

# SIMES

Novelties 2024

The dream of light that Simes has been pursuing since its foundation takes on new facets every year, resulting in a series of proposals that mark small milestones and at the same time open the way to new scenarios. These are not only solutions that are useful and functional for the designer's needs, but also glimpses of the future of a world in constant and rapid evolution, where progress goes hand in hand with the values of RESPONSIBILITY AND SUSTAINABILITY.

This assumption presents us with ever new challenges which, in the world of lighting, are reflected in a series of cornerstones of strategic importance.

**LIGHT CONTROL AND MANAGEMENT** is now a prerequisite for the development of all new products. Awareness of the need to provide light where and how it is needed, by dimming the amount of light and controlling its activation dynamically, in time and space, saves energy and improves visual comfort.

The converting process of ON-OFF products into DALI products, which began a few years ago on the entire SIMES portfolio, has been confirmed by an ever-increasing awareness and all the new products presented here have been designed with remote control in mind.

**THE COLOUR OF LIGHT**, in the RGB field, but especially in the field of white control, has become an issue closely linked to well-being, respect for the environment and biological rhythms. Offering Tunable White solutions is no longer the prerogative of interiors only, but is also becoming increasingly important for outdoor applications.

The performance of new LEDs now makes it possible to far exceed the actual illuminance required for visual and design purposes. Hence the decision to maintain adequate flux and illuminance levels, but to increase EFFICIENCY by reducing current levels and consequently extending the life of the LEDs.

Once again, the upgrading of light sources will affect many of the families in the Simes catalogue. Among the new products, POINTER and TRATTO fully exploit the potential of the new LEDs to offer powerful, precise and efficient spot and wallwasher lighting solutions.

The 2024 innovations cover a wide range of applications, but are united by an important constant that can be summarised by the term FLEXIBILITY. Interchangeable beam shaping filters, digital beam, adjustable optics, modularity, are some of the concepts that have guided the development of 4 new families that are capable of interpreting the direction that Simes has chosen.

# Shift

Bollard and Urban lighting

[www.simes.it/shift](http://www.simes.it/shift)

# SHIFT

Shift is a family of bollards and urban elements of great elegance and aesthetic cleanliness, integrating adjustable DALI spotlights into the cylindrical shape of the poles.

Each spotlight is housed in a head that can be independently controlled and freely rotated on its axis. It can be locked in the desired position by means of a locking mechanism. The spotlights integrated into the head can be tilted horizontally to a maximum of 90° to direct the beam downwards or pushed forward to cover greater distances.

The head can also be turned upside down. This additional degree of freedom also allows the beam to be directed upwards, for example to illuminate a walkway and an adjacent wall with the same fixture.

The bollard and the urban element are available with 1 head, but they can be upgraded up to 2 additional heads. Particularly suitable for parks, squares, cycle paths and pedestrian areas, it allows 360° coverage of the area to be lit, thanks to the combined use of several heads with large beams, distributed in the desired direction.

## TECHNICAL DESCRIPTION

Extruded aluminium profile (pole), die-cast aluminium housing (top and lighting element) with high corrosion resistance. Transparent extra-clear toughened glass diffuser 5mm thick. Stainless steel Allen screws with insulating treatment against galvanic corrosion. Luminaire supplied with 2 x neoprene H05RN-F cables and connectors for multiple head connections. Double powder paint.

# Pointer

Spotlight

[www.simes.it/pointer](http://www.simes.it/pointer)

# POINTER

Pointer is a family of high performance projectors available in three sizes, with Spot and Superspot light beams and a wide range of internal and external filters and accessories to modify the beam, offering a wide range of solutions.

It expresses the synthesis of the essential characteristics of a professional spotlight: design, strength, precision, visual comfort, high efficiency and luminous flexibility.

Pointer is available in all three sizes in White, Tunable White or RGBW versions for maximum design freedom.

MiniPointer is also available with DIGITAL BEAM optics. This version uses LensVector™ technology to digitally control the shape of the light by modulating the beam directly from mobile devices or advanced control systems.

The SLIM version of the Pointer is an even more compact alternative and is equipped with a monochrome LED and DALI power supply.

