Washing

Toileshing

Bathing

Showering

The complete bathroom from a single source --- For the public, semi-public and private sectors --- Flexibility in planning: from price-conscious to premium --- The ultimate in quality, technology, design

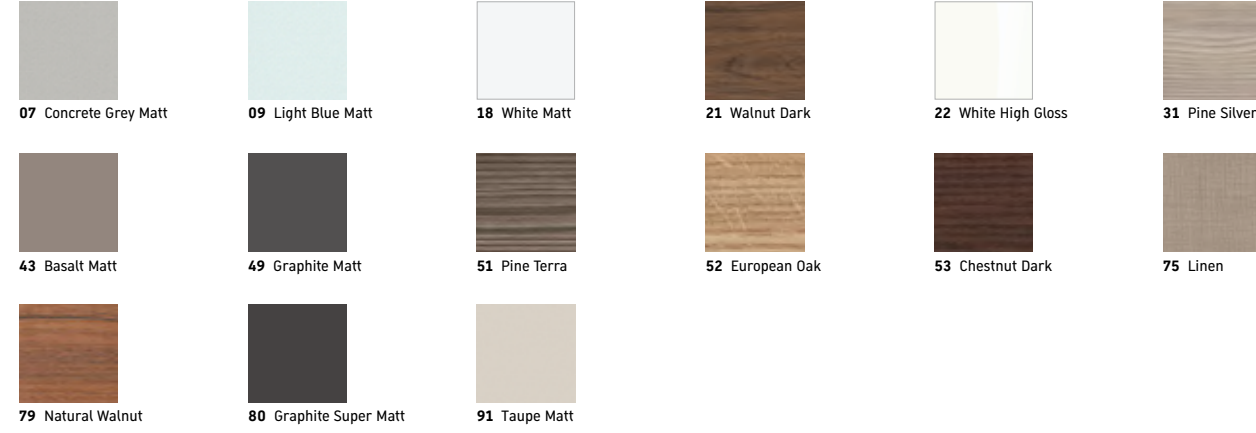

**The portal for professionals:
pro.duravit.com**

As a platform for architects, planners, trade partners and sanitaryware dealers, Duravit's professional portal provides an all-round service for all professional planning scenarios, with a practical focus and intuitive search options.

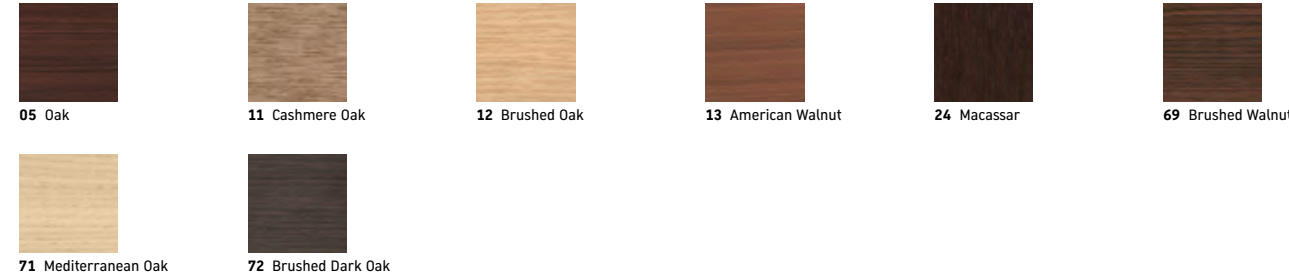

The clearly organized structure, ordered according to construction projects, ranges, categories, shapes or sizes, provides access to comprehensive product information. Material, weight, dimensions, technical data sheets, tender documents, technical drawings, 2-D and 3-D CAD drawings, and Revit files for BIM have been put together for downloading and can be used for your own planning projects.

100%

- DESIGN
- TECHNOLOGY
- QUALITY

100% Design

Duravit has a precisely formulated, recognizable, and sustainable design language with elementary, archetypal forms that are both modern and timeless. The key factor is to imagine the interior design of the bathroom in holistic terms: Duravit offers the full range of bathroom equipment from a single source, with perfectly harmonized elements for in front of and behind the wall. The unique network of 17 internationally successful designers, architects, and their teams works constantly on developing the Duravit design concept further. To date Duravit has picked up over 220 design prizes and awards for its product lines and bathroom ranges developed using such collaborative processes.

100% Technology

The focus of Duravit is on the perfect interaction between outstanding design, exacting precision, and comfort-enhancing technology. It should be accessible to the user at all times and generate daily benefits, but it should never be the main focus or interfere with the overall effect of the product or the room design. Duravit has a range of new and forward-looking developments, such as DuraCeram®, HygieneGlaze 2.0, or its c-bonded technology – a unique process that seamlessly combines ceramic and bathroom furniture.

100% Quality

Duravit aspires to offer its customers the perfect solution at all times thanks to its extensive understanding of quality and continual optimization measures across all areas of the company.

Emotional quality

The perfect interaction of the highest product quality, original design, and comfort-enhancing technology is unique and has a positive and lasting impact on users' quality of life, with a focus on look, feel, acoustics, and usability to inspire customers with the comprehensive quality of Duravit's branded products.

Service quality

For Duravit, excellent customer service means the highest possible competence, speed, and friendliness, from the initial contact right through to the after-sales service. Duravit provides support for project implementation, e.g. with specialist seminars, samples, or planning and sales documents. Swift, professional assistance is guaranteed by the technical hotline and the dedicated customer service.

Functional quality

Duravit products offer perfect reliability, high quality of use, and everyday suitability. They comply with all legal requirements and guidelines and are subject to strict internal specifications that go significantly beyond the official standards. The warranty period for sanitary ceramics, bathtubs and shower trays, accessories, toilet seats, and bathroom furniture is five years.

Concept quality

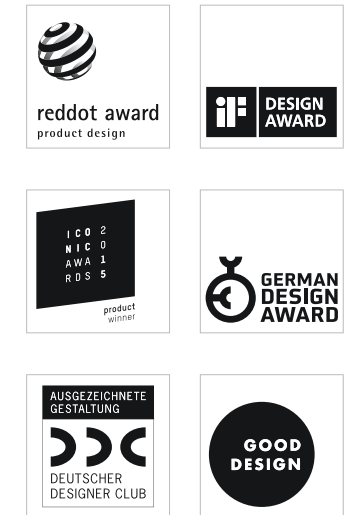

All the elements in the bathroom are not only perfectly matched, but also simple and intuitive to operate, which enhances users' comfort and quality of life. Take for example the DuraSystem® installation frames, which guarantee the perfect function of the products installed in front of the wall as well as offering convenient additional functions.

Aesthetic quality

Duravit ensures the perfect appearance of all its products by means of careful material selection and attention to detail. Minimal dimensional tolerances, precise lines, perfect transitions, and uniform joints are the visible result of this process.

Content quality

All relevant information about Duravit products and services is available at all times throughout the customer journey. It is provided across a range of platforms – correctly, comprehensively and tailored to the specific target group. For example, all product information and technical data sheets with tender documents can be found at pro.duravit.com.

Over 220 international awards testify to the consistent, high-quality, and recognizable design style.

