This catalog is dedicated to our professional paint customer. Inside, you will find everything you need to complete your job to your high standards. Thank you for choosing Dunn-Edwards.

A GREEN LEGACY, A GREENER FUTURE

An environmentally conscious paint company

At Dunn-Edwards, our mission has always been to develop the best-performing paint in an environmentally sound manner to protect the health and well-being of our customers. From the beginning, being green has been at the core of our business practices. From our ingredients, to labeling, to our LEED® Gold-certified paint manufacturing facility, we strive to continue our green legacy and provide you with eco-efficient products.

LEED Gold-certified paint manufacturing facility

In 2011, Dunn-Edwards opened the world's first LEED Gold-certified paint manufacturing facility in Phoenix, AZ. Encompassing manufacturing, product development, quality control and more, the 336,000-sq.-ft. facility was designed to be the greenest in the industry.

"LEED" and related logo is a trademark owned by the U.S. Green Building Council and is used with permission.

Products bearing this logo are EG-FREE™ and TAC/HAP-FREE

Ethylene glycol (EG), a solvent often used in water-based paints, is listed as a Toxic Air Contaminant (TAC) and Hazardous Air Pollutant (HAP). In 1983, Dunn-Edwards was the first in the industry to voluntarily replace EG with propylene glycol, a nontoxic alternative "generally regarded as safe" by the FDA. Also, every Dunn-Edwards product with the EG-FREE logo is formulated without any other TAC or HAP.

THE DUNN-EDWARDS EXPERIENCE

It's more than a tagline—it's our promise.

It reflects our values and commitment to serving professional customers with superior-quality, project-focused products, while delivering a high level of service tailored to meet the evolving and diverse needs of the pro. For 100 years, these high standards have made Dunn-Edwards a leading paint manufacturer in the Southwestern United States.

Your success is our priority

Professionals like you are our business, so we offer—in addition to superior paint and supplies—a wide range of services to help you complete your projects successfully, serve your customers effectively, and grow your business.

With Dunn-Edwards, you have a partner in business. Get in touch to be connected to a Dunn-Edwards Outside Sales Representative, Commercial Specialist, Business Development Representative, or other sales professionals.

More than 170 locations and growing

Find the nearest store wherever you are with locations in California, Arizona, Nevada, New Mexico and Texas. Also, order paint and supplies on our website, available for in-store pickup or delivery anywhere in the United States.

See store locations section

Pro tools on dunnedwards.com

Discover resources from finding a Representative, product specifications and paint problem-solving to color tools and paint-color archive—and a whole lot more.

Professional Color Advisors

Color indecision can delay the start of a project. That's why we offer complimentary in-store color consultations with friendly, confidence-inspiring, professionally trained and certified color experts who can help your customers gain confidence in their color choices, which helps to keep the project moving. This personalized color-selection guidance service is also available in-home and online for a fee.

PROFESSIONAL SERVICES

DESIGNED TO HELP YOU SUCCEED

Painting contractor services

We recognize that our relationship with painting contractors is based on more than what's in a can of paint, and we stand ready to provide products and services to support your business.

Besides offering high-quality paint and supplies, we also provide a wide range of professional services to support your business, grow your customers, and help you succeed.

Online services highlights

- :: **My Account** Order products, track projects, access customizable marketing tools, plus a lot more—for FREE!
- :: **Find a Paint Pro** Register on our contractor directory, and allow us to promote your business to our website visitors
- :: **Store Locator** Find the nearest Dunn-Edwards® store and dealer location
- :: **Green Building Paint Guide** Designed to assist in developing projects with a green focus
- :: **Specification Guide** Proper coating system recommendations for 13 project types ranging from CHPS to tract homes
- :: **Product Data Sheets, Safety Data Sheets and Product Conformance Table**
Everything you need to know about our products, from technical specifications to safe handling practices and more
- :: **Paint Problem Solver** Identify common paint problems and find solutions to fix them
- :: **Technical Bulletins** Common paint-industry topics include substrate concerns, best practices, and environmental and regulatory issues

The in-store services experience

- :: Save time with our FREE jobsite delivery service
- :: Get to your jobsite quicker on weekdays with our Early Bird service
- :: Save time with our 1-hour color-matching service
- :: Pick up brushes, rollers, tape, tools and a lot more
- :: Get equipment repairs and rentals*
- :: Refer your customers to our FREE color consultation service
- :: Order ahead, and your mixed paint will be ready when you arrive
- :: Attend our frequent product demonstrations and application trainings
- :: Rely on your Dunn-Edwards Representative or in-store associates for expert coatings advice
- :: Learn about financing options
- :: Recycle your unwanted coatings through our partnership with PaintCare (CA only)

**At select locations*

DIGITAL SOLUTIONS

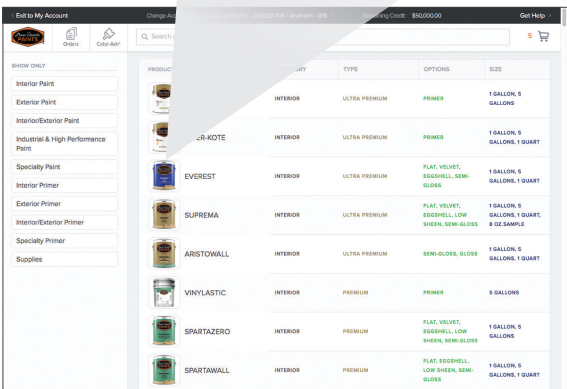

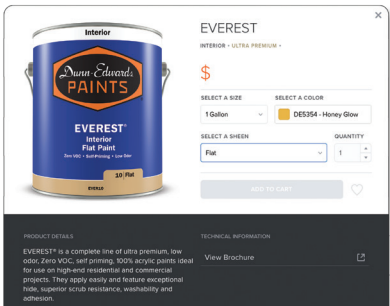

Digital solutions to help you manage and grow your business

Order online

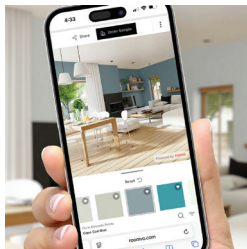

Dunn-Edwards account holders have access to convenient online services that save you time. Explore our Paints & Sundries Catalog, add products to your cart, mark your favorites for easy reordering, and pay with a credit card. Order online today, pick up at your local store tomorrow at noon.

