

# WEL- COME TO THE HEART OF BUSINESS

**TAPWARE** FOR OFFICES, PLACES OF ENTERTAINMENT  
AND SHOPPING CENTRES

**PRESTO®**  
loves water

## CONTENTS

### THE STAKES OF TAPWARE

Maintenance: facilitating the upkeep and durability of facilities	4 - 5
Water: reducing water and energy consumption	6 - 7
Design: a pleasant, comfortable experience for everyone	8 - 9
Hygiene: ensuring the cleanliness of the premises and the safety of users	10 - 11

### TERTIARY SELECTION

Public toilets / Infirmary / Cleaning room	12
Employee toilets	13
PRM toilets	14
Accessories	15

# THE ACTIVITY

## OF TERTIARY BUILDINGS

In offices, shopping centres, places of culture and entertainment, service the key. In offices and public areas alike, the public has very high expectations in terms of design, comfort and respect for the environment. Sanitary facilities are at the top of the list of expectations!

### **Company washrooms**

They must project a positive image to employees and visitors, while complying with regulations and withstanding intensive and collective use.

### **Shopping centre washrooms**

Every day, they welcome several thousand people. The stakes are twofold: to manage the crowds in terms of the availability of sanitary facilities and to ensure their comfort.

### **Sanitary facilities in places of entertainment**

They are used very intensively in theatres, museums and cinemas, due to the rhythm of the film and show schedules. They must be able to keep up with the rapid flow of visitors.

Everyone also needs to save water.

By incorporating these specific issues into the development of its products, PRESTO is helping to improve the performance of infrastructures, while making a significant contribution to protecting the environment and public health.

### **PRESTO loves water**

# MAINTENANCE

## FACILITATING MAINTENANCE AND SUSTAINABILITY OF FACILITIES

Businesses, cultural places and shopping centres all have one thing in common: they have to cope with a large number of people during the day. This feature considerably increases the constraints involved in maintaining sanitary installations:

- installation costs to be controlled;
- continuous use to manage;
- servicing and maintenance to be optimised;
- equipment efficiency and availability to be guaranteed.

**25 LITRES PER HOUR  
is the loss caused by  
a leaky toilet!**

Source: Water Information Centre.

### PRESTO NEO®

A mechanical timed-flow washbasin tap is easy to maintain and to replace thanks to an interchangeable head. It is particularly reliable and long-lasting, thanks to the bleed spring, a key element of the self-cleaning mechanism, which guarantees a constant flow time.

**SENSAO® 8400 N**

The sensor timed-flow urinal tap that can be installed in just 15 minutes for the angled version, and is easy to maintain thanks to its direct access to the components without dismantling the tap.

## RESISTANT AND LONG LASTING INSTALLATIONS

**PRESTO develops products that are specifically designed for intensive use, easy to maintain and to repair.**

- We check our products at every stage of design and manufacture. To ensure the resistance of our mechanical valves, we carry out **endurance tests at over 500,000 operations.**
- Our products are **guaranteed for 10 years**, they can be repaired and our **spare parts** are available for at least 10 years for more than 900 references.
- Our products are quick and easy to install and to maintain, thanks in particular to **direct access to the components.**
- Our products **are easy and natural to maintain**: the chrome-plated coating must only be cleaned with soapy water. **Abrasive, acid, alkaline or ammonia-based household products are prohibited;**
- We provide :
  - **maintenance videos on YouTube:**  
@GroupePresto;
  - **an app to help you select spare parts**, available on Google Play or App Store:  
LES ROBINETS PRESTO

**DL 400 SE**

Mechanical timed-flow shower tap easy to maintain thanks to anti-limescale spikes that can be cleaned with the swipe of a finger.

### TOILETS IN THE WORKPLACE

There must be at least 1 toilet and 1 urinal for every 20 men, and 2 toilets for every 20 women.

Employers must ensure that toilets and urinals are cleaned and disinfected at least once a day.

**Info and advice on our social media** to enhance the maintenance of your sanitary facilities

#ISAVEWATER

# WATER

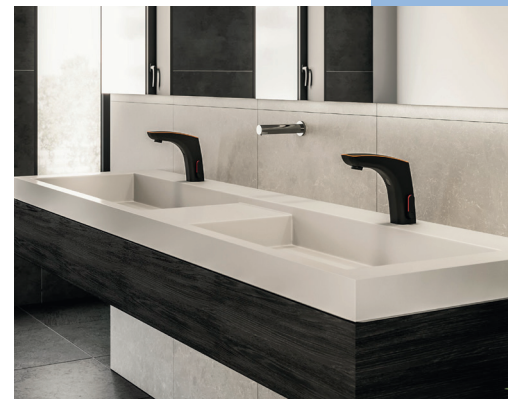

## REDUCING WATER AND ENERGY CONSUMPTION

In places where sanitary facilities are in constant use, good water management is crucial. It's all about taking responsibility for environmental issues, while ensuring optimum service:

- an exemplary attitude towards the management of natural resources;
- energy costs to be controlled;
- continuous operation to be guaranteed.

**The average water consumption  
in French offices:  
40 LITRES/DAY PER EMPLOYEE .**

Source: IOT Factory.

### **PRESTO NOVA®**

The sensor washbasin mixer that saves water. Its intelligent, configurable sensor with a self-learning function prevents it from being triggered accidentally.

## INSTALLATIONS THAT REALLY USE LESS WATER

Saving water has always been part of PRESTO's DNA. We develop unique technologies that significantly reduce water consumption.

**Our products are available in three technologies:**

- **mechanical:** an other push on the button from the user;
- **touch:** activation by a simple touch on the button (Start / Stop function);
- **sensor:** water flow is activated without touching the tap and stops automatically.