International references

Duravit enjoys worldwide success in the project sector and is regarded as a reliable partner to architects, planners, and property developers. Its international project management team offers professional support in planning and implementation in over 130 countries. Duravit develops the product range in cooperation with internationally renowned designers such as Philippe Starck, Sieger Design, Kurt Merki Jr., Christian Werner, Matteo Thun & Antonio Rodriguez or Cecilie Manz. The product portfolio comprises sanitary ceramics, bathroom furniture, bathtubs and shower trays, wellness systems, shower-toilets, faucets and accessories as well as installation systems.

Sustainability

Duravit's company history has been shaped by an awareness of the need to lead the way into a sustainable future. All sites are subject to systematic environmental and energy management and are certified in accordance with ISO 14001, ISO 50001 and ISO 9001. Through its participation in recognized testing and certification systems and membership of relevant associations such as DGNB, IBU or USGBC (LEED), Duravit plays a pioneering role in the industry.

Duravit series
Luv, ME by Starck

Duravit is a member of the German Society for Sustainable Building, DGNB. The purpose of the DGNB system is to objectively describe and evaluate the sustainability of buildings and districts. Quality in the broadest sense, across the entire building life cycle, is evaluated.

Duravit is a member of USGBC (U.S. Green Building Council), a committee that advocates efficient and energy-saving buildings for a sustainable future. One of its measures is the LEED program for green construction. LEED-certified buildings are efficient, have a positive effect on residents' health, and promote renewable energies.

Duravit is a member of Institut Bauen und Umwelt (IBU), an initiative by building product manufacturers promoting greater sustainability in the construction industry. IBU offers a self-contained external representation of environmental product declarations (EPDs) of Ecolabel Type III in accordance with ISO and EN standards.

The IBU has awarded Duravit the Environmental Product Declarations (EPD) for the product groups sanitary ceramics, sanitary acrylic, and DuraSolid®. An EPD demonstrates the environmental qualities of a product as well as the company's sense of responsibility in terms of sustainable construction.

The Unified Water Label is a voluntary system by European bathroom manufacturers in which Duravit participates together with all major brands. The online database of the Unified Water Label and the labels that can be affixed to products create transparency by presenting the water-consumption values and energy consumption of bathroom products in an easily understandable manner.

Duravit is a member of WaterSense, a partnership program of the U.S. Environmental Protection Agency (EPA). It is mainly aimed at consumers who want to reduce their water consumption. To be awarded the label, products and services must save at least 20% without impairing function and performance.

Duravit bathroom furniture production has the PEFC seal of quality. PEFC is the largest institution ensuring sustainable forestry through an independent certification system. Wood and wood products with the PEFC seal come from forests with proven ecological, economical, and sustainable management.

Duravit has been certified in compliance with ISO 9001 (quality management), ISO 14001 (environmental management), and ISO 50001 (energy management). All management processes are subject to an ongoing improvement process and satisfy internationally recognized requirements.

Program variety

Duravit offers architects, planners, and property developers a full range of sanitary equipment from a single source, with ideal solutions for all project requirements: 16 current design bathroom series, varied shapes, dimensions, and variants. Products and concepts for the public, semi-public and private sector. From price-conscious construction projects through to the premium segment.

Washing

At the washing area Duravit offers plenty of scope for individuality with a wide range of design options that always match. Washbasin, vanity unit or console, lighting, mirrors, mirror cabinet, shelves, accessories and faucets are perfectly harmonized. The DuraSystem® washbasin installation frames are a solid technical starting point for practically all applications.

Toileting

Everything from a single source for optimum comfort and hygiene: from the DuraSystem® installation frame with a matching actuator plate through the toilet or SensoWash® shower-toilet up to the matching accessories such as toilet-brush holder or toilet-paper holder.

Bathing

Freestanding or built-in, corner or back-to wall version, acrylic or DuraSolid®, with whirl system or lighting: the Duravit range offers varied design options plus matching faucets and accessories for relaxing and enjoyable bathing.

Showering

Whether a quick freshen-up or soothing relaxation: Duravit has the right solution for any shower space. Shower trays in a range of materials and dimensions, thermostat-controlled shower sets, shower systems, and accessories guarantee comfort and safety.

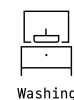

„Optimum project coordination is increasingly dependent on having one single point of contact that covers the whole range of sanitary facilities, as Duravit does with its perfectly harmonized products behind and in front of the wall.“

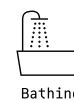

Mohammed Adib,
architect in Barcelona

Functional areas

Duravit splits the bathroom into four separate areas of activity: washing, bathing, showering, and toileting. For every area Duravit offers well-thought-out, harmonized products in a consistent design style. This approach makes bathroom design easier for professionals and customers alike and increases safety and efficiency during installation, thus offering a perfectly matching, extremely functional, and visually consistent outcome with maximum individualization.

Washing areas

Duravit washing area solutions impress through their form, functionality, and range of variants and provide the optimum basis for professional planning.

The range includes perfectly matching products for a range of project requirements, including for special areas of application such as schools or retirement homes. Compact versions with a reduced projection enable flexible room design even in small bathrooms.

Individual solutions combined with furniture are manufactured precisely to the required widths and depths.

Suitable for children

Special washbasins with a generously proportioned inner basin and easy-to-clean surfaces are ideal for autonomous use in a kindergarten or school.

pro.duravit.com/suitableforchildren

Without overflow

Duravit Med washbasins without overflow satisfy the high hygienic requirements in the medical sector. They are available in various designs.

pro.duravit.com/med

Accessible

The Vital models in the D-Code, DuraStyle, Starck 3 and Architec series meet DIN standards 18024/II and 18025/I+II for barrier-free bathrooms and are wheelchair-accessible.

pro.duravit.com/barrierfree

Washbasins, double washbasins, furniture washbasins

Washbasins and double washbasins are available in a range of shapes and dimensions as a classic solution for private bathrooms. Combined with matching vanity units in a range of finishes, furniture washbasins offer additional storage.

Handrinse basins and furniture handrinse basins

Handrinse basins in a range of shapes and variants, e.g. also as a handrinse basin for a 90° corner, are space-saving solutions for guest bathrooms and toilets. Furniture handrinse basins can be enhanced with a variety of matching vanity units and offer storage space for small rooms.

Built-in washbasins and semi-recessed washbasins

Washbasins that can be set into a countertop from above or below or into a vanity unit feature easy-to-clean surfaces and are ideal for the semi-public and public sector. Semi-recessed washbasins are especially space-saving (see below).

Above-counter basins and wash bowls

Available in a range of shapes and variants, supplied with or without tap platform, above-counter basins and wash bowls are perfect for combining with matching consoles and vanity units from Duravit. As a customized solution with plenty of storage space, they become a central feature of the overall look of the bathroom.

Flush-fitted transition

“Bonded” technology enables washbasins installed from below to be combined seamlessly with consoles from a wide range of furniture series. Similarly, the patented “c-bonded” variant enables a virtually seamless combination of furniture washbasin with the vanity unit.

Individual solutions

Custom washing areas manufactured to the highest standards of craftsmanship are made to measure precisely to the required widths or depths. With ideal storage options, they satisfy the most exacting requirements in large projects.

Variety of furniture

Duravit's overall furniture assortment comprises seven ranges with designs that are each matched to a bathroom series. Further eight programs can be flexibly combined with a range of ceramic series. With 49 different finishes, the range of variants is almost endless.