My Account

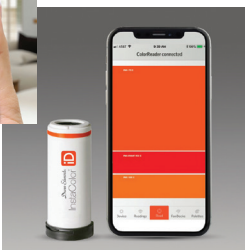

With a FREE web-based Dunn-Edwards My Account, you'll also have exclusive access to tools that allow you to track projects, as well as tools that help boost your visibility in the marketplace, such as our Find a Paint Pro contractor directory.

See product details as you shop

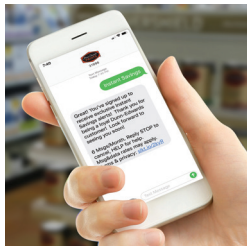

A smarter way to explore color
Capture what inspires you with a set of tools you'll find exclusively at dunnedwards.com.

Using the new Dunn-Edwards Paint Color Visualizer, you can snap and transform a photo—changing everything from walls to cabinets, doors, trim and more. And instantly match, collect and share colors using a Dunn-Edwards InstaColor® iD device and your smartphone.

Go mobile!
Access everything on dunnedwards.com 24/7 using your smartphone. Download Product & Safety Data Sheets, Technical Bulletins, and more.

Instant Savings
Dunn-Edwards now offers instant savings on many of our paints and supplies. Simply text 'Instant Savings' to 888-337-2468 for exclusive coupons and sales alerts.

Insider deals for pros

The **Dunn-Edwards Insider** program allows pros to unlock exclusive offers via texts.

SPECIALIZED SOLUTIONS AND SERVICES

Commercial Program: superior coatings and support

Dunn-Edwards has a complete line of product solutions that meet the unique requirements of commercial projects, and our team of experts can design a coatings system for any project's substrates that meets all durability and performance expectations.

- :: **Trained experts** provide job walks, product expertise, technical advice and everything else needed to meet your project needs
- :: **Specialized services**, such as free jobsite delivery, keep your crew on the jobsite, and professional color renderings help you visualize colors on projects
- :: **Business solutions** that enable easy management of invoices and transaction tracking, and archiving of products, colors, notes and images by project
- :: **Comprehensive product specifications** that help ensure a project's success
- :: **SpecLink** Streamline comparative evaluations

Industrial coatings experience and expertise in service environments

Dunn-Edwards is proud to deliver product solutions for any service environment. Our AMPP-certified coatings and substrate experts are available to work with you from surface prep through coating selection.

- :: **Expert Technical Services** specifications, substrate review and failure analysis
- :: **Tinting Capabilities** 35+ tinting locations for industrial and high-performance coatings
- :: **Industry Associations** NACE is now AMPP, The Association for Materials Protection and Performance, combining the best of both the National Association of Corrosion Engineers (NACE International) and the Society for Protective Coatings (SSPC). We are an affiliate member.

PROJECT HIGHLIGHTS

OFFICE BUILDING RENOVATION

Renovation of the 178,600-square-foot Intuit Bayshore building included a wide range of surface types to address—drywall, metal, steel and concrete—in a dozen colors. Schedules would overlap with other trades and time lines would be tight. California Drywall was chosen largely for their ability to be flexible, precise and capable of moving quickly. To make sure they delivered as promised, Zimmer looked to his Dunn-Edwards Representative to ensure product was always in stock, even on short notice, and for fast, superior color-matching, which helped the designers maintain confidence in the subcontractor.

**CALIFORNIA
DRYWALL**
ROBERT ZIMMER
PROJECT MANAGER

MARKET SQUARE CONDOMINIUMS

The repaint of Market Square, a 5-story building taking up an entire city block, involved all of the building's stucco, metal railings and trim. The 8-man crew worked in tight spaces and operated a boom lift in heavy pedestrian and vehicular traffic, so the job required considerable preparation and planning. Paint deliveries demanded clear communication and on-time delivery—with no hiccups. Among the job's challenges was Schaper's Representative being tasked with matching 13 colors from a diverse palette to Dunn-Edwards colors, which was executed perfectly. They used flat and semi-gloss SPARTASHIELD® exterior paint, and the customer commented on how good the project looked. "It's the highest-quality paint out there and it just makes us all look good," Schaper says.

C&A PAINTING
CURTIS SCHAPER
PARTNER

“Sometimes, even if Dunn-Edwards is not spec’d on the project, for certain situations like metal surfaces, we’ll ask to use their product instead. The quality is just that good.”

—Curtis Schaper, C&A Painting

COMMERCIAL SERVICES

Dunn-Edwards has a network of commercial stores to meet your volume needs

Our commitment

As the leading manufacturer and distributor of paints and supplies, we are committed to being your preferred paint partner for commercial projects.

Big benefits for commercial contractors

Office buildings, shopping malls and warehouses each present their own unique paint challenges, making it critical that your supplier understands your needs. Dunn-Edwards has developed superior products and services tailored to commercial facility maintenance. Our products are specifically formulated to hold up to the challenges of scale, frequency of use, and constant tenant turnover in commercial facilities, while minimizing disruption.

EXQUISITE®

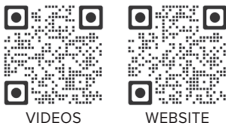

Meticulously Engineered for Exceptional Performance and Refined Results

EXQUISITE paints are a revolutionary line of products meticulously engineered to be truly washable and scuff, burnish, mar and color rub-off resistant. When life happens, these deluxe paints can withstand the inevitable scrubbing and cleaning, leaving your surfaces looking as good as new.

Why EXQUISITE paints outperform the competition

- :: Engineered for longevity and enduring elegance, so your space stays as beautiful as you envisioned it
- :: Easy to apply, provides exceptional hide, and is ideal for use on high-end custom residential and premier commercial projects where superior performance and refined results are required

These are commonly used gloss levels for surfaces listed above. Gloss may be affected by texture, porosity of the surface and atmospheric conditions. Please contact a Dunn-Edwards representative or your local store for specific product availability.

