

Retail Experience

When it comes to protecting commercial roofs on retail and walk-in facilities, there's no better solution than an edge metal system from Hickman Edge Systems. The perimeter edge metal system serves as the roof's first line of defense when it comes to protection against wind and water infiltration. We offer the industry's widest selection of ANSI/SPRI/FM 4435/ES-1 tested and approved edge metal systems for low sloped roofs including fascia, coping, water control systems, as well as custom edge products. We also have extensive experience working with specifiers of roofs installed on retail and walk-in facilities. Below is a representative list of our experience.