Place-saving products for small floor plans

Small floor plans do not mean you need to compromise on design freedom. With a creative layout and high-quality designer products, guest bathrooms can be transformed into oases of comfort. Where floor space is at a premium, the focus is on products in compact dimensions.

When space is at a premium

Handrinse basins with a super-short projection and tap platform to the side or corner handrinse basins are problem-solvers in small floor plans. The Architec diagonal handrinse basin is also a space-saving solution with compact dimensions and a generous storage area.

Wash bowls, above counter basins

Square, round, oval, or tri-oval, with or without tap platform, the Duravit above-counter basins set a functional design statement. Can be combined with a range of materials such as wood, natural stone, or glass, with Duravit furniture consoles or vanity units for individual washing area solutions with a practical storage area to the side. Smoothly polished undersides guarantee that the basins can be precisely mounted on the surface.

Above-counter basins without tap platform

Above-counter basins without a tap platform can be placed at variable distances from the wall. Combine with a wall-mounted or upright faucet for a clear aesthetic. The open space around the basin enables easy cleaning.

Above-counter basins with tap platform

Above-counter basins with a tap platform are fitted either directly to the wall or at a distance from the wall. The area to the left and right of the washbasin mixer acts as additional storage space.

Above-counter basins with a glazed back

When placed directly in front of a mirror, the above-counter basin with a glazed back creates a perfect visual, even in the reflection.

Two-tone above-counter basins

Two-tone above-counter basins thrive on attractive contrasts: White High Gloss on the inside and Satin Matt on the outside, in Anthracite, White, Grey or Sand they create expressive and harmonious combinations.

Faucets

Duravit faucets set themselves apart thanks to their high-quality materials, comfortable functions, and universal design, creating an ideal match for all Duravit ceramic and bathroom furniture ranges. They are a perfect addition to the overall picture: whether at the washing area, the shower, bathtub, or bidet, for the private and the project sector.

Precise: the mixer lever, perfectly proportioned to the eye and to the touch

Flexible: splash prevention from an outflow with a jet that can be adjusted by up to 20°

Durable chrome surface

Long-lasting ceramic cartridge

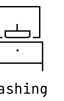

Water-efficient: flow rate of just 5.0-5.2 liters/min

With four different sizes and two finishes available – Chrome and Black Matt – the C.1 faucets are compatible with all types of washing area, from a handrinse basin to a wash bowl.

Attractive: a rosette provides a tidy cover for the tap hole despite the slimline dimensions

Compatible: all upright faucets can be supplied with or without pop-up waste

Accessories

With classic materials, durable workmanship, and a high design standard, Duravit accessories are a perfect complement to the bathroom fittings. The Karree accessories with their linear design, the D-Code program with its curved lines, and Starck T with the characteristically fluid transition from the round base to the geometric "T" shape are available as alternatives for enhanced comfort. They set highlights in Chrome (also available in Black Matt with Starck T).

Variable consoles, variable tall cabinets

Consoles of the Brioso, DuraStyle, L-Cube, X-Large, and XViü series are available in two thicknesses, 30 and 45 mm, and in two depths, 550 or 480 mm. The width can be specified individually from 800 to 2000 mm, optionally combined with vanity units (600 to 1000 mm) and/or vanity units for consoles (300 to 800 mm) with one pull-out compartment or two drawers.

Similarly, the correct height and width can be chosen individually for the tall cabinets of the series Brioso and L-Cube.

The optional interior system for drawers and pull-out compartments is alternatively available in solid American Walnut or Maple. The storage space can be organized tidily with dividers and boxes.

Universal Light and Mirror

The "Light and Mirror" universal range for the private and project sector offers LED mirrors in a range of dimensions and three different versions, with light field on the top edge, dual light fields on the sides, or four-sided ambient light. These are each available in three different price classes and design variants – good, better, best – from the entry-level model with a wall-mounted switch through to the variant with a sensor switch, dimmer function, mirror heating, and washbasin lighting. The timelessly modern shape of the mirrors harmonizes perfectly with all Duravit design series.

LED single light field with dimming function

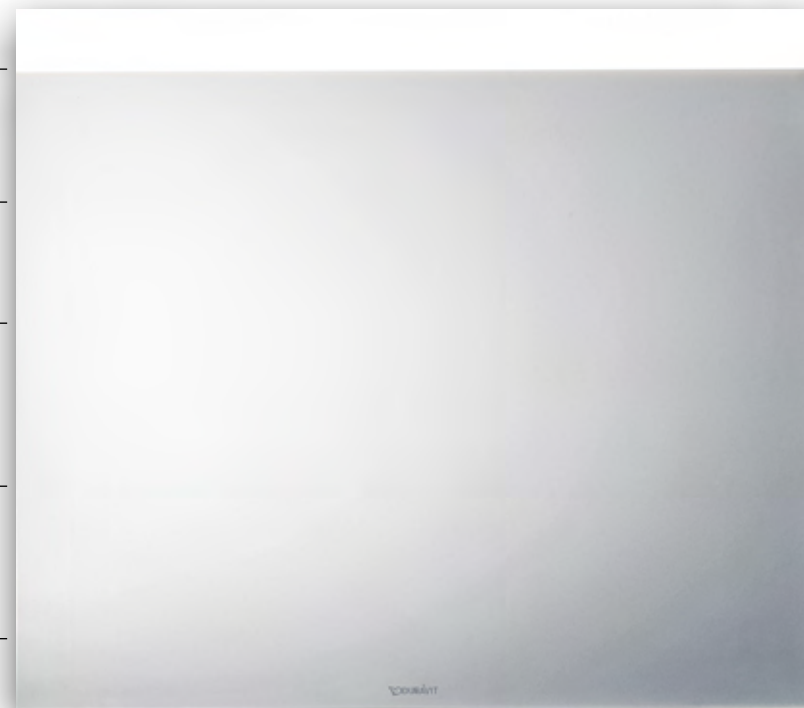

LED module 4000 kelvin light color

LED lifespan > 30.000 hours

Energy class A++

Ambient light pleasant indirect lighting up and down

Defog system Mirror does not fog up in high air humidity

Universal Light and Mirror „best“ version

Sensor switch for on/off function, integrated LED-dimming function

Downlight LED light for washbasin area

The mirrors with single light field, dual light fields and ambient light 4-sided are available in three different versions:

- Good** On/off function to be operated with external switch only
- Better** Equipped with sensor switch bottom right for on/off function
- Best** Combines the following features: sensor switch for on/off function, integrated LED-dimming function, defog system, downlight (always included for ambient light)

Mirror cabinets of the universal range are available in multiple dimensions and three different versions. As with the Universal mirror program, three design variants are on offer, with an optional installation frame for "good" and "better". All models have a 6 cm-wide LED light band with a light output of over 300 lux, a pleasant light color of 4000 kelvin, and more than 30,000 hours of operation.

Toileshing

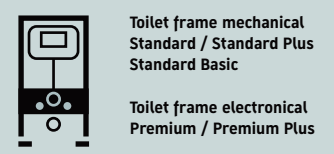

Different designs from round to rectangular as well as all necessary dimensions and versions for toilets, bidets, and urinals increase flexibility in planning. In perfect harmony: installation frames, accessories, and faucets.

