THE NEW

OUTDOOR HOSPITALITY

The outdoor hospitality is undergoing a profound transformation, accompanied by a remarkable increase in popularity.

According to data from the NFOH, the representative federation of Outdoor Hospitality in France, campsite bookings grew by an impressive 21 % between April 2022 and April 2023.

While remaining true to its DNA, this business is reinventing itself to meet the expectations of a diversified and more demanding customer base, while adapting to the major challenges of today:

- **the ecological approach:** encouraged by federations and customers, outdoor complexes are adopting more eco-responsible practices, such as water and waste management and the use of renewable energy;
- **hyperaccessibility:** for a number of years now, establishments have been striving to comply with these standards, despite the difficulties involved, to ensure that everyone is welcome and comfortable;
- **the move upmarket** of an entire sector, as demonstrated by the rise of "glamping" (a contraction of "glamour" and "camping"): visitors now believe that the outdoor experience and a good level of comfort are no longer incompatible .

As a manufacturer of collective taps that is always ahead of the game when it comes to ecological considerations, PRESTO is playing a leading role in this positive transformation. By developing innovative solutions that are more responsible and inclusive, we are helping to redefine the "outdoors of tomorrow".

PRESTO loves water

#ISAVEWATER

WATER

FIND THE GOOD BALANCE

In The outdoor hospitality , the challenges of saving water are many and complex:

- excessive consumption by visitors;
- Water-intensive facilities (swimming pool, restaurants, green spaces, etc.) that are often the main source of attraction;
- the need to preserve local natural resources, recent water restriction measures and emerging sectoral initiatives;
- the need to preserve economic activity.

On holiday,
we **MULTIPLY** our water
consumption **BY 2!**

PRESTO NEO®

The PRESTOGREEN tapware that reduces water consumption over the long term thanks to a flow time of 7 seconds and an automatic closing

**PRESTO DL 400 SE® SHOWER**

The mechanical timed-flow shower with automatic tap shut-off after 30 seconds.

PRESTO 12 NEO

The urinal with automatic closing that guarantees a constant flow time for water savings of up to 70 %.

WITH PRESTO, YOU CAN CONTROL YOUR CONSUMPTION

PRESTO supports open-air hotel establishments in their transition to more responsible resource management, offering them cost-effective solutions that are tailored to their needs, simple to implement and have no impact on user comfort.

Our products are available in 4 timing technologies:

- **mechanical:** water stops without pressure from the user;
- **touch:** activation by simply touching the button (ON/OFF function) ;
- **contactless electronic sensing:** activated and deactivated by hand movement. The tap delivers just the right amount of water;
- **contactless timed:** the water is triggered without contact and runs for a set time.

We are committed to the entire life cycle of our mechanical and electronic taps, via the Environmental and Health Declaration Sheets (EHSDS).

Our products are compatible with connected solutions or solutions that encourage a reduction in average showering time (connected showerheads).

THE TRANSITION IS ALREADY HERE!

Establishments are going green and numerous certifications and labels have emerged. More than ever, the FNHPA is encouraging environmental initiatives, notably with the creation of the "Sustainable Development Trophies" awarded to the most committed establishments.

EXPE- RIENCE

GUARANTEE COMFORTABLE TO USE FOR EVERYONE

By definition, open-air establishments are places where people of all types come together at any time of the day.

To offer everyone a "good experience", we need to understand this diversity:

- users of all ages with varying degrees of independence: babies, children, adults and the elderly;
- for people with reduced mobility, who need specialised facilities and equipment that comply with a number of standards;
- a wide range of needs: bathing, showering, washing hands, going to the toilet, washing up, doing the laundry, etc. ;
- a growing demand for installations that are increasingly designer and top-of-the-range.

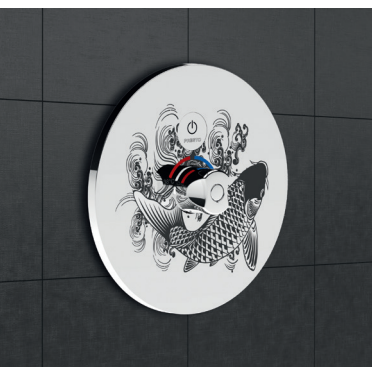

PRESTO LINEA® TOUCH

The elegant tap with tactile touch activation, suitable for people with reduced mobility.

THE DIVERSE PROFILE of visitors to campsites in 2023

18-24 year olds: 15
25-34 year olds: 20
35-49 years: 30
50-64 years: 20
65+: 15

Source: Statista

Our products can also be customised to combine style and adaptability!

PRESTO BOX TOUCH

The thermostatic shower mixer with tactile release is suitable for disabled people. Discreet and comfortable, it is recommended for top-of-the-range establishments.

