

CORPORATE PROFILE

Space design is more than visual appeal;
it's a transformative experience.

Elevate Spaces, Empower Living

At Carpets Inter, we draw inspiration from the innovative thinking and warm spirit of Thai culture. Our flooring solutions reach far beyond decoration, they enhance well-being.

Every design is meticulously crafted to capture the unique essence of every space, aligning seamlessly with your distinct vision. Our commitment on well-designed, sustainable solutions ensures your space is not only aesthetically pleasing, but also built for lasting impact on daily life.”

Imagination is the only limit.

Keeping it together.

We commit through every step of production that will have less effect to the world and ensure that every material come from eco-friendly process.

All aspects of creation happen under one roof.

ONE STOP

Flooring Supplier

Fiber & Yarn Production

At Carpets Inter we begin with the best materials, including natural wool fibers from New Zealand and the UK. We also use both in-house and imported man-made fibers and yarns such as advanced generation Nylon and Polypropylene.

Design Concept & Service

Carpets Inter design studio service is available to help you develop your custom carpet and color concepts, or to help you modify an existing design from our substantial design and color archives. Using the latest 3D technology and our extensive sampling facilities, our professional staff are here to help you turn your project vision into reality.

Sample Service

Sample services for Woven and Machine Tufted carpets are fast and efficient thanks to our computer controlled Kibby and M-tuft sample machines, which produce samples that closely imitate the finished texture, design and color of your potential carpet. For Hand Tufted projects, quality samples are produced showing a section of the actual design with the correct color yarn type and quality.

Floor Planning and Estimation

Our experienced site supervisors & estimators can save you the cost of hiring a specialist to plan your project installation. They can provide you with 3D design visualizations and detailed installation schematics for minimal installation wastage.

Twisting and Heat Setting

Yarn twist and heat setting are extremely important, especially for cut pile carpets. The yarn is first twisted and then heat set to lock in the twist. This combination gives the carpet resiliency, improving appearance retention on the floor.

Dyeing

Our dyeing facilities include computerized color-matching systems. In our continuing effort to minimize our environmental footprint, we have increased our Dyehouse water recycling capacity by over 30% in the past one year.

Weaving, Tufting, and Non-woven Needle Punched Product

We are the largest Axminster carpet weaver in South East Asia with over 60 looms. We also produce Hand Tufted, Machine Tufted, Carpet Tiles, and Needle Punched Carpets.

Finishing & Inspection

Our ISO certified Quality Control Inspection will ensure that the surface texture, appearance, pattern alignment and quality of the finished carpets meet the highest industry standard.

Warehousing, Distribution & Installation

Our expansive storage facility enables us to maintain inventory for 'just in time' dispatch. The in-house logistics team will organize local and export consignments all over the world. Our experienced project managers and Installation specialists are on hand to ensure a complete installed floor covering solution.

OUR COMPREHENSIVE PRODUCT RANGES

Whether it's the luxury of a hand tufted carpet, or the flexibility of carpet tiles, our expansive range of design choices will meet any project needs. Our computerized jacquard looms allow for unlimited scale of design, and our sampling service can provide you with a reproduction of the design and color of any custom carpet.

Hand Tufted

Hand Tufted carpets are unmatched for luxurious quality and unlimited scale, color and design possibilities. Our craftspeople combine different fibers and yarns in a variety of surface treatments to bring any design concept to life. Hand Tufted carpets and rugs are suitable for a wide range of applications in the Residential, Commercial and Hospitality sectors.