Toilets for every area of application

Wall-mounted or floor standing toilet, washout or washdown: Duravit's innovative technology meets the highest standards in terms of flushing performance, design, sustainability, comfort, and hygiene.

The range includes perfectly matching products for a range of project requirements, including for special areas of application such as kindergartens or retirement homes. Compact versions with a reduced projection enable flexible planning even in small rooms.

The range now also includes matching bidets.

As an upgrade for upscale projects, the SensoWash® shower-toilets offer state-of-the-art comfort and optimum toilet hygiene.

Carefully thought-out Duravit quality for the toilet

- Generally speaking, all Duravit toilets are fully glazed to prevent unhygienic dirt adhesions.
- The **rimless** technology with open design of the toilet rim enables an innovative and efficient flush.
- Duravit toilets achieve hygienically flawless flushing results with low water use of just 4.5 liters.
- The patented **Durafix** fixing system for concealed installation creates a completely flat and easy-care outer contour of the toilet.
- Functional surfaces such as **WonderGliss** and **HygieneGlaze 2.0** have an antibacterial effect and make cleaning easier. They are available as options.
- Duravit toilets comply with all international standards and guidelines.

Wall-mounted toilet, wall-mounted bidet
Wall-mounted toilets and bidets enable flexible adjustment of installation height. The floor clearance makes cleaning quick and easy.

Floor standing toilet, floor standing close-coupled toilet, floor standing bidet
Floor standing toilets with or without surface-mounted cistern and bidets can be fitted easily.

SensoWash® Starck f
With their puristic aesthetics and timeless modernity, SensoWash® Starck f Plus or SensoWash® Starck f Lite are a perfect match for all Duravit design series. Designed by Philippe Starck, they meet the highest requirements for a shower-toilet.
→ p. 066

SensoWash® Slim
SensoWash® Slim offers essential shower functions for nine Duravit design ranges. The entire seat unit can be removed and replaced with a single movement for quick and easy cleaning.
→ p. 068

Available for the series: Darling New, DuraStyle, Happy D.2, ME by Starck, Starck 2, Starck 3, Vero Air, Viu

Children's wall-mounted toilet
The DuraStyle Basic washdown, wall-mounted toilet makes it easy for children to get on and off the seat and to sit safely. Ergonomic dimensions and a soft-closing toilet seat encourage autonomous use.

Accessible toilets
With a seat height of 450 - 500 mm and a projection of 700 mm, barrier-free wall-mounted toilets in compliance with DIN 18040 enable ease of transfer and independent usage to the greatest possible extent.

Toilet with a raised sitting position
The Comfort wall-mounted toilet with a sitting position that is 500 mm higher, e.g. from the Starck 3 series, makes everyday life easier. Existing connections can be used for installation.

Floor standing "Big Toilet"
Extra-wide and extra-deep for maximum comfort, the Starck 3 toilet takes seating comfort to the next level. With the Vario universal outlet, it is suitable for horizontal and vertical connection.

Normal Compact

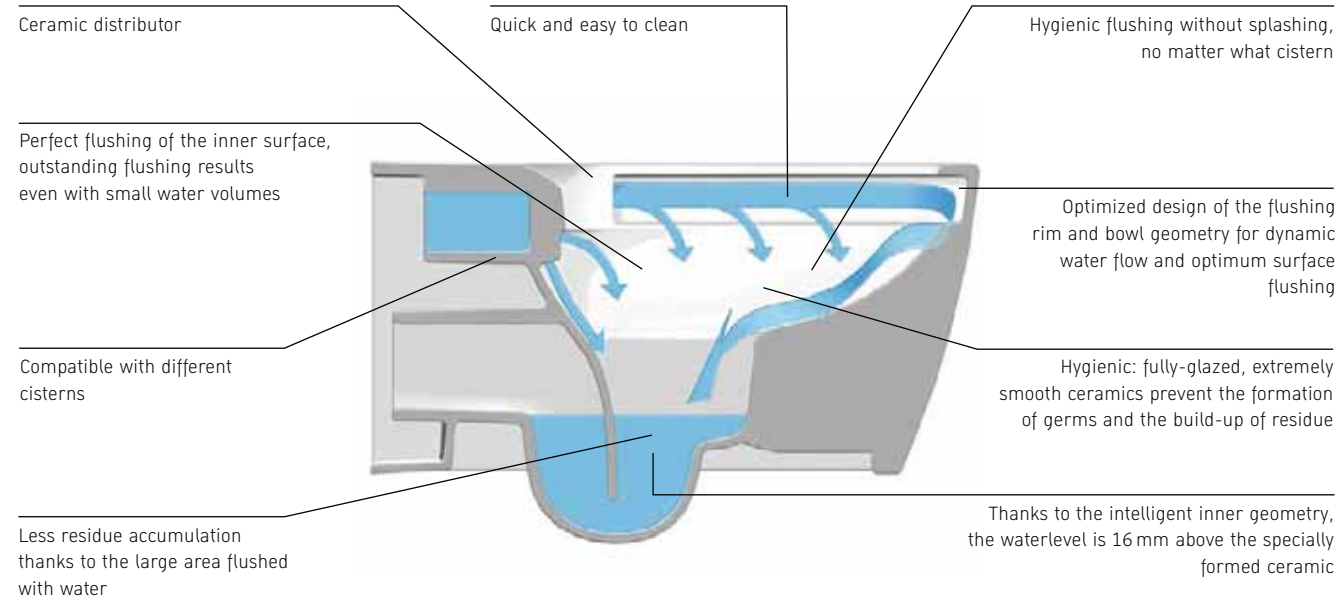

Barrier-free toilet models are available for the series Architec, D-Code, DuraStyle, and Starck 3

All variants and models can be viewed at pro.duravit.com/barrierfree

Duravit Rimless®

The open design of the toilet rim on Duravit Rimless® toilets and urinals enables an innovative and powerful water flow for optimum flushing performance. Of course, the applicable standards with regard to possible splashing are also observed and, in part, exceeded, ensuring perfect and hygienic flushing results, even with smaller volumes of 4.5 / 0.5 litres of water. Thanks to the open, easily accessible rim area, the bowl is easy to keep clean.

