April 2024

We build together.

We build together
for a better living.

**Welcome to a world full of high quality,
aesthetics and excellent service...
in the world of THRAKON!**

The real experience of building materials and premium colors. Utilizing long-term experience and know-how, THRAKON is one of the largest research and production companies in the building materials, paints and varnishes industry. THRAKON has the ability to provide integrated services and solutions for a wide range of applications.

BRANDS

THRAKON has an active presence in the market with the following leading brands.

CLIMAPLUS

DECOR

ULTRAPOR[®]

DESMOFLEX[®]

CARMYFIX[®]

**REPI
FIX**

Why THRAKON?

Reliability

THRAKON is one of the most reliable producers of mortars in Greece with guaranteed steady supply and six production facilities.

Quality

We offer products, services and solutions of the highest quality which add value to our customers.

Responsibility

THRAKON, since its foundation, presents in market high quality products and integrated solutions, that are innovative, environmentally friendly and economically profitable for the industry. We operate a continuous and reliable business strategy for our clients in order to justify and maintain their trust in us.

Technical Support

THRAKON recognizing the importance of after sales services, is committed to provide complete solutions and advice from specialized engineers and experienced applicators. We want always be close to the customer with a high sense of responsibility.

CLIMABOND THC 403

Cement based adhesive

Cement based adhesive, polymer modified. It complies with EN 13499 and ETAG 004.

- Suitable for bonding thermal insulation boards on exterior thermal insulation systems (EPS/ XPS/ Mineral Wool).
- Exterior use 3,5 - 4,0 kg/m²
- 60 items

Code	Pkg	Shade
P11830125	25 kg	Grey

PRO THC 404

Fiber reinforced, cement based adhesive - plaster

Fiber reinforced, polymer modified, cement based mortar.

- Suitable for bonding and plastering thermal insulation boards on exterior thermal insulation systems.
- Exterior use 3,5 - 4,0 kg/m²
- 60 items

Code	Pkg	Shade
P11834325	25 kg	Grey
P11834225	25 kg	White

FIBERPLUS THC 405

Fiber reinforced, cement based adhesive - plaster

Fiber reinforced, polymer modified, cement based mortar. It consists of cement and quartz sand, limestone fillers and admixtures. It complies with EN 13499 and ETAG 004.

- Suitable for bonding and plastering thermal insulation boards on exterior thermal insulation systems.
- Exterior use 3,5 - 4,0 kg/m²
- 60 items

Code	Pkg	Shade
P11830325	25 kg	Grey
P11830425	25 kg	White

CLIMAFLEX THC 410

Highly flexible, fiber reinforced, adhesive - plaster

Premium, highly flexible fiber-reinforced, polymer modified, cement based mortar with increased strength. It consists of cement, limestone fillers, polypropylene fibers and admixtures. It complies with EN 13499 and ETAG 004.

- Suitable for bonding and plastering thermal insulation boards on exterior thermal insulation systems. Highly recommended for the implementation of CLIMAPLUS with Mineral Wool.
- Exterior use 3,5 - 4,0 kg/m² (per layer)
6,0 - 7,0 kg/m² (as coating for leveled surfaces)
- 60 items (25 kg) 4 items (5 kg)

Code	Pkg	Shade
P11830005	5 kg	Grey
P11831005	5 kg	White
P11831325	25 kg	Grey
P11831225	25 kg	White

CLIMAFLEX THC 410 C

Coarse-grained, flexible, fiber reinforced, adhesive - plaster

Coarse grained, fiber reinforced, polymer modified, cement based mortar. It consists of cement, quartz sand with 1.5 mm max. grain size, limestone fillers and admixtures. It complies with EN 13499 and ETAG 004.

- Suitable for bonding and plastering thermal insulation boards on exterior thermal insulation systems.
- Exterior use 3,0 - 4,0 kg/m²
- 60 items

Code	Pkg	Shade
P11331425	25 kg	Grey
P11831125	25 kg	White

ORGANIC BASECOAT THC 420

Organic, fiber reinforced, adhesive - plaster

Organic fiber reinforced basic coat, ready for use. Reinforced with polypropylene fibers and admixtures. It is highly flexible and complies with EN 15824.

Suitable for bonding and plastering thermal insulation boards on exterior thermal insulation systems.

Exterior use

3,0 - 3,5 kg/m²

36 items

Code	Pkg	Shade
P21390025	25 kg	Beige

CLIMAPLUS STICK

One component, low expansion for bonding EPS

Polyurethane foam, one-component for bonding EPS and XPS. Offers excellent quality and durability. Replaces traditional cementitious adhesives, accelerating implementation process. Saves storage space and makes application easier. Excellent traction and insulation.

It is ideal for mounting heat insulation panels and filling voids during adhesive application. Suitable for wooden type construction materials adhered to concrete, metal, etc. Suggested for applications that need minimum expansion such as ETICS, mounting and isolating window and door frames, wall plugging etc.

Exterior use

Up to 9 m² per bottle

12 items (800 g)

Code	Pkg
T10310021	800 g

CLIMAPLUS STICK GUN

One component polyurethane gun foam, low expansion for bonding EPS

Polyurethane foam, one-component for bonding EPS and XPS. Offers excellent quality and durability. Replaces traditional cementitious adhesives, accelerating implementation process.

It is ideal for mounting heat insulation panels and filling voids during adhesive application. Suitable for wooden type construction materials adhered to concrete, metal, etc. Suggested for applications that need minimum expansion such as ETICS, mounting and isolating window and door frames, wall plugging etc.

