MODULAR FLOORING OFFERS APPEALING TEXTURE, COLOR AND PATTERN THAT CAN BE INSTALLED QUICKLY AND COST EFFECTIVELY WITH NEGLIGIBLE WASTAGE. IT IS DURABLE, LUXURIOUS UNDERFOOT AND EASILY MAINTAINED FOR LONG LASTING APPEARANCE RETENTION.

01 WELCOME TO STYLE

Modular Carpet provides Style flexibility within any Hospitality interior, as it can be installed in random configurations to create interesting effects. CNC cut inserts provide variety, transitional demarcation, signage and wayfinding for better Guest experience, safety and function.

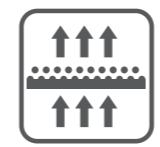

02 WELCOME TO COMFORT

Carpet effectively absorbs underfoot impact reducing leg muscle fatigue to a greater degree than a hard surface. Underfoot cushion translates to better ergonomic comfort for the guest and increases overall productivity of staff within the Hotel.

03 WELCOME TO PEACE & QUIET

Carpet is an outstanding sound absorptive material compared to resilient & hard flooring. Carpet absorbs ambient noise as effectively as most specialized acoustic materials.

04 WELCOME TO WELLBEING

Natural dust allergens and bacterial particulates that settle onto smooth surfaces become airborne from human interaction, triggering allergic reactions (e.g. asthma, itchy eyes,). The surface pile of a continuous filament solution dyed nylon carpet improves indoor air quality by entrapping dust particles until they are routinely vacuumed away. Heavily soiled modules are easily replaced without disruption to Hotel operations or impact to occupancy.

05 WELCOME TO GREEN BUILDING

When compared to hard surfaces, Carpets increased thermal insulate propensity regulates ambient temperature fluctuation. In controlled laboratory tests measuring heat consumption of two identical dwellings (one with and one without fitted carpet), the contributable energy saving was between 8.6% and 12.8% per annum. This considerably reduces a hotels Carbon footprint with lower electricity consumption required for HVAC systems.

06 WELCOME TO SUSTAINABILITY

Carpets Inter's ISO:140001 environmental management reduces impact at every stage of production by;

- 90% Clean Energy by onsite Solar Panel
- Using recycled/recyclable synthetic fibers.
- Zero waste to Landfill by repurposing offcut & take back EOL into refuse derived fuel (Biofuel) for Power Generation/ Cement manufacturing.
- Carbon Sequestration program by water treatment sediment to organic fertilizer production.
- Use of low VOC carpet adhesives and backings for all products.

WHY MODULAR FLOORING

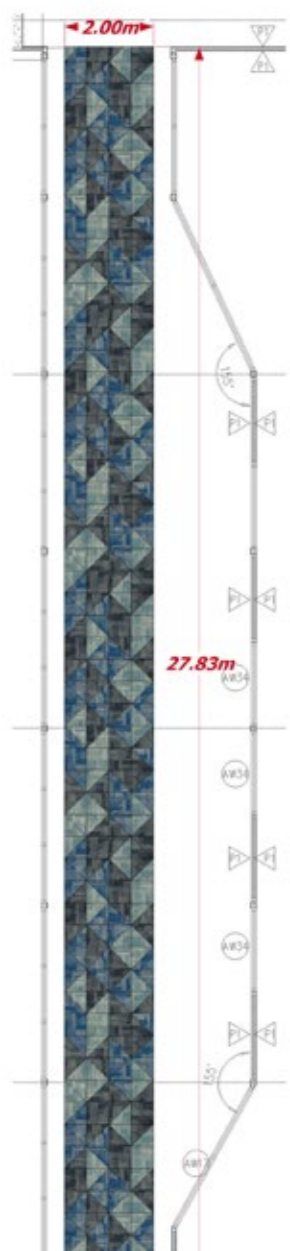

SMART CHOICES

“Hospitality interior spaces are specifically created to ensure aesthetic appeal, ease of maintenance, health & safety and overall high performance across the whole space. Every space has very a different expectation. The guest experience is one of the most important factors, as is the wellbeing of all who inhabit the space. From the vast array of flooring products in today’s market, smarter choices are available to ensure a fit for purpose solution for every requirement”.

