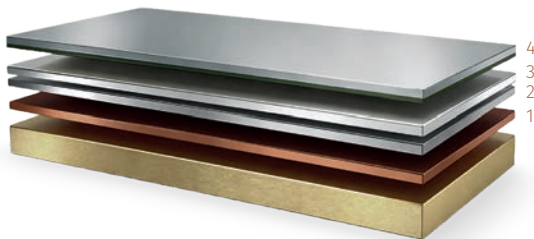

AASS test (UNE-EN 248) up to 120 hours without failure, ensuring protection against humidity, chemical agents, and demanding environments.

Long-lasting adhesion

The multi-layer process creates a strong bond between the coating and the metal, preventing wear or peeling over time.

Unalterable finish

Trivalent chrome maintains uniformity, mirror-like shine, and flawless aesthetics without alteration due to use or exposure.

- 4 **Trivalent chromium (Cr^{3+})**
Impermeability, hardness, and finish stability
 - 3 **Semi-bright nickel**
Anti-corrosion barrier that reinforces structural durability
 - 2 **Bright nickel**
Aesthetic uniformity and additional protection against wear
 - 1 **Copper**
Ensures perfect anchoring and coating consistency
- Faucet base material**
Low lead brass

Study

Delicate yet assertive, the Study collection is built from slender cylindrical volumes and refined proportions. Its formal language is clean, serene, and precise. A minimalist design that draws strength from geometric purity and the distinctiveness of its metallic finishes. Subtle sophistication for intentional spaces.

Canigó

Tres has endowed the Canigó collection with features that promote water and energy savings. The inclined trajectory of the lever and the robustness of the bodies blend seamlessly with the rounded angles of its contours, giving the entire collection character and distinction.

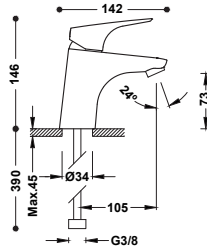

Versatility and reliability for a functional and luminous bathroom. The balanced design of the Canigó collection ensures comfort, durability, and coherence in hotels.

Tres Cleaner. mixerware cleaner for kitchen and bathroom

134100106

17,00

- Shines surfaces.
- Removes finger marks.
- Repels dirt.
- Removes limescale.
- Anti-static effect.
- 750 ml.

Polishes surfaces

Removes fingerprints

Repels dirt
Gets rid of limescale

Prevents static

With the nozzle open, the liquid disperses in a fine spray which reaches wider areas like screen doors and mirrors.

With the nozzle closed, the cleaning foam adheres and acts significantly more efficiently on dirt for a deeper clean.