## TECHNICAL DESCRIPTION

Die-cast aluminium housing with high corrosion resistance. Clear polycarbonate lenses. Transparent extra-clear toughened glass diffuser: 5mm MINIPONTER, 6mm POINTER, 8mm MEGAPOINTER. Stainless steel Allen screws with insulating treatment against galvanic corrosion. Silicone gaskets. Double powder paint.

**MINIPONTER, POINTER AND MEGAPOINTER**  
Luminaire supplied with neoprene 0,5m H05RN-F cable and connector.

**POINTER RGBW AND MEGAPOINTER RGBW**  
Luminaire supplied with neoprene 0,5m H05RN-F cable and connector + N°2 DMX 0,5m cables and connectors.

With 60° Filter

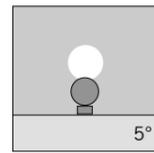

With 60° x 10° Filter

## Interchangeable filters

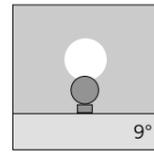

The Pointer has remarkable light flexibility thanks to the use of interchangeable filters that can modify the shape and width of the beam.

The optical system has been designed with hinges and anti-loss screws to allow filters to be easily replaced or added. The honeycomb accessory shields the source when maximum visual comfort is required and is also fitted inside the optical compartment, in a protected position between the source and the glass.

### Brackets for pole installation

MiniPointer 175, Pointer 255, MegaPointer 390 can be installed on a pole using anchor brackets.

**S.1084**

#### **BRACKET FOR POLE Ø 60mm INSTALLATION**

Bracket in die-cast aluminium for MiniPointer 175 and Pointer 255, suitable only for Ø 60mm poles. The Bracket can be used for maximum 2 projectors, one for each side.

**S.1085**

#### **BRACKET FOR POLE Ø 76mm INSTALLATION**

Bracket in die-cast aluminium for MiniPointer 175 and Pointer 255, suitable only for Ø 76mm poles. The Bracket can be used for maximum 2 projectors, one for each side.

**S.1018**

#### **BRACKET FOR POLE Ø 102mm INSTALLATION**

Bracket in die-cast aluminium for MiniPointer 175, Pointer 255 and MegaPointer 390, suitable only for Ø 102mm poles. The Bracket can be used for maximum 2 projectors, one for each side.

**S.1239**

#### **BRACKET FOR POLE Ø 120mm INSTALLATION**

Bracket in die-cast aluminium for MiniPointer 175, Pointer 255 and MegaPointer 390, suitable only for Ø 120mm poles. The Bracket can be used for maximum 2 projectors, one for each side.

# Tratto 50

Adjustable linear spotlight

## TRATTO 50

Tratto 50 is a family of linear tiltable projectors available in three lengths and equipped with monochrome LED circuit or RGB+WW.

Tratto 50 is particularly flexible thanks to its connection system, which allows the body of the luminaire to slide and to be configured according to the context and the surface to be mounted.

In fact, its support arms slide in special grooves provided in the body of the luminaire and can be locked at any point along its length. These grooves are located both on the bottom and on the side of the linear body. This important detail allows the supports to be anchored in two different ways, transforming Tratto 50 from a floor-mounted projector to a wall-mounted projector.

The visor accessory and special boxes for dimmable power supplies and DMX systems complete the family.

### TECHNICAL DESCRIPTION

Die-cast and extruded aluminium housing with high corrosion resistance. Clear polycarbonate lenses. Transparent extra-clear toughened glass diffuser 5mm thick. Stainless steel Allen screws with insulating treatment against galvanic corrosion. Silicone gaskets. Double powder paint.

# STICK

Stick is a family of cylindrical bollards with a simple and essential design, characterised by perfect uniformity of light all round. Available in three different sizes, each in two versions, single and double emission, Stick is particularly suitable for residential areas and guarantees a diffuse and homogeneous light beam. In the double emission version, the opening of the light beam is designed to cover the entire space around the pole at 360°.

The Stick family, for its aesthetic and dimensional characteristics, completes the Microlighting collection designed to enhance outdoor residential spaces.

## TECHNICAL DESCRIPTION

Extruded aluminium profile, head and base in die-cast aluminium with high corrosion resistance. Opal resin diffuser (MINISTICK). Prismatic micro-sandblasted extra-clear toughened glass diffuser (STICK). Stainless steel Allen screws with insulating treatment against galvanic corrosion. Silicone gaskets. Double powder paint.

## MINISTICK

Luminaire supplied with flat cable 5,0m for remote connections.