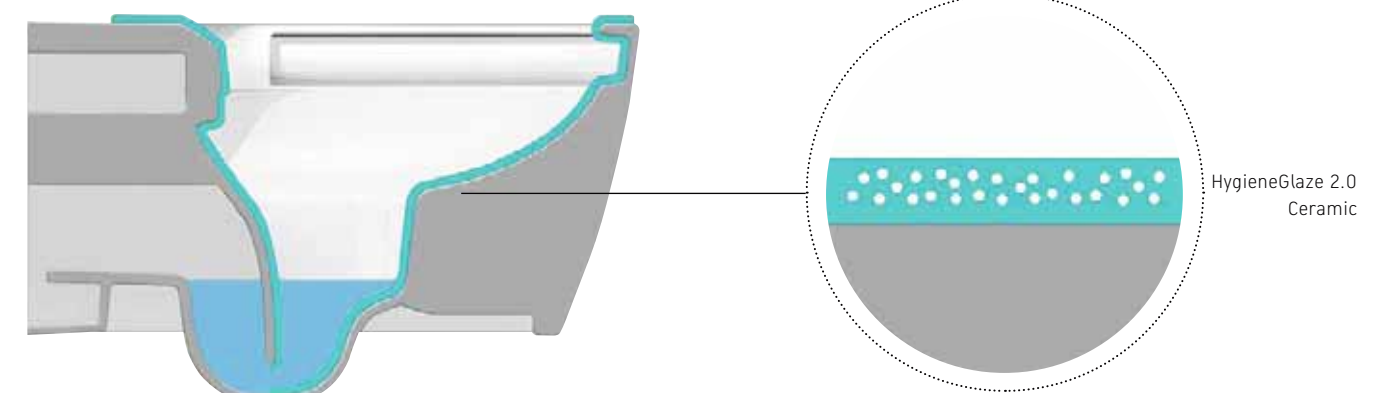

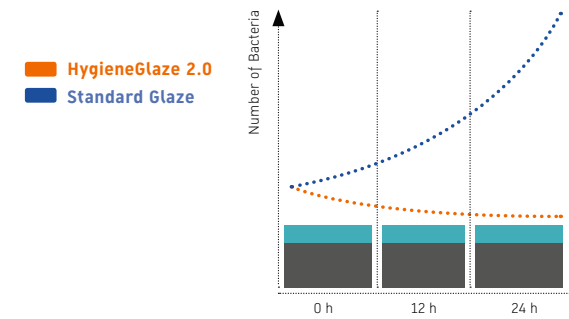

More at pro.duravit.com/rimless

HygieneGlaze 2.0

Duravit's HygieneGlaze 2.0 improves the standard of hygiene for toilets and urinals. The antibacterial glaze is not only exceedingly effective, but also acts very quickly. After just six hours, 90% of bacteria (e.g. coli bacteria) are killed, with 99.999% eliminated after 24 hours.

Baked into the ceramics and extending from the interior to the rim of the toilet or urinal, HygieneGlaze 2.0 is effective in the areas particularly susceptible to the accumulation of bacteria.

More at pro.duravit.com/hygieneGlaze

SensoWash® Starck

Design by Philippe Starck

SensoWash® Starck f shower-toilets offer the latest, comfort-enhancing technology in an uncompromising, minimalist aesthetic. The flat seat and the white cover located behind it form a precise, harmonious unit. The flat, heatable seat unit has a scratch-resistant and pore-free surface, affording the highest possible level of hygiene.

Available in the variants Plus and Lite, all functions are managed intuitively via a remote control. The shower-toilet can also be individually configured and controlled using the SensoWash® App.

Individually configurable and controllable via SensoWash® App.

SensoWash® Slim

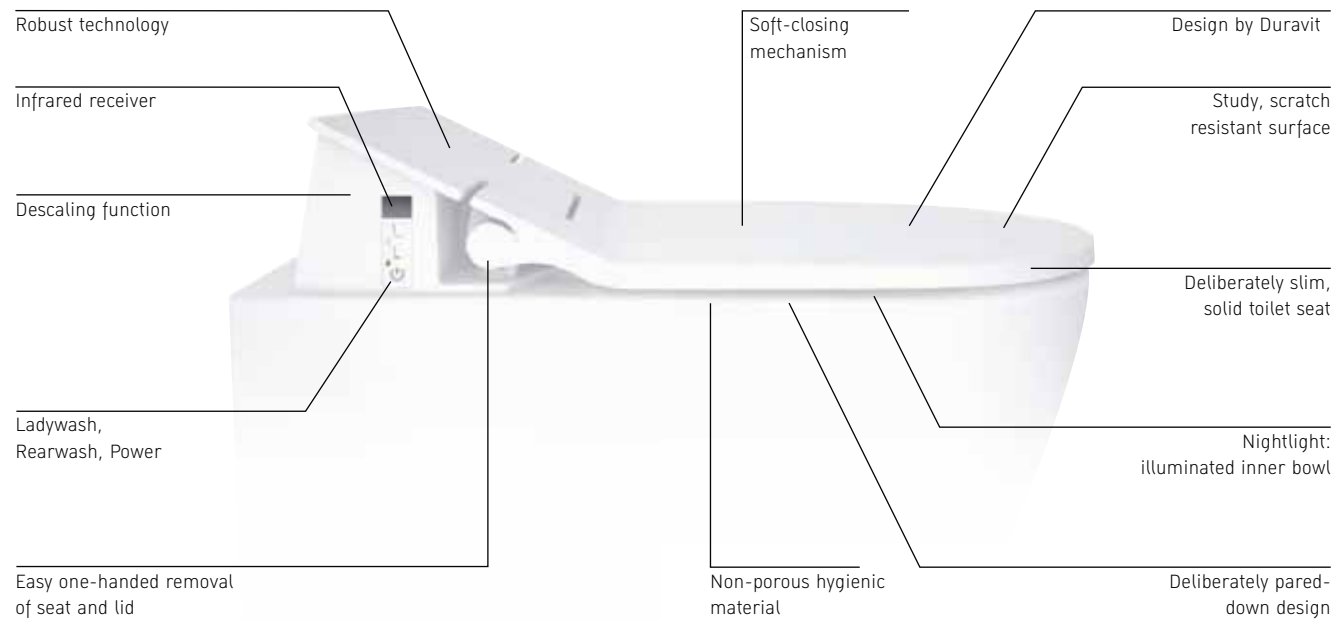

Design by Duravit

The SensoWash® Slim shower-toilet line offers essential functions for the most natural form of hygiene that can be managed intuitively via the convenient remote control. The robust material and the closed, non-porous, and scratch resistant surface of the seat unit is ideal for maintaining optimum hygiene. The entire SensoWash® Slim seat unit can be removed in one go, so the seat and toilet can be cleaned much more quickly and easily.

High functionality, ease-of-use and excellent value for money are the defining features of SensoWash® Slim.

Urinals

Duravit offers the optimum solution for all areas of application in public or semi-public buildings with more than 30 different urinal models. With water inlet from behind or above, with water rim, with jet nozzle, as an electronic version, or waterless, they meet the highest requirements in terms of hygiene, durability, and cost-effectiveness. The very slim models, e.g. Starck 3 with a width of just 245 mm, are suitable for rows of urinals installed alongside one another. Simple sanitary ceramic dividing walls provide the necessary privacy. Pre-mounted DuraSystem® installation frames guarantee uncomplicated and safe installation.

Electronic with jet nozzle
The urinal with jet nozzle impresses with its low water consumption and perfect, hygienic flush. Flushing and service programs can be configured individually. Cleaning of the rimless ceramic and exchange of the air trap via the bowl interior (e.g. DuraStyle) can be completed quickly and easily. The flushing action is triggered by an automatic infra-red sensor as soon as the user moves away from the urinal. Can be powered either by batteries or connected to the mains (230 V).

Electronic with rim
The electronically-controlled siphon urinal guarantees perfect hygiene at the same time as easy cleaning and low maintenance. Flushing and service programs can be configured easily and individually. The automatic infra-red user sensor triggers the flush as soon as the user moves away from the urinal. Can be powered either by batteries or connected to the mains (230 V).

Utronic
The Utronic urinal has an electronic control unit. Flushing is fully automatic and contactless. Flushing and service programs as well as flushing duration can be configured easily and individually. The automatic hygiene flush (every twelve hours) guarantees a secure air trap. Can be powered either by batteries or connected to the mains (230 V).