Exterior use

Up to 14 m² per bottle

12 items (800 g)

Code	Pkg
T10310020	800 g

INSULATION MATERIALS

PU FOAM

One component, self expanding

Self-expanding polyurethane foam, one component, reacts and cures in contact with air and humidity. It has excellent adhesive properties in almost every building material.

It is especially recommended for filling holes and gaps of thermal insulation boards, in application of the exterior thermal insulation system. It is waterproof, anti-mould and can be repainted.

Exterior use

12 Items

Code	Pkg
T10000420	750 mL

PU FOAM GUN

One component, self expanding Self-expanding

Self-expanding polyurethane foam, one component, reacts and cures in contact with air and humidity. It has excellent adhesive properties in almost every building material.

It is especially recommended for filling holes and gaps of thermal insulation boards, in application of the exterior thermal insulation system. It is waterproof, anti-mould and can be repainted.

ULTRAPOR® EPS 80

Expanded polystyrene boards

Expanded polystyrene (EPS) boards.

Suitable for the complete external thermal insulation system CLIMAPLUS.

1000 × 500 0,036 W/mK 5 days

Indicative Density: 15 - 17 kg/m³

(Also available in other thicknesses upon request)

Code	Thickness (mm)	m ² /Pkg
P11208030	30	10,00
P11208040	40	7,50
P11208050	50	6,00

TOP COAT

- ACRYLIC BASED ORGANIC PLASTERS

PRIMO TECH SILICONE

Acrylic base coating, modified with silicon resins

Acrylic coating reinforced with silicone. It has excellent adhesion and offers colored final surfaces in different types (RILLEN and SCRATCH), without the need for painting.

-  Suitable for use as a final layer plaster on the finished CLIMAPLUS external thermal insulation system and in interior and exterior masonry.
 -  Exterior & Interior use
 -  36 items
 -  It can be colored in more than 600 shades, through the ULTRA COLOR SYSTEM of THRAXON.

- CEMENT BASED DRY PLASTERS

DEC 424 SCRATCH

White inorganic plaster

White, cement based render of type SCRATCH, enhanced with silicone resins. Water-repellent, UV-resistant, with very strong adhesion to inorganic substrates. Suitable for substrates with high requirements in terms of flexibility and adhesion.

Use as a final coat render for exterior thermal insulation system CLIMAPLUS and for indoor or outdoor masonries.

CLIMAPLUS - EXTERIOR THERMAL INSULATION SYSTEM

**CLIMAPLUS CLIMAPLUS SILOXAN****High quality innovative silicone - siloxane paint**

The unique composition of CLIMAPLUS SILOXAN offers external surfaces excellent color stability, quick evaporation of moisture from the surface and an effective shield against ambient humidity.

Suitable for all external surfaces and ideal for renewing surfaces that have been applied the external thermal insulation system.

Exterior & Interior use

10 - 12 m²/L

**CLIMAPLUS CLIMAPRIMER SILOXAN****High quality colored, odorless, waterproof, silicone-based acrylic micronized water primer**

The ecological silicone-based acrylic micronized primer CLIMAPRIMER SILOXAN gives the applied surface waterproofing and excellent breathability, while at the same time shielding the substrate from rising soil moisture and the migration of salts from the substrate to the final painted surface.

Suitable for new and existing porous external and internal surfaces, which will then be painted with CLIMAPLUS SILOXAN.

WORLD-CLASS COLOR SYSTEM

SUPREME & ELITE

The most premium coloring system
with the innovation of THRAKON

We build together.

Supreme

WORLD-CLASS STAIN-BLOCKING PAINT

◆ Ultimate Stain-Blocking Formula

The formula for absolutely preventing the formation of stains is specially designed for preventing the penetration of the most persistent stains into the paint film.

◆ Nano CleanGuard Technology

Supreme has an optimized composition with elements of nanotechnology so that it can offer absolute protection of surfaces from chemical compounds and products. The applicators can recommend Supreme as a product with a paint film of amazing durability and the proprietor will enjoy absolute protection for a long time.

◆ Anti-microbial Shield

Supreme serves as a shield against microbes thanks to advanced technology ingredients that prevent the development of microorganisms on the surface of the paint film.

◆ Advanced Colour-Block Technology

The advanced Colour-Block technology is applied for the creation of extremely vivid and bright colors that will always remain new and will offer you the desired effect.

Elite Primer

2 in 1
White Primer

◆ Stain-Blocking & High Hiding Formula

The new Stain-Blocking & High Hiding formula used in Elite has been designed to prevent the most persistent stains and the formation of colour imperfections on the surface and, as a result, the surface is perfectly prepared for applying premium paints like Supreme and covering colour imperfections.

◆ The exceptional new-generation composition is appropriate for both interior and exterior surfaces, such as walls, ceilings, plasters, plaster boards, bricks, wooden surfaces, etc.

◆ The ecological Elite primer is available in white hue, thus ensuring a flawless final result, while, if you want a perfect and uniform hue of the final colour, you can use one of the thousands hues of the STATUS tinting system.

EMULSION PAINTS / COLORING BASES

STATUS SUPREME

Premium quality ecological emulsion paint

Premium ecological paint so special that covers the internal surfaces of the house with a sense of absolute luxury and 100% satisfaction. Supreme was designed to offer an aura of luxury, unrivaled appearance, exceptional finish and a special formula serving as a protective shield against stains and microbes spread on the surfaces of the house. The best technologies are included in the same container and you have in your hands an ecological paint like no other.

Suitable for busy homes and high traffic rooms, such as children's bedrooms, living rooms, dining rooms, kitchens, bathrooms, hallways and passages where cleaning is done often. Perfect for healthcare, hospitality and educational environments and especially for hotels, hospitals, hospital corridors, schools and public building corridors.

