

FLUSH MOUNT RACKING SYSTEM

FOR SOLAR COLLECTORS

The Solar Professional's First Choice in
Energy Solutions Since 1978

Product Overview

SunEarth's flush mount racks for solar collectors provide a strong, durable solution for mounting collectors parallel to the roof surface. The flush mount components consist of 6063-T6 anodized aluminum Solar Strut, collectors clips, and stainless steel fasteners that can withstand harsh weather conditions.

SunEarth's flush mount method has been designed for composition shingle-style roofs, cedar shake-style roofs, standing seam-style roofs, and flat/barrel tile-style roofs.

KEY FEATURES

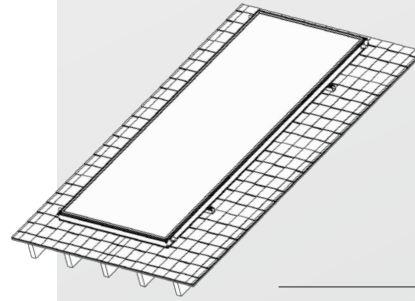

- Suitable for Residential & Commercial Projects
- Designed for a Variety of Roof Types
- Allows for Collectors Mounted Parallel to a Roof's Surface

ABOUT THE SUNEARTH

Flush Mounting System

SunEarth's flush mount racking provides a sleek, finished look for solar installations. This mount option for solar collectors are ideal for clients who want to achieve an unobstructive view. Flush mount racking requires installation on a roof with a minimum pitch of 2/12 or 10°. The flush mount method should not be used in areas that experience positive panel loading (such as snow) greater than 60 psf or negative panel loading (such as wind) greater than 60 psf. If expected loading exceeds these values, please contact SunEarth to discuss alternative mounting options.

Solar water heating should never be a gamble. With SunEarth's leading solar collectors and mounting systems, professional contractors rest easy. They know their customers will enjoy trouble free energy savings for many years to come.

PRODUCT SPECS

Applications. Flush mount racks are suitable for solar water heating systems and solar pool heating systems.

Installation. The SunEarth flush mount racks are designed to be installed parallel to the roof's surface.

Materials. Constructed of 6063-T6 anodized aluminum Solar Strut, collectors clips, and stainless steel fasteners
