# Surfaces with an authentic natural character.

© Ceramiche Atlas Concorde

© Ceramiche Atlas Concorde

Viewed from afar, the surfaces of Boost Natural convey a neutral, powdery look, opaque in the light, with slight color variations. On closer inspection, they reveal the random marks of manually worked raw earth and slight irregularities to the hand and eye.

A una visione d'insieme, le superfici di Boost Natural presentano un fondo dalle tinte neutre e polverose, opache alla luce, con lievi variazioni cromatiche. Da vicino rivelano invece una trama di dettagli spontanei che restituisce al tatto e alla vista i segni della lavorazione manuale della terra cruda e le leggere irregolarità della superficie.

Au premier coup d'œil, les surfaces Boost Natural présentent une base de teintes neutres et poussiéreuses, opaques à la lumière, avec de légères variations chromatiques. De près, cependant, elles révèlent un tissu de détails spontanés qui dévoilent au toucher et à l'œil les signes du travail manuel de la terre crue et les légères irrégularités de la surface.

Im Gesamteindruck präsentiert sich Boost Natural mit einem Grundton aus neutralen, staubigen Farben, die im Licht matt wirken und leichte Farbschwankungen aufweisen. Aus der Nähe betrachtet wird hingegen ein Geflecht aus spontan wirkenden Details sichtbar, in dem die Zeichen einer manuellen Bearbeitung der rohen Erde sowie leichte Unregelmäßigkeiten der Oberfläche erkenn- und erastbar sind.

## Large sizes for broad perspectives.

Large slabs broaden the perception of spaces and leverage the look of the original material. The 120x278 format with a 6 mm thickness allows you to design walls at full height with fewer joints, while the 162x324 slab with a 12 mm thickness is ideal for cladding kitchen countertops, tables, and large objects.

Le grandi lastre ampliano la percezione degli spazi e valorizzano la materia di ispirazione. Il formato 120x278 in 6mm di spessore permette di progettare pareti a tutta altezza con un minor numero di fughe, mentre la lastra 162x324 in 12mm è ideale per rivestire piani cucina, countertop, tavoli e volumi di grandi dimensioni.

Les grandes dalles élargissent la perception des espaces et mettent en valeur le matériau d'inspiration. Le format 120x278 en 6 mm d'épaisseur permet de concevoir des murs de pleine hauteur avec moins de joints, tandis que la dalle 162x324 en 12 mm est idéale pour les plans de cuisine, les comptoirs, les tables et les grandes tailles.

Die großen Platten lassen den Raum großzügiger wirken und bringen das als Vorbild dienende Material noch besser zur Geltung. Das Format 120x278 cm in 6 mm Stärke erlaubt die raumhohe Verkleidung von Wänden mit wenigen Fugen, während die Platte 162x324 cm in 12 mm Stärke für die Verkleidung von Küchenarbeitsplatten, Tischen und großen Volumen ideal ist.

Los formatos grandes amplían la percepción del espacio y realzan el material de inspiración. El tamaño 120x278 con 6mm de grosor permite diseñar paredes de altura completa con menos juntas, mientras que el tamaño 162x324 con 12mm de grosor es ideal para revestir encimeras de cocina, mostradores, mesas y grandes volúmenes.

Крупноформатные плиты визуально увеличивают пространства и максимально раскрывают красоту рисунка. Формат 120x278 см толщиной 6 мм позволяет покрывать одной единственной плитой всю стену снизу доверху с вытекающей из этого минимизацией количества швов в облицовке, а формат 162x324 толщиной 12 мм идеально подходит для облицовки столешниц, кухонных фартуков, столов, крупных архитектурных объемов.

Le revêtement 3D Texture mélange l'empreinte des tissus et de la dentelle avec les irrégularités naturelles qui caractérisent la surface granuleuse de la matière d'inspiration.
