

SUSTAINABLE SLUICE ROOMS

REDUCE WASTE & COSTS WITH STANBRIDGE EQUIPMENT

With growing concerns about the amount of waste we create daily, you'll be pleased to know that Stanbridge equipment can help your clients minimise their environmental impact and reduce costs!

Our advanced sluice room equipment offers significant environmental benefits whilst streamlining your client's operations:

ENERGY EFFICIENT & WRAS APPROVED

Our machines are designed for maximum efficiency, to improve hygiene and reduce staff workload, all whilst being WRAS approved.

BUILT TO LAST

We utilise stainless steel for surfaces and fixtures, ensuring exceptional longevity and fewer replacements.

CUT DOWN ON WASTE

Ditch macerators and opt for our bedpan washers and reusable bedpans – a drastic reduction in disposable waste and ongoing savings on consumables.

SMART DESIGN, LESS WASTE

Our thoughtfully designed sluice room layouts and equipment minimise spills and the need for excessive cleaning products.

FEWER PLUMBING PROBLEMS

Swapping to bedpan washer disinfectors from macerators means significantly fewer blockages, plumbing call-outs, and repair costs.

Want to enhance your projects with sustainable and cost-effective sluice room solutions? **Contact our team of experts today.**
