The intent of this document is to highlight the details, components and partners used in the creation of this office. Any reference herein to any specific commercial products or service does not necessarily constitute or imply its endorsement or recommendation.

New York Look Book

Designing the office for the Hybrid World

Spanning 59,000 square feet (5,481 square meters) in the heart of midtown Manhattan, Cisco’s New York City Talent and Collaboration Center is designed specifically for the realities of hybrid work. Over 70% of the usable square footage is dedicated to collaboration, including over 90 video-enabled spaces specifically designed for collaboration, learning, and socializing.

Built on a Power over Ethernet (PoE) foundation, 100% of the lighting, shading, and environmental controls are connected to the network, allowing us to achieve new levels of manageability, breakthroughs in health and wellness, as well as contributing to Cisco’s corporate goal of reaching net zero across all Scope 1, Scope 2, and Scope 3 emissions by 2040.

Most importantly, when combined with other technology elements, such as Cisco networking, Cisco collaboration devices, Meraki Cameras, and Cisco Spaces, the NYC Talent and Collaboration Center is a digital real estate platform that continues to delight employees and visitors alike.

Enabling Technology

Networking Elements

The Cisco Catalyst 9400 Switch provides connectivity for IT elements (video devices, wireless APs, IP Phones, smart cameras, etc.).

The Cisco Catalyst 90 watt UPOE+ 9300 stackable switching platforms is used to connect and power OT/smart building components (lighting, shading, thermostats, sensors, etc.).

The Cisco Catalyst 6E-compliant Wireless Access Points (APs) provide secure network connectivity for employees and guests.

Built-in temperature, humidity, and air quality (TVoC) sensors provide additional data on environmental performance.

Cisco Catalyst 9300 Switch

Cisco Catalyst 9400 Switch

Cisco Catalyst 9166 Access Point

Enabling Technology

Cisco Video Devices

Cisco Room Bar

Integrated video conferencing system for small rooms

Cisco Room Bar Pro

Dual-camera integrated video conferencing system for medium rooms

Cisco Room Kit EQ

An AI-powered collaboration solution for large collaboration rooms and boardrooms

Cisco Room Kit Pro

A powerful and flexible room device bundle for very large rooms and custom AV integration scenarios.

Cisco Board Pro G2

Interactive collaboration board available in 55" and 75" screen sizes

Cisco Room Kit EQX

Powerful dual-screen collaboration system with integrated sound system

Cisco Desk Pro

Studio-quality desktop collaboration with a 27" screen, used in Quiet Rooms

Cisco Desk

All-in-one desktop collaboration device with a 24" screen, used on hot desks

Cisco Desk Mini

Desktop collaboration system with a 15" screen, used in video booth and banquettes

Cisco Ceiling Microphone Pro

Intelligent beam-forming mic, easy-to-deploy and gives great room coverage

Cisco Table Microphone Pro

Advanced beamforming table microphones.

Cisco Room Vision PTZ

Premium pan-tilt-zoom

Enabling Technology

Room Signage

Bookable Rooms

Cisco Room Navigator for Wall – through its integration with the O365 Calendar – enables seamless room booking, calendar view, meeting information, and meeting extension with a few taps on the touch screen.

Available

Booked (not yet occupied)

Occupied

Adhoc Rooms

Using the presence and people counting capabilities of the Cisco Collaboration Devices, the Cisco Room Navigator changes the LED light and display based on occupancy (green for available and red for occupied).

