

DURAVIT

SensoWash® shower toilets
Edition 10 EU

SensoWash®

Comfort and hygiene on a whole new level – that's exactly what a shower toilet guarantees! Shower toilets are nearly indistinguishable from conventional toilets on the outside, but they have an added shower function on the inside. With a simple touch of a button, the pleasant, adjustable water stream will leave you feeling unbeatably

fresh. SensoWash® by Duravit is an innovative and extensive range of high-quality shower toilets. The timeless designs fit perfectly into any bathroom and the products set new standards for hygiene, ease of use, and overall well-being.

For the ultimate feeling of freshness

Duravit SensoWash®

The soft and soothing stream of water cleans sensitive areas gently and effectively. Water temperature, flow intensity, and position of the shower wand can be adjusted and programmed to meet the individual needs of different users, resulting in a fresh, clean feeling – just like being freshly washed – and better overall health and well-being every day. Depending on the model, comfort can be taken to new levels with a heated toilet seat and a gentle warm-air dryer, making toilet paper and wet wipes a thing of the past.

With uncompromising functionality and maximum comfort, SensoWash® guarantees a clean and pleasantly fresh feeling every day. Created in the Duravit design language, SensoWash® completes even the most sophisticated bathroom designs both aesthetically and functionally.

SensoWash® D-Neo
DESIGN BY DURAVIT

Three compelling reasons

for a shower toilet from Duravit

Duravit's quality promise

With SensoWash®, Duravit has successfully created a new global synonym for exceptional, modern shower toilet hygiene. We provide everything – from electronics to ceramics to software – all from a single source and produce in our own plants. We only use high-quality materials and put our products through the strictest quality testing to ensure that they meet the highest standards.

3-year warranty

Durable products, high-quality materials, and reliable spare parts availability – that's what the Duravit brand means. Secure long-term enjoyment of your SensoWash® by registering your product and taking advantage of the extended warranty.

Comprehensive support

Whether you have questions about the installation, maintenance, or functionality of your SensoWash® shower toilet, we are here to help you with expert advice:

You can reach us by phone at **+49 (0) 7833 70 403** or by email at **tb@duravit.de**. Our service is available in German and English during the following hours:

Monday to Thursday, 8:00 am – 5:00 pm
Friday, 8:00 am – 3:00 pm

Scan the QR code to register for the warranty.

SensoWash® functions

for better hygiene, comfort, and safety

Rearwash

The powerful stream of water provides a thorough yet gentle cleaning. Water temperature, intensity of the stream, and shower wand position are all adjustable.

Ladywash

Specially developed for the needs of women, our Ladywash function provides a delicate cleaning of sensitive areas with a soft and gentle flow of water. The shower wand and shower head automatically clean themselves before and after use.

Comfortwash

Gentle movement of the shower wand back and forth results in a soothing yet effective clean. The comfort shower function can be activated while using the Rearwash or Ladywash function.

Automatic Self-cleaning

The shower wand and shower head self-clean automatically before and after each use. When not in use, the shower wand is protected by a cover providing an even greater level of hygiene and safety.

Duravit Rimless®

The open rim allows for a dynamic, powerful flow of water that keeps residue to a minimum and improves hygiene. Cleaning the inside of the toilet bowl is extremely easy and efficient due to this glazed, open flushing rim.

DuraShield®

DuraShield® is a revolutionary ceramic glaze that offers maximum hygiene with minimum effort. The protective 2-in-1 ceramic glaze features an ultra-smooth, almost pore-free surface from which dirt and grime wash off more easily. In addition, positively charged metal ions create an invisible shield that eliminates 99.99 % of bacteria within 24 hours.

HygieneUV disinfection

After a single initial programming in the SensoWash® Starck f Pro app, the disinfection cycle starts automatically and keeps your toilet permanently free of germs without any extra cleaning.

Odor extraction

The convenient odor extraction function can be controlled via the app. This optional function is available for SensoWash® Starck f and SensoWash® Classic and only works in combination with the DuraSystem® installation element, A2 actuator plate and corresponding accessories.

12 SensoWash®

Warm air dryer

For gentle and careful drying after using the shower functions. The temperature can be adjusted as needed via the app.

Seat heating

The temperature of the toilet seat is adjustable. In energy saving mode, the seat heating function is only activated at predefined times and is otherwise automatically deactivated. For example, it can be conveniently turned off overnight.

Toilet seat sensor

Integrated into the toilet seat, the sensor automatically detects users and prevents the shower function from being activated unintentionally.

Seat functions

Toilet lid on the SensoWash® Starck f Plus, Pro, and Classic models open and close automatically using a proximity sensor. All other models have our practical slow-close function: a light tap is all it takes, and the toilet seat and lid close quietly and gently.

Night light

The integrated LED night light lights up the inside of the toilet, allowing you to orient yourself in the dark without disrupting your body's natural biorhythms.

User profiles

Depending on the model, SensoWash® products have the option of programming and saving up to four different user profiles. You can call up your personal preferences with the simple touch of a button.

Decalcification

The convenient decalcification function prevents limescale buildup in SensoWash® shower toilets, ensuring optimal performance even in regions with hard water.

Intuitive control of SensoWash® functions

The SensoWash® remote control combines elegant design with pleasant tactile buttons that allows intuitive operation of all functions. The smooth finish prevents dirt from sticking to the surface. After use, the remote control can be stored away in the convenient magnetic wall-mounted holder. In addition, the SensoWash® Starck f and Classic models can be configured and controlled using the associated app.

SensoWash® Starck f

DESIGN BY
PHILIPPE STARCK

SensoWash® Starck f represents the most modern, hygienic, and easy-to-clean toilet at the highest technical level with an uncompromisingly minimalist look. All components have been optimized so that the technology is “invisibly” concealed within the ceramic portion. The flat seat and white cover behind it create a harmonious unit that goes perfectly with all Duravit design series. SensoWash® Starck f is available in three versions: Pro, Plus, and Lite, perfectly tailored to meet your personal needs.

SensoWash® Classic

DESIGN BY
PHILIPPE STARCK

SensoWash® Classic combines stylish design with extensive shower toilet functions that guarantee that perfectly fresh feeling and maximum comfort. The seat blends in discreetly as a visual continuation of the ceramic portion and is available for selected Duravit design series. The subtle yet striking exterior is extremely sophisticated thanks to its elegant glass cover, while illuminated touch buttons make using it an intuitive and user-friendly experience.