Interior use

STATUS ALL WEATHER

Elastomeric waterproof facade paint

STATUS All-Weather is a pioneering product that dyes and isolates the exterior walls at the same time, ensuring absolute protection from the humidity and exceptional endurance. Its special composition creates a flexible membrane that covers all the veins and "monitors" the constrictions and dilations of the surface. Thanks to the built-in filters against the ultraviolet radiation it remains flexible without going off or peeling.

It is the ideal solution for coating and protection of buildings, mainly in urban and mountainous areas. It has the ability to prevent the formation of mold, and has a reduced tendency for retention pollutant (UV cross-linking).

EPOXY - POLYURETHANE PAINTS

STATUSPOX

Epoxy paint

Two component epoxy paint. It has high resistance to mechanical and chemical stresses. It is also highly resistant to oils, diesel, gasoline, acids and alkalis, and exhibits excellent adhesion to concrete and metal surfaces. Available in grey color RAL 7032 and can be produced in any color on request.

Suitable for painting floors in industrial sites, factories, warehouses, garages etc. For indoor use.

Exterior & Interior use

3 - 4 m²/kg for film thickness 150 - 200m

GEL TILE ADHESIVES

GEL

Gel-type cement-based tile adhesive

High-quality gel type, cement-based, tile adhesive with an extended open time application and zero vertical slip. The ACTIVE GEL TECH advanced technology, in the adhesive composition, produce a soft consistency that does not thicken for a long time while become so liquid to give effortless workability. The combination of extended open time and zero vertical slip of adhesive increase the workers' productivity, while the NEW GENERATION ELASTICITY makes it more elastic in comparison to with conventional C2TE class adhesives.

Small or large ceramic tiles of all types, granite tiles, natural stone tiles, cotto, klinker, etc. on all standart substrates

EXTRA SKW 114

Tile adhesive with slip resistance

SKW 114 is a thin layer, cement based tile adhesive, produced with quartz sand, offering resistance to vertical sliding. Its thixotropic characteristics give the applicator the ability to apply tiles from upper side downwards, when applied on vertical surfaces. For application on indoor and outdoor surfaces.

Suitable for application of absorbent ceramic tiles on wall or floor, on common substrates such as concrete, light weight concrete, renders, traditional cement based floor screeds, self-leveling floor screeds, etc.

EPOXY GROUTECH FMF 155

Advanced high resistant 2-component epoxy grout and tile adhesive

Advanced technology without solvents, porcelain, high strength, two-component epoxy grout, suitable for filling joints 0-20 mm wide. EPOXY GROUTECH stands out for its excellent workability and easy cleaning, while maintaining its color uniformity. It is suitable for grouting indoor and outdoor spaces, in any kind of tiles, tesserae and natural stones. At the same time, it can be used as an adhesive on surfaces that require welding with chemical resistance. Shades: Available in white and 17 shades with perfect color stability.

Its unique formula gives high resistance to applications where resistance to chemical and mechanical stress is required, such as floors, tiles with normal or marine waters, liquid and urban storage solutions, homes, construction sites, food production and processing facilities, food industries, industries, hospital laboratories and clinics.

EPOXY

LUX GROUTECH FMF 160

Porcelain grout

Grout with a characteristic chromatic homogeneity, stability and high mechanical strengths. It ensures sealing, achieving excellent water repellent properties and antifungal protection. Prevents the growth of microorganisms and the formation of fungus and salt stains on its surface. FMF 160 LUX is a fast setting grout and it is classified as type CG2 according to EN 13888.

Suitable for grouting ceramic tiles, marbles and granites on wall and floor applications. For exterior and interior use. It has excellent workability. It is applied at joint thickness from 1mm up to 8mm. It gives a smooth end result, on surfaces. Available in 17 colors.

ANTISLIP SYSTEM

**ANTISLIP****Non-Slip varnish 2-component**

Transparent, non-slip, 2-component varnish for indoor and outdoor use with strong adhesion, high resistance to abrasion and to chemical agents. It provides excellent waterproofing and protection to any kind of structural elements.

Suitable for waterproofing and protection of any type of construction element. Creates a non-slip surface, even when it is wet, and at the same time it seals and protects any kind of building block.

Exterior & Interior use

80 - 120 gr/m²

6 Items (1 kg [A+B comp.])
6 Items (4 kg [A+B comp.])

Code	Pkg	Shade
P121901301	1 kg	Transparent/ Matte
P121901304	4 kg	

**ANTISLIP PROMOTER****Adhesion promoter**

Transparent, deep penetration enhancer one component for interior and exterior use. Turns on chemically the surface and provides strong adhesion to glass and ceramic surfaces.

It is recommended before applying AntiSlip on glass and ceramic surfaces such as: glass ceramic tiles, glass, glass blocks as it is activated chemically.

Exterior & Interior use

50 - 100 gr/m² one or two layers

12 Items (1 kg)

Code	Pkg	Shade
P121901401	1 kg	Transparent/ Matte

PRIMERS & CLEANING AGENTS

**STATUS REMOVER****Color and epoxy grout remover**

New generation powerful corrosive for paints and epoxy grouts. Does not contain dichloromethane.

Suitable for the removal of old or new varnish, paint and primers.

Exterior & Interior use

12 Items (375 ml / 750 ml)

Code	Pkg	Shade
P121690004	375 ml	Transparent
P121690008	750 ml	
P121690003	4 Lt	

**VLX 181****Non-acid general purpose cleaner for joints and ceramic tiles**

Non-acid transparent general purpose cleaner for marble and tiles with lemon perfume. It cleans in depth, without causing any disaffects, and shines perfectly at the same time.