Exceptional washability and stain resistance

With EXQUISITE paints, you will never rub your surfaces the wrong way. They are engineered to keep the color right where you painted it, even after repeated cleaning.

Stain resistance is a paint's ability to prevent hydrophilic and hydrophobic substances from permanently discoloring the paint film, allowing for easier cleaning and maintenance.

Unrivalled scuff and mar resistance

The beautifully painted surfaces of your home can only take so much scuff. The revolutionary technology in EXQUISITE paints makes them tough on scuff and protects from marks, mars and scratches that come with everyday life.

Scuff and mar resistance refers to a paint's durability against surface damage from impact, rubbing or abrasion, helping the finish maintain its appearance and integrity despite wear and tear.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

EVEREST®

Performance, Style and Beauty in a Self-Priming, Zero VOC Paint

EVEREST paints are a complete line of ultra-premium, Zero VOC*, low odor, self-priming 100% acrylic coatings ideal for use on high-end residential and commercial projects. They apply easily and feature exceptional hide, superior stain resistance, washability and adhesion.

Why EVEREST paints outperform the competition

- :: Formulated using ultra-premium resins and pigments that provide exceptional performance, including adhesion, burnish resistance, and sheen uniformity
- :: Virtually no odor during or after application; perfect for painting occupied spaces
- :: Great flow and leveling for an even, uniform finish

Zero VOC means 'No organic solvents added.' (Trace amounts of VOC may be present as residual components of other ingredients. Dunn-Edwards uses Zero VOC colorants; other additives may increase VOC emissions.)

Unbeatable burnish resistance

Burnishing can quickly degrade a painted surface, leaving behind an unsightly polished look. The advanced formula of EVEREST paints provides superior resistance to withstand the effects of consistent abrasion and contact.

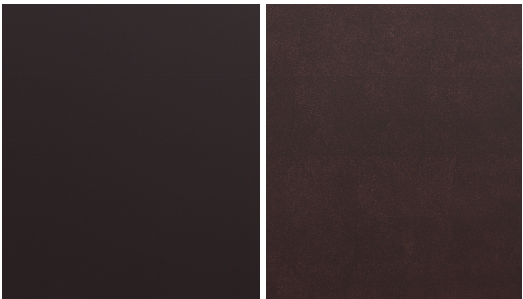

EVEREST

National Brand

Burnish resistance is a paint's ability to resist becoming shiny or polished over time due to repeated abrasion or friction on the surface.

Impressive applied hide

EVEREST paints deliver truly exceptional hiding power, resulting in fewer coats needed per project, saving time and labor.

EVEREST

National Brand

Applied hide is the ability of paint to conceal or obscure the surface over which it is applied.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

ULTRA-PREMIUM INTERIOR PAINTS

SUPREMA®

Superior Performance
With Effortless Application

SUPREMA paints are a complete line of ultra-premium, ultra-low VOC, acrylic latex coatings. They combine exceptional hide with superior durability, washability and block resistance.

Why SUPREMA paints outperform the competition

- :: Applies easily and dries to a smooth, uniform finish
- :: Formulated with the highest-quality resins that create a harder finish and better block resistance
- :: Excellent flow and leveling due to a special thickening agent that interacts better with the resin

These are commonly used gloss levels for surfaces listed above. Gloss may be affected by texture, porosity of the surface and atmospheric conditions. Please contact a Dunn-Edwards representative or your local store for specific product availability.

Superior block resistance

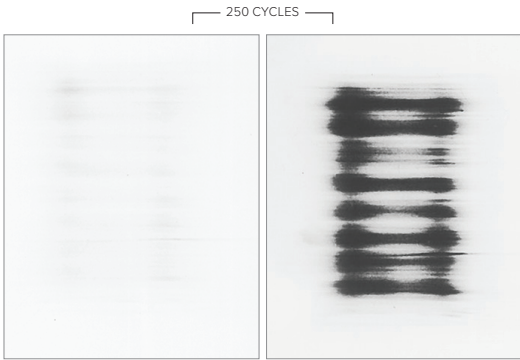

Count on SUPREMA paints to resist sticking and peeling, due to tough resin particles that create a hard finish.

SUPREMA Semi-Gloss National Brand
Block resistance is a paint's ability to prevent sticking or peeling when two painted surfaces come into contact, such as a door and doorjamb.

Excellent scrub resistance

Clean with confidence, knowing SUPREMA paints will keep your surfaces looking flawless for years to come.

SUPREMA Flat National Brand
Scrub resistance measures how well the paint film can endure abrasion from cleaning tools and solutions without wearing away.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

PREMIUM INTERIOR PAINTS

SPARTAWALL®

Superior Hide and Durability

SPARTAWALL paints are a line of premium, interior acrylic coatings formulated to provide a tough, durable, block-resistant finish, and are easy to apply.

Why SPARTAWALL paints outperform the competition

- Formulated using high-quality resins and pigments that withstand repeated washing
- Superior block resistance
- Easy to apply and dries to a smooth, uniform finish
- Very low odor and Zero VOC* content

These are commonly used gloss levels for surfaces listed above. Gloss may be affected by texture, porosity of the surface and atmospheric conditions. Please contact a Dunn-Edwards representative or your local store for specific product availability.

*Flat: 15 g/L; other sheens are Zero VOC. 'Zero VOC' means 'No organic solvents added.' (Trace amounts of VOC may be present as residual components of other ingredients. Dunn-Edwards uses Zero VOC colorants; other additives may increase VOC emissions.)

Superior block resistance

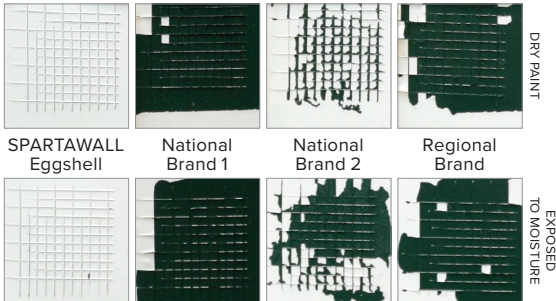

While competitor products stick together and peel, SPARTAWALL paints are formulated to resist blocking.

