REQUIREMENT

SPORTS AND LEISURE FACILITIES

In a context marked by growing environmental concerns and sharp rises in energy costs, water has become a key issue for everyone.

For sports centres, multi-purpose halls, water parks, swimming pools, stadiums and entertainment venues, adopting sustainable solutions for managing natural resources is an absolute necessity.

Tapware plays a crucial role. The quality of the sanitary installations not only influences the day-to-day running of these facilities, but also the experience they offer their visitors. And when it comes to leisure, it's all about the experience!

For users, a pleasant experience

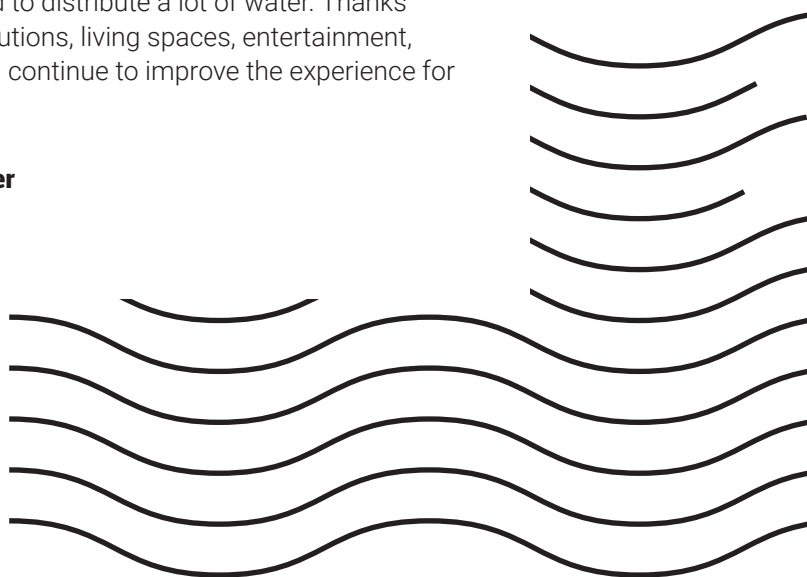

Make the most of the visit, from start to finish, in a pleasant, clean, safe and easy environment... with no questions asked .

For facility managers, optimising management

Avoiding waste, controlling expenses and simplifying maintenance.

PRESTO develops intelligent taps specifically designed for places that need to distribute a lot of water. Thanks to its innovative solutions, living spaces, entertainment, sport and wellbeing continue to improve the experience for everyone.

PRESTO loves water

SUSTAINA- BILITY

GUARANTEE RESISTANCE TO WEATHER AND VANDALISM

Sanitary facilities in stadiums, gymnasiums and sports changing rooms are subject to considerable maintenance constraints due to their intensive use and frequent acts of vandalism:

- accelerated wear and tear on equipment;
- recurrent breakages, resulting in frequent repair and replacement costs;
- budgetary constraints and the need to strike a balance between the quality of installations and purchase and maintenance costs;
- regular maintenance.

**60% OF FRENCH PEOPLE
practise a sporting activity at

PRESTO 120 B
The mechanical wall mounted urinal flush valve prevents damage.

**PRESTO 7000 XL N**

The sensor and mechanical timed-flow concealed flush valve, ensuring automatic detection of small or large volumes and avoiding any risk of removal.

**PRESTO NEO® INOX**

The vandal-proof mechanical timed flow tap with the  anti-jamming system. The non-rotating knob prevents premature wear.

FITTINGS THAT RESIST INTENSIVE USE

PRESTO develops hard-wearing, easy-to-maintain products that promote long-lasting, efficient sanitary installations.

- **Concealed installation:** our products are designed for concealed installation, so there's no risk of them being removed or damaged, and have a longer lifespan.
- **Easy maintenance:** the chrome or stainless steel coating on our taps is easy to clean, and must only be cleaned with soapy water
- **Endurance tests:** to guarantee the robustness of our mechanical valves, we carry out endurance tests at more than 500,000 operations. Our products are also tested in neutral saline mist (NSS): 200 h in accordance with NF ISO 9227.
- **Guarantee and certification:** our products are guaranteed for 10 years, and an exclusive selection **has** obtained NF* certification.
- **Training:** we train technical centres so that they can carry out servicing and maintenance on our products (requests for technical training should be addressed to a sales representative).
- **Repairability and availability of spare parts:** our products are repairable and spare parts are available for at least 10 years for over 900 references.

AN APPLICATION TO HELP YOU SELECT SPARE PARTS

To make it easier to maintain our products, we provide an application to help you select spare parts, available on the App Store and Google Play (LES ROBINETS PRESTO), as well as maintenance videos on YouTube (@GroupePresto).