Especially suitable for cases that require the use of mild cleaning agents (e.g. for cleaning marbles, calcium tiles, calcium carbonate tiles and sensitive tiles in general). It is ideal for tiles with silk decorative elements and special decorations, which are cleaned with a soft cloth.

Exterior & Interior use

1 Lt/ 5 m² surface

16 Items (1 Lt)

Code	Pkg
T021540100	1 Lt

VLX 182

Acid general purpose cleaner for joints and ceramic tiles

Acid transparent liquid cleaner and shining aid for joints and ceramic tiles. Cleans, shines and maintains the colors of grout vibrant and shiny after application.

Removes cementitious residues, salt and calcareous crust, residues from adhesives and sand mortars, stain for greases, varnishes, oils, etc. Do not use for cleaning marble, decorative stone from limestone and non acid-resistant surfaces.

Exterior & Interior use

1 Lt/ 5,5 m² surface

16 Items (1 Lt)

Code	Pkg
T021540000	1 Lt

VLX 185 GROUT ELASTIC

Elastic admixture for grouts

Elastifying admixture for cementitious grouts. Reduces water absorption.

Highly recommended for grouting surfaces which are off ended by contraction/expansion and moisture such as under floor heating, pool surroundings, tanks, bathrooms, terraces, balconies etc.

Exterior & Interior use

FMF 150 ULTRA GROUTECH: 1800 g/5 kg FMF 150
FMF 160 LUX GROUTECH: 1200 g/5 kg FMF 160

Code	Pkg
P121540000	1 Lt

VLX 186

Acrylic admixture for mortars – Primer for special applications

Environmental friendly, acrylic admixture for mortars and a primer for non-absorbing substrates. It does not contain organic solvents. It is used as a primer for bonding tiles on demanding substrates (old tiles, marble, mosaic).

Suitable for improving the properties of tile adhesives and grouts. Increases bonding strength and significantly reduces water absorption.

Exterior & Interior use

Admixture:
40 - 80g per kg

16 Items (1 Lt)

Primer:

- Non absorbing substrates:

1 kg/15 m² surface

- Absorbing substrates:

1 kg/5 m² surface

Code	Pkg
P121541000	1 kg
P121541100	5 kg
P121541200	20 kg

GLX 190

Acrylic primer with quartz sand grains for tile & mosaics

Adhesion primer that consists of synthetic resin, inorganic fillers and quartz sand with selected grain size. Increases the bonding strength of the tile adhesive on smooth and low absorbing surfaces.

Suitable to be used as a bonding agent on old tiles and mosaics when new tiles are going to be applied, in indoor and outdoor surfaces. It is also applied on fine renders, wood, PVC and cement boards.

Exterior & Interior use

0,24 - 0,28 kg/m²

THRAKON innovates
once again, with the launch
of the DESMOFLEX series.

DESMOFLEX[®]

The **DESMOFLEX[®]** range offers ultimate
and long-lasting waterproofing solutions.

THRAKON's laboratories have created products that will offer excellent waterproofing and excellent mechanical, thermal and chemical resistance, with the new generation "**DESMOFLEX[®]**" technology.

The **DESMOFLEX[®]** range consists of the **DESMOFLEX[®] PU System**, a three-product waterproofing system, and **DESMOFLEX[®] Aqua**.

www.desmoflex.gr

POLYURETHANE SYSTEM

DESMOFLEX® Aqua / The Superb Aqua Formula

HIGH QUALITY POLYURETHANE WATER-BASED MEMBRANE

Not just a sealant: The sealant designed for great durability and duration!

DESMOFLEX® Aqua is a high quality white, aliphatic, polyurethane water-based membrane of one component, suitable for long-term waterproofing. Its unique composition is designed to create a single, elastic, hydrophobic membrane that completely covers capillaries and cracks up to 2mm. In addition, DESMOFLEX® Aqua provides excellent mechanical, thermal and chemical resistance as well as protection from frost and ultraviolet (UV resistance) for a long time. After application, the surface remains walkable and resistant to stagnating waters, maintaining high whiteness over time.

Suitable for long term waterproofing of roofs, terraces, balconies and asphalt felts, EPDM or PVC membrane. Waterproofing of horizontal surfaces from concrete, cement mortars etc., especially for surfaces with stagnating waters.

Exterior & Interior use

1,0 - 1,2 kg/m² for 2 layers

DESMOFLEX® PU System / The Ultimate Polyurethane System

INNOVATIVE POLYURETHANE SYSTEM

The polyurethane excellence of THRAKON: Holistic waterproofing solution!

DESMOFLEX® Polyurethane Primer

One component polyurethane primer

Transparent polyurethane solvent primer, one component. It is used as a primer in THRAKON's DESMOFLEX® PU waterproofing system. It has a great penetrating capacity on absorbent surfaces. It is ready to use, and dries quickly. At the same time, it polymerizes with the moisture of the subsoil and the air.

Exterior & Interior use

150 - 250 ml/m² applied in one layer

72 items (4 kg)

Code	Pkg	Shade
P21660804	4 kg	Transparent

DESMOFLEX® Epoxy Primer

Pioneering technology 2-component epoxy primer, water based

A transparent, rigid, two component epoxy primer, water-based. Used as a universal primer in waterproofing, sealing and floor coating applications on absorbent and non-absorbent surfaces. DESMOFLEX® Epoxy Primer cures by reaction (cross linking) of the two components. Also provides high tensile and impact strength.