Block resistance is a paint's ability to prevent sticking or peeling when two painted surfaces come into contact, such as a door and doorjamb.

Good adhesion

SPARTAWALL paints do a good job at sticking to aged alkyd, whereas competitor brands are more prone to peeling, especially when exposed to moisture.

Adhesion refers to the ability to bond firmly to the substrate and create a stable foundation for topcoats.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

PREMIUM INTERIOR PAINT

SPARTAZERO®

Dead-Flat Finish and Zero VOC Content

SPARTAZERO paint is a premium interior, low odor, Zero VOC* coating that provides exceptional hide, durability and performance. It is ideal for use on residential and commercial projects, schools, hospitals and hotels, and any application where a low odor product is preferred.

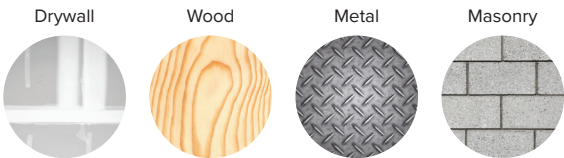

Why SPARTAZERO paint outperforms the competition

- :: Formulated using the highest-quality paints and pigments to provide better scrub resistance
- :: Dead-flat finish
- :: Minimal roller spatter

**Zero VOC* means 'No organic solvents added.' (Trace amounts of VOC may be present as residual components of other ingredients. Dunn-Edwards uses Zero VOC colorants; other additives may increase VOC emissions.)*

ACRI-WALL®

Paint That Works as Hard as You Do

ACRI-WALL paints are a line of professional, Zero VOC,* low odor interior coatings ideal for use on multi-tenant housing projects. They exhibit very good touch-up, sheen uniformity and hide. They can be used on properly prepared and primed masonry, wood and metal, and are self-priming on new drywall.

Why ACRI-WALL paints outperform the competition

- :: Formulated using the right blend of pigments, binders and thickeners that provide excellent sheen uniformity, touch-up and durability
- :: Zero VOC, low odor
- :: Very good touch-up and block resistance
- :: Self-priming on new drywall (first coat)

Very good touch-up

ACRI-WALL outperforms the competition when it comes to touch-up.

ACRI-WALL

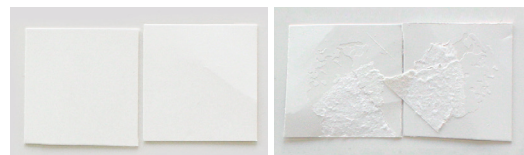

National Brand

Touch-up refers to a paint's ability to blend seamlessly with the previously painted surface when recoating small areas (less than 1 year old), such as missed spots or minor defects.

Superior block resistance

When two painted surfaces come into contact, such as a door and door jamb, they can stick together, or block. When that happens, the paint can peel from the surface. ACRI-WALL clearly beats the national brand, as their paint is sticking together and peeling from the surface.

ACRI-WALL

National Brand

Block resistance is a paint's ability to prevent sticking or peeling when two painted surfaces come into contact, such as a door and doorjamb.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

PROFESSIONAL INTERIOR PAINTS

PRO-COM[®] 3500

Performance for Commercial and Multifamily Projects

PRO-COM 3500 paints are a line of professional, interior coatings for commercial and multi-tenant housing properties. They can be used on properly prepared and primed masonry, wood and metal, and are self-priming on new drywall.

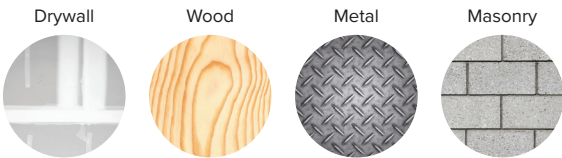

Why PRO-COM 3500 paints outperform the competition

- :: Very good hide
- :: Good touch-up
- :: Good sheen uniformity

Good touch-up

PRO-COM 3500 paints outperform the competition when it comes to touch-up.

Touch-up refers to a paint's ability to blend seamlessly with the previously painted surface when recoating small areas (less than 1 year old), such as missed spots or minor defects.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

EVERSHIELD®

The Ultimate in Exterior Protection

EVERSHIELD paints are ultra-premium exterior, ultra-low VOC, 100% acrylic coatings that provide maximum protection against UV color fade, dirt pick-up, mildew, efflorescence, water intrusion and film failure (grain-cracking, peeling, blistering).

Why EVERSCHILD paints outperform the competition

- :: Formulated using advanced technology and premium ingredients that provide unparalleled performance, durability, coverage and adhesion
- :: Ultimate protection against moisture penetration and UV color fade
- :: Exceptional dirt pick-up resistance
- :: Outstanding gloss retention
- :: Superior non-blocking properties

Unparalleled alkali burnout resistance

EVERSHIELD paints resist blotching and fading, which can occur on new masonry surfaces.

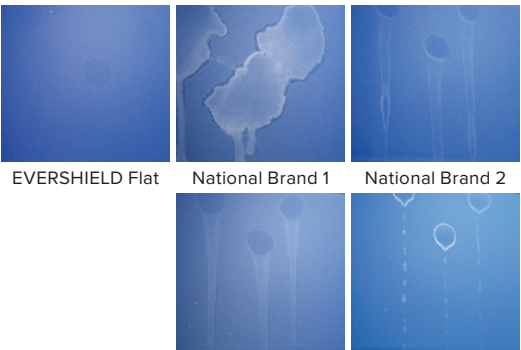

EVERSHIELD Flat Regional Brand National Brand

Alkali burnout occurs when high alkalinity (pH > 7) breaks down the resin, which deteriorates the paint film.

Industry-leading surfactant leaching resistance

EVERSHIELD paints effectively fight surfactant leaching with no glossy, soapy or sticky residue.

EVERSHIELD Flat National Brand 1 National Brand 2

National Brand 3 National Brand 4

Surfactant leaching occurs when water-soluble components (surfactants) migrate to the surface when exposed to moisture or high humidity, causing streaking and discoloration.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

PREMIUM EXTERIOR PAINTS

SPARTASHIELD®

Premium Protection and Long-Lasting Durability

SPARTASHIELD paints are a complete line of premium exterior, 100% acrylic coatings engineered to provide superior hide and durability. They are ideally suited for use on residential and commercial projects where long-lasting performance is required.