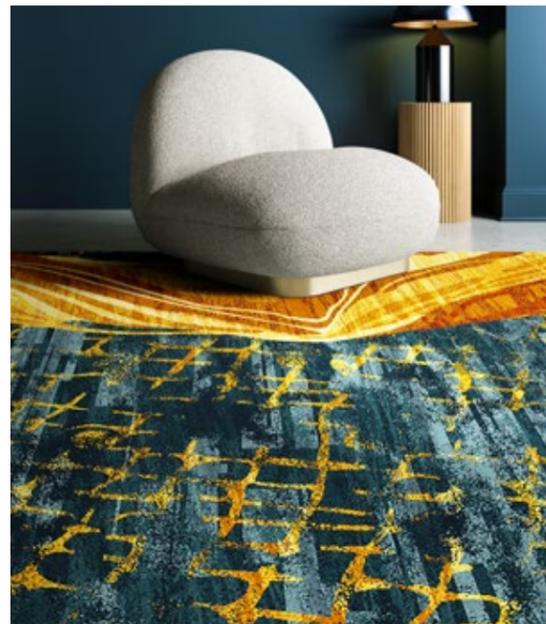

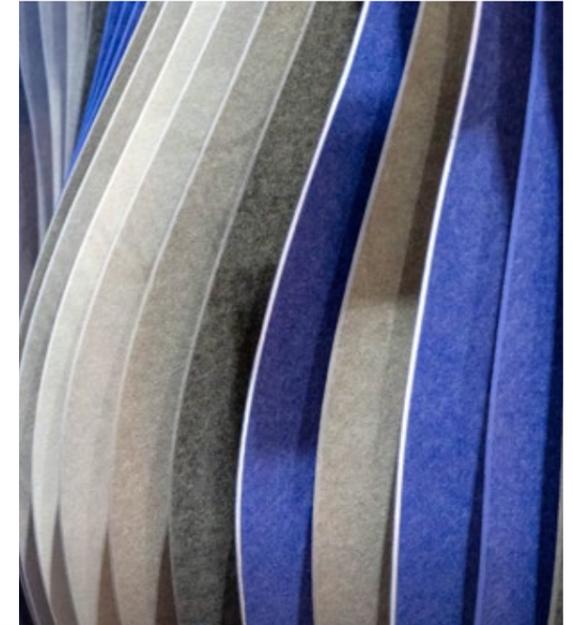

The techniques we utilise cover the entire spectrum of carpet manufacturing, from premium to economical, including hand tufting, and large volume rug production.

RT acoustic

RT acoustic improves and enhances the user's time, space, and quality of life, with effective acoustic solutions that are high-performance, design-savvy, and sustainable.

RT acoustic is an innovator and designer of progressive acoustic solutions. Crafting smarter, sophisticated, and high-performance sound-management products from sustainable materials, RT acoustic brings a new profound level of peace and wellness to users, and ultimately, enhances their quality of life.

Woven Axminster

If public spaces demand long lasting carpet, the resilience of our woven Axminster is an ideal choice. Axminster is made up of a fibre blend of 80% wool and 20% nylon, or is available as 100% solution dyed nylon. Multiple loom widths ensure minimal on-site joints and reduced wastages. We also offer the option of modular Axminster in many sizes for uplift and replacement.

Carpet Tile

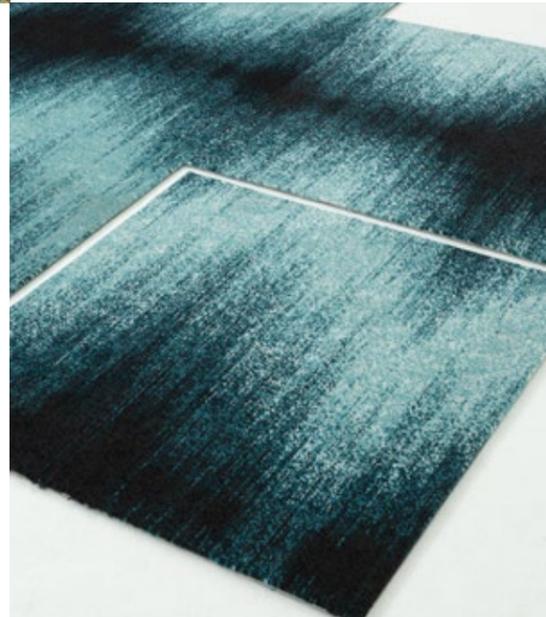

We also have access to offering products from our sister company CARPETS INTER, a source for International markets - Carpet with EcoSoft® Backing.

The EcoSoft® Backings are made from post-consumer material. It outperforms conventional PVC backings for cushion, performance durability, walking comfort, acoustical propensity, and indoor air quality. Cushion backed carpet tile requires less floor preparation and is quick and cost effective to install, creating less disruption to operations from furniture removal or prolonged closure.

Axminster Tile

Royal Thai unsurpassed manufacturing diversity continues to evolve unique floor covering solutions for all commercial sectors, engineered to provide facility management with the best return on investment. Our unique modular axminster carpet expands the unlimited design options and durability of woven Axminster carpet into the realm of custom engineered large scale Axminster tiles. Showcasing beauty as well as dimensional stability in either 80% wool / 20% nylon pile fiber or 100% nylon pile fiber.

Available in a unique environmentally conscious recycled PET Premise™ backing. Cushion backed carpet tile requires less floor preparation and is quick and cost effective to install, eliminating expensive floor preparation of hard substrates prior to initial installation.