Exterior & Interior use

100 - 200 gr/m² applied in one layer

Pkg: 3 kg **A** + 1 kg **B**

Code	Pkg	Shade
P21660103	(A+B) 4 kg	Transparent

DESMOFLEX® Polyurethane

New generation liquid-applied polyurethane waterproofing membrane (1K)

A polyurethane based, white, glossy one component used for long term waterproofing. Due to its polyurethane technology, provides solutions to problems of waterproofing where the other methods fail, like to surfaces with stagnant waters and ices. Based on pure elastomeric hydrophobic polyurethane resins, which result in excellent mechanical, chemical, thermal, UV and natural element resistance properties. DESMOFLEX® PU polymerizes with the moisture of the subsoil and air.

Exterior &
Interior use

1,4 - 2,4 kg/m² applied in
2 or 3 layers

36 items (25 kg)

5 items (6 kg)

P21660205	6 kg	White Glossy
P21660225	25 kg	

DESMOFLEX® Top Coat

Advanced technology 2-component aliphatic polyurethane top-coat, UV-stable (2K)

2-component coating with unaffected whiteness and gloss, suitable for the long-term protection of roofs, rooms, balconies and asphalt, EPDM or PVC membranes that have been prior sealed with DESMOFLEX® PU. It provides excellent mechanical, thermal, chemical and UV resistance as well as protection against frost and chalk.

Exterior &
Interior use

120 - 250 g/m² per layer

72 items (5 kg)

Code	Pkg	Shade
P21660305	5 kg	White Glossy

DESMOFLEX® Fiber Fix

1-component fibre-reinforced liquid polyurethane membrane for waterproofing details on roofs and terraces

DESMOFLEX® Fiber Fix is a fibre-reinforced, spreadable, one-component polyurethane-based membrane with high thixotropy and elasticity. It polymerizes with the humidity of the environment forming a single membrane without bubbles. Intended for use as a spreadable sealant for long-term insulation of roofs, terraces and floor joints, where details must be covered. Its unique composition of elastomeric, hydrophobic polyurethane resin and inorganic chemical additives makes it resistant to chemical and thermal attacks, ultraviolet (UV) radiation, to intense weather conditions while giving it excellent mechanical properties so that it can easily cope with various mechanical stresses.

Suitable for roofs details waterproofing, terraces but also joints between floors. More specifically, it is indicated for joints between wall and floor, at angles up to 90°, pipes, skylights, ventilation, chimneys, bases of air conditioning units, siphons, gutters, skylights, photovoltaic and solar systems. In addition, it is indicated for the waterproofing of details in large technical projects of high demands.

Exterior &
Interior use

DESMOFLEX® Catalyst

Reaction accelerator

DESMOFLEX® Catalyst is a reaction accelerator suitable for use in conjunction with the DESMOFLEX® PU system. It is used when the application is to be done under low temperatures or when greater thicknesses of layers are required, as well as shorter waiting times between them. With the addition of DESMOFLEX® CATALYST, the uniform polymerization of the waterproofing membrane is accelerated, resulting in the possibility of applying the next layer within 4-5 h, even in conditions of low atmospheric humidity. At the same time, the creation of bubbles is prevented, and the mechanical strength increases.

Suitable for polyurethane system applications at low temperatures or when greater layer thicknesses are required, as well as shorter waiting times between them.

Exterior & Interior use

D-FLEX® Clear

Transparent elastic, spreadable, sealing membrane with high mechanical strength

Transparent elastic spreadable membrane of polyurethane technology for long-term waterproofing. The sophisticated D-FLEX® technology gives the application surface excellent protection against UV radiation so that it does not turn yellow over time and remains transparent and elastic. The hydrophobic film that is formed shows high tightness and elasticity, while it is also characterized by excellent mechanical and chemical resistance.

Suitable as a waterproofing material on surfaces where we do not want to change the aesthetic effect, such as external surfaces (roof/terrace/wall) covered by tiles, natural stone, wood, bamboo, decorative cement mortars (tread, slopes, etc.), glass blocks, domes, glass patios and greenhouses, polycarbonate sheets, etc. It is also used as a binding material for glueing mosaics/flakes to decorative indoor and outdoor floors.

Exterior & Interior use

3-4 m²/kg per layer

ΑΣΦΑΛΤΙΚΑ ΠΟΛΥΟΥΡΕΘΑΝΙΚΑ

D-FLEX® Bitu

2-component bituminous polyurethane

D-FLEX® BITU bituminous polyurethane consists of a set of hydrophobic polyurethane resins (A component) and bitumen (B component). The final produced membrane, which develops from the mixing and reaction of the 2-components in markedly time (fast curing), exhibits excellent elasticity and mechanical strength while offering high resistance to any chemical attack.

Suitable for basements/foundations, planted roofs, non-potable water tanks, irrigation canals, under tiles (after applying quartz sand on the last layer) in kitchens, bathrooms, balconies, roofs, under thermal insulation roof slabs, in technical road works for the waterproofing of bridge decks, in tunnels, etc., as well as for application to elenite, sheet metal, gypsum boards, cement boards and polyurethane foam.

Exterior & Interior use

1,5 - 2,0 L/m² for 2-3 coats,
depending on the substrate.

Packaging: A 20 L + B 20 L

Code	Pkg
P21660416	(A+B) 40 L

D-FLEX® Bitu Aqua

One-component, polyurethane-bituminous liquid waterproofing membrane

D-FLEX® BITU AQUA is a one-component thixotropic liquid membrane, asphalt-polyurethane dispersion base. The produced membrane is characterized by high elasticity and mechanical strength, while it offers excellent adhesion to many types of surfaces. It is used on horizontal and vertical surfaces, and the sophisticated D-FLEX® technology gives the application surface excellent protection against UV radiation with a long-lasting effect.

