Made Green

means that the products are made of up to 95% post-consumer recycled materials such as ocean waste, used textiles, food packaging waste, used plastic bags, etc. Our Made Green products are made with an approximately 50% reduction in carbon emissions compared to similar traditional products made from virgin sources (depending on the chosen product).

Fitness equipment

marked with this symbol can be used directly from a wheelchair.

The mark of responsible forestry

Look for FSC®-certified products on product pages. The mark of Responsible Forestry.

Safety standards

Product safety is a long tradition in KOMPAN, and we take great pride in testing and evaluating each product before launch.

KOMPAN products meet relevant safety standards depending on the type of product. Playground equipment meets ASTM F1487 and for products intended for users under the age of 2 years, we use ASTM F2373.

Outdoor fitness equipment is compliant with ASTM F3101 and multi-sports equipment meet the European standard EN15312.

Whenever possible, we design worldwide products, meaning the equipment also meets the equivalent European standards and we pick the specifications covering both.

The International Play Equipment Manufacturers Association (IPEMA) provides a third-party certification to ensure product conformance to specific ASTM and/or CSA standards. Each product promoted here, if certified by IPEMA, includes the name and model number for you to search the IPEMA website for verification. To verify product certification, visit www.ipema.org and conduct a search.

THE KOMPAN OFFERING

Essential play solutions for every child, every space, and every budget

All children deserve safe, inspiring places to develop the physical, cognitive, and social-emotional skills that are essential for leading happy, healthy lives. Our Essentials playground equipment helps to create those places. Designed to foster creativity, physical development, and social skills—while being budget-friendly and durable enough to withstand the elements—Essentials play systems are available in three vibrant colors

and meet the needs of preschool and school-age children alike. Whether it's a space-efficient footprint that packs in BIG play value or a solution with lower fall heights that let imaginations soar, there's an Essentials line offering fit for your community's needs.

THIS IS WHAT YOU GET

When you choose one of our Essentials play systems, you get a solution with varied play elements to accommodate your specific setting and intended user group, but you also get so much more, including:

1 Play Value for All—Guaranteed

Since the 1980s, the KOMPAN Play Institute has merged cutting-edge research in child development with hands-on testing, ensuring our designs inspire and engage children of all ages and abilities. Our design philosophy is: everyone should feel included.

2 Space- and Budget-Friendly Designs

Essentials offerings are available in an assortment of footprints, colors, and budgets, all with the same KOMPAN quality and play value. No matter what size playground or budget you are working with, we can accommodate you.

3 Sustainable and Durable Materials

We use materials that feature a significantly reduced carbon footprint and durability backed by our industry-leading warranties. Our HDPE EcoCore™ colored panels are made from >95% post-consumer recycled waste. See page 24.

4 Easy, Quick Installation and Low Maintenance Cost

Efficient footprints and straightforward designs make our Essentials play systems simple to install. The structural integrity and appeal of these sites can be maintained with ease, ensuring users get as many hours of joy as possible.

5 Safety Compliance

The safety of a playground is a shared responsibility but a good place to start is by using playground equipment that meets safety standards and guidelines. Essentials structures meet the standards and regulations of ASTM, IPEMA, and ADA.

6 Industry-Leading Warranties

Our warranties are among the best in the industry. With a lifetime warranty on hot-dip galvanized parts, stainless steel parts, EcoCore™ panels, and other high-density polyethylene (HDPE) parts, you can trust the quality and durability of our Essentials play systems. See page 25.

ESSENTIALS SOLUTIONS FOR PRESCHOOL, 2-5 YEARS

Find the package that's right for your preschool play space

Play and growth are intertwined. Children's physical, social-emotional, cognitive, and creative development is not only supported by play, but is developed through play. Evidence clearly demonstrates that play, apart from being great fun, is fundamental for all areas of child development, which is why it is so important

for preschool-age children. Based on research documented by our KOMPAN Play Institute, free outdoor play in well-planned play areas is key to improving the physical activity level of preschoolers. Let us help you find the right solution for the 2-5 year old children on your playground.

