your technology  
investment.

# Protecting Your Technology Investment

To achieve mass scale in computing, hyperscale infrastructure must be designed for scalability, priced competitively and guaranteed by a steady, robust and responsive supply chain.

When the fate of massively scalable server architectures and virtual networking depends on achieving that mass scale, Chatsworth Products (CPI) is uniquely prepared to respond and deliver on those needs.

CPI has a proven track record as a global manufacturer of products and solutions that protect and power your technology investments. With global availability, rapid product customization and expertly engineered infrastructure solutions and services, you'll have the competitive advantage you need to stay ahead in a rapidly evolving marketplace.

# Capabilities You Can Rely On

From expert staff and services to flexible, lean manufacturing processes and product availability, CPI's ability to deliver hyperscale infrastructure solutions quickly and reliably is built on proven key elements for delivering success, time after time.

## Consultation & Communication

CPI starts by understanding your goals and objectives, then devising a strategy to deliver the right solution considering all factors (physical, functional, geographical and economical). And thanks to open, constant communication throughout the process, you can rest assured that CPI will help you manage changes in project specifications and delivery schedules should they occur.

## Rapid Engineering & Customization

Whether your project requires a unique design that you've developed or you'd prefer a CPI standard or customized offering, our expert engineering team excels at quickly aligning your needs with the appropriate solution, developing 3D models for review, providing rapid prototyping and executing any specific testing requirements.

## Pre-integration & Value-Added Services

CPI offers the ability to pre-install power, cable management or other components to your specific work instructions. A single, configuration-specific part number is assigned for easy ordering and CPI also offers kitting, custom labeling, shock pallets or crates to make sure your product arrives as you need it, ready for the fastest possible installation.

## Commitment to Quality & the Environment

CPI holds ISO 9001 Certificates at all of its employee-owned manufacturing facilities to ensure high quality and craftsmanship. Each facility has the flexibility and speed to implement corrective actions and part replacement to keep your critical project on track. Additionally, CPI is committed to minimizing our impact on the environment through our designs, manufacturing processes, RoHS compliance and energy efficient solutions.

## Global Manufacturing, Logistics and Support

CPI offers manufacturing in the United States, Asia and Europe to support global programs with regional manufacturing. Additionally, CPI offices in the United States, Canada, Mexico, China, the United Kingdom and the Middle East, along with CPI's global distribution network allows us to design and support a program to best support your roll-out needs.

## Built-to-Order, Built to Last: CPI's Hyperscale Product Set

CPI provides a robust standard product offering that demonstrates a wide range of design and manufacturing capabilities, including designs for tubular or sheet/extrusion frames, heavy-duty cabinets and racks that can be moved when fully populated, as well as products and solutions that can be customized during the manufacturing process to match exact project requirements—including those designed to meet 19" EIA or Open Compute Project™ (OCP) specification. These include:

### Server Racks and Cabinets

- Designed and built-to-order 19" EIA cabinets or Open Racks for OCP
- Rack and Stack - Integrator-ready
- Seismic
- Fully Configurable

### Aisle Containment

- Hot- or cold-aisle solutions with doors
- Customizable Pods - expandable, free-standing structures to move racks in and out and support overhead cable tray and power busway

#### Power Distribution

- Basic and intelligent rack PDUs
- PDU Customization
- Busbar solutions from E+I Engineering Group

#### Cable Pathways

- Wire Mesh Cable Tray
- Cable Runway - Standard or Adjustable

#### Racks and Cable Management

- Motive® Cable Management
- Two- and Four-Post Racks
- Vertical and Horizontal Management
- Fiber and Copper Cable Management

## About CPI

CPI, a 100% employee-owned company, was founded in June 1991, when 90 workers joined together and purchased the Dracon Division of Harris Corporation using an Employee Stock Ownership Plan (ESOP). Employee ownership is central to the success of CPI. Employee owners are committed to a philosophy of quality through teamwork, caring and commitment, which are extended to customers through our solutions and services.

While every effort has been made to ensure the accuracy of all information, CPI does not accept liability for any errors or omissions and reserves the right to change information and descriptions of listed services and products.