Suitable for building basements (foundations), retaining walls, wet areas, bituminous membranes, for application under tiles (after applying quartz sand on the last layer), gypsum boards, cement boards, as well as for use on roofs, terraces and balconies.

CRYSTALLINE

New!

CRYSTALLINE SLURRY DSF 310

Brushable crystalline waterproofing slurry

Brushable cement-based waterproofing slurry with crystallising effect for high performance waterproofing and deep protection (not only on the surface). When applied on the concrete surface, the active chemicals create insoluble crystalline complexes. These crystals make concrete watertight while on the same time protecting small cracks from penetration of water, even under pressure.

Waterproofing of old and new surfaces of concrete, for interior or exterior surfaces, no matter where water pressure is applied. Also ideal for waterproofing cutting concrete joints, underground concrete elements, drinking water tanks made of concrete, swimming pools, water irrigation channels etc.

P121603100	25 kg	Grey

New!

CRYSTALLINE ADMIX DSF 315

Crystalline waterproofing admixture

Concrete admixture in powder form for waterproofing and protection of concrete. It creates crystals which close porous and hair cracks on surface of concrete. It can be used at concrete production plants (before adding water) or on-site (after mixing cement with water).

Ideal for waterproofing of foundations, underground areas, water tanks, swimming pools, etc

Exterior & Interior use

CEMENT BASED

**FLEX DSF 350****Flexible, 2-component, brushable waterproofing slurry**

DSF 350 FLEX is a flexible waterproofing mortar suitable for the waterproofing of indoor and outdoor surfaces.

Suitable for waterproofing in roofs, inverted roofs, underground tanks, balconies, showers before tiling. Offers elasticity. Suitable for surfaces that subject to contractions and expansions as well as vibrations. Crack-bridging ability.

Exterior & Interior use

1,5 kg/m² 1 mm per layer

60 items (A 25 kg + B 10 kg)

Packaging: A 25 kg + B 10 kg

Code	Pkg	Shade
P11603500	35 kg	Grey

**SUPER ELASTIC DSF 353****Highly flexible, 2-component, brushable waterproofing slurry**

DSF 353 SUPER ELASTIC is an elastic waterproofing mortar suitable for the waterproofing of indoor and outdoor areas

Suitable for waterproofing concrete surfaces such as foundations, tunnels, retaining walls, above ground tanks, swimming pools, terraces. Provides protection from corrosive atmosphere. Offers great elasticity. Suitable for surfaces that subject to contractions and expansions as well as vibrations. Crack-bridging ability. May be applied as a final layer on terraces.

Exterior & Interior use

1,4 - 1,6 kg/m² 1 mm per layer

60 items (A 20 kg + B 10 kg)

Packaging: A 20 kg + B 10 kg

**FIBERELASTIC DSF 363****Flexible, fiber-reinforced, brushable waterproofing slurry**

Flexible, fiber reinforced, brushable one-component sealing slurry, reinforced with special polymeric components, creating an absolutely tight, elastic and flexible membrane of high strength.

Suitable for sealing surfaces like concrete foundations, tunnels, retaining walls, above ground tanks, swimming pools, terraces. Provides protection against the corrosive agents in the atmosphere. Applied to substrates that are subject to vibration and contraction. Bridges hairline cracks present in the substrate.

Exterior & Interior use

2 - 4 kg/m² per two layers, depending on the waterproofing requirements

60 items (18 kg)

Code	Pkg	Shade

P11603631	18 kg	White

DSF 370

Waterproofing plaster

DSF 370 is a waterproofing, one-component, cement based plaster that consists of high silica content for improved waterproofing properties. Provides thin layers on interior or exterior surfaces of buildings, underground spaces, canals and water tanks.

Suitable for waterproofing applications upon concrete, brick, cement, stone and other very hard surfaces and substrates located constantly under water.

Exterior & Interior use

6 kg/m² per 3 mm

35 items (40 kg)

P11603700	40 kg	Grey

ACRYLIC BASED

FLEX HYDROSTOP DSF 300

Elastomeric waterproofing membrane

DSF 300 Flex Hydrostop is a flexible, brushable, one-component, waterproofing membrane for waterproofing jointless and with no connections substrates, vertical or horizontal surfaces.

Suitable for tiling on humid places (rooms, showers, toilets, washing machines) as well as waterproofing concrete elements or floors on terraces and balconies which are to be coated with tiles. Used as a system, applied after GLX 292 primer (for absorbent substrates or STATUS DUR WATER).

Exterior & Interior use

1,6 - 2 kg/m² per two layers, depending on the type of the surface

60 items (20 kg)

ROOF SEALER FLX 380

Brushable, elastomeric waterproofing membrane

Highly flexible, acrylic based, one-component, brushable membrane. The white shade protects against ultraviolet radiation and heat transfer through the buildings.

Suitable for sealing terraces, roofs, balconies, corners etc. It is also used for sealing corners and filling hair cracks (up to 1 mm) and joints between concrete slabs up to 1 mm in size, on surfaces that exhibit contraction and vibration.

HYBRID PU FLX 385

Hybrid, brushable, elastomeric waterproofing membrane without solvents

Hybrid, waterproofing coating for roofs with UV cross linking system. New technology, roof waterproofing elastic membrane without solvents. High resistance to moisture, UV radiation and low temperatures.