Dry
In the dry version, the urinal works completely without water – and is no less hygienic as a result. The dry urinal is easy to clean due to the lack of a rim. The hose diaphragm integrated into the outlet opens automatically when urine flows through and then closes again preventing odors. The odor ring with biodegradable gel indicates when the air trap needs changing (after approx. 7500 uses).

0.5-liter rimless urinal
The ME by Starck urinal features the innovative rimless technology. The open rim design enables dynamic water flow with excellent flushing results. The easily accessible rim area also makes the bowl easy to clean.

The applications for the urinal frame for concealed flushing valves are extremely flexible as it can be activated both with actuator plates with manual flush actuation and also via infra-red proximity electronics. The electronic variant is available as a battery or mains version. The frame is also suitable for urinals with water inlet from behind. It is quick and easy to install, guaranteeing a high level of flexibility for any project.

The highest level of functionality is also called for in front of the wall, the surface-mounted actuator plates appeal to both the sense of sight and touch. They feature the clear geometry that characterizes the stylish design of Duravit products.

Waste and overflow
Quadroval
791246

The outlet/drain (left) is optionally available with integrated bath inlet. The mechanical safety lock prevents the door from being opened while the bathtub is full.

At bath time, the waterproof pad becomes a comfortable backrest that can be individually positioned (left), otherwise it can be used as a pad to sit on or as a practical storage surface.

Bathtubs

Duravit offers bathtubs with an oval, round, right-angled, pentagonal, or hexagonal basic shape, in various designs and dimensions. From a generously-proportioned two-seater through to a space-saving shower or bath combination, the bathtub range offers the perfect solution for all architectural requirements and room sizes.

Acrylic bathtubs have a high-gloss, white finish similar to ceramic and impress with their pore-free, robust surface. The mineral material DuraSolid® enables bathtubs to be realized in flowing shapes without visible joints and seams. The matt surface feels pleasantly soft and warm.

Optimum use of space

The Shower + Bath features a walk-in shower and bathtub in one. The integrated glass door turns the bathtub quickly and easily into an open shower with straightforward access. The open door remains invisible under a waterproof pad. A large glass partition, optionally mirrored, demarcates the shower area. Compact external dimensions of 1700 x 750 mm enable space-efficient installation options in a corner or niche.

Tub covers

The individual, combinable White or Anthracite elements can transform the bathtub into a comfortable place to sit, a relaxing lounger, or a practical changing mat. Used individually at bath time, these elements can also be used as a storage surface.

Freestanding bathtubs

Freestanding bathtubs with seamless paneling can be positioned anywhere in the room. They are available in a range of designs as a one-seater (Cape Cod, bottom) or two-seater (DuraSquare, top) as an eye-catching choice. The freestanding C.1 bath faucet is a perfect addition.

Corner bathtubs

Maximum utilization of space – even where space is tight. The trapezoid Paiova pentagonal bathtub (bottom) that enables side-by-side bathing makes perfect use of the corner. Duravit offers a range of other models for positioning in a corner, e.g. the oval Luv bathtub (top).

Back-to-wall bathtubs

Back-to-wall bathtubs are fitted flat against a wall and are available as a one- or two-seater to match a range of design series. Made entirely of DuraSolid® as with Cape Cod (top), or with seamless acrylic paneling in Graphite Super Matt as with Happy D.2 Plus.

Built-in bathtubs

Built-in bathtubs (P3 Comforts top, DuraSquare bottom) made from acrylic or DuraSolid® offer a wide range of design opportunities with paneling from materials selected specifically to go with the room design. They are available in dimensions from 1600 x 700 mm to 2000 x 1000 mm to fit all design series.

Further versions on pro.duravit.com/tempano

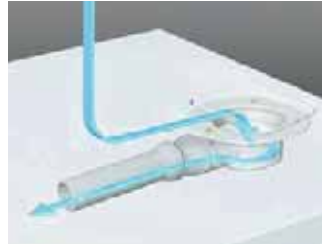

Shower trays

Duravit offers shower tray models (square, rectangle, or quarter circle) for the variants in all required sizes that can be installed flush-fitted, semi-recessed or on the tile. Duravit uses the innovative DuraSolid® material with a matt surface or high-gloss white sanitary acrylic for its shower trays. Accessories include height-adjustable feet or a polystyrene support frame that can be tiled.

Barrier-free

Shower trays made of DuraSolid® offer class B slip-resistance and are suitable for accessible installation in compliance with DIN 18040. The flush-mounted shower trays meet the criteria of the DIN standards 18025-1, 18025-2 and 18040-2E for wheelchair users. The optional Antislip coating is available for acrylic shower trays.

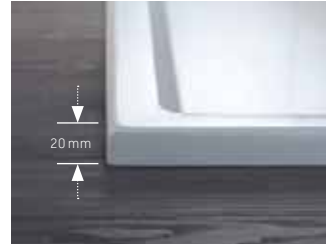

Drainage system

Duravit has developed a drainage system for DuraSolid® shower trays that guarantees excellent drainage performance in conjunction with the standing water height in the bathtub. It is therefore ideal for the heavier water flow bigger shower heads and rain showerheads. By using a secure collar seal, the drain can be verified leak-proof before the shower tray is installed.

Antislip

All acrylic shower trays are optionally available with an "Antislip" coating. The transparent and yet tangible primer guarantees sureness of footing and slip-resistance pursuant to DIN 51097. Antislip is notable for its robustness, ease of cleaning, and environmental-friendliness. Products made from DuraSolid® meet slip resistance requirements even without an additional Antislip coating.

Starck Slimline shower tray

With a rim height of just 20 mm, the shower trays from the Starck Slimline range are pleasantly low and comfortable. The range covers all dimensions needed for planning from 800x800 mm to 1800x900 mm.

Flexible installation

Flush fitted

Semi-recessed

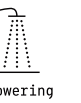

Floor-mounted

Sound insulation

If installed with the optional noise-protection set, all shower tray ranges satisfy DIN 4109, VDI 4100 and the more stringent Swiss standard SIA 181.

„DuraCeram® is the very quintessence of ceramics. With finely worked and precisely contoured forms, such as the Luv wash bowls.“

Thomas Stammel,
CEO board technology, Duravit

Above-counter basin ↗ bonded, c-bonded, built-in washbasin, semi-recessed washbasin, furniture washbasin, washbasin

Above-counter basins can be combined with a range of materials such as wood, natural stone, or glass, with Duravit furniture consoles or vanity units for individual washing area solutions with a practical storage area to the side. Smoothly polished undersides guarantee that the basins can be precisely mounted on the surface.

Acrylic ↗ DuraSolid®A, DuraSolid®Q

Duravit uses sanitary acrylic with a pleasant, pore-free, smooth surface and white shimmering gleam for its bathtubs and shower trays. The material is colored throughout, UV-stable, colorfast, and resistant to almost all standard household cleaning agents.

Air-System ↗ Whirl system

The Air-System can be switched on and off via a flat, discreet, one-touch Piezo button and offers a pleasant massage by adding fine air bubbles. The flat, white base jets with a diameter of just 8 mm (acrylic bathtubs) or the directly integrated base jets (DuraSolid®A) are almost invisible.

