Inside-Sash Retainer System

Our In-Line, Factory Pre-Installed Retainer System allows for seamless integration of glass or other inserts. Allowing for thicknesses between 3/16" and 15/16" this inside-sash retainer system provides a seam-sealed, flush installation ready for your choice of insert.

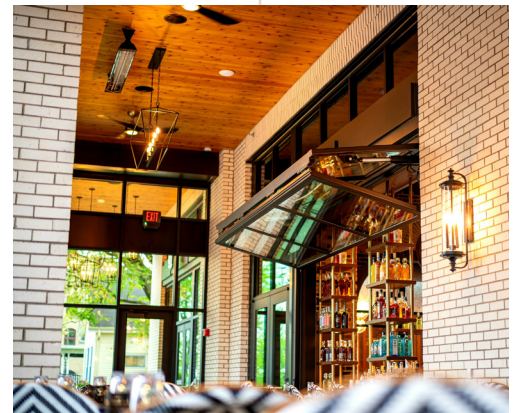

Glass in almost any variety is the most common insert. However, our customers often select other materials such as decorative, insulated paneling, or wood. With few exceptions, the sky is the limit.

The Inside-Sash Retainer System consists of factory pre-welded and seam-sealed exterior stops and factory pre-mounted interior stops. An integrated part of the panel system, our Inside-Sash Retainer System is factory powder-coat finished per customer specifications.

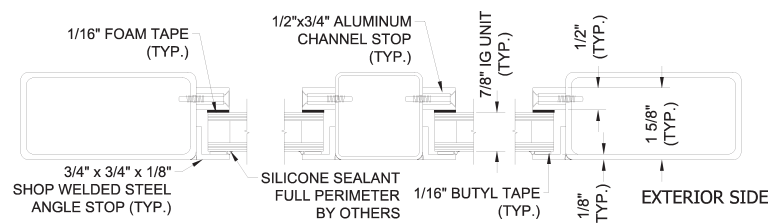

KEY FEATURES

- Factory pre-installed
- Fully integrated into system panel(s)
- Supports insert thicknesses between 3/16" and 15/16"
- Powder-coat finished to match system frame and operable panel(s)