Suitable for roof waterproofing on new or old construction giving the ability to withstand standing water. Appropriate for spreading bituminous membrane with or without chip. Applied on concrete, mortar, cement tiles, ceramic tiles, terrazzo and asphalt membranes. Also suitable for application to surfaces of glass, metal, galvanized steel, elenite, asphalt coated aluminum. Excellent adhesion to polyurethane waterproofing layers and insulating polyurethane or polycarbonate panels.

IMPREGNATING

HYDRO R

Hydrophobic impregnation product

Ready to use, clear, water repellent, solvent-based, liquid, for permanent waterproofing of all kinds of inorganic substrates such as plaster, exposed concrete, exposed masonry, decorative bricks, tiles and tile joints, natural and artificial stones, tiles, etc. It does not create film and is vapor permeable.

The surface must be clean, dry, structurally sound and free from all dirt. Protect adjacent materials that may be destroyed by the solvents. The material is applied by spraying, roller or brush in 1-2 layers, wet on wet.

Exterior & Interior use

0,15 - 0,35 L/m² per coat, depending on the type of substrate

NANOSHIELD O

Nanomolecular product for protection of surfaces against oil

Product of nanomolecular structure that seals porous and slightly porous surfaces from oil stains, moisture infiltration, creating salts and prevents mold. At the recommended dosage it does not create film and does not cause aesthetic alteration to the application surface. Characterized by excellent penetration and has the advantage of rapid absorption on the substrate.

Apply to various surfaces such as marble, granite, brick, concrete, plasterboard, chipboard, plaster, tile grout etc. Suitable for indoors and outdoors.

Exterior & Interior use

50 -100 mL/m², depending on the absorbency of the substrate.

PRIMERS AND ADMIXTURES

**ANTI-LIME****Plasticizer – Retarder for mortars**

ANTI-LIME is a transparent resin liquid that replaces the use of lime. Prevents from problems caused by using lime (e.g. "blows").

Ideal for mortar, plaster, masonry, marble, stone and tile applications. Suitable when the extension of open time and the improvement of the adhesion strength of mortars on the application surface is required.

Exterior & Interior use

- a) For plasters:
0,2 - 0,5 kg / cement bag
b) For masonry mortars:
0,15 kg / cement bag

**GLX 290****Acrylic primer – Transparent**

GLX 290 is one component, acrylic based primer that impregnates and stabilizes cementitious mortars, creating a bonding bridge for materials to follow. It protects the surfaces from staining and prevents the absorption of water.

Suitable for coating surfaces before painting or repairs.

Exterior & Interior use

80 items (4 kg)

Undiluted:
60-90 g/m² per coat

Dilution:

•For relatively smoothly cementitious substrates

(e.g. cementitious floor screeds, plasters, etc.):

primer: water = 1:4 - 300-350 g/m² per coat

primer: water = 1:3 - 350-400 g/m² per coat

• For absorbent surfaces like AAC:

primer: water = 1:4 - 400-450 g/m² per coat

* These consumptions are indicative and depend on the type of substrate (absorption, smoothness, etc.) and the type of application.

Code	Pkg
P21472901	4 kg

**GLX 292 FLEX PRIM****Acrylic primer - High penetration**

Ready to use micronized acrylic water-based primer with high penetration ability.

Ideal for preparing each new or old porous surface such as plaster, brick, concrete, plastered walls etc, creating an adhesion bridge for acrylic plasters, water paints, mortars, tile adhesives, acrylic and cementitious waterproofing spreads etc.

Exterior & Interior use

**LATEX 296****Polymer latex for multiple type improvement of mortars**

Building acrylic admixture. Suitable for improving the properties of mortars such as: mechanical strengths, shrinkage, adhesion on various surfaces, flexibility, resistance to frost, permeability, resistance to friction, resistance to acids and workability. Recommended for cement and gypsum based mortars. Without organic solvents.

Suitable for all kinds of mortars based on cement or plaster.

Exterior & Interior use

Dilute with water.
Ratio: THRAXON LATEX 296:
water = 1:1 to 1:5

SEALANTS

ANTI-MOULD

Anti-mould silicone

One-component acetoxycure silicone sealant for a range of general sealing and glazing applications.

Suitable for applications that require elasticity, in general sealing applications and application of glass panes. Sealing perimeter of the frames. Sanitary applications. Joints and expansions. Not paintable.

Exterior & Interior use

Joint 6 mm x 6 mm:
8 m per cartridge
Joint 12 mm x 6 mm:
4 m per cartridge

12 items (280 mL)

Code	Pkg	Shade
C/C	280 mL	Transparent, White

KITCHEN & BATH

Silicone sealant

Specially designed silicone sealant, acetoxycure based for use in wet areas such as bathrooms and kitchens. Not suitable for aquariums.

Suitable for welding of glass and cabin bathroom joints, during construction. Filling of tile joints, bathtubs and bathroom cabinets during installation. On glass surfaces without priming. Filling joints between the tub and tiles. Sealing sinks, bath compounds as well as waterproofing and welding of glass bricks.

Exterior & Interior use

Joint 6 mm x 6 mm:
8 m per cartridge
Joint 12 mm x 6 mm:
4 m per cartridge

12 items (280 mL)

Code	Pkg	Shade
C/C	280 mL	Transparent, White

ELASTO PU

Polyurethane joint sealant, medium modulus expansion

Polyurethane, medium modulus expansion one-component polyurethane joint sealant, with medium expansion, that matures during exposure to atmospheric humidity. Offers great adhesion.

Suitable for sealing and for the construction of expansion joints in all common building materials such as cement, bricks, ceramics, glass, wood, irons galvanized and chrome plated as well as various plastic.

