The selection of unsupervised service areas and motorway service areas for lorry drivers	14
Selection of guarded service areas and stations	15

THE FREQUENCY

OF TRANSPORT PLACES

Airports, railway stations, service stations and motorway service areas are characterised by continuous traffic. In addition to the specific regulations that apply to places that receive large numbers of people, these transit areas have to meet the growing demands of travellers in terms of today's challenges. Tapware play an essential role in water management, hygiene and sustainability.

A better user experience for travellers and working people

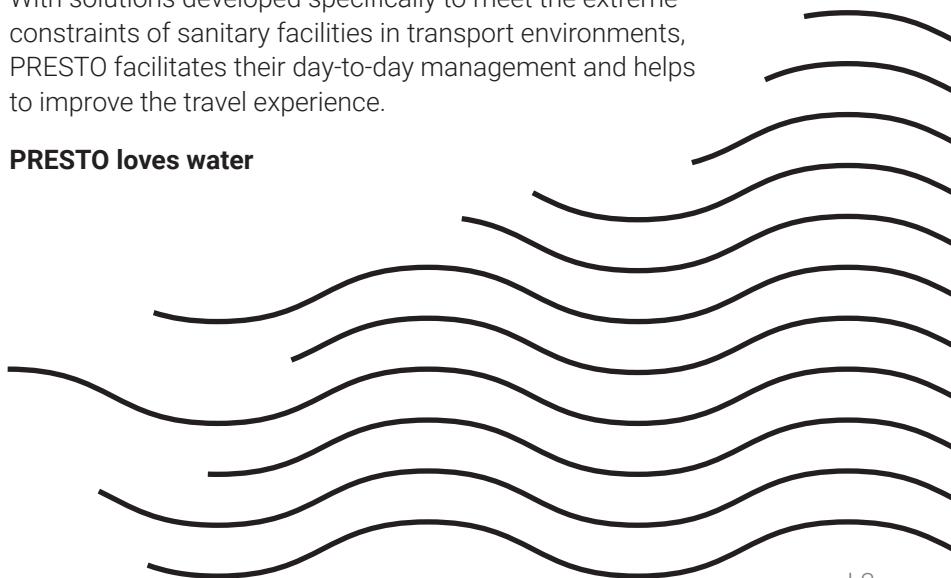

They expect these places, which they frequent out of necessity, to offer facilities that are practical and comfortable, modern and inclusive, and impeccably clean.

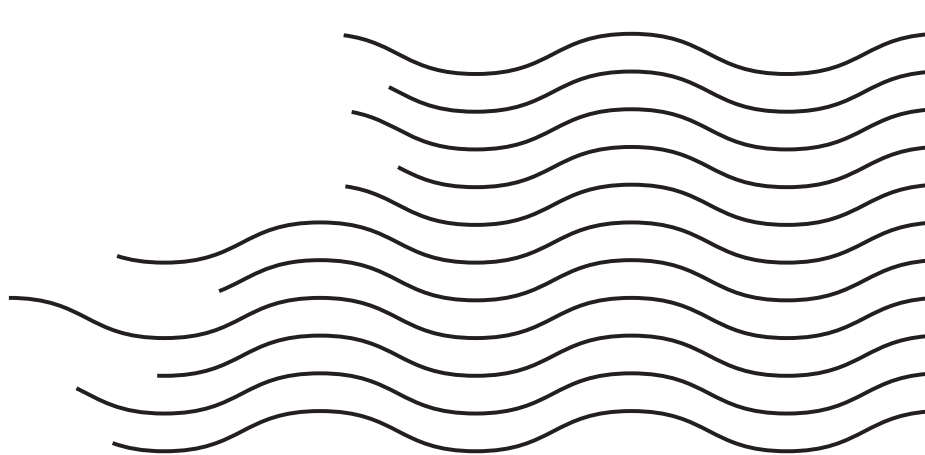

A need for managerial efficiency

The management of transport facilities is complex. Reliability, the durability of equipment and keeping it clean are the main challenges. Infrastructure must be able to withstand intensive use, while minimising maintenance costs.

With solutions developed specifically to meet the extreme constraints of sanitary facilities in transport environments, PRESTO facilitates their day-to-day management and helps to improve the travel experience.