## STICK

Luminaire supplied with neoprene 5,0m H05RN-F cable.

# Ikonic sensor

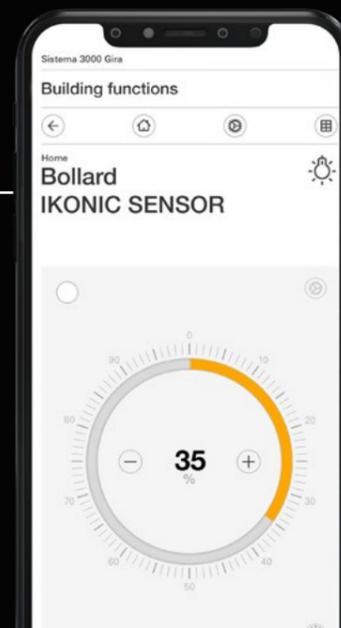

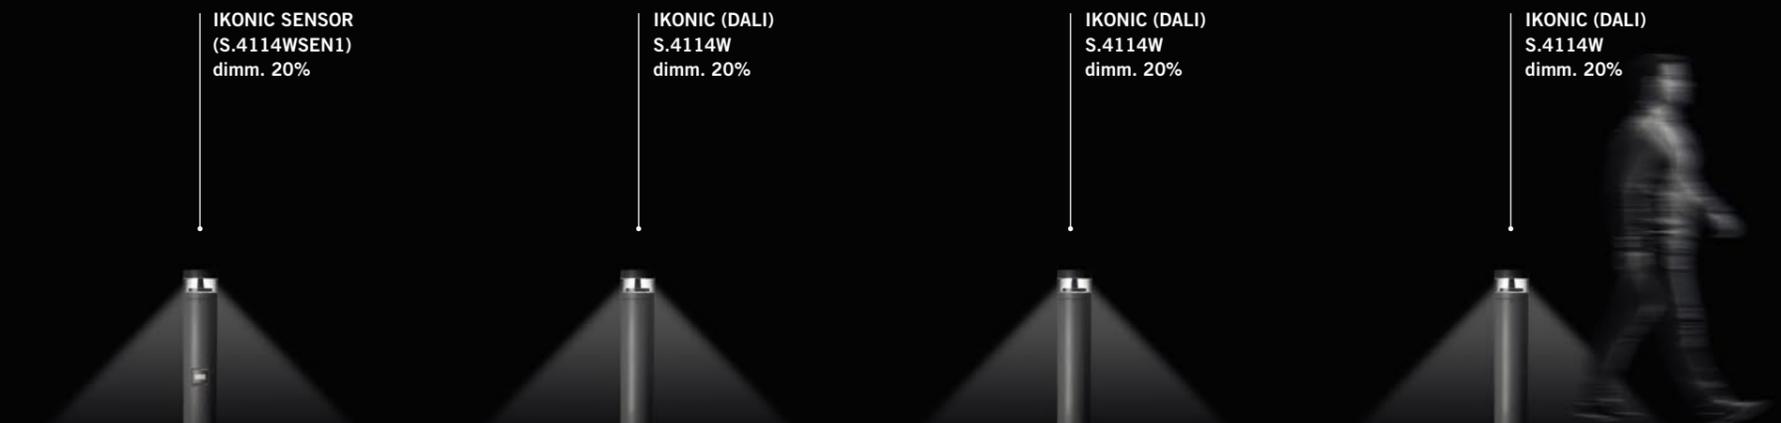

## Bollard with presence sensor

### STANDALONE DALI SENSOR CONNECTION DIAGRAM

The IKONIC SENSOR version (S.4114WSEN1) installed upstream of the system allows the lighting and setting of IKONIC BOLLARDS (S.4114W) to the movement close to the sensor (up to a maximum of 18 products in series). The settings of the product sequence connected to it can be set via a special APP.

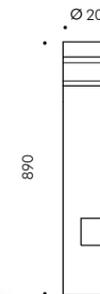

After the pre-set time (or with the detection of a possible second sensor placed at the end of the path) the bollards go back to their standby situation by decreasing or switching off the amount of light emitted.

Ikonic Sensor is equipped with **DALI STAND-ALONE** presence sensor IP44 (not interfaced to DALI home automation) and it switches on when something is detected. Through a specific APP it is possible to set the product on the desired amount of light.