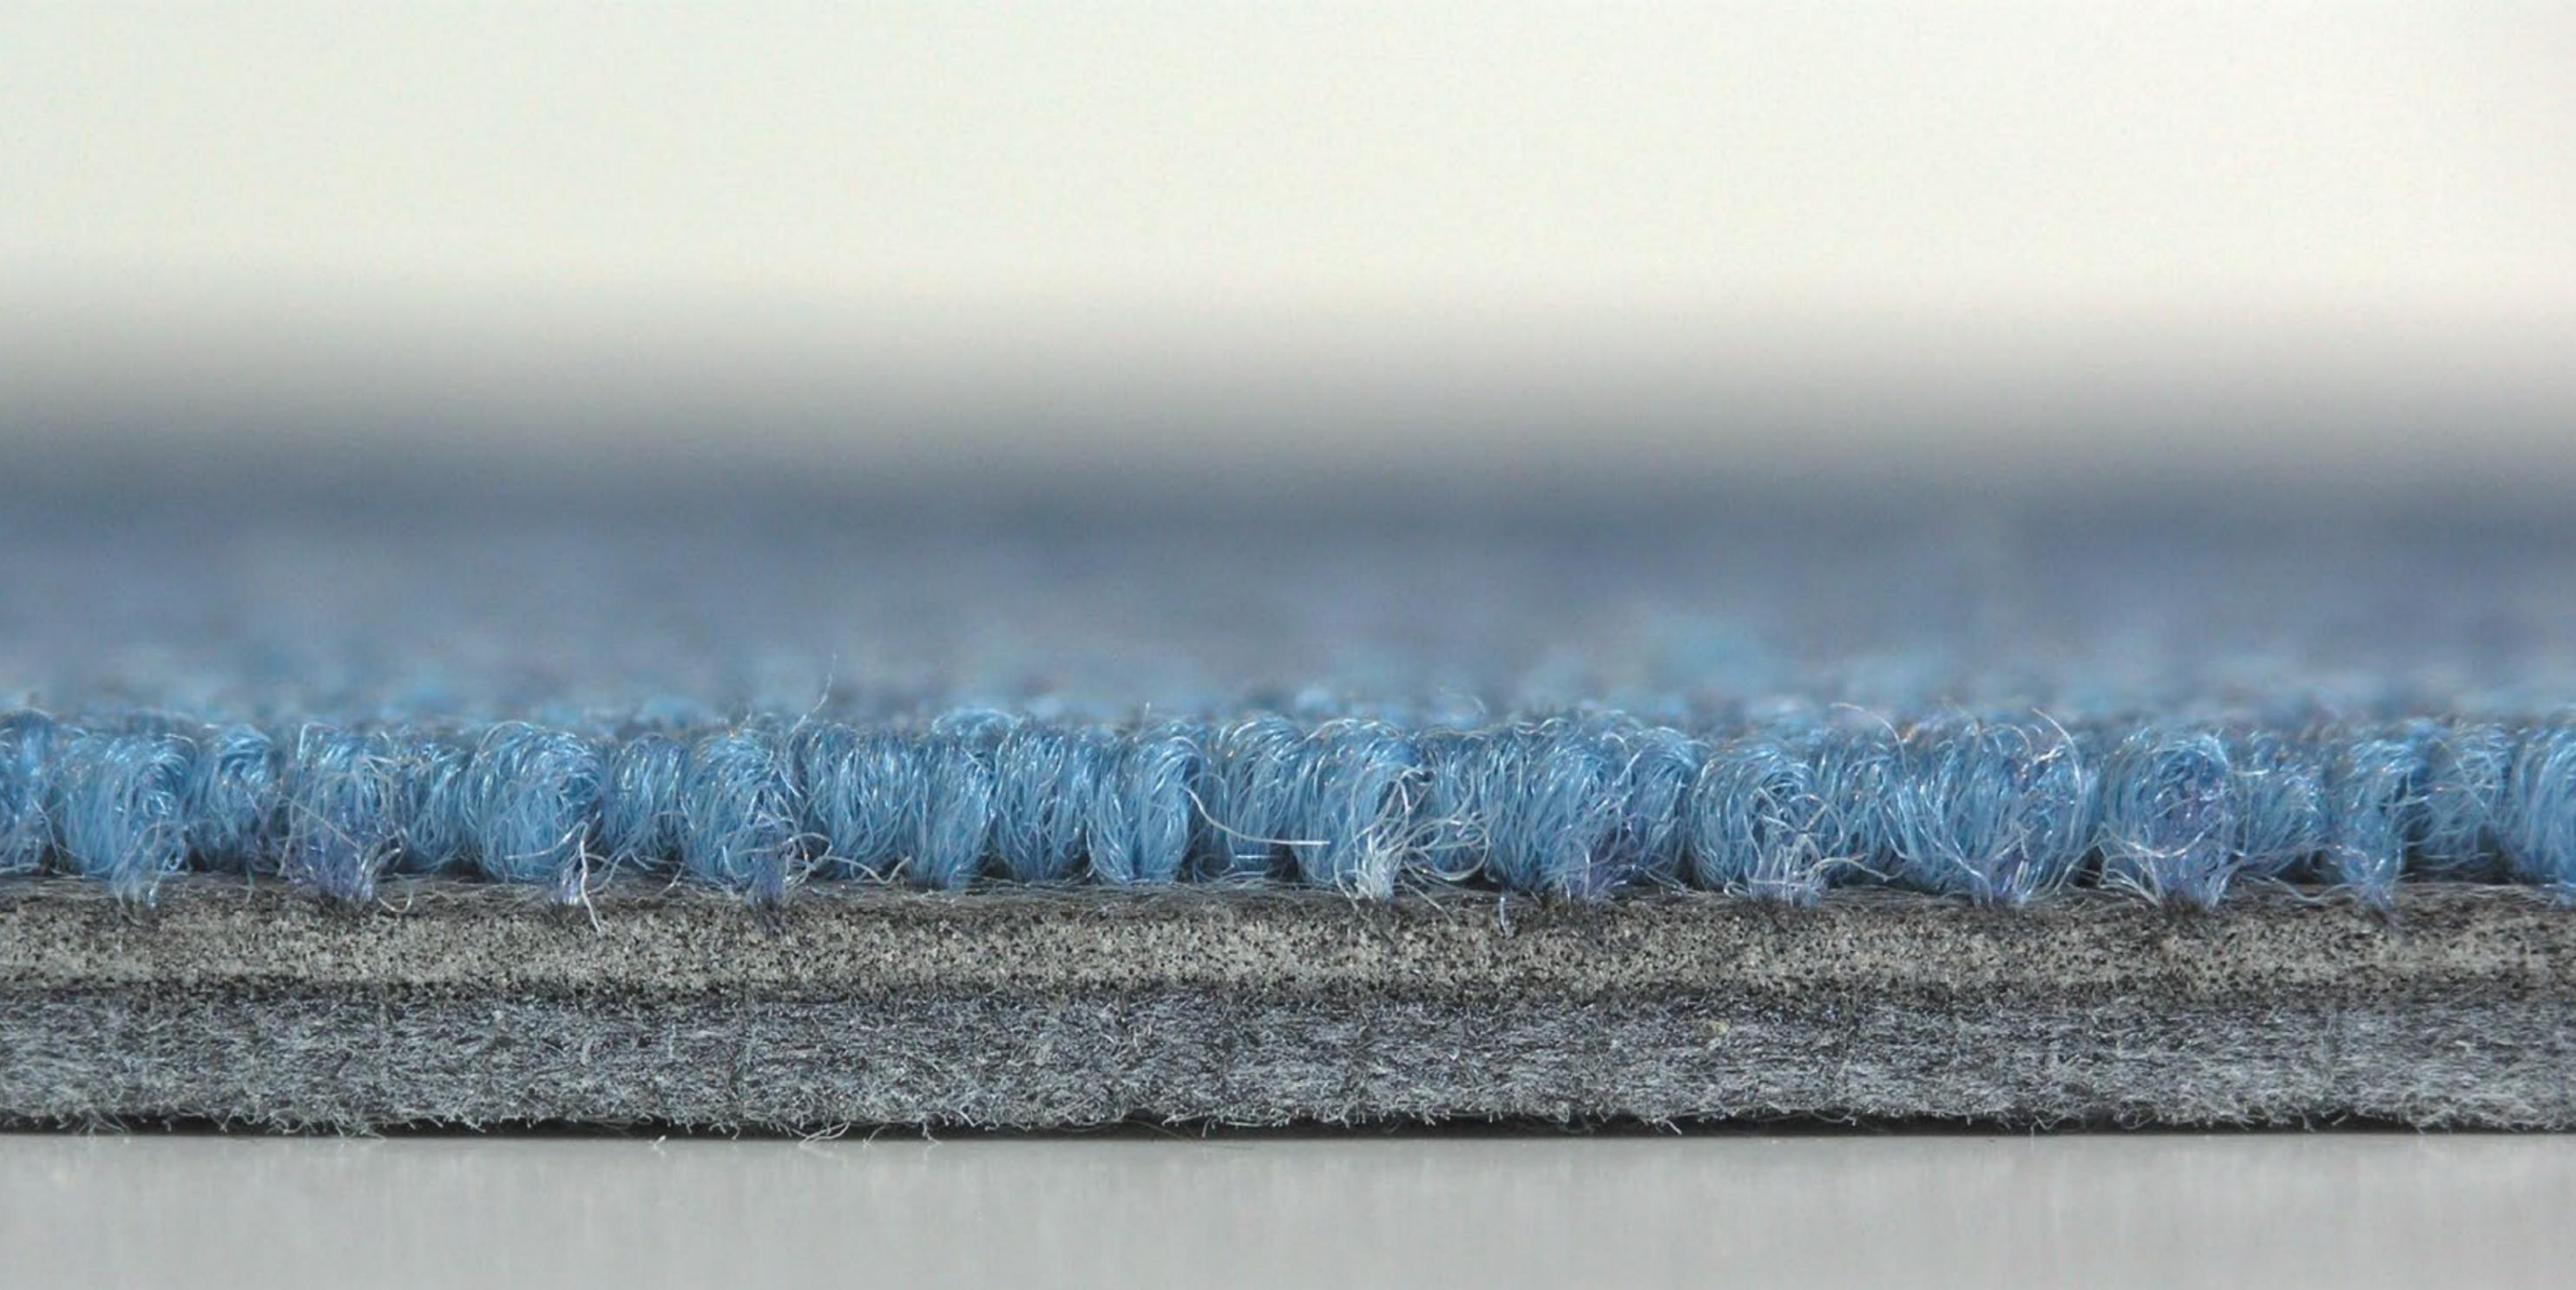

Resilient Flooring

A classic timeless selection of natural wood styles offered in resilient SPC (Stone Polymer Composite) modular plank tile.

