

STACBOND

Coil coating and processing

stacbond.com

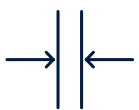

Coil coating line of up to 2 m wide

30,000 t/year of coated aluminium coils

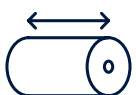

Transversal and longitudinal cutting

Thickness from 0.2 to 2 mm

Available coatings: PVDF, FEVE, HDPE, PE, etc.

Coating of coils of up to 2050 mm wide

Aluminium alloys series 5XXX, 3XXX and 1XXX

More than just colours, it is creating the perfect finish for your project

We have **our own colour laboratory with the best specialists** to achieve the exact colour you need or to create a custom finish for your project. We offer the most complex and eye-catching finishes on the market.

Custom embossing, printing and cutting

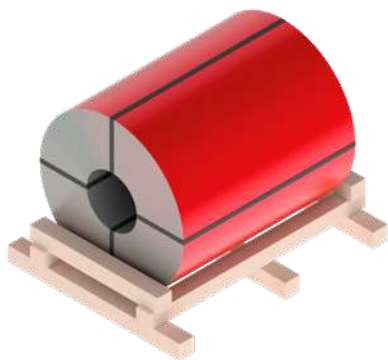

To reach high levels of customisation and creativity, we can process the coils on our embossing line and then cut them to size on our slitter line.

Environmental commitment

STACBOND is ISO 14001 certified, thanks to the Environmental Management System (EMS) implemented at our facilities, which complies with the requirements of this standard.

STACBOND has implemented a waste collection and recycling system to reduce its environmental footprint.

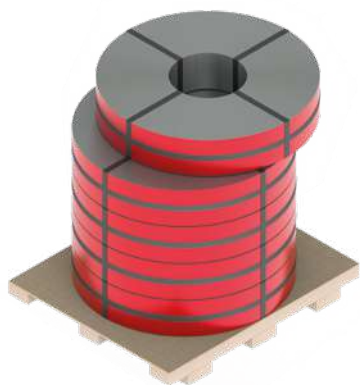

Product range

COILS

THICKNESS	0.2 - 2
WIDTH	800 - 2050

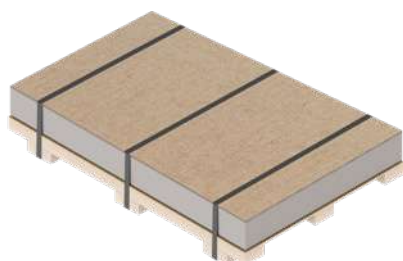

Aluminium coils coated on one or both sides.
Possibility of embossing.
Available with protective film.
Consult the different alloys and tempers available.

STRIPS

THICKNESS	0.2 - 2
WIDTH	60 - 800

Aluminium strips coated on one or both sides.
Available with protective film.
Consult the different alloys and tempers available.

PLATES

THICKNESS	0.2 - 2
WIDTH	800 - 2000
LENGTH (mm)	1000 - 4000

Aluminium plates coated on one or both sides.
Possibility of embossing.
Available with protective film.
Consult the different alloys and tempers available.

Any RAL, PANTONE or NCS colour

Double-sided, triple-layer coating

Most complete pre-treatment on the market

Comprehensive coil solutions

At STACBOND, our aim is to help our customers to succeed. With this goal in mind, we develop innovative products and processes that set the standard for quality and eco-efficiency.

Our range of coil-coated aluminium sheets is comprised of coils, strips and plates that can reach up to 2.05 m wide, allowing us to offer a wider range of possibilities in numerous industrial and building applications.

For the manufacture of our products, STACBOND has extensive manufacturing and development facilities equipped with the latest technology to ensure quality control and achieve an optimal final product.
