

Tailored acoustic solutions

# Make your mark with Sonify

Sonify is a customisable acoustic ceiling and wall system, offering fast installation and 3D design support with outstanding performance.

sonify   
by // zentia

### Acoustic control where it matters

Sonify reduces reverberation and improves speech clarity, creating quieter, more comfortable spaces.

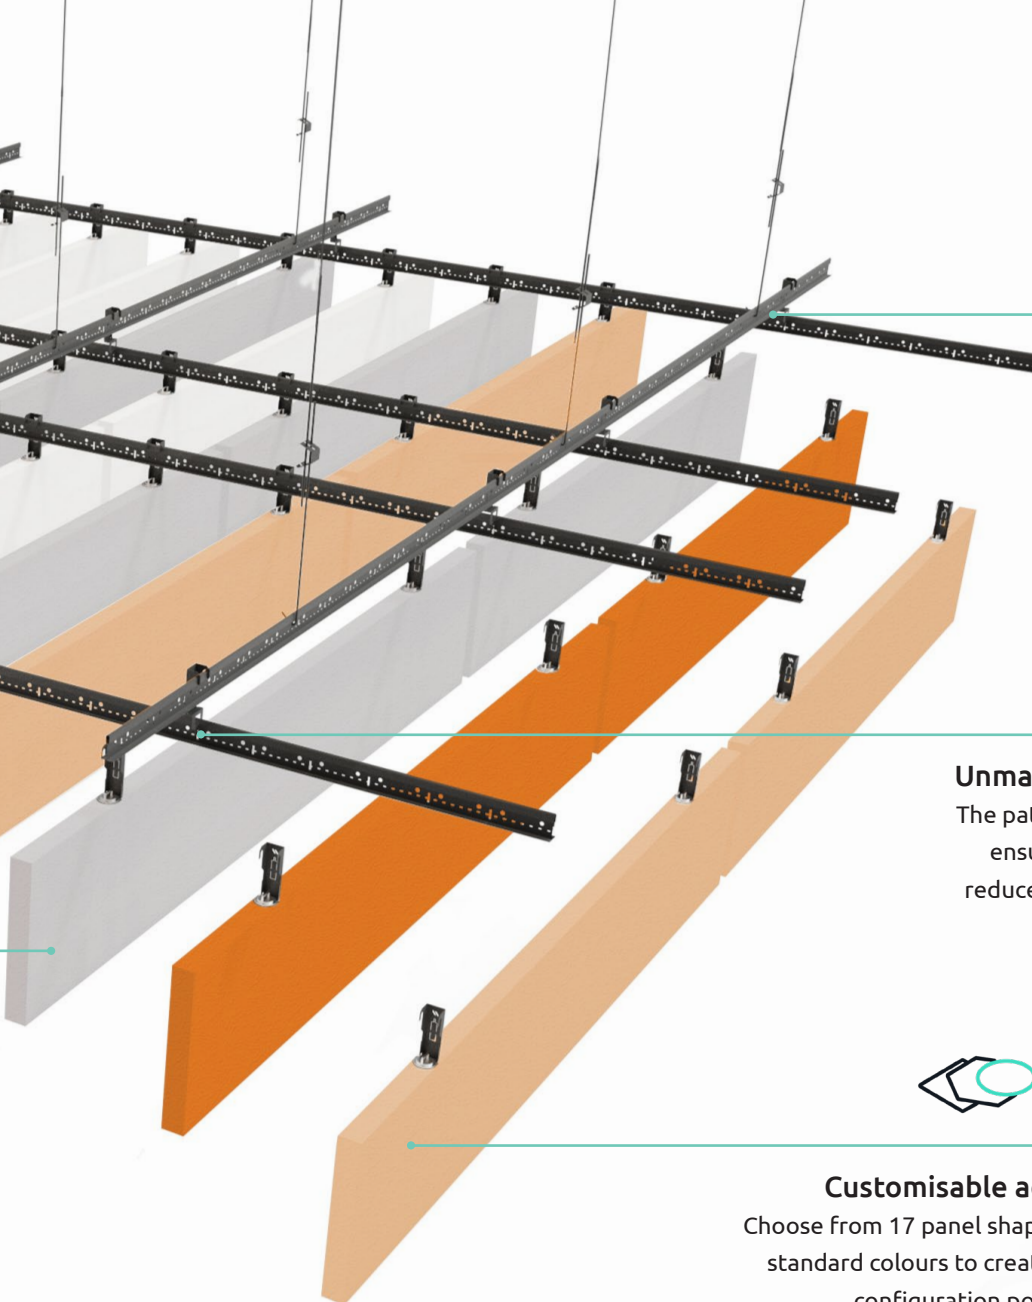

### Comprehensive design services

Our Sonify 3D Studio service follows a 5-step design process, including links to Zentia's network of trained Pinnacle Installation Partners.