Ambient light ↗ LED

In addition to direct mirror lighting, Duravit Premium mirror models also offer indirect light for pleasant lighting on all four sides. As well as the emotional impact, indirect light also ensures greater brightness in the field of vision thanks to the ceiling deflection.

Anti-fingerprint

An additional, highly matt coating on the furniture surfaces (in Graphite Super Matt on Happy D.2 Plus) makes fingerprints invisible.

Antislip

Optionally available for acrylic shower trays, the transparent yet tangible Antislip coating guarantees sure footing. DuraSolid® shower trays meet anti-slip requirements without further coating.

Barrier-free ↗ Med washbasin

Under the DIN 18040 standard, barrier-free bathrooms require a wheelchair-accessible washbasin, a toilet with an elongated projection of 70 cm as well as a flush-fitting shower tray with a minimum size of at least 120 x 120 cm. Individual needs and the extent to which mobility is restricted are important parameters to take into account during planning and execution.

Base inlet

Bathtubs with a base inlet are filled almost silently from below. The water inlet can be controlled by any standard faucet. Alternatively, an outlet/drain with integrated bath inlet is available.

Bathtub covers

The individual, combinable White or Anthracite elements can transform the bathtub into a comfortable place to sit, a relaxing lounger, or a practical changing mat. Used individually at bath time, these elements can also be used as a storage surface for books.

Big Toilet

Extra-wide and extra-long for maximum comfort, the Starck 3 toilet takes seating comfort to the next level. With the Vario universal outlet, it is suitable for horizontal and vertical connection.

Bluebox®

The Duravit Bluebox® is a universal installation system for concealed installed faucets (lever mixers or thermostats). The design decision can even be made following the installation of the base plate (Bluebox®).

Bonded, c-bonded ↗ Built-in washbasin, furniture washbasin, washbasin

"Bonded" technology enables built-in washbasins installed from below to be combined seamlessly with consoles from a wide range of furniture series. Similarly, the patented "c-bonded" variant enables a virtually seamless combination of furniture washbasin with the vanity unit.

Built-in washbasin ↗ Above-counter basin, semi-recessed washbasin, furniture washbasin, washbasin

Washbasins that can be set into a countertop from above or below or into a vanity unit feature easy-to-clean surfaces and are ideal for the semi-public and public sector.

Ceramic, sanitary ceramic

Ceramic is a natural product made from ingredients such as kaolin, quartz, feldspar, or clay and is unique by its very nature. Each bathroom ceramic is individually finished by hand prior to glazing.

Ceramic filter

The Architec washbasin with a ceramic filter is particularly hygienic and easy to clean. Instead of a standard drain in which dirt and bacteria can collect, the water simply runs through small openings in the ceramic.

Combi-System E ↗ Whirl system

The Combi-System E for whirltubs offers an especially high standard of comfort with an electronic control: all the regular functions of the Air and Jet systems, the back and foot massage and LED white light can be easily and comfortably operated using a compact integrated controller. The Combi-System E can be individually expanded with the additional heating, LED colored light, and UV hygiene management modules. A changer can be used to concentrate the force of the pump on the feet and back jets.

Combi-System L ↗ Whirl system

The touch panel of the Combi-System L for whirltubs with LED backlighting affords a high level of comfort. All jets, such as the four flat swivel jets with the roving water jet as well as the two LED white-light sources, can be operated quickly and easily. Can be individually enhanced with the additional modules LED colored light, heating, and the automatic UV hygiene management.

Combi-System P ↗ Whirl system

The positive effects of the Air and Jet systems are combined in the Combi-System P for whirltubs. In addition, the Combi-System P is also fitted with four back-massage jets. It is operated via a pneumatic switch and an air control fitted on the rim of the bathtub. Can be individually enhanced with the additional module LED colored light.

Comfort toilet

The Comfort wall-mounted toilet with a sitting position that is 500 mm higher, e.g. from the Starck 3 series, makes everyday life easier. Existing connections can be used for installation.

Compact

Compact versions of washbasins, bathroom furniture, and toilets offer a comprehensive design style for small bathrooms or guest toilets. They enable efficient use of space with maximum comfort and increase planning flexibility.

Decor ↗ Real wood veneer, lacquer, solid wood

Furniture with decor finishes on a chipboard basis refined with laminates. The furniture surface is resistant to damp and perfectly suited to the bathroom.

Dual Flush

Toilets with Dual Flush technology help save precious water. The large button triggers the flush with the full water volume. The small button comes into its own for "number ones", providing a clean and hygienic flush with a lower quantity of water.

DuraCeram®

DuraCeram®, an innovative material developed by Duravit, is a special ceramic mass with particularly high impact resistance. It also enables particularly delicate forms to be realized with extremely thin edges just 5 mm thick. This is also done without any loss of quality, robustness, and ease of cleaning.

Durafix

The patented Durafix fixing system for concealed installation creates a completely flat outer contour of the toilet. Wall-mounted toilets of the series Architec, Darling New, DuraStyle, Happy D.2, ME by Starck, Starck 1, Starck 2, Starck 3, Vero Air, and Viu are available with Durafix.

DuraSolid®A

DuraSolid®A is a proven cast mineral material for bathtubs. The material is colored throughout and also retains the surface quality and color in the event of damage. Bathtubs made from DuraSolid®A have a matt, velvety surface for a pleasant touch without visible joints and seams, e.g. the bathtub Cape Cod by Philippe Starck. DuraSolid®A guarantees safety with slip-resistance class B.

DuraSolid®Q

DuraSolid®Q is an innovative mineral material for shower trays. The look and feel of the matt surface is reminiscent of natural stone. The slightly speckled surface enhances the natural look and is available in four colors (Anthracite, Sand, Concrete, and White) to match individual tiles and furnishing styles. DuraSolid®Q is homogeneous with full-body coloring. It has a very hard surface and density, making it relatively resistant. The surface structure of DuraSolid®Q satisfies the requirements of class B slip-resistance and ensures additional safety in the bathroom.

DuraSystem®

DuraSystem® offers installation systems for the toilet, urinal, washbasin, and bidet, for the most common installation scenarios, whether dry-wall or wet construction. The matching actuator plates are available for toilets and urinals with mechanical and electronic flush actuation as well as in the versions white plastic, plastic high-gloss chrome, white tempered safety glass.

Duravit Rimless® ➔ Rimless**Furniture washbasin ➔ Above-counter basin, bonded, c-bonded, built-in washbasin, semi-recessed washbasin, washbasin**

Furniture washbasins are designed to be combined exactly with matching vanity units and offer a harmonious storage solution.

Glazed flushing rim

Generally speaking, all Duravit toilets are fully glazed to prevent unhygienic dirt adhesions.

HygieneGlaze 2.0

The innovative HygieneGlaze 2.0 ceramic glaze is baked into the ceramic during firing and has an antibacterial effect: 99.999% of bacteria (e.g. coli bacteria) are killed after just 24 hours. HygieneGlaze 2.0 also inhibits bacterial growth (e.g. Escherichia Coli) as compared to a regular ceramic glaze. HygieneGlaze2.0 is available for toilets in the following ranges: Architec, Darling New, D-Code, DuraStyle, Happy D.2, ME by Starck, Starck 3, Vero Air and Viu.