BASE LEVEL

The **Coach Package**, featuring a simple and elegant design, is packed with play value and fits on a footprint just over 400 square feet. The double slide is specifically designed for social interaction, which supports cooperation and turn-taking skills. Sliding additionally trains the sense of balance and trunk stability of preschool children, which supports general movement stability. Have some extra space? Add two KOMPAN classics, the Hen Springer and the Junior Spica, and bring endless joy to your playground with this package.

ALPINE LEVEL

The **Sprinter** ups the fun factor of any play area with not two, but three slides. With so many opportunities to climb and slide, children will develop important physical and social skills while playing longer outdoors. Climbing supports cross-coordination, which leads to increased readiness for reading, and open spaces throughout the structure also encourage socialization. Perfect additions to the Sprinter package are the Junior Spica, a ground-level play panel, and some swings!

SUMMIT LEVEL

This **Trouper Package** offers varied play activities and social opportunities for all. From the elevated level, multiple slides provide thrilling heights and speeds, alone or with a friend. Sliding builds a sense of balance, which is fundamental to all other motor skills—enhancing children’s self-efficacy and their feeling of achievement. The Villa Playhouse and the Combi Swing provide the ideal complements to this package.

ESSENTIALS SOLUTIONS FOR ALL AGES, 2-12 YEARS

Choose from packages that accommodate all ages

Great playground design inspires children of all ages to play, and play develops young bodies and minds. Play design must embrace the aesthetics that appeal to children and make them want to visit the playground again and again. More importantly, play design must contribute to the overall development of children. With the help of KOMPAN Play Institute, we continue to deliver unique and

user-centric play equipment that is at the heart of GREAT playgrounds. Playgrounds are safe places where children learn how to navigate the world and take risks—an important life skill they can only learn by doing. Our Essentials line for children between the ages of 2 and 12 provides age-appropriate play spaces where children can challenge themselves, develop, and have fun!

BASE LEVEL

Loaded with play value in a compact space just over 500 square feet, the **Acadia Package** is accessible and motivating for all ages. Children can climb the stairs or the climbing pole then take the slide to develop trunk stability and a sense of balance. The upper level provides the perfect meeting point with friends, as well as a vantage point of the play space below. With the addition of our wildly popular Spinner Bowls and Double Somersault Bars, this option offers a total package.

ALPINE LEVEL

The **Yellowstone Package** is an exciting play system rich in variations where children can climb and descend Yellowstone tower. The accessible stairway offers a loop of play with a lower and higher slide and a gently swaying hammock. Slides not only develop the child's sense of balance and trunk stability, but also their ability to take turns and empathize—important social-emotional skills that are hard to teach but easily learned through play. Add a Tipi Carousel with Top Brace and swings to round out the package perfectly.

SUMMIT LEVEL

Welcome to the **Grand Canyon!** The graduated challenges, rich variation of sliding experiences, and multiple access points of this thrilling play system invite endless fun for children of all ages. The Wackle Bridge is a wonderfully challenging feature, training the sense of balance and developing the ability to securely negotiate space. Cooperation and consideration are a must at the Grand Canyon, maturing children's social-emotional skills and encouraging friendships. A Spinner Bowl, Combi Swing, and Albatross seesaw nicely complete this package.

ESSENTIALS SOLUTIONS FOR SCHOOL AGE, 5-12 YEARS

The ideal package for school-age children awaits

Different age groups have specific play preferences and needs. We recognize age-appropriateness in the design and placement of our equipment, so it is important that play systems created for school-age children are created with their specific preferences and needs in mind. The Surgeon General's Report on Physical Activity and Health suggests that everyone should burn 150 calories of energy

per day to maintain a healthy body composition. This energy balance is off for many children. KOMPAN Play Institute's research shows that children burn two-thirds of the recommended 150 calories during 30 minutes of free playground play, so providing school-age children with fun play structures that encourage playground play is imperative to their health and well-being.

