

Why Tamper with Your Time?

Ames Integrated Tamper Switch Eliminates Install Delays

Now Available
Pre-Installed on
Backflow Assemblies

Factory Installed and Tested

Continuous Monitoring Via BMS

Save Time

Select Ames backflow preventers now come with factory integrated, UL/FM certified, fire tamper detection. This will eliminate the hand-assembly, manual field installations, and opportunity for error associated with installing aftermarket tamper (supervisory) switches on existing backflow preventers.

 How to Buy

Be more efficient with your time

Stay Connected

Continuously monitor your valve for fire tampering through your BMS system

All-in-One Purchase

Purchasing a backflow preventer with a tamper switch already installed means one less purchase to deal with

No More Headaches

Having fire detection already installed and calibrated means less frustration in the field

Specification and code requirements state that all fire systems need to have a fire tamper switch. Choosing one of our Ames backflow preventers with integrated fire tamper detection will help you save time by eliminating the need to install a separate tamper (supervisory) switch yourself.

- ✓ Select Ames backflow preventers ship from the factory with integrated fire tamper detection.
- ✓ Skip the frustration of having to install a fire tamper switch yourself.
- ✓ Alarms if the tamper switch is removed from the valve or if valve closes