Find out more about setting up the TOUCH button

WITH PRESTO, THERE'S A TAP FOR EVERY AUDIENCE

PRESTO offers a comprehensive range of products for all users, combining comfort and ergonomics.

The Accessibility offer is particularly recommended for use by people with reduced mobility. It is dedicated to sanitary environments.

A LABEL THAT DISTINGUISHES

Created in 2001, the aim of the "Tourisme & Handicap" label is to help develop an adapted tourism offer.

It provides reliable, descriptive and objective information on the accessibility of tourist sites and facilities, taking into account the 4 types of disability (motor, mental, hearing and visual).

GRAB AND SUPPORT BAR

135° angled grab bar suitable for people with disabilities

PRESERVING THE SUSTAINABILITY OF FACILITIES

As highly seasonal establishments, they are subject to accelerated ageing of their equipment, under the influence of the environment, visitor numbers and the climate:

- chlorinated or salty environments;
- very intensive use ;
- stopping the use of sanitary facilities and networks for several months;
- changing and demanding climatic conditions, including frost.

5 MONTHS
is the average time
campsites are
closed between 2
seasons

WITH PRESTO, YOUR INSTALLATIONS ARE PROTECTED

Committed to the fight against programmed obsolescence, PRESTO is constantly working on the durability and reparability of its products, with a system that facilitates the use of spare parts.

- Our products are **repairable**.
- Our **spare parts** are available for a minimum of 10 years for more than 900 references.
- Our products come with a **10-year guarantee**.
- **We train** our customers **technicians** in product maintenance.
- **Our products are tested** and resistant to neutral salt spray (NSS): 200 h according to NF ISO 9227.

PRESTOTEM 2 ALPA®

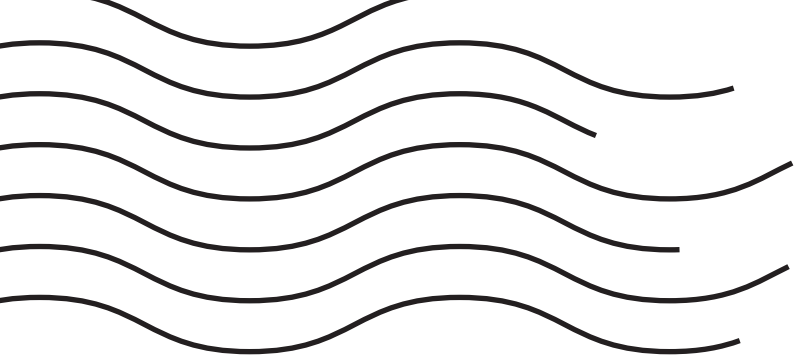

The shower panel installed in 6 minutes and easy to maintain thanks to its wide-angle opening. Its removable and interchangeable plate makes it easy to winterise.

WINTERIZATION ASSISTANCE

The PRESTO technical assistance service advises establishments on the various stages of wintering their facilities, from preparation to putting the water back in:

- assistancetechnique@presto-group.com
- application to help you select spare parts: LES ROBINETS PRESTO, available on Google Play or App Store

HYGIENE

ENSURING SAFE USE

Health risk management is an omnipresent issue for ERP Establishment open to the public, and requires constant attention:

- very intensive use to manage ;
- strict regulations to be complied with (particularly anti-regional);
- burn hazards to be avoided;
- risks of vandalism to be anticipated.

**HAND WASHING,
it's the most important
hygiene gesture of the day**

PRESTOTEM® 2 SENSOR

The contactless activation shower with automatic rinsing, limiting bacterial growth, siphonage issues, and bad odors.

PRESTO 4000 S®

The vandal-proof tap.
(Anti-blocking system)

WITH PRESTO, YOUR AUDIENCES RISK NOTHING

To provide visitors with a safe and healthy environment, PRESTO develops products that maintain a maximum level of safety and withstand intensive use. The aim is multiple: to prevent the risk of burns, limit the proliferation of bacteria and prevent vandalism.

- We offer a range of **anti-legionella solutions** with automatic rinsing.
- Taps with MasterMix® technology **do not interconnect** hot water and domestic cold water.
- Taps with MasterMix® technology (thermostatic controller) are **anti-scald**.
- Our sensor taps maintain **maximum hygiene**.
- Our S® anti-blocking safety system is **vandal-proof**: it prevents water from blocking during continuous flow.

P3500 WALL-MOUNTED

The ideal rotating spout tap for washing up, which limits the maximum temperature by means of an adjustable stop inside the product, which is inaccessible to the user.

TRIED AND TESTED!

To ensure the resistance of its mechanical valves, PRESTO carries out endurance tests involving more than 500,000 operations. And it's been going on for 96 years!