2D FLOORPLAN

PLEASE ENJOY YOUR STAY

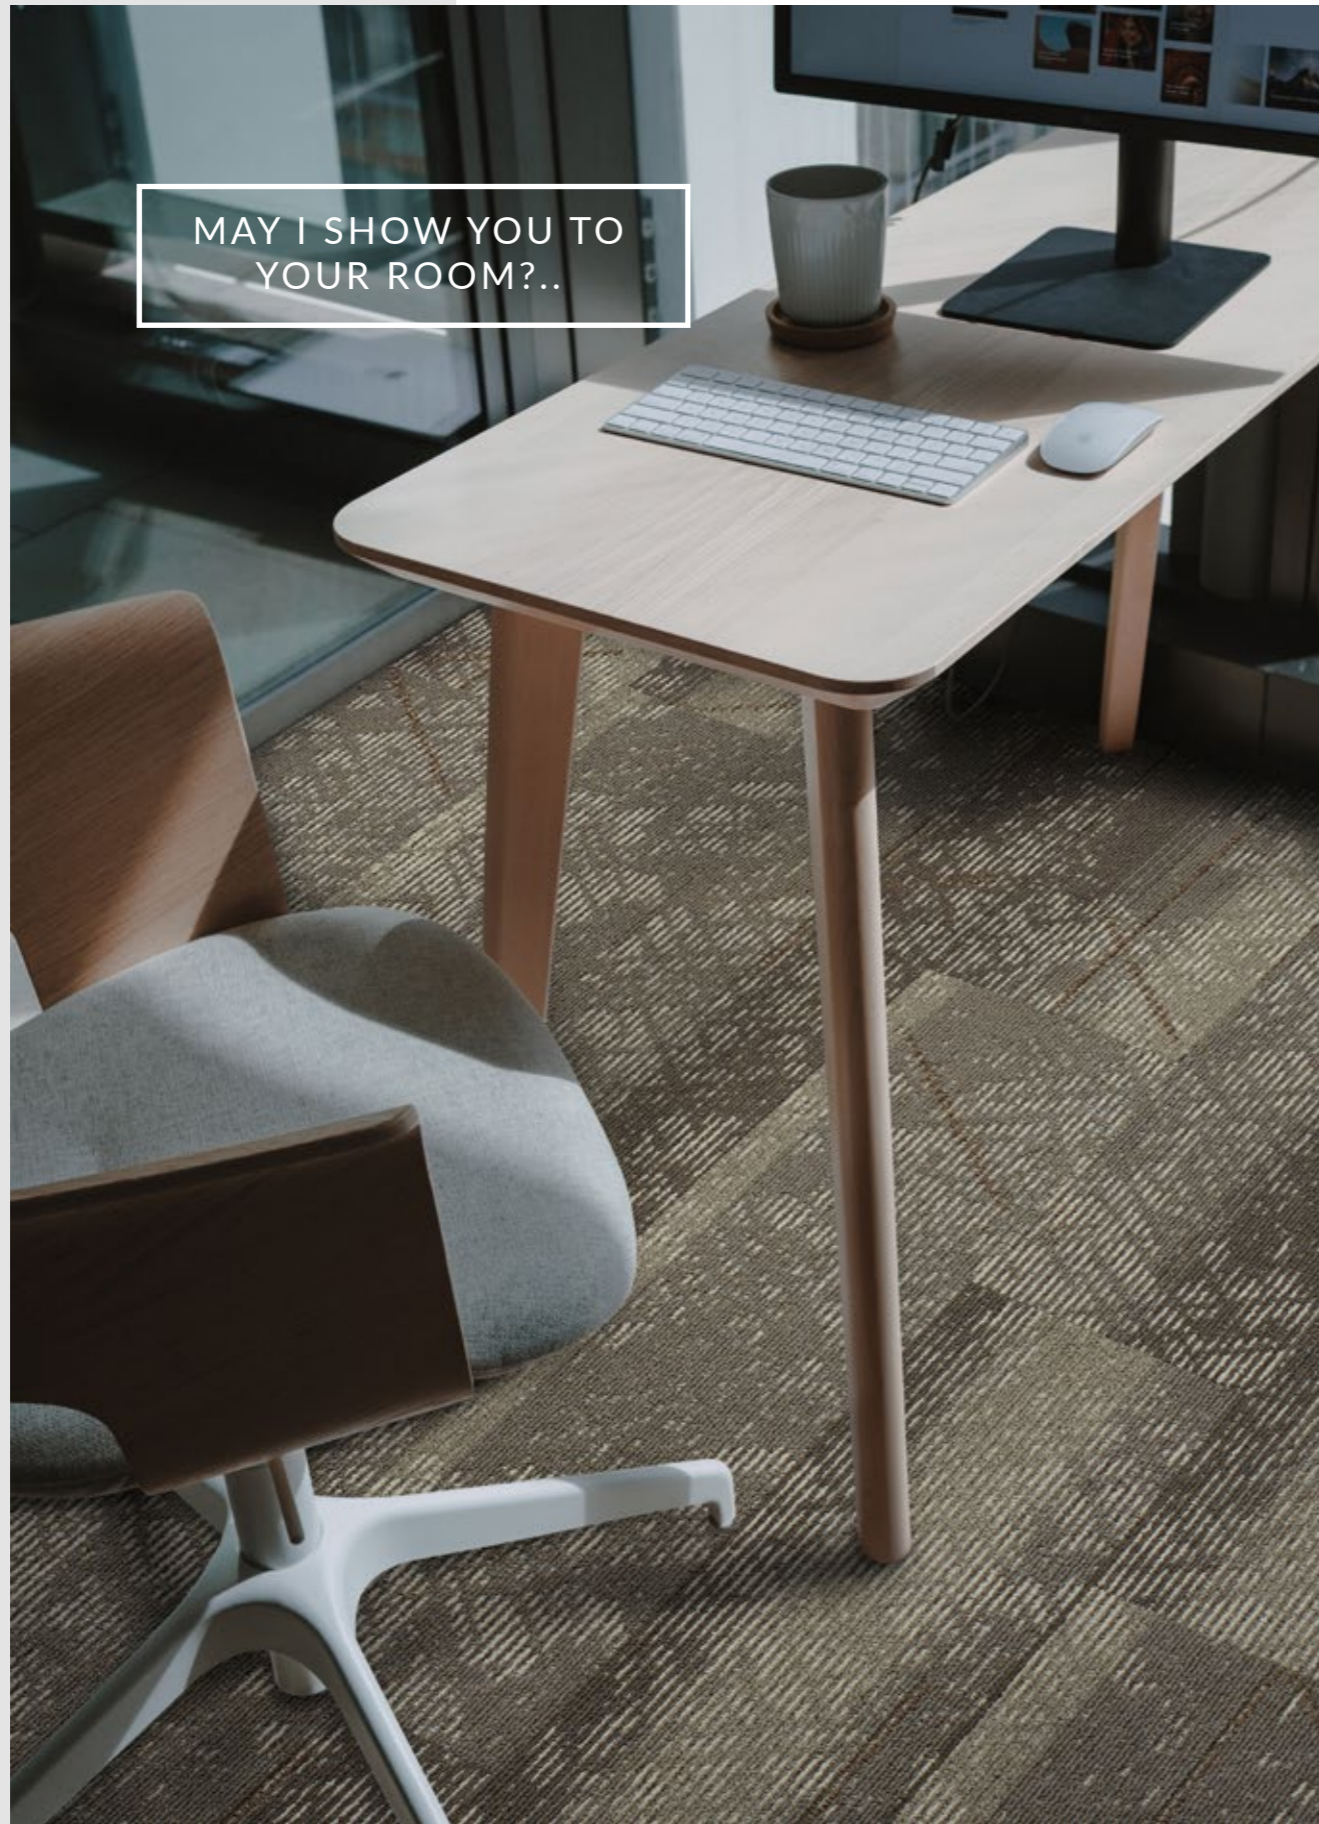

THIS WAY PLEASE...

CREATE PATTERNS TO VISUALLY EXPAND NARROW WALKWAYS

MAY I SHOW YOU TO YOUR ROOM?..

