

THE DRAINPACK

SOLAR HOT WATER STATION

The Solar Professional's First Choice in
Energy Solutions Since 1978

Product Overview

SunEarth's Drainpack Hot Water Station (HWS) was specifically designed and engineered with the professional installer in mind. The Drainpack HWS is factory assembled using top tier components and is tested for hydraulic integrity to ensure a smooth installation.

The Drainpack HWS pairs perfectly with SunEarth's high-performing Cascade drainback system and includes all necessary components while eliminating dozens of intermediate connections.

KEY FEATURES

- 75psi Pressure Relief Valve and Integrated Sight Tube for Simple System Maintenance
- Double-Insulated Magwire to Protect Against Condensation
- Glass-Lined and Pressure Rated Storage Tanks
- Easy-to-Read Liquid Crystal Display (LCD)

ABOUT THE SUNEARTH

Drainpack HWS

The SunEarth Drainpack hot water station offers an all copper 6-gallon drainback reservoir for the 80-gallon model and 7.2-gallon drainback reservoir for the 120-gallon model. Comprised of lead-free ball valves, the integrated service bypass allows the backup water heater to continue operating while service is performed on the solar system. The thermal expansion tanks ensure consistent pressure throughout the wide operational temperature range, and the mixing valve distributes controlled temperature water.
