Manufacturer of demountable partitions

ABCD International has been designing and marketing demountable office partitions, phone booths and meeting boxes since 1980.

Their comprehensive range of products thus makes it possible to meet the aesthetic and regulatory technical requirements (CERFF, acoustic, fire rating...) of most architectural projects.

With 580 000 sqm sold each year, both in France and abroad, ABCD International has earned itself a reputation as a leader in office layout design.

Office partition fit-out

Created in 2000, SOBAC Cloisons offers supply and installation in the office partition fit-out projects. With more than 70 000 sqm of demountable partitions installed every year, SOBAC Cloisons :

- Provides commercial, technical and administrative assistance until the project completion.
- Defines the team dedicated to the project depending on the type of works and the project schedule.
- Benefits from ABCD International's stock capacity (more than 100 000 sqm of walls in permanent stock), buying department and responsiveness to respect production and delivery time of the projects.

The strength of our story, the energy of our collective.

For more than 45 years, ABCD International has been designing, manufacturing and distributing more than 16 systems of demountable office partitions. More than 200 valid certificates (CERFF, acoustics, fire-rating, guardrail) attest to the quality of our products.

SOBAC Cloisons study every project specification, plan their actions and implement their solutions in accordance with standards and norms in force. SOBAC Cloisons advise on the most appropriate material to achieve the desired acoustic performance and aesthetic, technical and financial requirements.

Besides, as an active member of the Building Industry, ABCD International has been focusing for the past 15 years on a sustainable development-oriented strategy.

This commitment not only concerns the design and manufacturing of our partition systems, it also aims at improving our employees' environmental awareness.

In 2024, we launched the "Remake" program by ABCD International which involves carefully dismantling and re-conditioning ABCD partition systems during a site clearance.

Then, we carry out the sorting, cutting of materials, and waste recovery in our reuse workshop (located close to our Headquarters, in a more than 1 700 m² warehouse).

Finally, the re-used partitions are installed with a warranty aligned with that of our new products.

The ABCD International Group operates across multiple locations :

- The headquarters, spread over two buildings of 10,000 m², located 20 km south of Paris.
- The Remake workshop close to ABCD headquarters, over 1,700 m².
- The Rhône-Alpes branch, 1,000 m² near Lyon.
- The PACA branch, 1,200 m² near Avignon.

These facilities offer ABCD International and SOBAC Cloisons ideal locations to :

- Showcase, in their permanent showrooms, their partition solutions, autonomous pods, and the latest innovations.
- Offer their clients a comprehensive range of aluminum profiles, plasterboard panels with vinyl or metal cladding, melamine panels, with raw edges or edge-banding finish.
- Distribute trade products such as melamine panels, insulation, hardware, glazing, blinds, etc.
- Provide partition reuse solutions through the "Remake" program.