Info and advice on our social media to enhance the sustainability your sanitary facilities

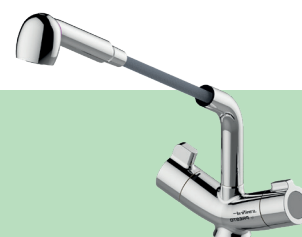

OFFER A PLEASANT EXPERIENCE FOR EVERYONE

For a sports and leisure facility, offering a "good experience" to all its members of the public means providing an inclusive, safe and attractive environment, taking into account very specific characteristics:

- welcoming people of all ages;
- high safety and accessibility standards;
- people with reduced mobility who need specialised facilities and equipment;
- a growing demand for modern, designed facilities.

Of the 18 million sports licence holders in France, 35,000 are disabled (visual, hearing or motor disability).

THERMOSTATIC MIXING VALVE BABY BENCH MASTERMIX®

Suitable for infant showers with its thermostatic cartridge anti-scald to EN1111. The temperature limit is 41°C.

PRESTO NEO® DUO

The soft-touch tap with ergonomic handle is suitable for children, the elderly and PRMs.

PRESTO LINEA®

The designer mixer that fits into any environment.

PRESTO BOX TOUCH

The anti-scald thermostatic shower mixer that guarantees the same water temperature during a shower, with a flexible release suitable for PRMs.

Our products can also be customised to combine style and adaptability!

A GOOD TIME FOR VISITORS

To guarantee easy and pleasant use to all, PRESTO has developed a range of designer taps that are easy to use and maintain the highest levels of safety.

- **Ergonomics for everyone:** we develop products that are suitable for children, the elderly and people with reduced mobility.
- **Safe use :** taps incorporating MasterMix® technology (thermostatic mixing valve) are anti-scald and prevent intercommunication between hot and cold water, and back-pollution in the network.
- **Maximum comfort :** thermostatic technology maintains a constant temperature.
- **Design :** we offer a range of design products, in particular for VIP box washrooms.
- **Customisation :** we offer customisation of our products (text, logo, colour) .

For more information and a quote, contact chiffagechantier@presto-group.com or one of our sales agents.

AN INCLUSIVE CLUB PROGRAMME

As part of the Paris 2024 Paralympic Games, the French Paralympic and Sports Committee has created "Club Inclusif", a programme to help clubs open up to people with disabilities.

HYGIENE

ENSURING CLEANLINESS FACILITIES

As ERP (public service establishment), sports and leisure establishments are among the most highly regulated places in terms of health and safety. They are characterised by :

- intensive use ;
- very specific hygiene standards;
- a public that does not always respect cleanliness instructions;
- water network safety to be guaranteed.

**A gym treadmill contains
3TIMES MORE BACTERIA
than a domestic treadmill.**

DL 400 E-SENSOR®

The sensor timed shower valve with automatic 30-second rinse every 24 hours after last use.

**DL 400
E-TOUCH®**

**DL 400
E-SENSOR**

CONTACTLESS ELECTRONIC BARRIER

The shower corridor barrier forces users to wash before entering the pool and limits water pollution. Periodic automatic rinsing can be programmed by PRESTOCOM.

ANTI-BACTERIAL CONTROL

PRESTO develops products that maintain the highest levels of hygiene and safety and withstand intensive use.

Network hygiene

- Our anti-legionella solutions are equipped with automatic rinsing and remote disconnection systems. This allows the entire network to be purged in the event of thermal shocks, ensuring complete disinfection.

User hygiene

- Our taps are equipped with MasterMix® technology, which prevents any intercommunication between hot and cold sanitary water, and is anti-scald.
- Touch-free sensor taps ensure maximum hygiene by avoiding physical contact.

SPAS, PLACES AT RISK FROM LEGIONELLA

The bacterial ecology of spas is highly evolutive depending on the quality of maintenance, renewal and of water disinfection, and the frequency of use. If they are not properly designed and maintained, they provide favourable conditions for the proliferation of many germs: *Escherichia coli*, *Legionella*, *Pseudomonas aeruginosa*, *mycobacteria*, etc.

PRESTO LINEA®

The sensor tap with adjustable periodic rinsing to prevent bacterial proliferation and de-siphoning.

PRESTO PLP TOUCH®

The anti-legionella thermostatic mixer. The PRESTOTEM PLP shower panel is equipped with a patented by-pass system that allows thermal shocks to be performed remotely, ensuring total disinfection of the network and the panel in complete safety.

#ISAVEWATER

WATER

REDUCING WATER CONSUMPTION

Directly impacted by rising energy costs, the leisure sector must find ways to reconcile the challenges of preserving natural resources and the sometimes intensive consumption needs.

It is characterised by :

- strong cost control challenges;
- equipment such as swimming pools, which consume a lot of water;
- users who pay little attention to saving water when they are away from home.

