

YOUR **ECO**NOMICAL SOLUTION FOR YOUR **ECO**LOGICAL NEEDS!

Whether your project requires a vine screen on a wall or a free-standing installation, the Omega ECO System is just as customizable as any of Omega II Fence Systems options. The durable 6-gauge pre-galvanized welded wire mesh panels are powder coated any color you would like and can hold up to more aggressive vines. Not sure which vines to use? Check out our interactive recommended plant list provided by Monrovia. Our rigid panels can be cut down or stacked to accommodate any space. Want to use the Omega ECO as an architectural design until the vines fill in? No problem! We can weld a frame around the panels to give it a more “finished” look. Contact us today to see how the Omega ECO System can be used on your project!