BASE LEVEL

The **Mount Meru Package** offers thrilling play for school-age children. This slick design features varied slide, glide, and climb actions that support hours of play. Looping between the varied egresses keeps heart rates high while the transparent design supports social interaction as children talk with friends across the structure. With the addition of a Spinner Bowl and Double Somersault Bars, the Mount Meru Package encourages the development of turn-taking skills, as well as other fundamental social-emotional skills.

ALPINE LEVEL

The **Pikes Peak Package** amazes and delights children in the 5-12 age range. Meandering activities have both wilder and milder slides and glides, while the daredevil Firefighter's Pole provides thrills and skills in spatial awareness. The tunnel offers an added challenge and motivates crawling, which develops cross-coordination that is important for reading. The addition of two Spinner Bowls and swings that encourage social play put the finishing touches on this package.

SUMMIT LEVEL

The **Cantana Peak** is a varied and physically challenging play structure. On ground level, the bench offers a place to socialize and share. The accessible stairway makes for easy access to the elevated level while the climbing pole offers more challenge and cross-coordination. Two slides lead back to ground level, offering an exhilarating feeling of height and speed. A Tipi Carousel with Top Brace and a Shell Seat Swing adds extra play value that will keep the 5- to 12-year-old crowd outside playing, not gaming.

ESSENTIALS

Physical Play in Premium Quality

The Essentials range holds fun and physically developing play activities for adventurous preschoolers and other school-age children. Loaded with essential age-appropriate play value that draws on classic playground activities, you can match the developmental needs of your users.

This range is premium quality and premium play for all ages.

SPINNERS AND SPRINGERS

A Thrilling Way to Enhance Balance

Children need the dizzying input that comes from spinning. These important movement experiences help the child's nervous system mature and organize. Besides being great fun, the spinners and carousels also help children train their sense of balance.

Our innovative spinners and carousels attract children of all ages and abilities and the best part is: They LOVE it!

PLAYHOUSES AND THEMED PLAY

Familiar, Child-Sized Spaces in a Big World

The smaller-scale open playhouses are a strong play motivator for the youngest age group. The openness of the play space allows many children to play together from the inside and the outside. It's the first stage of forming a community.

Whether in a playhouse or around a musical play panel, themed play opens doors to learning the value of friendship and experiencing the joy of imaginative play.

BALANCING AND CLIMBING

So Simple, Yet So Important

A somersault bar, stepping pod, or climbing net may not look like much, but through fun play, they contribute to childhood development. Rotating trains children's sense of space, climbing trains their cross-coordination skills, and jumping trains their agility and balance.

These motor skills are vital for navigating the world confidently, for example, in situations like judging distances in traffic.

TODDLER PLAY EQUIPMENT

A Stimulated Toddler is a Happy Toddler

The happiest toddlers are those who experience age-appropriate stimulation and challenges. The playful designs in our Toddler Equipment collection draw on familiar connotations and invite children to engage in dramatic, developmental play.

Whether climbing the tallest giraffe or driving a pretend car, our toddler universe gently stimulates and guides the little ones to understand the world around them.

HIGHEST QUALITY MATERIALS

Panels

The 19 mm EcoCore™ panels are a highly durable and eco-friendly material, which is not only recyclable after use, but also made from >95% post-consumer recycled waste.

Decks

All decks are supported by uniquely designed low-carbon aluminum profiles with multiple attachment options. The gray-colored molded decks are made of 75% post-consumer PP material with a non-skid pattern and textured surface.

Tempered Corocord™ rope with EcoYarn™

Ropes come with galvanized six-strand steel wires and a steel core, impossible to wear through. Each strand is tightly wrapped with EcoYarn™ made from >95% post-consumer recycled material, which is melted onto each individual strand. This makes the ropes highly wear- and vandalism-resistant.

Posts

Main posts are available in five different materials.

