

THE SOLARSTATION XXL SOLAR PUMP STATION

The Solar Professional's First Choice in
Energy Solutions Since 1978

Product Overview

The SolarStation XXL is SunEarth's solution to large-scale commercial solar thermal. Designed with multi-speed pumps to ensure compatibility with a wide range of system configurations. The SolarStation XXL is factory assembled using top-tier components and is tested for hydraulic integrity to ensure a smooth installation every time.

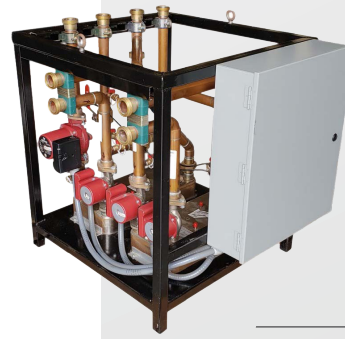

SunEarth's solar products have over four decades of engineering and design experience built into every component, defining quality and value in the North American market.

KEY FEATURES

- Built for Large-Scale Commercial Solar Heating Systems
- Easy-to-Read Controller with Liquid Crystal Display for Insight into System Operations
- Allows for Installation in Collector Area of up to 3,000 sq.ft.
- Corrosion-Resistant Heat Exchanger

ABOUT THE SUNEARTH SolarStation XXL

Decrease installation time reduce labor and engineering costs with the SunEarth SolarStation XXL pumping station. Specifically designed for large-scale commercial solar water heating projects, the SolarStation XXL covers a collector area of up to 3,000 square feet. This pump station's welded steel frame allows for maximum durability and the heat exchanger is manufactured from corrosion-resistant 316L Stainless Steel. The SolarStation XXL features a Liquid Crystal Display (LCD), and the controller also includes a micro-SD card for data logging of time, date, temperature, flow-rate, pressure, and energy measurements. Customizable options are able to meet the monitoring needs for a variety of commercial buildings. The SolarStation XXL's components are tested for hydraulic integrity by SunEarth, the North American leader in solar water heating.

PRODUCT SPECS

Applications. SunEarth's SolarStation XXL pump stations are optimized for commercial property solar water heating systems.

Models. SolarStation XXL is available in six models for a collector area ranging from 1,000 ft² to 3,000 ft².

Materials. Featuring a welded steel frame, 316 stainless steel heat exchanger plates, and Type M copper pipe.

Why SunEarth?

Listed & Certified

SunEarth has the most certified ICC-SRCC systems.

American Made

Since 1978, SunEarth has continuously built industry-leading solar hot water collectors, components, and packaged systems.