Why SPARTASHIELD paints outperform the competition

- :: Superior hide and durability
- :: Excellent resistance to efflorescence
- :: Exceptional balance of sag resistance and flow and leveling
- :: Easy to apply and dries to a smooth, uniform finish

LEARN MORE

For use on these substrates

These are commonly used gloss levels for surfaces listed above. Gloss may be affected by texture, porosity of the surface and atmospheric conditions. Please contact a Dunn-Edwards representative or your local store for specific product availability.

Superior applied hide

SPARTASHIELD paints outperform the competition in applied hide. Good applied hide ensures that maximum hide is achieved when the paint is rolled so that fewer coats are needed to complete the project.

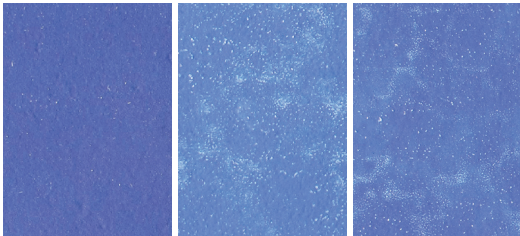

SPARTASHIELD Flat National Brand Regional Brand

Applied hide is the ability of a paint to conceal or obscure the surface over which it is applied.

Excellent efflorescence resistance

SPARTASHIELD paints outperform the competition in their ability to resist efflorescence, which are white salt deposits that can develop on masonry surfaces. Painted surfaces that resist efflorescence look newer for a longer period of time.

SPARTASHIELD Flat National Brand Regional Brand

Efflorescence resistance is the ability of a paint to resist the white 'fuzzy' salt deposits present in concrete from migrating through the coating to the surface.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

ACRI-HUES®

NEW
SHEEN

Big Projects Need Big Project Paint

ACRI-HUES paints are a line of professional, exterior, ultra-low VOC, 100% acrylic coatings that provide dependable performance and very good durability.

Why ACRI-HUES paints outperform the competition

- :: Formulated using the highest-quality resins and pigments to provide better adhesion, durability and hide
- :: Better balance of sag resistance and flow and leveling provides a smooth, uniform finish
- :: Superior dirt pick-up resistance and block resistance provide dependable performance

Superior block resistance

When two painted surfaces come into contact, such as a door and door jamb, they can stick together, or block. When that happens, the paint can peel from the surface. ACRI-HUES clearly beats the national brand, as their paint is sticking together and peeling from the surface.

ACRI-HUES Semi-Gloss

National Brand

Block resistance is a paint's ability to prevent sticking or peeling when two painted surfaces come into contact, such as a door and doorjamb.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

PROFESSIONAL EXTERIOR PAINT

ACRI-BUILD®

Performance for New Construction Projects

ACRI-BUILD paint is a professional, exterior, ultra-low VOC, 100% acrylic flat coating that provides excellent sheen uniformity, good hide and durability, and can be used on properly prepared and primed masonry, concrete block, tilt-up concrete, stucco, wood and metal.

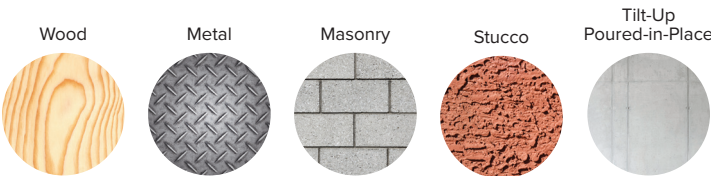

Why ACRI-BUILD paint outperforms the competition

- :: Formulated using 100% acrylic resin to provide excellent sheen uniformity, hide, adhesion and durability
- :: Dirt pick-up resistance and alkali resistance provide dependable performance
- :: Touch-up and spatter resistant for better application performance

ULTRA-PREMIUM INTERIOR/EXTERIOR PAINTS

ARISTOSHIELD®

Oil-Like Performance in a Water-Based Paint
ARISTOSHIELD paints are a line of ultra-premium, ultra-low VOC, interior/exterior coatings formulated with advanced water-based urethane alkyd technology for an oil-like finish. They are ideal for use on high-end projects where superior performance and durability are required.

Why ARISTOSHIELD paints outperform the competition

- :: Superior balance of hardness and flexibility
- :: Can be used as a direct-to-metal coating on properly prepared surfaces
- :: Excellent flow and leveling, which forms a durable, uniform finish
- :: Superior non-yellowing properties compared to other alkyd emulsion paints

LEARN MORE

For use on these substrates

	Eggshell	Satin/ Low Sheen	Semi-Gloss	High Gloss

These are commonly used gloss levels for surfaces listed above. Gloss may be affected by texture, porosity of the surface and atmospheric conditions. Please contact a Dunn-Edwards representative or your local store for specific product availability.

Best-in-class metal adhesion

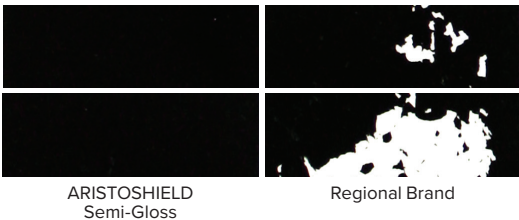

ARISTOSHIELD paints do a better job at sticking to both steel and aluminum, especially when exposed to moisture.

Adhesion refers to the ability to bond firmly to the substrate. Proper adhesion is crucial for long-lasting paint performance.

Excellent block resistance

ARISTOSHIELD paints clearly outperform the rest, with no sticking or peeling.

Block resistance is the ability of a dried paint film to resist sticking to another painted surface when pressed together, such as doors and doorjams.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

BLOC-RUST®

Protects Metal Surfaces From Moisture

BLOC-RUST Premium primers are ultra-low VOC, rust-preventative coatings offering excellent corrosion resistance and adhesion on interior and exterior metals, except for galvanized steel.

