840 Stretcher Bed

Pre-op, Transport, Surgery, and Recovery
All on the same motorized bed

MTI®

Specialized Equipment
for Specialty Healthcare

Innovating to meet healthcare's biggest challenges

In the demanding world of specialty care, where your equipment can impact patient outcomes and caregiver satisfaction, you're challenged to provide top-tier care while using equipment you never have to think about; equipment that should simplify and enhance your practice.

MTI understands these challenges personally. We've spent over 27 years working hand in hand with medical and dental professionals, listening to what truly matters in your practice. Our products are designed and manufactured in the USA, with the guidance of caregivers like you, ensuring they meet the unique demands of your specialty. Today, our equipment is trusted in hundreds of thousands of care visits every day, a testament to our commitment to quality and innovation.

Designed for Accessibility & Safety

Becoming ADA Compliant is Easy with MTI

MTI has led the way in exam chair innovation for over 27 years, including ADA-compliant design and development, helping caregivers provide quality experiences to more patients. MTI has 11 specialty-specific exam chair models that comply with the enforceable 2017 U.S. Access Board's Standards for Accessible Medical Diagnostic Equipment (the "Standards").

17" – 19" Entry Height
Measured with upholstery uncompressed at the highest point on the transfer surface.

Transfer Support
Ambidextrous and meets all ADA requirements.

Critical Requirements

Some of the key requirements for an ADA Compliant examination chair are a 17" – 19" entry height, a transfer support, a 21"×17" transfer surface, and leg supports where stirrups are required. With your MTI chair, you can rest assured that these requirements are met. [1,3]

To help implement these standards, the IRS has issued Section 44 Disabled Access Credit (also known as the ADA Tax Credit), which may provide a tax credit of up to $5,000 for ADA Compliant examination chairs. [2]

Pre-op, Transport, Surgery, and Recovery

All on the same motorized bed

MTI's 840 Stretcher Bed improves the care experience for patients and caregivers by creating a consistent setting from pre-op through recovery. Plus, a more efficient workflow not only helps improve quality of care, but streamlines your process and provides the opportunity for additional patient visits.

Providing a better workflow

- Increase efficiency without patient transfers
- 5 user-programmable positions improve workflows
- See up to 25% more patients per day
- Decrease caregiver and patient injuries
- Saves space over traditional stretchers
- Never wait for a battery to charge

Pre Op Position

A low 18.75" ADA-compliant entry height eases patient entry for pre-op.

*Images shown with optional accessories.

Transport Position

Stow-away steering handles and 5" casters for operator selected steering modes allow for easy patient transport by a single healthcare professional.

Surgery Position

Patient access for the surgeon is convenient and comfortable with the industry leading ultra-thin backrest and four power functions to make nearly any position possible.

Recovery Position

Safely transport the patient to the recovery room where they can relax in the space saving 840 Stretcher Bed while staging other patients in pre-op and surgery.

Mobile Base Operation

Lock, free, and steer modes enable complete control over effortless patient transport.

All Day Care, On One Charge

MTI's Lithium Ion Battery

Work for an entire day without worry when using our lithium-ion battery system. It's compact and lightweight design provides true operational mobility. Plus, ensure optimal workflow by using one of the two batteries provided, while charging the second battery in as little as 2 hours.

Innovations that Enhance

Every MTI G2 chair is equipped with our innovative SmartTech™ and ComfortSync™ technologies for improved patient care.

SmartTech™
SmartTech™ is the combination of MTI's Smart Controller™ and Smart Safety™ technology using a centralized computer controller that enhances safety, reduces energy consumption, and provides smoother movement, additional memory options and more user preferences.

ComfortSync™
With an ADA-compliant 18.75" entry height, the 840 Stretcher Bed's ComfortSync™ provides a smooth and independent 7" automatic power extension of the footrest as it follows the natural relationship of the patient's leg, also accommodating taller patients.

Arms

Our patented Spline System™ provides quick and easy attachment and removal of multiple arms or accessories.