PRESTO loves water

HYGIENE

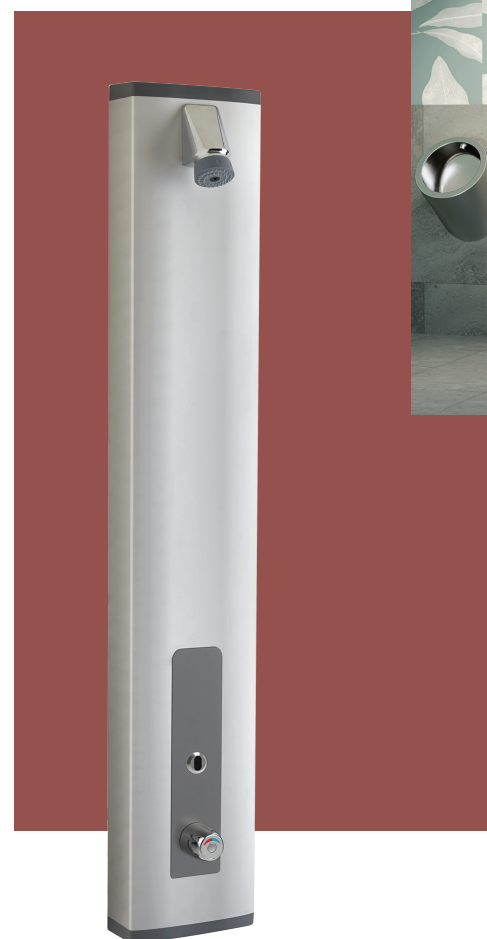

GUARANTEEING CLEANLINESS AND SAFETY ON AN ONGOING BASIS

Transport hubs are high-traffic areas, where the provision of clean sanitary facilities is an essential service for users, staff and truck drivers. The constraints are very specific:

- specific hygiene standards;
- continuous and sometimes careless use;
- maintenance required several times a day, including when the sanitary facilities are in use;
- an obligation to maintain permanent accessibility.

**France has
364 SERVICE AREAS
637 REST AREAS.**

PRESTOTEM® 2 SENSOR

The thermostatic shower mixer is timed and contactless. It promotes maximum hygiene for both users and water systems, thanks in particular to the automatic on/off system with no manual contact and automatic periodic rinsing to limit bacterial growth.

DETECTION FOR URINAL BARRIERS

The touchless timed urinal tap for a high level of hygiene:

- The bowl is rinsed automatically
- Periodic automatic rinsing can be programmed by PRESTOCOM
- Automatic closing does not require any manual contact

FACILITIES THAT ARE ALWAYS CLEAN AND SAFE

To ensure a healthy environment for travellers, PRESTO develops products that maintain the highest levels of hygiene and safety and products that stand up to intensive use:

- our products **are easy to maintain and natural**: the chrome coating can only be cleaned with soapy water, **without abrasive, acid, alkaline or ammonia-based cleaning products**;
- our products with automatic rinsing function allow you to **purge the system** regularly and prevent the proliferation of bacteria;
- our touchless taps maintain **maximum hygiene**;
- taps with **MasterMix® technology** have no hot/cold water connection and are scalding-proof.

MASTERMIX® THERMOSTATIC MIXING VALVE BABY BENCH

The washbasin mixer suitable for cleaning infants, ideal for use in nurseries. It is equipped with anti-scald (temperature stop at 41°C) and anti-bacterial proliferation safety systems.

NEW GENERATION SERVICE STATIONS

In recent years, major efforts have been made to make rest areas more attractive. Sports stops, siesta areas, "fun zones" and reading corners are now available to encourage passengers to take a real break on their journey.

Info and advice on our social media to enhance the hygiene of your sanitary facilities

COMFORT

OFFER A PLEASANT EXPERIENCE FOR EVERYONE

Going to the toilets is an almost obligatory step on passengers' journeys. For the experience to be satisfactory for everyone, the facilities must be able to meet the following requirements:

- welcoming people of all ages;
- high standards of safety and accessibility;
- people with reduced mobility who need specialised facilities and equipment;
- a growing demand for modern, designer facilities.

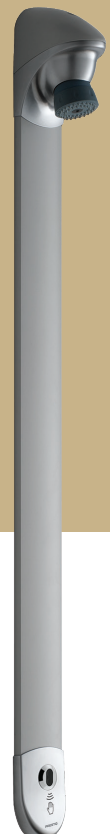

99.715 MILLION PASSENGERS

DL 400 E SENSOR

The simple, timed-flow, touchless shower tap, with a sleek design and comfortable operation for all: PRM, children and the elderly.

PRESTO LINEA®

The touchless basin mixer can be customised with a logo, text or colour.

**PRESTO LINEA TOUCH®**

The timed basin mixer is particularly well suited to use by PRMs, thanks to its effortless tactile release mechanism and easily identifiable button.

**PRESTO LINEA®**

The touchless washbasin tap with a timeless linear design that blends into any environment. Several finishes are available: matt black, polished black, brushed stainless steel, brushed copper, brushed gold, rainbow.

**A GOOD TRAVEL EXPERIENCE**

PRESTO offers a range of products that are both stylish and practical to use, making them easy and pleasant for everyone to use.

- **Ergonomics for everyone:** we develop products that are suitable for children, the elderly and people with reduced mobility.
- **Aesthetics:** we offer ranges of timeless design products, such as the PRESTO LINEA® range
- **Customisation:** our products can be customised with a logo, text or colours.

For more information and to request a quote, please contact chifffragechantier@presto-group.com or a sales representative.

WATER IN STATIONS

The stations that consume the most water are:

- sanitary supply;
- cleaning the premises;
- maintenance of green spaces.

**60315**

The grab bar designed to combine safety and comfort in every situation.

