PIRNAR'S

HERITAGE

We take pride in our heritage. From our initial steps in the family workshop onward, we are driven by a passion for creation and a commitment to excellence in design and craftsmanship that has been passed down through generations. We continuously enhance our expertise and combine it with modern technologies. Strong roots maintain our connection to tradition, while courage and boldness push the boundaries of possibility, guiding us to new successes. With a clear vision and an innovative approach, we exceed expectations and set new milestones globally in the realm of building furnishings.

* The RC2 package is standardly available for inward opening single-leaf door configurations with a solid door leaf, sizes up to 1250 x 2400 mm, without toplights or sidelights. For designs with glass in the door leaf featuring sidelights, toplights, or separate sidelights, the RC2 package is available as an additional option.

EXCEPTIONAL SIZES

CarbonCore construction allows Pirnar's entrance doors to embellish majestic villas, castles, and masterpieces of contemporary architecture. With an impressive height and width Ultimium models together with side elements, create an impression of stunning grandeur.

CONCEALED HINGES

Concealed hinges are an important aesthetic and security element on Ultimium entrance doors with CarbonCore construction. The elegant black finish and alignment with the door leaf complement exceptional robustness and durability, allowing concealed hinges to also serve as a security bolt.

SEALING MAGNET WEATHERSEAL

CarbonCore features advanced sealing with Magnet WeatherSeal, giving the doors an outstanding water-tightness rating of 9A in testing laboratories. This ensures complete water-tightness, even under pressure from winds at speeds of up to 114 km/h (600 Pa). This represents a sixfold higher load than what regular entrance doors can withstand.

RECOMMENDED SOLUTIONS FOR ENHANCED SECURITY AND EASE OF USE

(REFER TO CATALOG FOR DETAILS)

FINGERPRINT READER

This modern and popular method of unlocking doors with a fingerprint reader ensures enhanced security and, above all, a simpler and more comfortable entry for your entire family, as it allows you to store fingerprints of multiple selected individuals simultaneously. Forget about keys and concerns.

SECUROSART KEYPAD

The modern keypad allows for unlocking with various PIN codes tailored to specific needs and unlocking with an NFC card. It features a fingerprint reader and doorbell, managed via the Pirnar mobile app.

SMART MANAGEMENT SECUROSART

The smart SecuroSmart system in the Pirnar mobile app boasts outstanding functionalities for easy and secure door usage. Even if you are on the other side of the world, you can conveniently unlock your doors.

CONCEALED HINGES

Concealed hinges are a vital security element of Pirnar's entrance doors, characterized by exceptional robustness and long-term durability. They not only provide an elegant appearance but also function as a security bolt that effectively prevents the lifting of the door or its forcible removal from the frame.

* The RC2 package is standardly available for inward opening single-leaf door configurations with a solid door leaf, sizes up to 1250 x 2400 mm, without toplights or sidelights. For designs with glass in the door leaf featuring sidelights, toplights, or separate sidelights, the RC2 package is available as an additional option.

TIMELESS ELEGANCE & EXTRA PROTECTION

MARINE & NERO EDITION

NERO EDITION

The Nero Edition package is a collection of sophisticated accessories for entrance doors in an aesthetic black finish. Pull handles, lever handles, protective trims, and even the smallest details, such as glazing frames and cylinder protection, are aesthetically refined with a black powder coating application, while also being additionally protected against corrosion.

MARINE EDITION

The Marine Edition is a collection of accessories for entrance doors that have been additionally processed using powder coating technology. They are the ideal choice for doors in coastal areas. Pull handles, lever handles, protective trims, and even the smallest details, such as glazing frames and cylinder protection, are aesthetically complemented and further protected against corrosion.

UNIQUE PERSONALIZATION OPTIONS

EXCEPTIONAL PULL HANDLES

The pull handle is one of the most personal elements of a door. Every resident touches it at least a thousand times a year, which is why Pirnar dedicates considerable attention to it. Each model features a selection of basic shapes, either round or angular, with an exact length specified. To create the best impression and personal touch, we have developed several series of unique illuminated pull handle upgrades that utilize patented technology and have been awarded the prestigious international German Design Award Special 2019.

LENGTHS OF ROUND AND ANGULAR PULL HANDLES

For additional information about the full range of available pull handles and lighting upgrades, please consult our sales staff.

GLASS

With a rich selection of premium decorative glazing from Pirnar's glassworks, you will elevate the appearance of your entrance.