Why BLOC-RUST Premium primers outperform the competition

- :: Formulated with corrosion inhibitive additives and pigments that prevent metal corrosion
- :: Formulated with advanced waterborne alkyd resin technology, which improves hide and adhesion to metal
- :: Easy to apply, dries fast and water cleanup

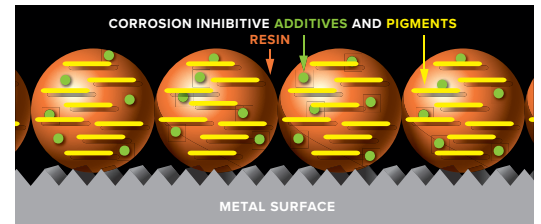

LEARN MORE

For use on this substrate

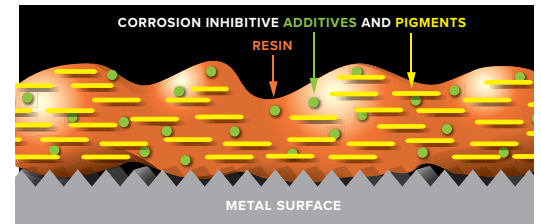

Metal

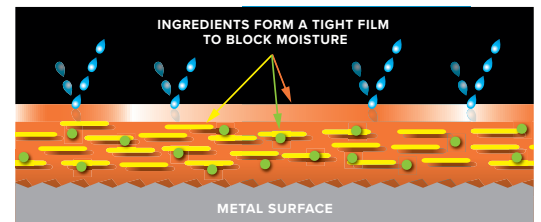

The science of rust prevention

Primer applied to ferrous or nonferrous metal

Superior resin containing corrosion preventive pigments and corrosion inhibitive additives work together to help prevent corrosion of the metal substrate

Resin and pigments form a tight, uniform, nonporous film that prevents water from reaching the metal surface, thus preventing corrosion

These diagrams are not designed to scale and are simplified to illustrate what is happening on a microscopic level.

INTERIOR/EXTERIOR MULTI-SURFACE PRIMER

ULTRA-GRIP[®] Premium

Multi-Surface Primer With Excellent Adhesion

ULTRA-GRIP Premium primer is an ultra-low VOC, acrylic, multi-surface coating designed for a wide range of interior and exterior applications. It provides excellent adhesion to properly prepared drywall, wood and masonry, as well as hard-to-stick surfaces, such as aged alkyd surfaces, aluminum, galvanized metal, vinyl, fiberglass and select plastics. ULTRA-GRIP Premium provides outstanding stain-blocking, strong tannin resistance, great hide, and excellent enamel holdout. It applies smoothly and dries fast.

Why ULTRA-GRIP Premium primer outperforms the competition

- :: Excellent adhesion to a wide variety of surfaces
- :: Outstanding stain blocking
- :: Strong tannin resistance
- :: Great hide and excellent enamel holdout
- :: Ultra-low VOC content

LEARN MORE

Excellent adhesion

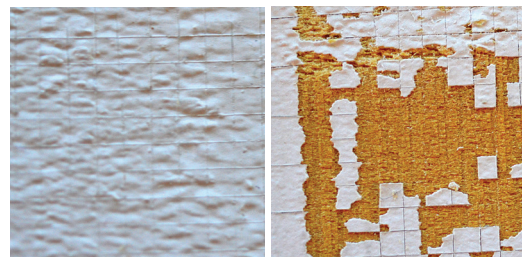

Paints that exhibit good wet and dry adhesion are better able to protect the substrate. ULTRA-GRIP Premium primer sticks to the surface better than the national brand, even when the finish is subjected to moisture.

ULTRA-GRIP Premium

INTERIOR HIGH BUILD PRIMER-SURFACER

PRO-COM[®] High Build Primer-Surfacer

Single-Coat Application for a Level 5 Finish

PRO-COM High Build Primer-Surfacer is an interior, ultra-low VOC, drywall primer and surfacer designed to efficiently transform a properly finished Level 4 drywall surface to a Level 5 in a single application. It can be used in lieu of a skim coat to achieve a Level 5 finish and provide a smooth surface ready for topcoats.

Why PRO-COM High Build Primer-Surfacer outperforms the competition

- :: Helps hide defects such as minor sanding grooves, nicks, pinholes and paper fuzz
- :: Provides a smooth, uniform finish for the topcoat

LEARN MORE

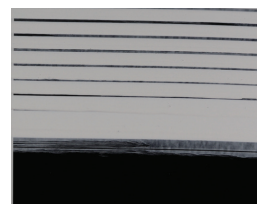

For use on this substrate

Drywall

Proven sag resistance

The high build formulation stays in place on the wall, unlike others that run and drip. Its sag-resistant properties reduce the need for additional costs, saving time and labor on every project.

PRO-COM
High Build Primer-Surfacer

National Brand

Sag resistance refers to the ability to maintain its shape and position on vertical or inclined surfaces during application. A high level of sag resistance prevents running or dripping, ensuring a smooth, even finish.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

CEILING PAINT

Exceptional Hide

CEILING PAINT is a premium, Zero VOC*, low odor, interior coating ideal for use on residential, commercial and institutional projects where a dead flat ceiling paint is required.

Why CEILING PAINT outperforms the competition

- :: Exceptional hide
- :: Spatter-resistant formulation for ease of use
- :: Excellent sheen uniformity
- :: Outstanding touch-up

LEARN MORE

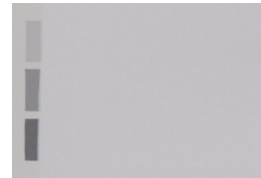

For use on this substrate

Drywall

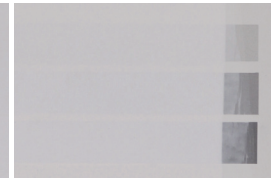

Exceptional dry hide

CEILING PAINT outperforms competitors by providing excellent dry hide to achieve better single-coat coverage when applied to a properly prepared ceiling.

