

THE SOLARSTATION HX

SOLAR PUMP STATION

The Solar Professional's First Choice in
Energy Solutions Since 1978

Product Overview

The SolarStation HX is SunEarth's preferred residential solar thermal pump station. The multi-speed pumps allow flow speed tuning for optimal performance. Strong soldered and gasketed connections extend product life. This completely contained unit can function with most tanks. The SolarStation HX is factory assembled and hydraulically tested to ensure leak-free installation every time.

SunEarth's solar products have over four decades of engineering and design experience built into every component, defining quality and value in the North American market.

KEY FEATURES

- 4 Service Drains for Easy Exchanger Flushing
- Multiple Speed Settings for Optimal Rate
- Trouble-Free Installation with Integrated Mounting Brackets
- Expanded Polypropylene Insulation for Maximum Solar Thermal Efficiency

ABOUT THE SUNEARTH SolarStation HX

The key to an effective solar water heating system lies in pulling the heat out of the collectors and putting it into your tank. The SolarStation HX does this better than any other freeze-protected system on the market. SunEarth's SolarStation HX converts any existing water heating system into a solar water heating system.

Featuring a compact design that's optimized for performance and a low profile look. All valves, controls, and cleaning ports fit neatly in one easy-to-maintain package. Installation designed with solar contractors in mind, the SolarStation HX is quick and easy to install. Once the collectors are mounted on the roof, it's just a question of running the insulated lines and connecting to the Solar Station HX, which can be installed on standard tanks (such as electric or natural gas), as well as solar-specific tanks.

PRODUCT SPECS

Applications. SunEarth's SolarStation HX pump stations are optimized for solar water heating systems.

Specifications. Maximum Collector Area of 160 ft² and a Maximum Nominal Pipe Size of 3/4 in. (40 sq.ft. system uses 1/2" collector plumbing)

Materials. Featuring expanded polypropylene insulation, stainless steel plates, and type M copper pipes.

Why SunEarth?

Listed & Certified

SunEarth has the most certified ICC-SRCC systems.

American Made

Since 1978, SunEarth has continuously built industry-leading solar hot water collectors, components, and packaged systems.