ACCOMMODATION
*"You've arrived.....
enjoy your stay and
please don't hesitate
to call us if you need
anything" ...*

Designed to suit hospitality spaces, Breathe and Headlands collections are very versatile. Soft neutrals are suited to guestroom and relaxation areas. Add character to corridors and passageways using coordinating colorways....or some vibrant colour for meeting rooms and dynamic public spaces.

NICE TO MEET YOU

CONFERENCE

Informed product choices should take a holistic 'life-cycle' view, based on what the product is made from, how it is made, and how it is disposed and recycled to ensure better outcomes for the environment. Designers and specifiers must select flooring products that balance beauty, performance and sustainability to deliver improved wellbeing, not only to occupants within the space, but also to the planet itself.

Use EcoSoft® 1m x 1m modular or 2.00m wide MegaPlank® for larger multi-function spaces.

BAR / LOUNGE

... "please take a seat, what would you like"....

With such a diverse choice of color, structure and pattern, modular carpet provides creative possibility, transforming the mood of interior environments and defining space.

FITNESS / WELLBEING

Carpets Inter, providing healthier flooring solutions.

When choosing a floorcovering for Fitness & Wellbeing locations, it is essential that the architect, interior designer and building contractor consult with the client representative and product manufacturer to ensure that the end product can be 'signed-off' as suitable and 'fit for purpose'.

FEATURED AMENITIES

Moose Hotel Chiang Mai

Product : Headlands and Flatlands collection with EcoSquare®
 Three Color Schemes for identifying Standard and Executive levels
Quantity : 650 sq.m.

GUEST APPRAISAL

TELL US ABOUT YOUR STAY

Best Western Jatujak Hotel

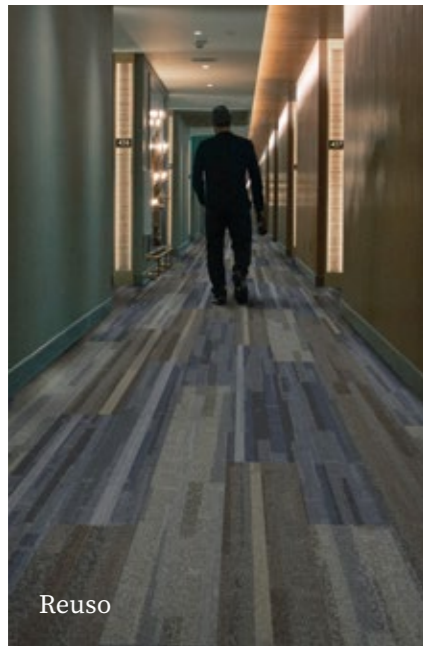

“EcoSoft is an amazing initiative that shows how even we as a Hotel can do our part to protect the enviroment by recycling over 60,000 plastic bottles into a beautiful and high performing carpet.... We were so surprised to see how much we saved in time and cost compared to installing custom made wall to wall carpets....”

ASAI Bangkok Chinatown

“Since replacing our carpet to carpets Inter MegaPlank®, not only are we getting positive comments from our guests, but we are no longer getting any complaints about noise coming from other rooms.... We will certainly use EcoSoft into our other properties in the future....”

SUSTAINABLE PERFORMANCE AND VALUE

EcoSoft® is made from 80% post-consumer material reengineered from millions of discarded drinking water bottles, plus 5 to 10% post-industrial recycled PET.

This environmentally friendly backing not only meets all the stringent performance criteria required for modular carpet, but consistently outperforms conventional PVC and bitumen hard-backed product, as well as urethane cushion back in terms of durability, underfoot comfort, acoustical propensity and indoor air quality.

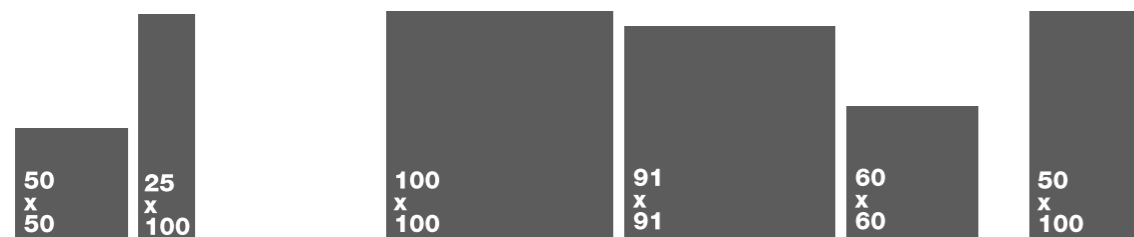

EcoSoft® recycles over 50 x 550ml used PET drink bottles into every sq.m. of product.