1. Impregnated pine wood with in-ground steel footing.
2. Galvanized steel with powder-coated top finish.
3. Color-anodized lead-free aluminum made from low-carbon aluminum.
4. TexMade™ posts made from 95% post-consumer recycled textile and plastic waste.
5. Low-carbon pre-galvanized steel posts made from 80% post-consumer recycled material.

Galvanized steel

Our steel surfaces and steel frames are hot-dip galvanized inside and outside with lead-free zinc. The galvanization has excellent corrosion resistance in outside environments and is maintenance free.

Robinia wood

Robinia wood is a very strong and long-lasting material with very high levels of natural oils. Thus, Robinia wood makes durable playgrounds almost maintenance free and able to last for many years.

Nothing lasts forever. All playgrounds face the trials of weather, use, and abuse, and will eventually succumb to the ravages of time. That day can be postponed for a lifetime by using the finest of materials and the cleverest of designs. Quality costs, but quality also lasts. A simple equation that in the fullness of time pays dividends.

WARRANTY

We have industry-leading warranties

LIFETIME* warranty

- Hot-dip galvanized parts
- Stainless-steel parts
- EcoCore™ and other high-density polyethylene (HDPE) parts

*KOMPAN's LIFETIME warranty is in effect for the lifetime of the product until the product is uninstalled and/or taken out of use. In addition, KOMPAN's general terms and delivery conditions apply and supplement this warranty.

15-year warranty

- High-pressure Laminate (HPL) parts
- Aluminum parts

10-year warranty

- TexMade™ posts
- Pre-galvanized posts with painted top layer
- Painted surface on galvanized or aluminum metal parts
- Stainless Steel Slides
- Electrogalvanized metal parts
- Molded PP decks
- Solid plastic parts
- Hollow plastic parts
- Transparent Poly Carbonate (PC) parts
- Rope and net constructions
- Wood-plastic composite (WPC) parts
- Robinia, ash, pine, and other wood types

5-year warranty

- Resin-coated plywood parts
- Springs and ball bearing assemblies
- Graphic print on transparent PC panels
- Concrete parts
- Galaxy Connection Balls

2-year warranty

- Moveable plastic and metal parts
- Rubber membranes
- Screens and electronic parts
- Sunshades & sail solutions
- Nylon nets
- Spare parts

Warranty coverage

This warranty applies to KOMPAN's products for the time periods described for each product type above and with the limitations described in this warranty. The warranty period applies from the date of purchase by the first customer. This warranty covers only defects in materials, production errors, and structural integrity failures caused by defects in design, materials, or manufacturing. KOMPAN's liability under this warranty is limited to repair or replacement of defective products, without charge, at KOMPAN's discretion.

Proper installation and maintenance

The warranty only applies if KOMPAN's products have been installed according to the instructions provided by KOMPAN and maintained correctly according to the KOMPAN Maintenance Manual. All warranty claims shall be accompanied by full documentation for proper installation and maintenance.

Warranty exclusions

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discolored surfaces, and other cosmetic issues or failures due to misuse or vandalism. Natural changes in wood over time are considered cosmetic issues and are not covered.

Near water installations

Products installed in direct contact with chlorinated water or saltwater (water-parks), or products installed within 650 feet from the shore are not covered by the KOMPAN warranty for any defects caused by corrosion. Specially designed products (handled via department for customized products), provided they have been upgraded to corrosion class C4 prior to delivery, installed within 650 feet from the shore (and not in direct contact with saltwater/spray of saltwater or

chlorinated water(e.g. waterparks) shall, subject to the applicable warranty period for each product type set out in the general warranty, be covered only against structural failure caused by corrosion (excluding moving parts) and under no circumstances for any period longer than 5 years.

Third-party supplied products and services

KOMPAN provides non-KOMPAN branded products and installation services performed by certified third-party suppliers. This general KOMPAN warranty does not apply to such non-KOMPAN branded products and installation services, which may carry their own warranties. KOMPAN will pass on information about such warranties where possible.

Freight and warehousing

Global transport and logistics arranged by KOMPAN-appointed forwarder. Products/items are not to be stored outside while awaiting installation and must be kept dry at all times.