Available

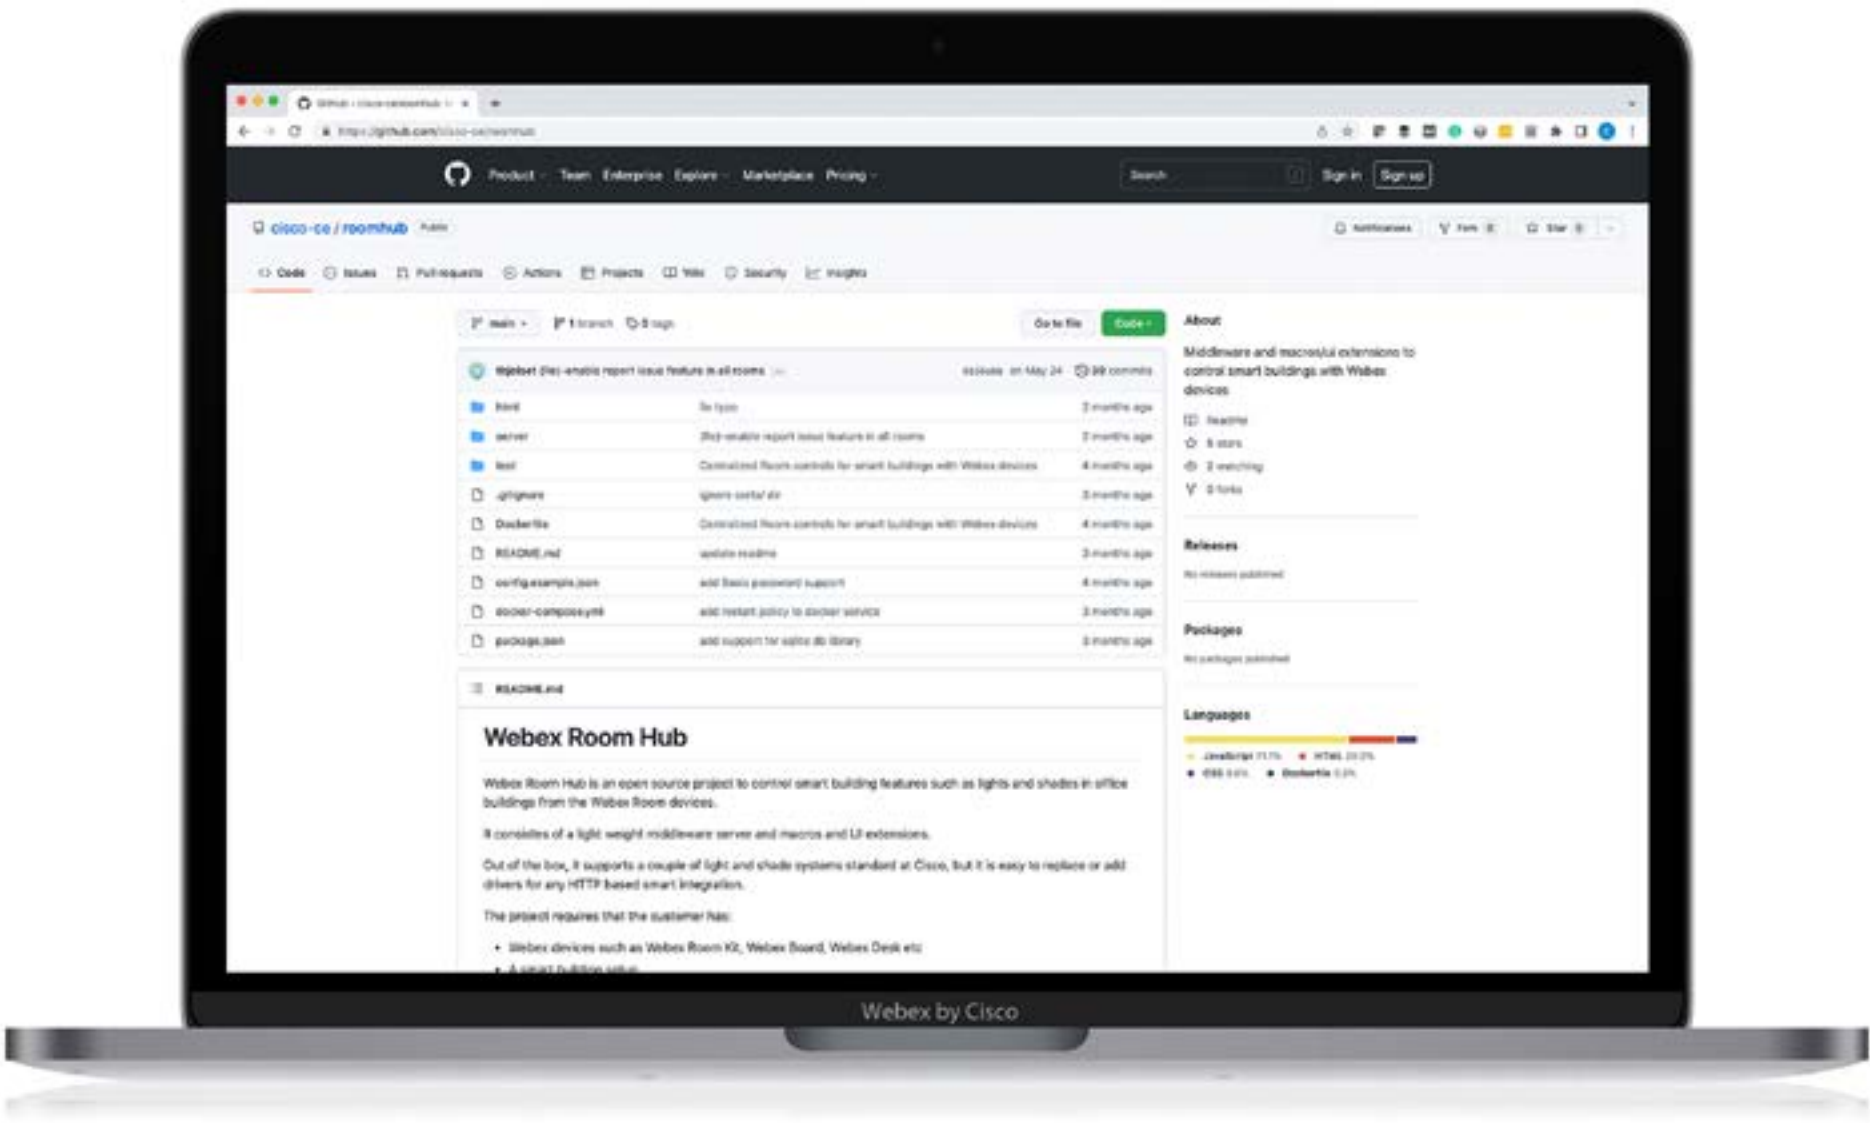

Occupied

Enabling Technology

Building System Integration

Leveraging the open APIs available from the smart building systems and the UI Extension feature within the Cisco collaboration devices, custom buttons are available on the Cisco Board Pros, Cisco Desk/Desk Pros, and the Cisco Room Navigator for Table to control lights and shades in the collaboration spaces.

These capabilities are also available via voice command in selected rooms using Webex Assistant (“Hey, Webex, tell the room to lower the shades”). The integrations leverage the openness of the smart building APIs and the Cisco collaboration devices and do not require using any third-party control systems (Crestron, AMX, etc.). They are now available on GitHub for download and use.