Exterior & Interior use

Joint 15 mm x 8 mm:
2,5 m per cartridge 310 mL
5 m per 600 mL

12 items (310 mL / 600 mL)

Joint 20 mm x 10 mm:
1,5 m per cartridge 310 mL
3 m per 600 mL

REPAIRING MORTARS

Repairing Mortars

Complementary Reinforcement Products

REPAIRING MORTARS

EPOSHIELD INJECT S

Injectable, two-component epoxy resin suitable for cracks width 0.1-3.0 mm.

Injectable solvent free, two-component epoxy resin. Used to apply resin injections in concrete cracks width 0.1-3.0 mm.

Suitable for injections in concrete cracks 0.1-3 mm wide. Suitable for fixing and anchoring of reinforcing bars in concrete surfaces. It is also a valuable tool for fixing and anchoring of reinforcing bars in existing building elements. It offers excellent results even on damp substrates.

Exterior & Interior use

1,1 kg/L headspace for crack sealing

12 Items (1 kg)

EPOSHIELD INJECT W

Injectable two-component epoxy resin for cracks > 3.0mm - Bonding agent

Injectable solvent free, two-component epoxy resin. Used to apply resin injections in concrete cracks larger than 3.0 mm.

It is used as a bonding key between fresh and old concrete, according to the Concrete Regulation. It is also suitable for injection application in concrete cracks wider than 3mm. Suitable for fixing and anchoring of reinforcement rods in concrete surfaces.

Exterior & Interior use

1,5 kg/L headspace for crack sealing

12 Items (1 kg)

REPIFIX TOP WRM 483

Extra fine cementitious putty

Extra fine cementitious putty reinforced with special resins. With excellent workability by hand or airless pistol, leaving a smooth finish, with high abrasion resistance, very good adhesion to the substrate, ready for painting.

For puttying exposed concrete and stucco surfaces, cover or nesting resources. Also ideal for local repairs seals cracks etc. Suitable for indoor and outdoor use. It is classified as concrete repair mortar type PCC R2 according to EN 1504-3.

Exterior & Interior use

~ 1,3 kg/m²/mm Thickness

60 items (25 kg)

4 items (5 kg)

WRM 500

Fast setting repairing mortar

WRM 500 is a fast setting sealing mortar (3 minutes setting time). Cement based, non shrinkable and requires only water for its preparation.

Immediately seals cracks, leaks, holes and joints in all masonry and concrete constructions, such as dams, sewers, wastewater tanks, water tanks, underground spaces, tunnels, foundations. Suitable for anchoring of bolts, piping, sanitary ware and in general for works that require fast and strong support.

Exterior & Interior use

1 kg yields approximately 0.6 L of ready to use mortar

100 items

REPIFIX PROTECT WRM 510

Anticorrosive primer for steel reinforcement

One-component, spread anticorrosive product, consisting of special specifications cement, silicon, resins and improvers additives.

Suitable for anticorrosive use on reinforcement steel, preparation of concrete, iron and other structural materials as a bonding key prior to the application of repairing materials.

Exterior & Interior use

On reinforcement:
0,06 - 0,12 kg / m

New!

REPIFIX GROUT WRM 530

Cementitious grouting for accurate anchoring

Ready to use, cementitious, shrinkage compensated with a controlled increase in volume product. It is waterproof, free of chlorides and high-alumina cement as well as resistant to frost and de-icing salts. It offers high strength (R4) and can be applied for accurate anchoring in big thickness (up to 100 mm).

Ideal for accurate anchoring like steam or gas turbines, electricity generators, compressors, planes, oil machines, cranes, pumps, crashing units, machines for cutting marbles etc

Exterior & Interior use

Depending on the application type

FLOORING SCREEDS

Cement based flooring screeds

Primers

CEMENT BASED FLOORING SCREEDS

NSD 600

Cement-based floor screed 3 - 10 cm

NSD 600 is a ready to mix, cement-based mortar suitable for floor filling and leveling. Consists of selected quartz sand of 2.5mm maximum grain size.

Applied at thickness of 3-10 cm. Recommended for: creation of inclinations of flat roofs and outdoor places, ramps, preparation of concrete floors for the installation of any type of tile, marble, decorative materials or parquet, indoor and outdoor areas.

Exterior & Interior use

15 - 17 kg/m² of dry mortar for 1 cm thickness

PRIMERS

**FLOOR SEAL S****Curing compound with antievaporation agent for concrete floors**

1-component, solvent-based, clear acrylic resin polymer. The unique composition of the product: protects the fresh concrete from rapid evaporation of mixing water, hardens the existing brittle floors to increase their abrasion and wear resistance, enhances the maturation of concrete in order to avoid cracks and dryness, and seals the concrete to avoid dust.

Ideal for areas that are subject to moisture but with light traffic such as basements, parking lots, warehouses, and for large exposed concrete surfaces, such as industrial floors, parking spaces, concrete slabs.

Exterior &
Interior use

110 - 210 mL/m² per layer
(depending on the absorbency
of the substrate)

**New!****FLOOR SEAL W****Resinous floor stabilizer**

Resinous floor stabilizer, water-based, with high penetration capacity. It is applied to cement floors to prevent the creation of dust while at the same time sealing the pores of the surface, thus minimizing its absorbency. It is also used on friable surfaces to stabilize them and improve their abrasion resistance. After its application, it becomes transparent and thus does not aesthetically alter the surface.

Suitable for stabilizing, reducing absorbency and increasing the surface hardness of cement mortar and concrete floors.

Exterior &
Interior use

100 - 200 g/m² per layer
(depending on the absorbency
of the substrate)