CEILING PAINT

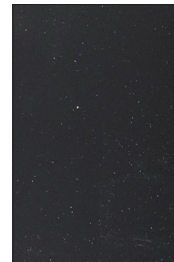

National Brand

Dry hide is a paint's ability to fully cover and conceal the surface beneath it, preventing underlying colors or patterns from showing through after the paint dries.

Roller spatter resistant

CEILING PAINT outperforms competitors in spatter resistance and is easy to apply by brush, roll or spray application.

CEILING PAINT

National Brand

National Brand

Roller spatter refers to a paint's ability to minimize the tiny droplets or specks that may fling off during roller application, helping to keep the surrounding area clean.

*"Zero VOC" means "No organic solvents added." (Trace amounts of VOC may be present as residual components of other ingredients. Dunn-Edwards uses Zero VOC colorants; other additives may increase VOC emissions.)

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

INTERIOR CABINET, DOOR & TRIM PAINTS

DECOGLO®

Durability Meets Excellence

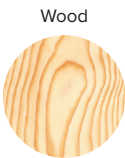

DECOGLO Cabinet, Door & Trim Paints are a line of ultra-premium, interior, ultra-low VOC, urethane modified coatings. They provide a lacquer-like finish ideal for use on properly prepared interior wood substrates, including furniture. Together with DECOPRIME® primer, this paint and primer system is designed to provide exceptional durability.

Why DECOGLO paints outperform the competition

- :: Exceptional film hardness
- :: Scuff and chemical resistant
- :: Fast drying and block resistant
- :: Excellent flow and leveling

Superior scuff resistance

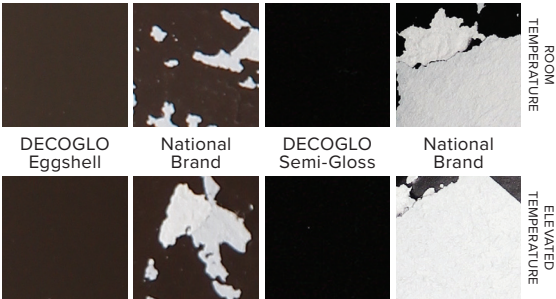

DECOGLO paints outperform competitor products in scuff resistance, which can be defined as the physical damage that typically occurs on the surface of the topcoat.

Scuff resistance is a paint's ability to resist visible scuff marks and surface abrasions while preserving a smooth finish.

Unrivaled block resistance

When two painted surfaces come into contact, such as a door and doorjamb, they can stick together, or block, and paint can peel from the surface. DECOGLO paints clearly beat the national brands, as their paints stick together and peel from the surface.

Block resistance is a paint's ability to prevent sticking or peeling when two painted surfaces come into contact, such as a door and doorjamb.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the corporate office by appointment.

ENDURALASTIC® 5

ENDURALASTIC® 10

Flexible, Durable Performance

ENDURALASTIC 5 elastomeric wall coating is a premium, specialty, 100% acrylic product that provides excellent performance and great durability for masonry surfaces.

Flexible, Long-Lasting Performance

ENDURALASTIC 10 elastomeric wall coating is an ultra-premium, specialty, 100% acrylic product that provides superior performance and exceptional durability for masonry surfaces.

Why ENDURALASTIC 5 coating outperforms the competition

- :: Excellent elasticity and elongation
- :: Very good crack-bridging properties
- :: Waterproofs against wind-driven rain

LEARN MORE

Why ENDURALASTIC 10 coating outperforms the competition

EXTERIOR DECK, FENCE & SIDING STAIN

SOLID-COLOR

Rejuvenate, Transform, Protect

SOLID-COLOR deck, fence & siding stain provides beautiful results designed to last longer than traditional deck stains, as its formula resists UV ray and water damage.

Why SOLID-COLOR stain outperforms the competition

- :: Very good protection from UV ray and water damage
- :: Resists cracking and peeling
- :: Tintable in 50 transformative colors

LEARN MORE

For use on this substrate

Wood

Resists UV ray and water damage

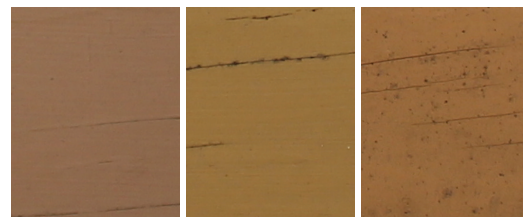

Breathe new life into wood surfaces that have a worn coat of paint, stain or varnish —or are grayed from time and exposure to the elements.

Protect new wood with a beautiful, solid-color finish.

Exposure test

When tested for durability against competitor exterior staining products, SOLID-COLOR stain outperformed 7 national brands' products. Natural exposure testing is used to determine the weathering and durability of coatings. It allows for the coating to be exposed to real environmental conditions that allow the most accurate prediction of product performance.

SOLID-COLOR

National Brand

National Brand

Exposure testing shows how well a paint holds up in real outdoor conditions, helping to predict its long-term durability against weather and environmental factors.

PORCH & FLOOR

Rejuvenate, Transform and Protect Concrete and Wood

PORCH & FLOOR concrete & wood coating's 100% acrylic formula is engineered to protect surfaces from water damage, scuffing and the sun's harmful UV rays. It's ideal for use on concrete and wood porches, patios, basements, walkways and stairs.

Why PORCH & FLOOR coating outperforms the competition

- :: Superior hide
- :: Delivers a smooth, flawless finish

LEARN MORE

For use on these substrates

Wood

Concrete

Resists UV ray and water damage

Give concrete and wood surfaces with chipped or faded paint a new life.

Protect new concrete with a beautiful finish.

Superior hide with just one coat

PORCH & FLOOR coating outperforms leading competitors in applied hide and application. It shows no noticeable brush marks or uneven blending at the edges, and delivers a smooth, flawless finish with minimal effort.

PORCH & FLOOR

Regional Brand 1

Regional Brand 2

Applied hide is the ability of paint to conceal or obscure the surface over which it is applied.

INTERIOR CABINET, DOOR & TRIM PRIMER

DECOPRIME®

**Fast Drying With Unmatched Sandability**

DECOPRIME primer is a premium, ultra-low VOC, water-based coating for new interior wood and hardboard. Together with DECOGLO* Cabinet, Door & Trim Paints, this paint and primer system is designed to provide exceptional durability.

