

MESH collection

A photograph of a garden at dusk. In the foreground, a modern outdoor lamp stands on a thin, dark pole. The lamp's shade is a wide, shallow cone made of a dark material with a grid of small, circular perforations, which are illuminated from within, creating a warm, glowing effect. The background is filled with purple flowers, possibly lavender, and a second, similar lamp is visible in the distance, slightly out of focus. The overall atmosphere is serene and elegant.

Mesh is a contemporary revisiting of the classic model of a bedside lamp, where the lampshade is made in turned aluminium, painted and resistant to corrosion. Mesh thus becomes a suitable product for outdoor, resistant against water and weather. The light is diffused through small holes on the surface

of the lampshade, creating a cosy atmosphere and soft light. Available as wall lamp, table lamp, with rod and pendant, the collection allows an unlimited use in projects, also due to the right balance between decoration and technical performance. Mesh is now also available in battery-powered version.