Sonify by Zentia

# Our customisable acoustic ceiling and wall system

Design without limits. Sonify by Zentia is your canvas for acoustic creativity. Recognised with the **iF Design Award 2025**, Sonify is fast to install and fully customisable for ceilings and walls. With matching canopies, baffles and wall absorbers, plus support from our Sonify 3D Studio, you can bring bold, original concepts to life with ease.

### 30-year warranty

Sonify comes with a 30-year warranty for lasting performance and peace of mind.

### Unmatched stability & precision

The patented Sonify Create grid system ensures precise panel alignment and reduces installation time by up to 50%.

### Customisable aesthetic

Choose from 17 panel shapes and 35 standard colours to create endless configuration possibilities.

**Contractor: Edinburgh University**  
**Edinburgh University**

A bold blend of orange (OR1) and grey (GY2, GY3) Sonify canopies and baffles revitalised Level Three changing facilities, delivering vibrant acoustics and zonal clarity.

**Architect: Bond Bryan Ltd**  
**Bradford College**

In the transformed five-storey Garden Mills building, Sonify canopies and baffles delivered contemporary acoustic control supporting the college's functional and aesthetic goals.

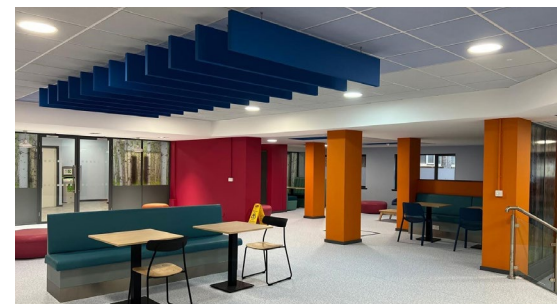

**Architect:** HMY Architecture  
**Canterbury Christ Church University, Kent**

The refurbished Student Union features grey (GY2) rectangular Sonify panels in a black grid for improved acoustic quality in the vibrant new campus hub.

**Architect:** Farrell and Clark Architects  
**Grimsby Institute**

Farrell & Clark Architects mixed green, pink, red, and blue baffles to refresh interiors with striking acoustics, all installed efficiently on the existing grid for cost-effective impact.

With Sonify, spaces look and sound better.

# Acoustic comfort by design

Acoustic comfort isn't just about meeting a specification, it's about creating environments where people can focus, communicate, and feel at ease.

Whether it's teachers being heard clearly, patients resting without disturbance, or office teams working free from distraction, the right acoustic design transforms the way a space is experienced.

With **Zentia's range of acoustic ceiling and wall solutions**, you can shape three essential qualities in every room:

**Clarity**  
"I want to be understood"

**Concentration**  
"I would like to focus"

**Confidentiality**  
"I would like some privacy"

## Tailored acoustic service

Our acoustic specialists work with you from the outset, designing solutions that go beyond simple "Class A" ratings. We consider the real-world conditions of your project, from ceiling void depth to material interaction, and tailor the system to its purpose, aesthetics, and performance needs. The result is intentional acoustic comfort: spaces that look exceptional, sound right, and perform reliably for years to come.

## Sonify Create grid system

# Unmatched stability & precision

The patented, award-winning Sonify Create grid system saves time while enabling the precise installation of highly aesthetic and functional acoustic ceiling and wall panels.

