INTELLIGENT POLE BASE

More Than Just a Block
of Concrete

www.intelligentpolebase.com

Amenity Storage at Every Pole.

House advanced, technological components used to power service amenities such as video displays, security cameras, WiFi, car chargers, and more.

*Technology is changing the world...
...what used to be ordinary, has been reimagined.*

This simple, yet innovative light pole base has endless, untapped potential for storing future technology.

By creating a physical space where none existed before, coupled with the structure to support lightpoles, the infrastructure for current and future technology is born.

More Amenities = More Revenue

The Intelligent Pole Base is compatible with virtually all industry technologies and equipment allowing you to customize your light poles according to your needs today, and tomorrow.

Add value to property

Studies show that amenities like EV Charging, WiFi, security presence, and music create loyal customers and increase traffic. This adds value to any property.

Create a profit center

IPB's installed throughout your parking lot generate profits through Digital Advertising and EV Charging.

A more attractive lot

Our base hides unsightly installations of technology by eliminating add-on boxes, allowing you to offer your visitors the most aesthetically-pleasing lot experience possible.

Future technology

Who knows what the future will bring. As new technology becomes available, the Intelligent Pole Base provides a secure location for future tech.

External Boxes?

Intelligent Pole Base?

How would *YOU* prefer to add technology?

What is the Intelligent Pole Base?

The Intelligent Pole Base is a weatherproof housing offering flexibility, power, and add-on options, while maintaining the structural strength and integrity required to support light poles up to 30 feet or more.

Our IPB system is compatible with virtually all the industry technologies and equipment, allowing you to customize your light poles according to the needs of today, and tomorrow.

Structurally Engineered

Designed to be used with any pole, at any location

Steel Structure and Skin

Steel structure with fully plated & triple-coated epoxy paint finish

Water Resistant

Our non-vented door version creates a NEMA 3R weather resistant cabinet

Safe & Secure

Double-pin latching deadbolt keeps electronics protected

Thermal Protection

Vents, fans, cooling & heating options available to provide an optimal environment for your critical electric components

Before

After

Before

After

Electric Vehicle Charging

The Intelligent Pole Base allows property owners to add electric vehicle charging stations that can be disbursed throughout parking areas, rather than being limited to a bank of chargers in a single, inconvenient location.