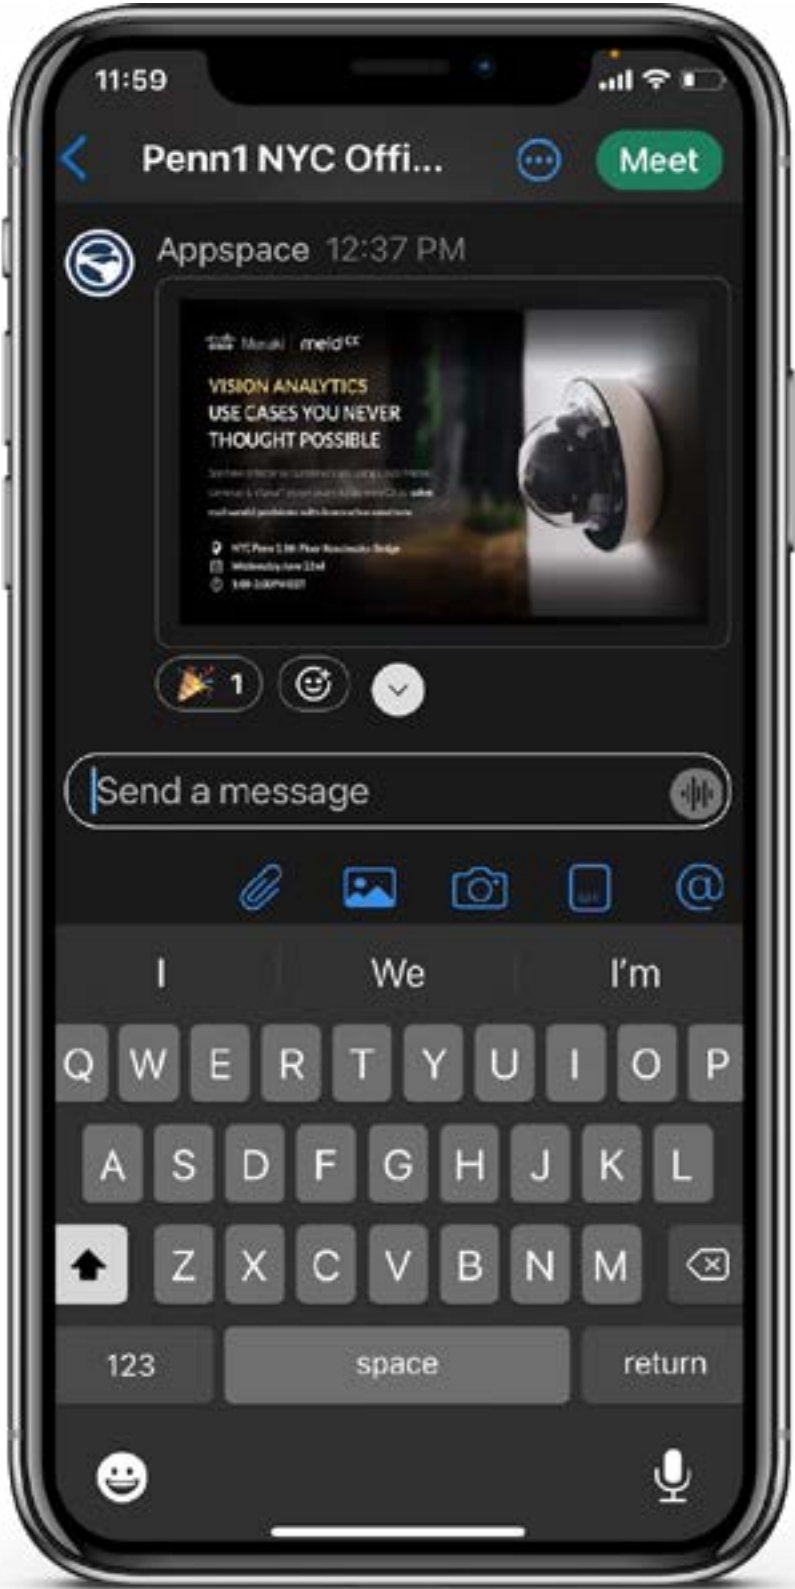

Enabling Technology

Digital Signage

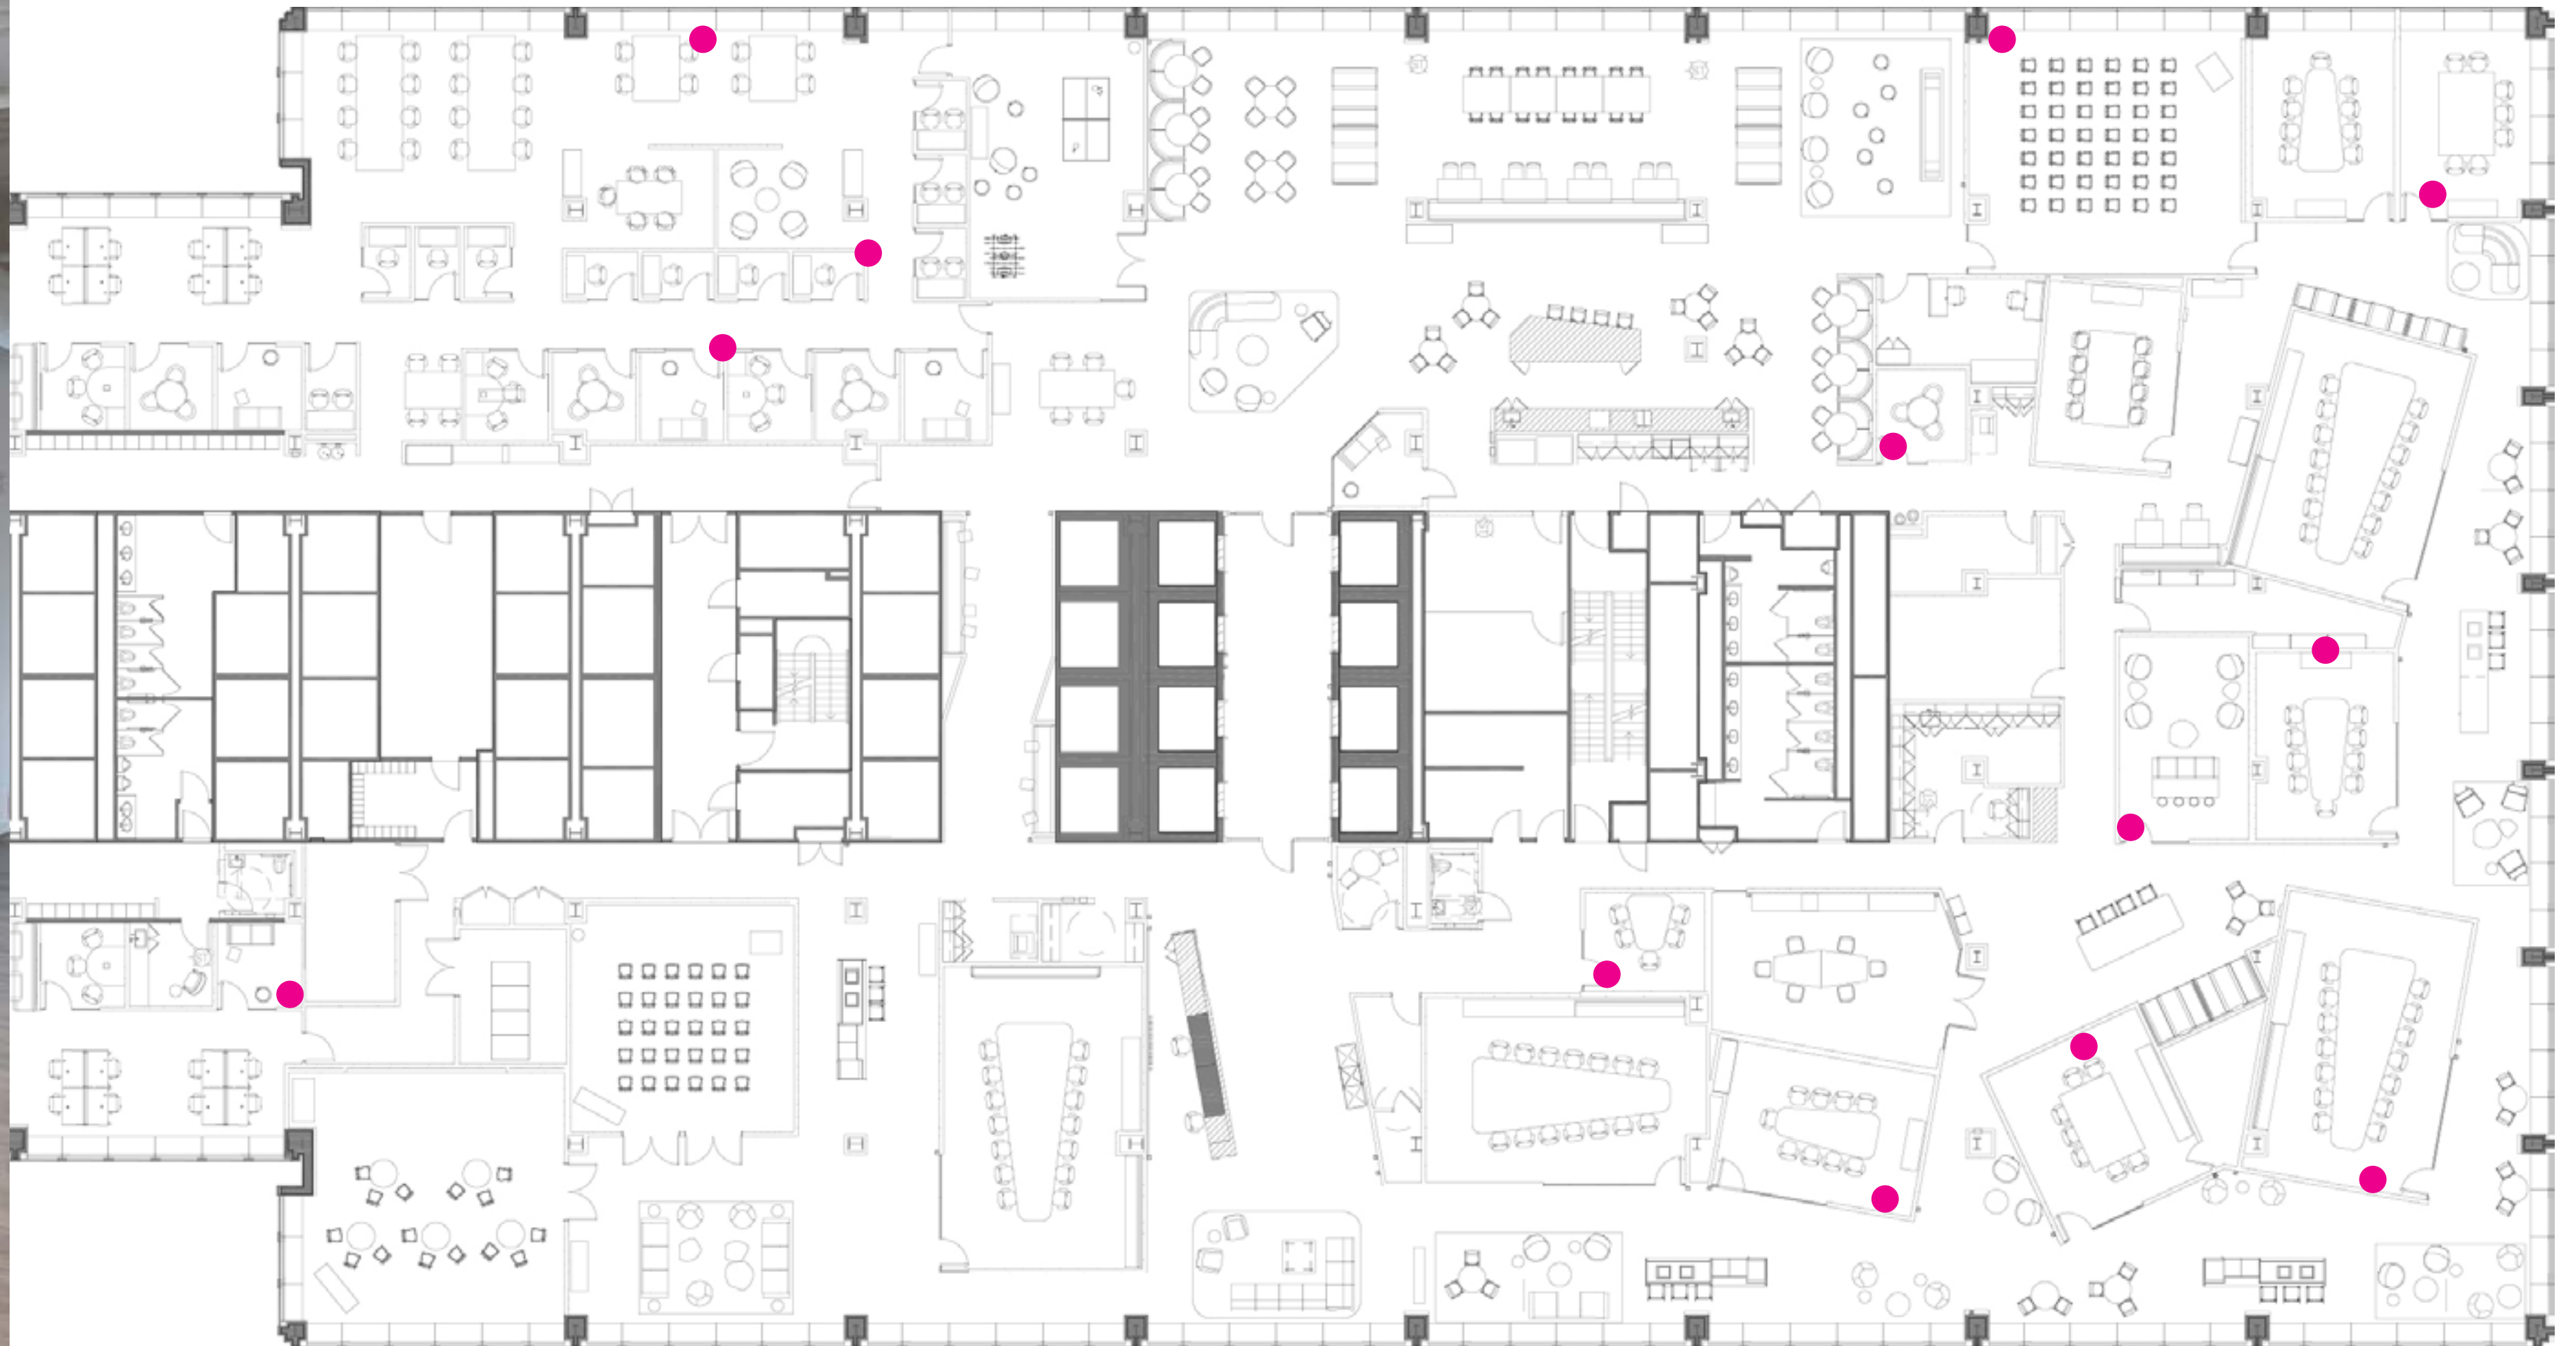

Appspace Digital Signage
on LG 55” Display

Simultaneous display of
local office signage within
the Webex app,
via Appspace bot.

Traditional Huddle Room

Overview

Making it easy for small groups to come together to share information, brainstorm, and solve problems is absolutely critical. In this office, we've replaced personal offices with dozens of huddle rooms and smaller collaboration spaces, each designed for this exact purpose. All of these spaces are video-enabled, ensuring the right resources can come together, regardless of where they are.

The Traditional Huddle Room is the perfect space for small group collaboration, especially when you need to bring in that important remote participant. Wireless sharing allows you to display content effortlessly in local and virtual meetings.

Features

Training Room

Overview

Designed for delivering true hybrid learning events, this training room leverages three large displays, multiple cameras, and Cisco's "Classroom" mode to provide an unparalleled experience to all participants. The solution supports multiple learning scenarios, including local presenter to a local audience, local presenter to a local and remote audience, remote presenter to a local and remote audience, and discussion mode. In the meeting, whiteboarding and annotation are supported by the Cisco Board Pro operating in Companion Mode.

Features