**Our electronic sensor taps** allow hands-free water flow detection for optimal hygiene. The tap delivers the right amount of water needed for each use, preventing unnecessary waste.

**We are committed to the entire life cycle of our mechanical and electronic valves, via the Environmental and Health Declaration Sheets (EHSDS).**

### PRESTO 7100 XL N

The sensor timed-flow & mechanical flush valve reduces water consumption.

Automatic detection of double volume based on the time the user is present.

### SENSÃO® 8300 N

The sensor timed-flow urinal tap that keeps the consumption under control thanks to a flow rate regulated from 1 to 5 bar, and a reduced delivered flush volume.

## SAVE EVEN MORE WATER

Some of our products are available in a **PRESTOGREEN®** version for considerably more economical hand-washing: while a traditional tap uses 4.80 litres of water for a flow rate of 9 litres/min, a **PRESTOGREEN®** tap uses just 0.38 litres or 0.44 litres. That's a saving of 93 % compared with a conventional tap!

Info and advice on our social media to save water  
#SAVEWATER

# THE DESIGN

## PROVIDING A PLEASANT AND COMFORTABLE EXPERIENCE FOR EVERYONE

The aim is to meet the public's expectations in terms of comfort and aesthetics, including in the washrooms:

- growing expectations in terms of user experience;
- a good image to project;
- a varied public, for whom the facilities must be adapted (children, the elderly, people with reduced mobility, etc.);
- guaranteed ease of use.

**+11% MORE visitors  
to French museums and cultural  
places by 2023!**

Source: CLIC.

### PRESTO LINEA® AUTOMATIC HAND DRYER MATT BLACK FINISH

A perfect match  
with the PRESTO LINEA®  
sensor washbasin mixer  
and the soap dispenser.

### PRESTO SO'O®

The sensor washbasin tap for PRM, children and the elderly especially made for the countertop basin.

## A GOOD EXPERIENCE IN SANITARY INSTALLATIONS

**To promote a good image of cultural establishments and companies, PRESTO is developing product ranges with timeless design and ergonomics adapted to everyone.**

- **Customisation:** our products can be customised with a logo, text or colours (customisation requests to [chifffragechantier@presto-group.com](mailto:chifffragechantier@presto-group.com) or to a sales agent).
- **Ergonomic:** our various technologies (touch, sensor, detection) ensure maximum user comfort and are suitable for everyone: children, the elderly, people with reduced mobility, etc.
- **Design:** we offer ranges of aesthetic, and timeless products, such as the PRESTO LINEA® range.

### PRESTO LINEA® TOUCH®

The sensitive timed-flow washbasin tap, with effortless operation thanks to the Touch button, recommended for PRM.

### PRESTO LINEA®

The sensor washbasin tap with a timeless linear design that blends in with any environment. Several finishes are available: matt black, polished black, brushed stainless steel, brushed copper, brushed gold and rainbow.

## TOILETS THAT MAKE A LASTING IMPRESSION

For a long time limited to their basic function, toilets are now becoming a way for ERP to stand out from the crowd.

Architects, artists and designers have turned them into a new playground: new-generation toilets are more design-led and comfortable, take better account of environmental and social issues, and are sometimes even veritable works of art!

**Info and advice on our social media**  
to create modern sanitary facilities with design

# HYGIENE

## ENSURING THE CLEANLINESS OF THE PREMISES AND THE SAFETY OF USERS

In offices, as in areas accessible to the public, there are strict standards to be met in terms of health and safety. Beyond the regulatory aspect, it's the image of the site that's at stake.

There are many constraints:

- very specific hygiene standards for each sector of activity;
- intensive use and regular maintenance, sometimes while the toilets are in use;
- a public that sometimes disregards hygiene recommendations;
- permanent access to sanitary facilities and rapid technical intervention to be guaranteed.

**2 500 is the number of times we go to the toilet each year.**

Source: World Toilet Organisation.

### THERMOSTATIC SHOWER MIXER TOUCH MASTERMIX® VERSION

It guarantees network safety (without ECS-EFS intercommunication) and user safety (anti-scald thermostatic cartridge, instantaneous shut-off of hot water in the event of cold water cut-off in compliance with NF EN 1111).

## MODULAR DETECTION FOR URINAL BARRIERS

The system with simultaneous rinsing of several toilets, programmable by PRESTOCOM. The "busy" mode detects heavy traffic and spaces out the rinsing of the bowls accordingly. It is particularly well-suited to the rhythm of theatres with intermissions.

### MODULAR DETECTION

The washbasin and urinal tap with touch-free automatic activation for optimum hygiene.

## CLEAN AND SECURED FACILITIES

**PRESTO develops products that guarantee the safety of water networks, as well as maximum hygiene and safety for users:**

- offers a range of **anti-legionella solutions** with automatic rinsing;
- taps with **MasterMix® technology** do not interconnect hot and cold water for domestic use and are scald-proof;
- thermostatic technology allows to maintain a **constant temperature**;
- our sensor taps maintain **maximum hygiene**;
- Our products with automatic rinsing ensure regular **purging of the network** and prevent the proliferation of bacteria.

### HYGIENE IN PUBLIC TOILETS

Public toilets have a bad reputation : washbasins, toilet seats, door handles, etc. are perceived as veritable breeding grounds for germs. However, there are a number of well-designed features that can considerably reduce this perception, such as electronic flushes that can be activated without manual contact. The most important thing is to wash your hands!

### PRESTO 12 A AND BACKFLOW PREVENTER

The backflow preventer with associated hand shower for intimate hygiene, optimising comfort in office washrooms.

**Info and advice on our social media** to enhance the cleanliness of your sanitary facilities