Drives Cost Efficiency

Increased utilization of parking lot

Increases Revenue Generation

Become a destination area and charge \$/kwh

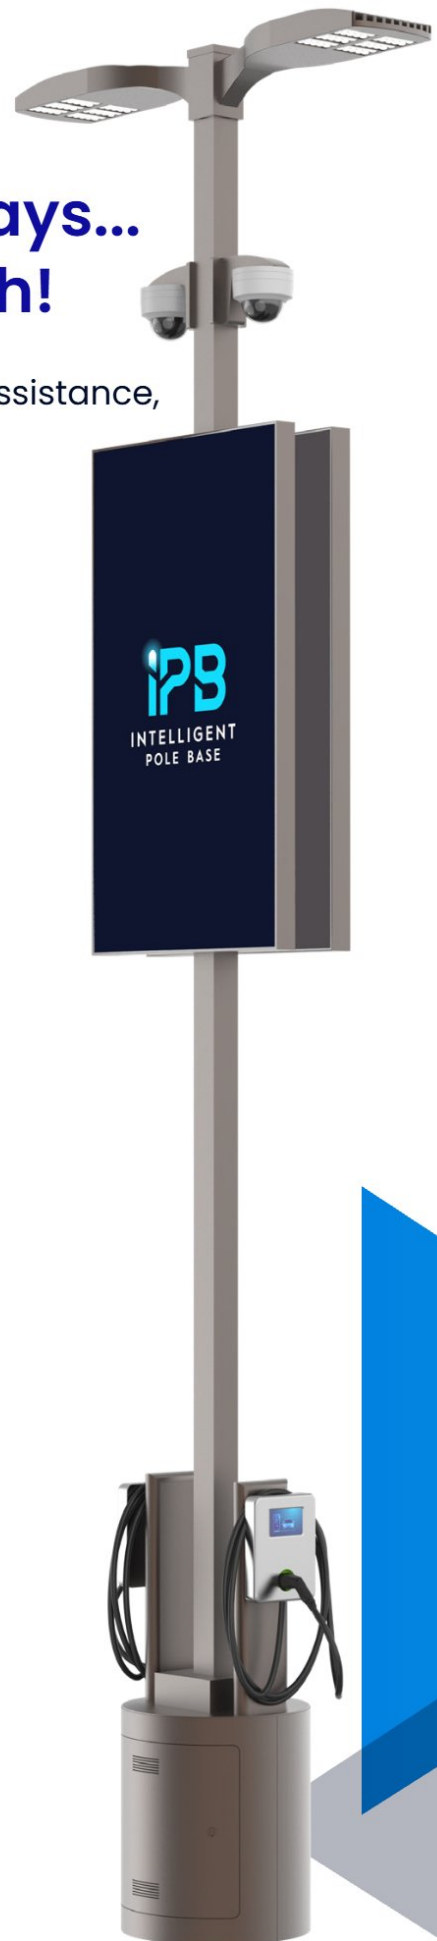

Maximizes Number of Chargers

Up to 4 vehicles per pole with chargers distributed throughout the lot

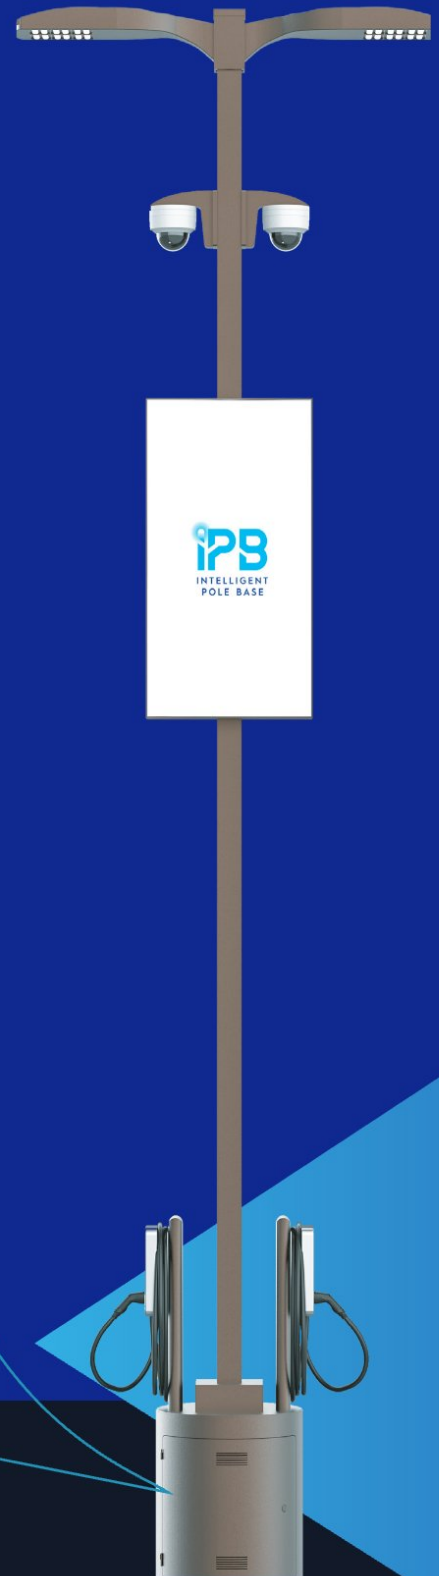

IPBs & Digital Displays... ...a perfect match!

For advertising, directions, parking assistance,
branding, and much more.