### Minimal effort

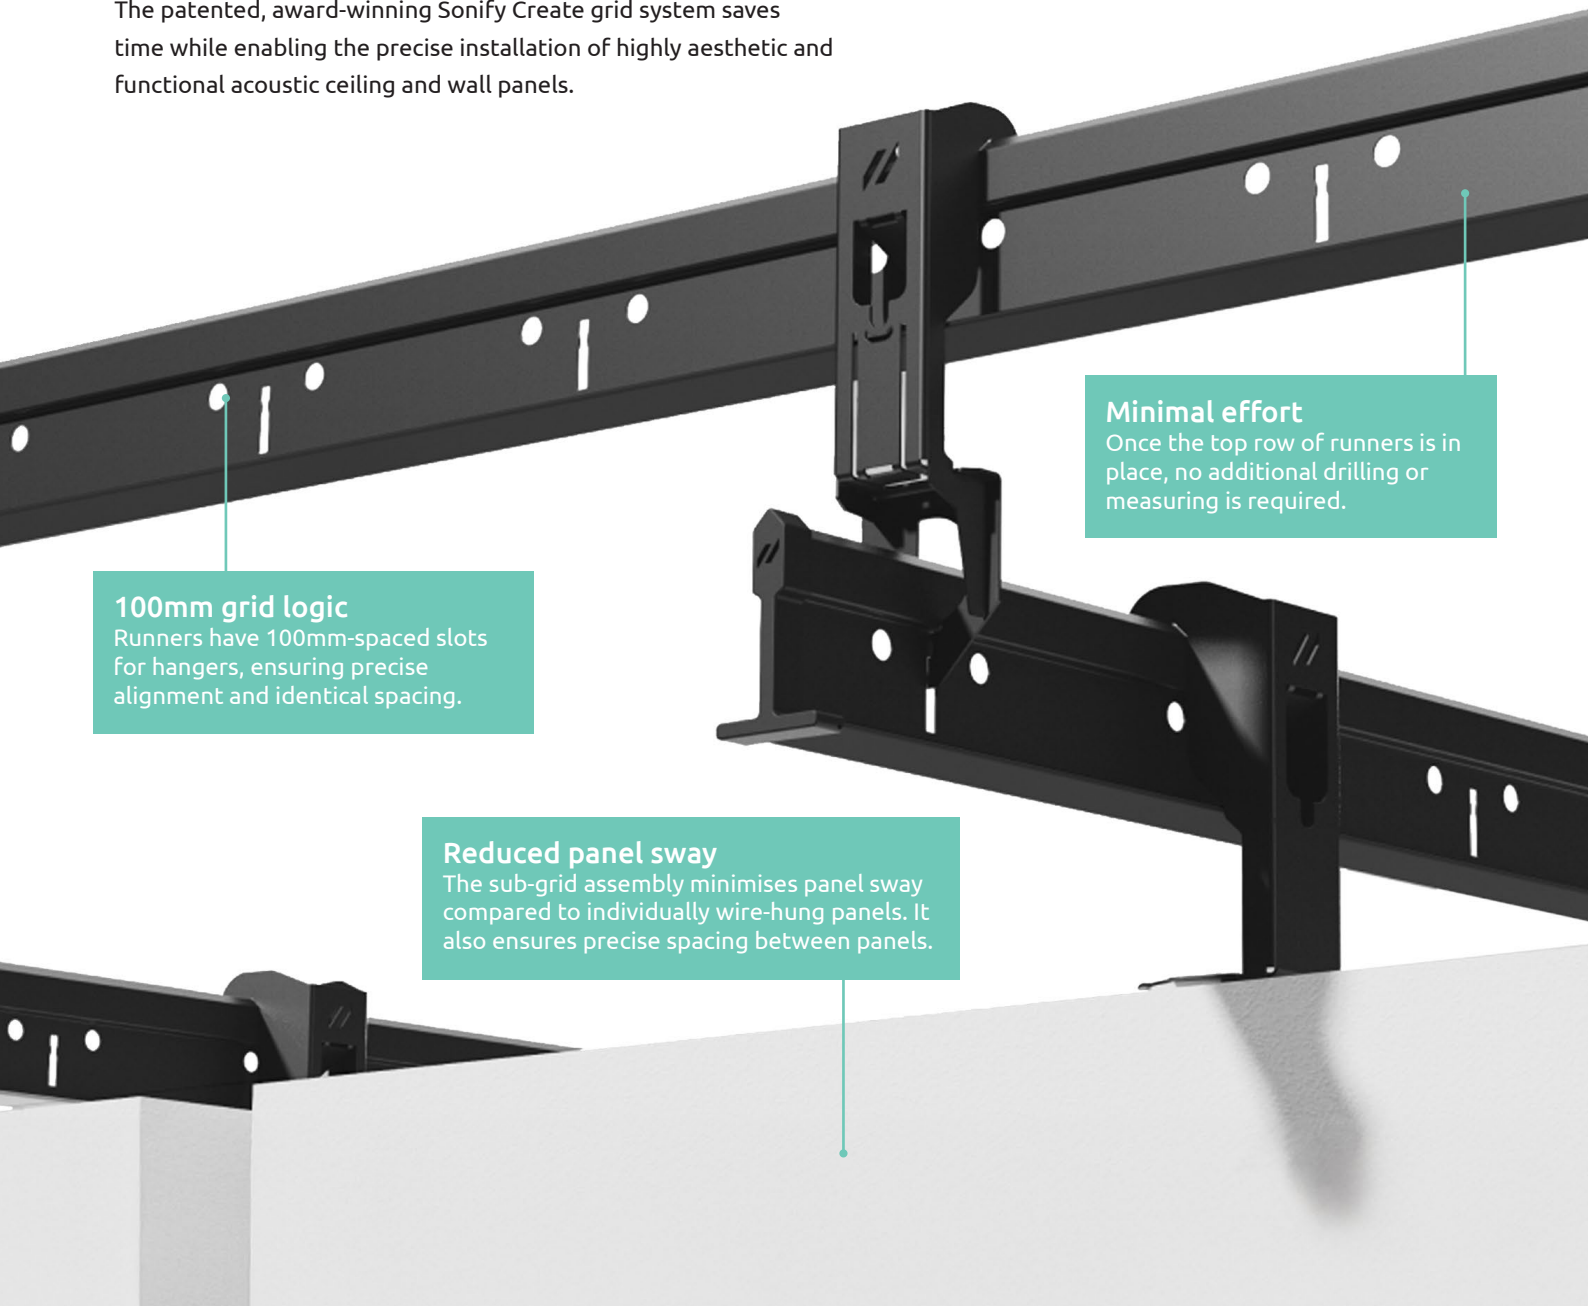

Once the top row of runners is in place, no additional drilling or measuring is required.

### 100mm grid logic

Runners have 100mm-spaced slots for hangers, ensuring precise alignment and identical spacing.

### Reduced panel sway

The sub-grid assembly minimises panel sway compared to individually wire-hung panels. It also ensures precise spacing between panels.

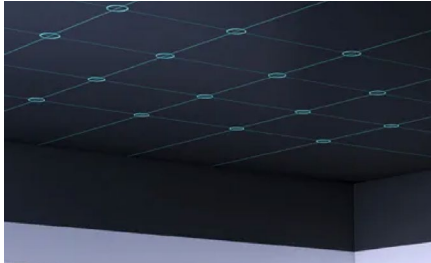

Installs up to 50% faster than other systems

# Install Sonify in 8 simple steps

Sonify is up to 50% quicker to install when used with our patented grid system, Sonify Create.

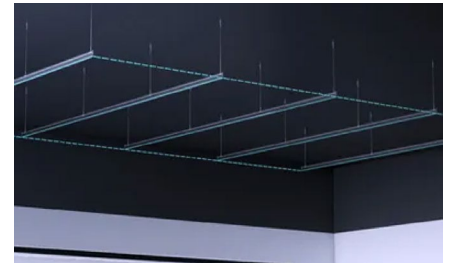

This method of installation promotes speed, accuracy and stability by reducing the impact of panel sway.

**01** Drill holes and mount wire hangers to the soffit.

**02** Cut the runners to length and mount the runner end caps.

**03** Install top row of runners using wire hangers.

**04** Mount the connector hangers onto the top row of runners.

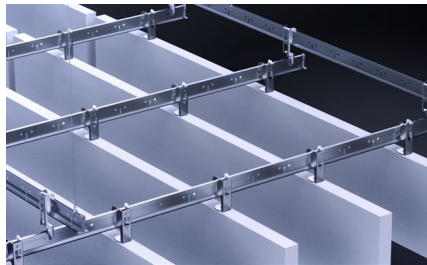

**05** Bend the tab upwards to secure against vertical movement.

**06** Hook the crossing row of runners onto the connector hangers.

**07** Mount the runner-to-panel anchor hangers to the baffles.

**08** Hang the baffles onto the lower row of runners.

## Our service process

# Sonify 3D Studio: Unrivalled support and expert advice, when you need it

We know acoustics, we know ceilings, we know you are busy, we are here when you need us. Our UK-wide team of Architectural and Design (A&D) Consultants provide expert support at every stage of your project. With our own qualified acoustician and CAD technicians, we can provide you with seamless design-to-installation support.

## 01

**Tell us about your project**

From a simple sketch to detailed drawings, simply get in touch to begin discussing your project.

## 02

**Send us your project drawings**

We'll discuss your current project plans and we'll help you understand how Zentia solutions can integrate into your project.

## 03

**Zentia provides drawings**

Our team will create a series of CAD-generated layouts in PDF and CAD format that show Zentia solutions in your designs.

## 04

**Specification support**

Once the design is approved, we'll supply detailed specs including NBS K40s, plus Revit and CAD models to outline in detail the products used.

// At Zentia, we support our clients from concept to installation, making sure every ceiling solution performs acoustically and fits the design vision. //

Michael Anderson  
Head of Specification Sales

## 05 Installation support

Our network of Zentia trained Pinnacle installers ensures quality installation, with expert on-site support available when needed.