Our SPC tiles have the newest generation of floor covering features: Enhanced stability, high performance, 100% water-proof, high-density solid core, and indentation resistance.

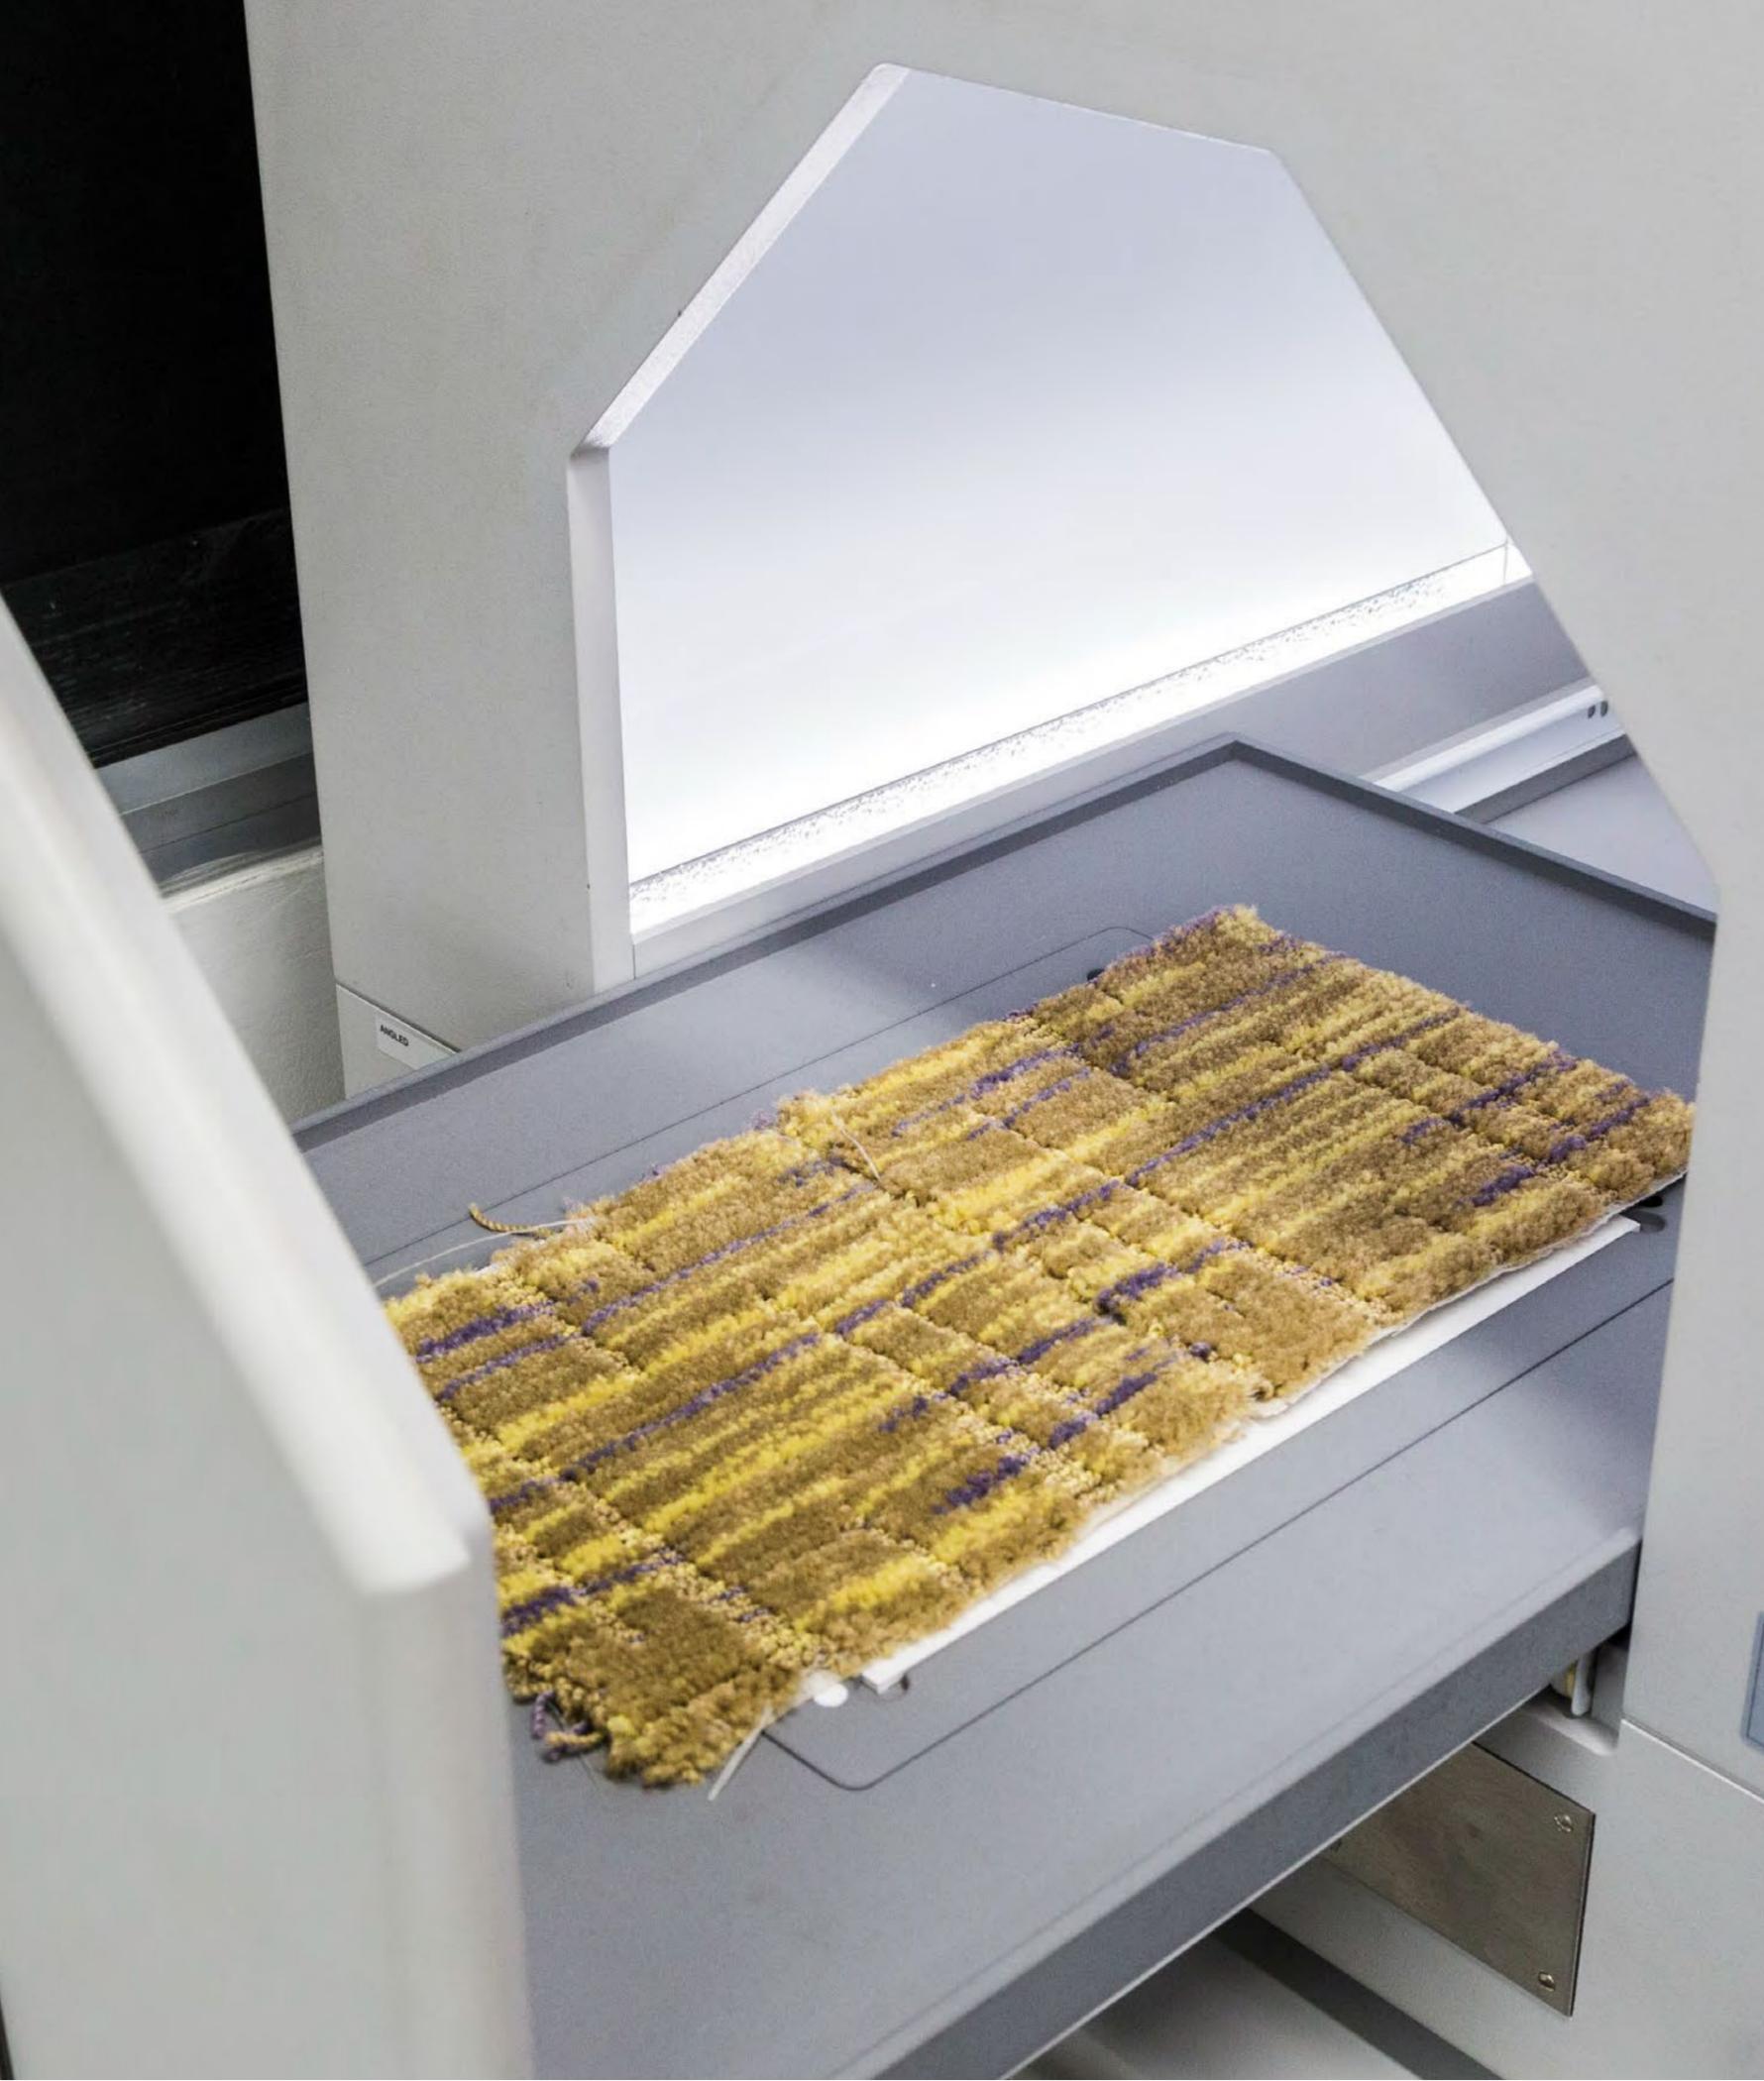

We believe in conducting business with a conscience.

At Carpets Inter, we create modular carpet that does more than just make the world more beautiful; it makes it more livable. We do this with products that meet stringent indoor air-quality needs, are safe to manufacture and utilize and incorporate recycled materials wherever feasible including our unique EcoSoft® backing fabricated from millions of recycled plastic bottles.

Our commitment to ecological sustainability extends beyond our product. We practice it in everything we do – from manufacturing facilities