

Hospital & Healthcare Experience

When it comes to protecting commercial roofs on hospitals and healthcare facilities, there's no better treatment than an edge metal system from Hickman Edge Systems. The perimeter edge metal system serves as the roof's first line of defense when it comes to protection against wind and water infiltration. We offer the industry's widest selection of ANSI/SPRI/FM 4435/ES-1 tested and approved edge metal systems for low sloped roofs including fascia, coping, water control systems, and custom edge products. We also have extensive experience working with hospital/healthcare specifiers and facility managers. Below is a representative list of our hospital/healthcare projects.

Adventist Health System
Allen Medical Plaza
Augusta Medical Center
Beebe Medical Center
Christus Spohn Hospital
Clovis Medical Plaza
Community Neuroscience and
Sports Medicine Center
Covenant HealthCare
