

ENVIRONMENTALLY FRIENDLY INFECTION CONTROL

Stanbridge is here to help clients balance infection control with environmental responsibility. Our equipment ensures safe, compliant waste disposal to protect healthcare facilities from infection and cross-contamination, while simultaneously offering a sustainable solution that reduces both waste and operational costs.

Environmentally Friendly Machines

Our machines use minimal water, no harsh chemicals, and are energy efficient. Helping healthcare facilities meet their sustainability targets, reduce environmental impact, and potentially lower operational costs.

Stanbridge reusable bedpans

By using Stanbridge reusable bedpans and bedpan washer disinfectors instead of macerators, you can be confident that you are not contributing to the build-up of waste products and chemicals in our planet's rivers and oceans.

Switching to Stanbridge reusable bedpans significantly decreases the need for single-use cardboard bedpans. This reduces waste, lowers consumable costs and simplifies storage and collection.

Our bedpans are also made from high-quality ABS plastic for easy cleaning and long-lasting use, making them highly sustainable.

Protecting Water Systems and Drains

Flushing macerated cardboard waste down drains introduces non-biodegradable glue and excess waste into the water system, impacting the environment. This can also lead to drain blockages, resulting in costly and inconvenient maintenance. Using Stanbridge bedpan washer disinfectors instead of macerators helps maintain cleaner drainage systems and helps avoid blockages.

WRAS Approval

At Stanbridge, all of the bedpan washer disinfectors we manufacture are WRAS approved. This means every machine connected to the public water supply meets the highest standards, stopping cross-contamination and minimising water waste. We're dedicated to providing safe, compliant solutions that support infection control in your sluice room.

Stanbridge Limited Unit 78, Powder Mill Road, Questor Park, Dartford, Kent DA1 1JA

Registered in England and Wales No. 570388 Registered Office: as above

VAT No. 335 8708 35

ISO 14001

Stanbridge is also proud to be accredited with ISO 14001, which is the internationally recognised standard for environmental management systems (EMS), helping companies manage their environmental impact.

Locally Manufactured Equipment

All of Stanbridge's bedpan washer disinfectors are manufactured in the UK, reducing the environmental impact compared to overseas-produced equipment, which would need to be delivered. We can usually replace machine components rather than whole subassemblies, making repairs cost-effective and increasing the life span of equipment.

Reduce your environmental impact & enhance your care with Stanbridge. **Contact us today on 01689 806 500.**