that maintain the highest environmental standards, to reducing our carbon footprint in every facet of our global business.

Excellence is its own reward.

At Carpets Inter, our business is guided by a vision that values our products' long-term economic benefit to customers. The manifestation of this vision lives in a product that is built to look good for its required lifespan. And it is driven by an underlying conviction that beautiful design, superior manufacturing, and easier installation promote healthier workspaces, increased productivity, and reduced ancillary costs. We apply this same long-range worldview to our own multinational operations, operating from core values that invest in continued growth, fiscal responsibility and economic fairness in every facet of our business.

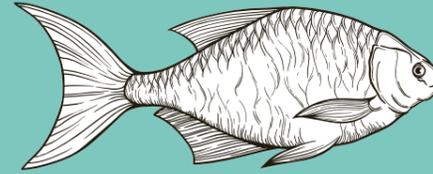

8 MILLION
METRIC TONS OF
PLASTIC
ENTERS THE OCEAN
FROM THE LAND
EACH YEAR

EcoSoft® marks a new era in the development of high-performance and environmentally friendly carpet tile cushion backing.

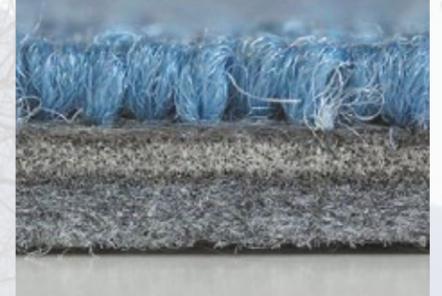

Natural spring water may be good for your health, but the bottles themselves threaten our environment by swallowing landfill space and increasing air-pollution from incineration. Uncontrollable volumes of plastic waste continue to flow into our oceans every second! EcoSoft®, our established high performance carpet cushion backing, is made from 80% post-consumer material reengineered from discarded drinking water bottles plus 5% post-industrial recycled PET. So you can breathe and walk with ease.