HANDCRAFTED

Traditional glassmaking technique

The stained glass, adorning the magnificent windows of Europe's most beautiful cathedrals, is a popular choice in Classico door models. It is crafted with dedicated precision by Pirnar's artisan masters using traditional techniques.

FULL
RANGE
OF GLASS

DECORATIVE TEMPERED GLASS

Decorative tempered glass offers greater safety and, in various colours with both shiny and matte finishes creates a refined, minimalist, and glamorous look on modern entrances.

 NIGHT SKY MATTE Black tinted surface without a pattern on fine-matte glass.	 NIGHT STORM MATTE Elegant black-and-white striped pattern on fine-matte glass.	 AFRICAN MYSTERY MATTE Striped pattern in black-copper colour on fine-matte glass.
 NIGHT SKY GLOSS Tinted surface without a pattern on glossy smooth clear glass.	 NIGHT STORM GLOSS Elegant black-and-white striped pattern on glossy smooth clear glass.	 AFRICAN MYSTERY GLOSS Striped pattern in black-copper colour on glossy smooth clear glass.

SINTERED STONE

For selected models in the Premium, Ultimium Pure and Ultimium Multilevel lines, sintered stone can be chosen as a surface finish – available in seven curated designs.

CREATING AMBIANCE WITH
ELEGANT LIGHTING

SMARTLUX

Pirnar's solutions for creating a comfortable atmosphere facilitate the management of lighting for entrance doors at thresholds, pull handles, or lever handles. With the smart SmartLux system in the Pirnar mobile app, you can adjust the intensity, colour, temperature, and timing of the lighting. Manual control of the light remains an option, allowing you to modify the intensity, colour, and temperature of the illumination.

Time setting for LED lighting

Voice control with integration of Google Assistant and Amazon Alexa

Wi-Fi and Bluetooth connectivity

Temperature control of led light intensity from 2700 Kelvin (warm white) to 6500 Kelvin (cool white)

Remote management

The SmartLux system is compatible with many popular smart home solutions.

* The led lighting for the entrance doors is exclusively available as part of a package; individual lighting elements cannot be ordered separately. If you choose not to use specific lighting, you can easily turn it off using the Pirnar mobile app.

UNMATCHED THERMAL AND ACOUSTIC INSULATION

SOUNDCORE

THE BEST SOLUTION FOR HOMES IN URBAN AREAS.

SoundCore is premium sound insulation for residential houses in urban environments, featuring a filling density of 900 kg/m^3 in the door leaf. In combination with superior sealing, it reduces the sound load in living areas by more than 18 times compared to fully open doors. The intensity of sound passing through the entrance doors is significantly reduced compared to values found in standard entrance doors.

THERMOCORE

EXTRAORDINARILY LOW THERMAL TRANSMITTANCE VALUES,
SUITABLE FOR PASSIVE CONSTRUCTION.

ThermoCore is premier thermal insulation for residential houses and passive construction, with significantly higher thermal insulation properties. Exceptionally thin panels made of glass nano fibres, combined with other insulating materials, contribute to reduced energy consumption and additional savings on heating. Thermal insulation is improved by nearly 20 % compared to standard doors.

SUPREMECORE

THE ONLY ONE ON THE MARKET THAT OFFERS OUTSTANDING
THERMAL AND ACOUSTIC INSULATION SIMULTANEOUSLY.

SupremeCore is premium insulation for residential houses that boasts record values for both sound insulation and thermal transmittance. Innovative insulation panels for sound and heat, combined with other materials, create solid doors with exceptional soundproofing qualities and the lowest possible thermal losses. With excellent sound insulation, you do not compromise on thermal transmittance.

WARRANTY

Pirnar aluminium entrance doors come with a 10-year warranty – a clear commitment to quality, durability, and a peace of mind. This extended cover protects your investment and reflects the outstanding performance of every Pirnar entrance door.

10 years:

- Door functionality
- The durability of the powder-coated aluminium surface of the doors, including resistance to cracking, peeling, and excessive fading of the coating under normal environmental conditions

5 years:

- For the airtightness of thermal insulating glass
- The visual consistency of the glass with the EN 1279:2018 standard

2 years:

- For issues pertaining to the performance of the door's built-in hardware (lock, cylinder, handle, self-closing mechanism, handles)
- For the performance of electronic components

The full warranty terms and conditions can be found at www.pirnar.co.uk.