EcoSoft® OUTSTANDING FEATURES

- > 85% recycled content backing
- > 100% recyclable
- > No PVC, Bitumen or Fiberglass content
- > Suitable for installation onto wet slab up to 99% RH
- > Superior Acoustical Propensity - outperforms hardback by 150% to 175% per Green Star IEQ10 internal noise level requirements
- > Excellent Dimensional Stability BS EN 986 less than 0.15%
- > Cushioning reduces wear and tear, fiber crush and user fatigue
- > EcoSoft® backed modular carpet product contributes up to 6 LEED points

In view of the superior properties outlined above, modular carpet with EcoSoft® backing is the ideal choice for Hotel interiors.

... SO WHAT SIZE MODULES ARE AVAILABLE?

Standard Size

Square Module 50 x 50 cm.
Thin Plank 25 x 100 cm.

Custom Size

Square Module 100 x 100 cm., 91 x 91 cm., 60 x 60 cm.
Wide Plank 50 x 100 cm.

AL LA CARTE

MegaPlank® can help achieve any creative vision through use of the exclusive patterns, textures and colours. The product has a unique environmentally conscious recycled PET EcoSoft® backing. Flooring becomes another design medium allowing for the creation of truly unique design schemes without compromising performance.

01

Product

- Custom Pattern & Color to enhance any Interior Space.
- Reduces pile fiber crush; minimal wear and tear prolonging appearance retention.
- Cushioning effect reduces leg fatigue.
- Superior sound absorption, outperforms all other floor finishes.
- Thermal Insulator reducing energy cost by up to 20%.
- 15-Year limited wear warranty.

02

Installation

- Supplied as 2.00m-wide < 16-meter long modules cutting the average installation time by half achieving minimal disruption to occupied spaces.
- May be applied onto unburnished floor wet-slab, eliminating expensive floor preparation.
- MegaPlank® is installed onto wet quick-release adhesive, such upon completing the warranted lifespan may be uplifted with minimum affect to the substrate, avoiding prolonged and expensive repairs often necessary after uplifting hard and/or resilient flooring.
- Spare maintenance stock rolls may be stored upright with minimal storage space.

Carpets Inter revolutionary MegaPlank® provides a perfect floor covering solution for hospitality spaces. Available in many designs and colors in 2.00m wide x 16m Long

MegaPlank®
200 x ≤ 1600 cm.

Visit our MegaPlank page to see more details.

FIVE STAR TREATMENT

INDOOR AIR QUALITY

The Green Label Plus symbol informs customers that they are purchasing the lowest emitting carpet, adhesive, and cushion products on the market.

CRI designed the Green Label Plus program for architects, builders, specifiers, and facility managers who want assurance that carpet, adhesive, and cushion products meet the most stringent criteria for low chemical emissions.

ENVIRONMENTAL PRODUCT

EPD (Environmental Product Declaration) is an independently verified and registered document that communicates transparent and comparable information about the life-cycle environmental impact of products.

DECLARE LABEL

Declare is regarded as the toughest materials transparency standard in sustainable construction. The Declare program enables manufacturers to communicate their product ingredients in an effort to promote transparency and accountability.

Our Solution Dye Nylon EcoSoft® PET Felt Cushion modular carpet tile has received the highest award of 'LBC RED LIST FREE' under the International Living Future Institute (ILFI) Declare Label Award program.

Sustainable Minds™

SUSTAINABLE MINDS

Sustainable Minds is dedicated to operationalizing environmental performance in mainstream product development and manufacturing in an understandable, empowering, and credible way. Carpets Inter modular flooring is being listed on Sustainable Minds/WELL register now for application into WELL Certified Buildings.

WELL v.2 BUILDING STANDARD

WELL v2 Building Standard verifies the quality of materials installed within the occupied space to positively impact wellbeing and productivity. The below information demonstrates how Carpets Inter modular flooring contribute to the WELL v2 Building Standard.