Info and advice on our social media to enhance the comfort of your sanitary facilities

#ISAVEWATER

WATER

CONTROLLING CONSUMPTION

With taps and flushes running all the time, the sanitary facilities at transport facilities consume a huge amount of water. When it comes to saving resources, has a lot at stake:

- costs to be controlled;
- users to be made aware of and supported;
- an exemplary attitude to adopt.

25 % REDUCTION IN WATER CONSUMPTION BY 2035 in all stations.
That's what SNCF* is aiming for!

Source: Le Rail (* National Company of the French Railways)

PRESTO SENSAO® 8100 N

The touchless timed-flow urinal tap allows to control water consumption: flow rate regulated from 1 to 5 bar, reduced volume of flush delivered.

**PRESTO LINEA®**

The touchless washbasin mixer with automatic shut-off after hands are removed. also available in the 1.9 l/min version for even greater water savings.

**PRESTO 1000 XL DVA**

Direct flush, which regulates water consumption thanks to its dual adjustable volume, ensuring a complete flush.

- Small volume: from 2.5 l to 5 l, adjustable by thumbwheel.
- Large volume: from 6 l to 9 l, adjustable on front panel.

also available in a 2-4 l Eco version.

REDUCED WATER CONSUMPTION

PRESTO supports transport facilities in their transition to more responsible resource management, by developing products that help to save water through an ongoing, integrated innovation process:

- we invented and patented **timed-flow technology** 100 years ago;
- our products are available in three timer technologies:
mechanical, sensitive or contactless;
- our **electronically** controlled taps turn the water on and off by detecting the movement of your hands. The tap delivers just the right amount of water for the job;
- our range of **PRESTOGREEN®** taps **sustainably limits water consumption** to a flow rate of 1.9 l/min, which means that only 0.38 l or 0.44 l of water is used for hand washing;
- we are developing products with **adjustable timers** to achieve even greater water savings.

We are committed to the entire life cycle of our mechanical and electronic valves, via the Environmental and Health Declaration Sheets (EHSDS).

A WATER MANAGEMENT PLAN AND SOBRIETY

Since the drought of 2022 in France, government measures have been encouraging public infrastructures, including transport hubs, to reduce water consumption and combat leaks. The plan also aims to raise awareness among users of the need to consume more responsibly.

#SAVEWATER

SUSTAINABILITY

FAVOUR RESISTANCE TO TIME AND VANDALISM

The sanitary facilities at all transport facilities are subject to considerable maintenance constraints due to their intensive use. For guarded and unguarded service areas and stations, frequent acts of vandalism add to these constraints:

- accelerated wear and tear on equipment;
- recurrent breakages, resulting in frequent repair and replacement costs;
- budgetary constraints and the need to strike a balance between the quality of the installations and the purchase and maintenance costs;
- regular maintenance.

900,000 KILOMETRES
drinking water distribution network in
France, to supply water to transit areas
in particular.

Source: Sispea, 2023.

PRESTO NEO® INOX

The vandal-proof washbasin tap thanks to with System S® anti-blocking system. Its interchangeable head and non-rotating knob prevent premature wear and tear.

PRESTO 12 NEO

The sustainable mechanical timed-flow urinal tap, with a reparability index of 9.1/10.

**PRESTO 120 B**

The mechanical timed-flow urinal tap with flush-mount installation ensures optimum resistance.

SUSTAINABLE FACILITIES AND EFFICIENT OVER THE LONG TERM

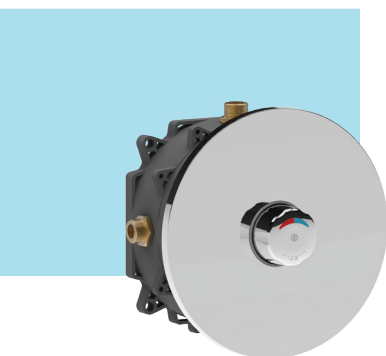

PRESTO develops robust, easy-to-maintain products that withstand very intensive use:

- we check products at every stage of design and manufacture. To ensure the resistance of our mechanical valves, we carry out **endurance tests at more than 500,000 operations;**
- our products are designed for **concealed installation** to avoid the risk of being ripped out or damaged, and to ensure a longer service life;
- **our products are guaranteed for 10 years;**
- our products are **reparable and our spare parts** are available for at least 10 years for more than 900 references;
- **we train the technical centres** so that they can work on product maintenance;
- we provide **an application to help you select spare parts**, available on the App Store and Google Play (LES ROBINETS PRESTO), as well as **maintenance videos on YouTube** (@GroupePresto).

VANDALISM IN TRANSPORT FACILITIES

To tackle this recurring problem, the authorities and transport operators are stepping up security measures and working on prevention and deterrence solutions in partnership with local players. They are also sharing experiences with other countries that have fallen victim to the same phenomenon.

**PRESTO ALPA®**

The concealed shower mixer with vandal-resistant front panel with its ¼-turn lock and concealed screw.
