

# **About Us**

We develop and deliver water treatment and water management solutions for healthcare, hospitality, education, commercial, industrial, and multi-family customers.

Our chemical-free, sustainable technologies are designed to improve potable water quality, eliminate waterborne pathogens, extend the life of water-bearing equipment, and deliver long-term value to our customers, their businesses, and the planet.

## **Why LiquiTech**

- Expert staff: Our professional staff are ASSE 12080-certified experts with deep knowledge of water treatment technologies, potable water systems, plumbing infrastructures, and waterborne pathogens.
- » Regulatory guidance: With more than 30 years of experience working with regulatory agencies, we can help you understand, navigate, and comply with the various water management guidelines and standards applicable to you.
- » Smart technologies: Our technologies can be remotely monitored, controlled, and integrated with your existing building management system.
- » Sustainable solutions: Our products are non-chemical, water-efficient, and built with reusable and durable components, helping you protect the environment and your building occupants without sacrificing quality.

# LiquiTech

## **Products**

**LiquiTech® Copper-Silver Ionization System** is an innovative, chemical-free disinfection solution for potable water systems. It's designed to quickly destroy Legionella and other waterborne pathogens and achieve long-term prevention without creating carcinogens or damaging plumbing equipment.

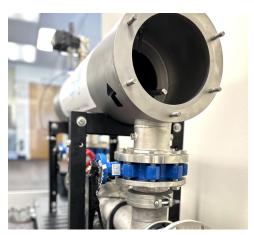

**LiquiTech® UV Disinfection System** is a non-chemical disinfection technology for cold water systems. Our energy-efficient UV system requires minimal maintenance costs or time and destroys 99.99% of microorganisms.

**LiquiTech® Sediment Filtration System** removes sediment from your water that can damage pipes and equipment, degrade water quality, and encourage bacteria growth. With self-cleaning stainless-steel filters and a control system, this system is durable, sustainable, and cost-effective.

**LiquiTech® Smart Temperature Sensors** detect temperature fluctuations within your water system that indicate equipment failures, system inefficiencies, and amplified bacteria growth.

**LiquiTech® Point-of-Use Filters** for faucets, showerheads, and ice machines remove Legionella and other pathogens right before water consumption or use.

## **Services**

### **Water management programs**

We develop and implement all aspects of your water management program to improve safety, achieve legal defensibility, and maintain regulatory compliance.

### **Water testing and diagnostics**

Our water quality testing services help you proactively identify pathogens and sediment in your water supply before they cause harm.

### **Outbreak remediation**

Our remediation services can help you gain control of waterborne pathogens in as little as 48 hours without disruptions or unwanted public attention.

### **Service program**

After installation of a LiquiTech system, we continue our commitment to your organization with a range of monitoring, testing, maintenance, and other services.