CREDIT	CONTRIBUTION
AIR	
 A05 ENHANCED AIR QUALITY Part 2: Enhanced Thresholds for Organic Gases (Max: 1 Pt)	Provision of enhanced air quality indoors positively impacts human health, well-being, and performance and constitutes one of the most important factors of healthy buildings. The following thresholds are met: a. Formaldehyde less than 13.4 ppb. EcoSoft cushion back carpet tile meets the requirement, refer to the tested and compliant with the GLP7543.
LIGHT	
 L02 VISUAL LIGHTING DESIGN Part 1 Light Levels for Visual Acuity	Provide visual comfort and enhance acuity for all users through electric lighting. The light reflection value (LRV) can be given for all products upon request.
MATERIALS	
 X01 FUNDAMENTAL MATERIAL PRECAUTIONS Part 1 Restrict Asbestos	The following newly installed building materials contain asbestos less than 1% by weight: c. Wallboard/millboard, resilient floor covering, roofing and siding shingles (including metal cladding), and construction mastics. EcoSoft cushion back carpet tile is free from Asbestos.
 X10 VOLATILE COMPOUND REDUCTION Part 1 Manage Volatile Organic Compounds (Max: 2 Pt)	The following requirements are met: a. At minimum, 20% by cost of the following newly installed components contain halogenated flame retardants at less than 100 ppm or the extent allowable by local code: 3. Flooring, ceiling, tiles, and wall coverings. EcoSoft cushion back carpet tile does not contain halogenated flame retardants.
 X11 LONG-TERM EMISSION CONTROL Part 2 Manage Flooring and Insulation Emissions (Max: 1pt)	At least 90% (by area) of newly installed flooring and thermal and acoustic insulation (excluding duct and pipe insulation) inside the building meets the following VOC emission thresholds: [95] a. California Department of Public Health (CDPH) Standard Method v.1.1-2010 or any more recent version EcoSoft cushion back carpet tiles are tested and compliant with the Indoor Air Quality program of CRI, GLP 7543