If things continue as is... by 2050
there will be more
PLASTIC
than

in the
OCEAN

We're thrilled to announce that our
**"1 BILLION
RECYCLED
WATER BOTTLES"**
campaign has reached its goal!

This is a major milestone in our journey towards a more sustainable future, and we couldn't have done it without you.

At Carpets Inter, we create modular carpet that does more than just make the world more beautiful; it makes it more livable. We do this with products that meet stringent indoor air-quality needs, are safe to manufacture and utilize and incorporate recycled materials wherever feasible including our unique EcoSoft® backing fabricated from millions of recycled plastic bottles. Our commitment to ecological sustainability extends beyond our product. We practice it in everything we do – from manufacturing facilities that maintain the highest environmental standards, to reducing our carbon footprint in every facet of our global business.

Sustainability
Awards

Winner

Waste Elimination
Carpets Inter EcoSoft® carpet tiles

Over 150 projects, people and products were nominated for Australia's 'Sustainability Awards' organized by Architecture & Design and In Design Media Asia Pacific Magazine. All nominees exhibited a high caliber of design that choosing the finalists was an arduous task even for the highly experienced jury. After careful and deliberate consideration, Carpets Inter's EcoSoft back modular Carpet tile manufactured from recycled Plastic Bottles was selected as the unanimous winner of the 'Waste Elimination' category. The award recognizes Carpet Inter continued efforts to provide leading Architects and Interior Design practices with fit for purpose sustainable product solutions, suitable for WELL Buildings in many appealing styles.

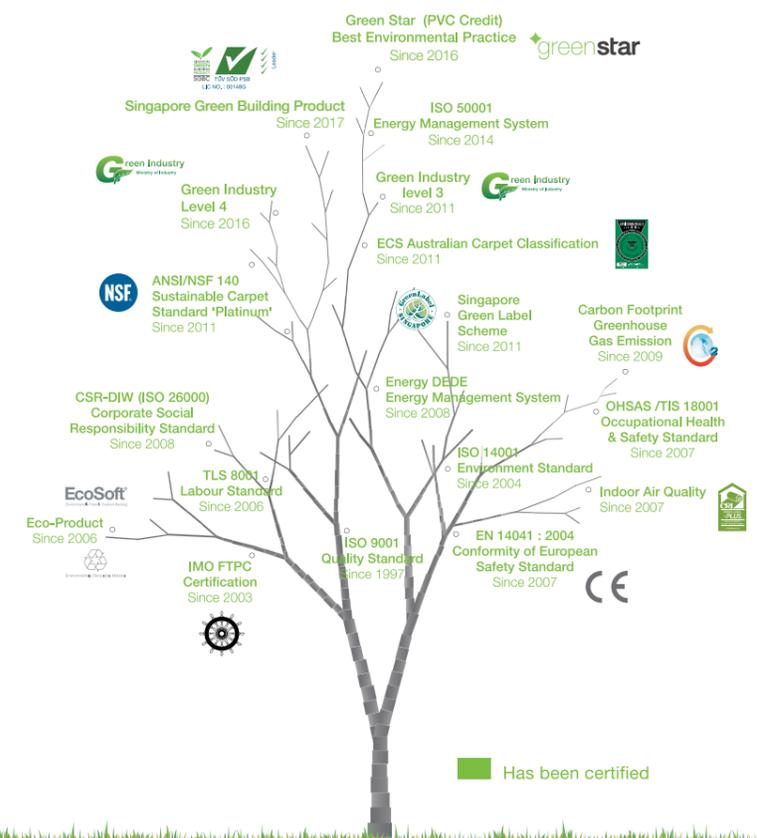

Declare.

We will strive for even greater heights every year.

At Carpets Inter, we manufacture high quality floor coverings to enhance people's lives. This commitment goes beyond providing a product that is safe, comfortable, and well designed. It extends to fostering humane, safe, and ethical workplace conditions in every facet of our multinational business, while promoting those same values – and a greater commitment to social awareness – wherever our brand is present. We base this promise on the underlying principle that the truest value of a company should be judged not only by its product or its profit, but ultimately, by its social benefit to people.

NET ZERO IN 2050

At Carpets Inter, our mission is to achieve net-zero emissions by 2050. We recognize the urgent need to address climate change and take responsibility for our environmental impact. With a clear vision for a sustainable future, we are committed to implementing innovative strategies and technologies to reduce our carbon footprint.

By aligning our operations with the principles of sustainability and embracing a circular economy approach, we are determined to make a significant contribution towards a cleaner, greener, and more sustainable planet.
