FOOD LOCK

Food-safe

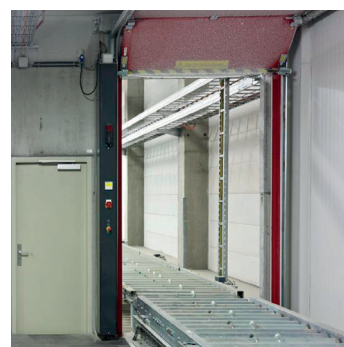

These industrial sectional shutters are specifically designed for the food industry, where hygiene, safety and durability are absolute priorities. All exposed surfaces are finished in stainless steel (Inox), the material of choice for environments subject to strict HACCP standards and intensive cleaning cycles.

Designed for installation in production areas, storage facilities, and automated transport zones, they feature a hygienic construction and deliver fire compartment performance that ensures dependable protection of critical spaces.

Designed and tailored to your needs

As with all Winlock solutions, custom engineering is at the core of our approach. Our Food Lock application can be extended with additional features such as fire resistance, smoke sealing, sound insulation, bor explosion protection, fully adapted to the specific requirements of your project.

Technical specifications

Options:	RVS 304 RVS 316