Icon control ➔ Sensor control

Mirrors and mirror cabinets with icon technology have a touch panel on the surface of the mirror for main light, ambient light, and defogger.

Interior system

The optional organizer system for drawers and pull-out cabinets is alternatively available in solid American Walnut or Maple. It organizes the storage space with dividers and suitable boxes.

Jet-System ➔ Whirl system

The Jet-System has jets set into the side walls that expel a mixture of air and water into the bathtub, gently or powerfully. Can be individually enhanced with the additional module LED colored light.

Lacquer ➔ Decor, real wood veneer, solid wood

Lacquer surfaces in high gloss or matt are of a high quality and bring color into the bathroom. Because the surface is completely sealed, it is resistant to damp and ideally suited to use in the bathroom.

LED ➔ Ambient light

Duravit uses LEDs (light emitting diodes) as light sources for mirrors and mirror cabinets, light and colored light programs for bathtubs, whirlpools and saunas as well as for the operating elements on bathtubs. Special LEDs are used that are economical, dimmable, and especially long-lasting.

Med washbasin ➔ Barrier-free

Duravit Med washbasins without overflow satisfy the high hygienic requirements in the medical sector. Models of the series Architec, D-Code, DuraStyle, Starck 3, and Vero are available. Wheelchair-accessible Vital washbasins of the series Architec, D-Code, DuraStyle, and Starck 3 are also available as a Med variant.

Night light

Shower-toilets with LED night-light function offer orientation and safety when it's dark without interrupting the body's repose. Some mirrors and mirrored cabinet models feature washbasin lighting that acts as a night light.

Push-open valve ➔ Slotted waste

The push-open valve for washbasins with overflow can be opened and closed with a simple tap, depending on whether the basin should be filled with water or drained.

Raised tap platform

On some washbasin models, the raised tap platform serves as a dry area that can also be used as a storage area for bathroom utensils.

Real wood veneer ➔ decor, lacquer, solid wood

Bathroom furniture made from real wood veneers have a chipboard base that is refined with various laminates and a 0.5 mm veneer. The furniture surface is resistant to damp and ideally suited to the bathroom.

Removable toilet seat

Toilet seats can be easily removed for cleaning.

Rimless ➔ Duravit Rimless®, washout flush, washdown flush

The open design of the rim on Duravit Rimless® toilets and urinals enables an innovative and powerful water flow for optimum flushing performance. Of course, the applicable standards with regard to possible splashing are also complied and, in part, exceeded.

Semi-recessed washbasin ➔ Above-counter basin, bonded, c-bonded, built-in washbasin, furniture washbasin, washbasin

Semi-recessed washbasins are especially space-saving. They are not fully integrated into a countertop or item of bathroom furniture and protrude out to the front.

Solid wood ➔ Decor, real wood veneer, lacquer

When solid wood is used, naturally occurring fluctuations in texture, grain, porosity, and color are proof of the distinctiveness and authenticity of wood as a natural material.

Sensor control ➔ Icon control

On mirrors and mirror cabinets with sensor control, the light can be turned on and off with a simple motion of the hand.

SensoWash®

SensoWash® is an innovative range of high-quality shower-toilets: from the comfortable seat to the wireless, intuitive remote control, SensoWash® units feel every bit as good as they look. SensoWash® Slim offers all the essential functions in a modern slim design. With SensoWash® Starck f, all the technical components are housed in the ceramic body. All functions are controlled via a remote control. The shower-toilet can also be individually configured and controlled using the SensoWash® app.

Slotted waste ➔ Push-open valve

The slotted waste for washbasins without an overflow cannot be closed.

Soft-closing mechanism

Toilet seats with soft closing mechanism simply need a light tap to close the seat and lid automatically, softly, and silently.

Thermostat

A thermostat-controlled faucet ensures a consistent water temperature and volume during the entire period of use. An integrated safety lock at 38°C and a backflow protection device in the hose connector ensure comprehensive safety.

Tip-on technology

Handle-free drawers, pull-out compartments, or cabinet doors of bathroom furniture can be opened at the tap of a finger, and closed just as easily via self-closure by tapping again with the finger.

Urinal Dry ➔ Urinal Electronic, Urinal Rimless

The dry urinal functions entirely without water and is easy to clean due to the lack of a rim. The hose diaphragm integrated into the outlet opens automatically when urine flows through and then closes again, effectively preventing any odors. The odor ring with biodegradable gel indicates when the air trap needs changing (after approx. 7500 uses).

Urinal Electronic ➔ Urinal Dry, Urinal Rimless

Fitted with an electronic control unit, electronic urinals flush contact-free and fully automatically. Additionally, they offer multiple service and flushing programs and the flushing duration can be set manually. An automatic hygiene flush in a twelve-hour rhythm ensures a secure air trap. The compact form and inconspicuous placement of the control in the lower part of the urinal provides protection from vandalism.

Urinal Rimless ➔ Rimless, Urinal Dry, Urinal Electronic

The ME by Starck urinal features the innovative rimless technology. The open rim design enables dynamic water flow with excellent flushing results. The easily accessible rim area also makes the bowl easy to clean.

Variable tall cabinets ➔ Variable consoles

The width (250 to 500 mm) and height (600 to 2000 mm) of tall cabinets from the Brioso and L-Cube series can be selected to suit individual requirements.

Variable consoles ➔ Variable tall cabinets

Consoles of the Brioso, DuraStyle, L-Cube, X-Large, and XViü series are available in two thicknesses, 30 and 45 mm, and in two depths, 550 or 480 mm. The width can be specified individually from 800 to 2000 mm, optionally combined with vanity units (600 to 1000 mm) and/or vanity units for consoles (300 to 800 mm) with one pull-out compartment or two drawers.

Vital ➔ Accessible

Barrier-free baths compliant with DIN 18040 require specially developed products. The Vital washbasins and toilets of the Architec, D-Code, DuraStyle, and Starck 3 series satisfy the corresponding requirements in this area.

Washbasin ➔ Above-counter basin, bonded, c-bonded, built-in washbasin, semi-recessed washbasin, furniture washbasin

Washbasins are fitted directly to the wall; not intended to be combined with a vanity unit. The siphon can be concealed using a semi-pedestal. etc.

Washout flush ➔ Washdown flush, Duravit Rimless®, Rimless

The toilet variant with washout flush is the most common type of flush associated with the lowest amount of unpleasant odors. Waste falls into a specially shaped siphon filled with water.

Washdown flush ➔ Washout flush, Duravit Rimless®, Rimless

The toilet variant with washout flush also enables easy stool examination thanks to the ceramic tongue integrated into the body of the toilet.

Whirl system ➔ Air-System, Jet-System, Combi-System P, Combi-System L, Combi-System E

Bathtubs with a whirl system offer relaxation for the musculature, stimulate the circulation, and ease the pressure on the joints. A range of whirl systems are available for various Duravit bathtub designs.

WonderGliss

The WonderGliss coating that is baked into the ceramic doesn't give grime a chance: dirt and limescale cannot secure a hold on the smooth surface and residues run off more easily with the water. Sanitary ceramics featuring WonderGliss stay smooth and clean for longer and are thus extremely easy to clean. All it takes is a soft cloth and mild cleaning agent.