7 SECONDS

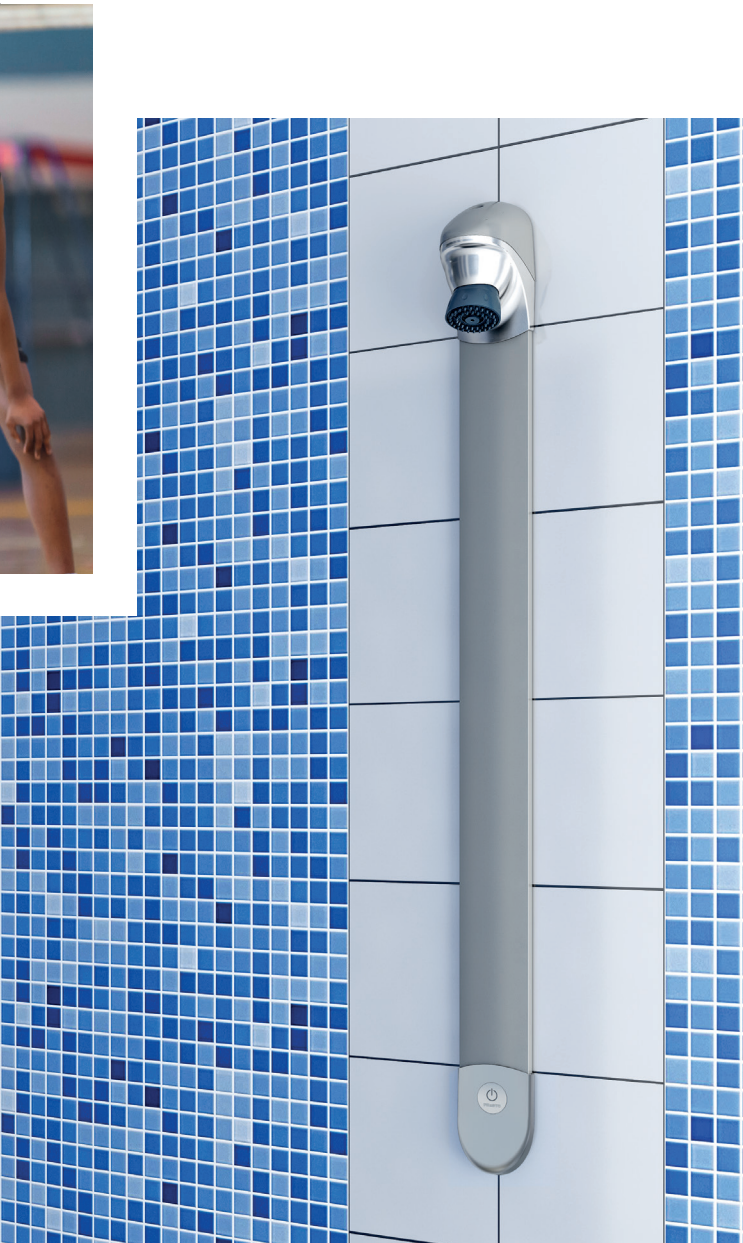

This is the timer that saves the most water for washbasin use!

INSTALLATIONS THAT CONSUME LESS WATER

PRESTO supports ERP companies in their transition to more responsible resource management, by developing products that help to save water through an ongoing, integrated innovation process.

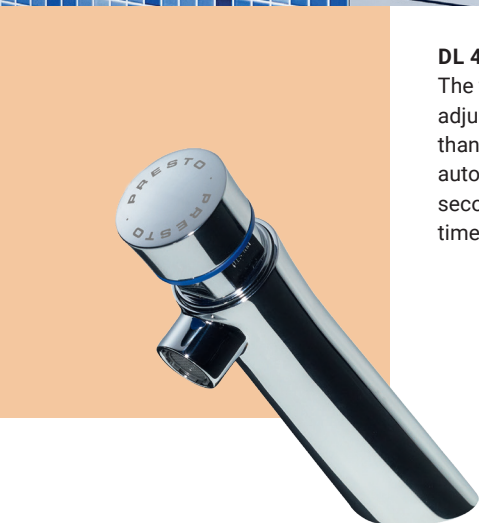

- We invented and patented **timer technology** 100 years ago.
- Our products are available in three timer technologies:
mechanical, tactile or sensor.
- **Our electronically triggered taps** allow water to be turned on and off by detecting a movement of the hands.
The tap delivers just the right amount of water for the job.
- With a flow rate of 1.9 l/min, our **PRESTOGREEN®** range of taps reduces water consumption over the long term.
- We are developing products with **adjustable timers** for even greater water savings.

We are committed to the entire life cycle of our mechanical and electronic valves, via the Environmental and Health Declaration Sheets (EHSDS).

DL 400 E-TOUCH

The tactile shower tap with adjustable timer saves water thanks to Start/Stop function, automatic switch-off after 30 seconds and adjustable Flow time.

PRESTO NEO®

The **PRESTOGREEN®** version of the single mechanical timed tap with a 7-second delay to save water.

SPORT IS ALL-CONSUMING!

According to data from the Ministry of Energy Transition's statistics department, energy consumption in the sports, leisure and recreation sector represents around 1 % of consumption by all economic activities.