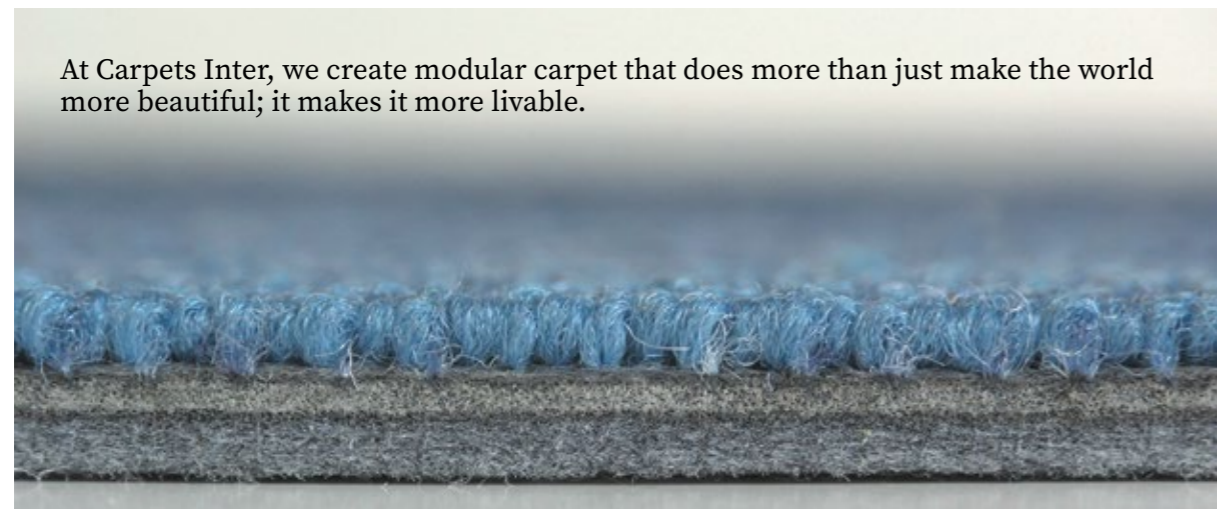

CREDIT	CONTRIBUTION						
MATERIAL							
 X13 ENHANCED MATERIAL PRECAUTION Part 1 Select Optimized Materials (Max: 2 Pt)	Newly installed furnishings, built-in furniture, interior finishes and finish materials comply with some combination of the following programs, earning points based on the table below: <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Percent Compliance by Cost</th> <th style="text-align: left;">Points</th> </tr> </thead> <tbody> <tr> <td>15%</td> <td>1</td> </tr> <tr> <td>25%</td> <td>2</td> </tr> </tbody> </table> a. Declare: Living Building Challenge Red List Free, Declare: Living Building Challenge Compliant or Living Product Challenge label. Carpets Inter provides material transparency through Declare labels Red List Free.	Percent Compliance by Cost	Points	15%	1	25%	2
Percent Compliance by Cost	Points						
15%	1						
25%	2						
 X14 MATERIAL TRANSPARENCY Part 1 Promote Ingredient Disclosure (Max: 2 Pt)	Newly installed interior finishes and finish materials, furnishings (including workstations) and built-in furniture have some combination of the following material descriptions, with ingredients identified and disclosed to 1,000 ppm and earning points based on the table below: a. Declare Label. b. Health Product Declaration. Carpets Inter publishes HPDs on the HPDC repository and provides Declare label for EcoSoft cushion back carpet tile.						
MIND							
 M02 ACCESS TO NATURE Part 1 Provide Access to Nature	Projects integrate and encourage occupant access to nature within the project boundary through the following: a. Indirect connection to nature through use of natural materials, patterns, colors or images. Carpets Inter offers tiles collection that creates patterns and color schemes inspired by nature.						

WHY WE DO WHAT WE DO

The threat to our marine life is at a critical point, due to the massive amounts of plastic being dumped into our living Oceans every day. To date we have recycled over 920 million used PET bottles into the manufacturing our unique 'EcoSoft®' cushion back modular flooring, thus reducing the effects of plastic pollution on our planet...

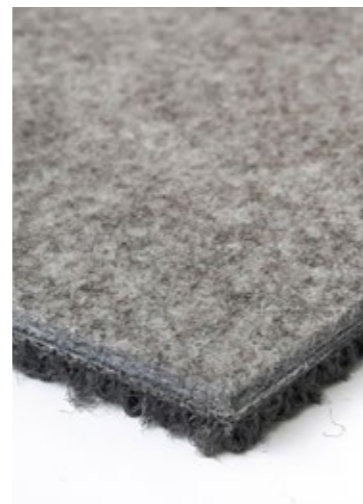

..... it's just good Stewardship!

At Carpets Inter, we create modular carpet that does more than just make the world more beautiful; it makes it more livable.

Our commitment to ecological sustainability extends beyond our product. We practice it in everything we do, from manufacturing facilities that maintain the highest environmental standards, to reducing our carbon footprint in every facet of our global business.

Our modular flooring is recognized by the International Living Future Institute (ILFI) under their DECLARE Label award program as RED LIST FREE, the highest designated level acknowledging there is no harmful material content. This achievement further demonstrates Carpets Inter genuine commitment to material transparency, providing safety and hygiene towards healthy occupied spaces, while aspiring to achieve carbon neutrality at source, as opposed to purchasing Carbon offsets to mitigate pollutive practices, and aligned with Well v.2 Building Standards.

The Paris Climate Change Agreement states that there is no such thing as a Carbon offset project.

Taking responsibility means you should actively participate in an emission reduction or a climate change mitigation project, such as a Carbon Sequestration initiative. At Carpets Inter we invest to PROTECT THE PLANET AT SOURCE, rather than relying on the reactive purchase of Carbon Credits to offset our Carbon footprint.

WHY WE DO WHAT WE DO....

Since 2014, Carpets Inter has been repurposing and donating treated facility wastewater sediment, contributing to produce over 15.50 million Kg (310,000 x 50Kg sacks) of organic fertilizer annually, to fertilize over 5,250 acres of Thailand's agricultural Croplands. For every +1% more organic material per acre present in the soil, the earth will naturally sequester an additional 10 Tons of Carbon draw-down per year from the atmosphere.

..... it's just good Stewardship!
