

K-12 School Experience

When it comes to protecting commercial roofs on K-12 school and educational facilities, there's no better lesson than an edge metal system from Hickman Edge Systems. The perimeter edge metal system serves as the roof's first line of defense when it comes to protection against wind and water infiltration. We offer the industry's widest selection of ANSI/SPRI/FM 4435/ES-1 tested and approved edge metal systems for low sloped roofs including fascia, coping, water control systems, and custom edge products. We also have extensive experience working with K-12 and educational facility specifiers and school boards. Below is a representative list of our K-12 school and educational facility projects.

Providence Middle School	Dover Shores Elementary School	Charles County Public Elementary Schools
Lake Elementary School	Audubon K-8 School	Powhatan Middle School
Parkview Elementary School	Ledyard Middle School	Pine Hills Elementary School
Mt. Graylock Regional High School	Maxey Elementary School	Cherryland K-8 School
