

Case Study: FOS Billiard Club Transformation

The FOS Billiard Club, originally a traditional billiard hall, underwent a stunning transformation into what is now referred to as a Billiard Parlor.

Spanning approximately **3,000 square feet**, the renovation focused on elevating the atmosphere with new ceiling treatments that dramatically improved the room's character and ambiance.

Design & Installation

- **Ceiling Grids:** The existing 2' x 4' grid system was converted into a 2' x 2' system, which made the ceiling visually more elegant and proportionally balanced for the space.
- **Painted Finish:** The ceiling grids were painted with **hammered copper paint from Home Depot**, complementing the metallic tones of the Decorative Ceiling Tiles.
- **Ease of Installation:** The updated grid system simply snapped into place, making the installation **super simple**. Even during the process, the transformation was evident.

Results

- The Billiard Hall was **completely redefined into a sophisticated Billiard Parlor**, impressing members and guests alike.
- The new ceiling provided **abundant ambiance**, enhancing both the atmosphere and customer experience.
- The project team highlighted the **remarkable ease of installation**, noting how quickly and seamlessly the tiles changed the feel of the room.

Client Feedback

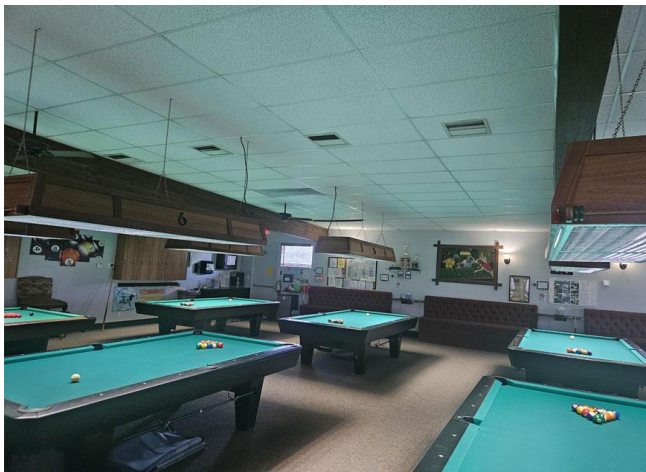

"It was super simple and absolutely everyone is impressed. It changed our Billiard Hall into a really special place with abundant ambiance. Decorative Ceiling Tile was absolutely great to work with, and they had the best selection. They gave us better pricing than anywhere else, and we looked around. Thank you, Decorative Ceiling Tile! We are very happy with the tiles and the service from Aly!"

— Wayne Prowse, President, FOS Billiard Club