Why DECOGLO primer outperforms the competition

- :: Fast drying
- :: Exceptional sandability, adhesion and enamel holdout

LEARN MORE

Excellent sandability

A primer that is easily sandable provides a smooth and uniform surface, allowing for maximum adhesion of a topcoat.

DECOPRIME primer doesn't gum up the sandpaper while sanding, is easier to generate powder when it is sanded, and has better sandability compared to the competition.

For use on this substrate

SUPER-LOC®

Maximum Adhesion and Performance for All Surfaces

SUPER-LOC bonding primer offers excellent adhesion on a vast array of difficult-to-paint surfaces (see Product Data Sheet) in addition to alkali and efflorescence resistance on interior and exterior masonry surfaces.

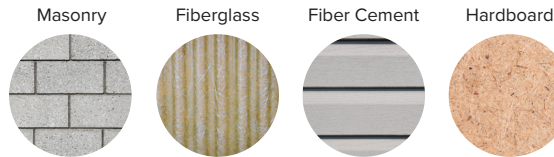

Why SUPER-LOC bonding primer outperforms the competition

- :: Formulated with advanced resin technology, which improves adhesion properties, alkali and efflorescence resistance
- :: Easy to apply and dries fast
- :: Low odor and ultra-low VOC content

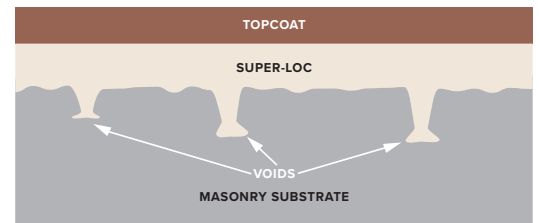

LEARN MORE

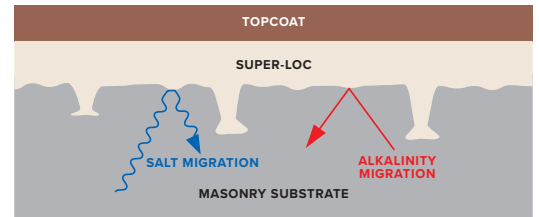

For use on these substrates

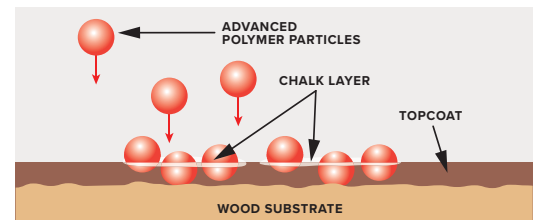

The science of excellent adhesion, alkali and efflorescence resistance

Unique resins migrate into voids in the masonry substrate, providing superior adhesion

High-performance acrylic resin seals masonry substrate from salt migration (efflorescence) and provides excellent protection by suppressing alkaline migration to the topcoat

Advanced polymer particles penetrate chalky surfaces and adhere to the underlying substrate, which provides superior adhesion

These diagrams are not designed to scale and are simplified to illustrate what is happening on a microscopic level.

INTERIOR/EXTERIOR LIGHT-DUTY INDUSTRIAL MAINTENANCE COATINGS

ENDURA-COAT®

Quality You Know, Performance You Can Trust

ENDURA-COAT coatings are a line of interior/exterior high-performance, low VOC, water-based, acrylic industrial maintenance coatings with superior adhesion and exceptional corrosion resistance. They can be used on properly prepared and primed metal, wood, masonry, plaster and drywall.

*For Professional Use Only.**

Available in Eggshell, Semi-Gloss and Gloss finishes

Why ENDURA-COAT Industrial Maintenance Coatings outperform the competition

- :: Can be applied directly to metal
- :: Exceptional corrosion resistance
- :: Fast drying

ULTRASHIELD® SERIES new

Performance for Any Service Environment

The ULTRASHIELD series is a line of coatings engineered to protect surfaces in heavy-duty environments where increased durability is a must. **For Professional Use Only. Not for Residential Use.**

Base Coats/Primers

Base Coats/Primers, Topcoats

Ultra-Weatherable Topcoat

We are proud to deliver product solutions for any service environment. Our NACE-certified coatings and substrate experts are available to assist you with everything from surface prep through coating selection.

- :: **Expert Technical Services:** specifications, substrate review and failure analysis
- :: **Tinting Capabilities:** 35+ tinting locations for industrial and high-performance coatings
- :: **Industry Associations:** NACE is now AMPP, The Association for Materials Protection and Performance, combining the best of both the National Association of Corrosion Engineers (NACE International) and the Society for Protective Coatings (SSPC). Dunn-Edwards is an affiliate member.

BASE COAT/PRIMER

ULTRASHIELD® Aluminum Epoxy

ULTRASHIELD Aluminum Epoxy is a low VOC, high-performance, aluminum-filled, micaceous iron oxide (MIO) epoxy engineered to provide excellent corrosion protection on marginally prepared steel.

- :: Excellent corrosion resistance
- :: Excellent wetting properties and adhesion
- :: Outstanding tolerance on marginally prepared surfaces

LEARN MORE

BASE COAT/PRIMER

ULTRASHIELD® Epoxy Penetrating Sealer

ULTRASHIELD Epoxy Penetrating Sealer is a high-solids, high-performance, universal tie-coat engineered to provide exceptional wicking characteristics that result in outstanding adhesion to a variety of marginally prepared bare and previously coated surfaces.

- :: Exceptional wetting and wicking properties
- :: Excellent adhesion to a variety of substrates
- :: Universal primer and tie-coat accepts a wide range of topcoats
- :: Flexible, high-solids formula

LEARN MORE

BASE COAT/PRIMER, TOPCOAT

ULTRASHIELD® Gloss Water-Based Epoxy

ULTRASHIELD Gloss Water-Based Epoxy is a high-performance, water-based epoxy engineered to provide very good chemical, corrosion and abrasion resistance on drywall, concrete and steel surfaces.

- :: Very good chemical and corrosion resistance
- :: Outstanding adhesion
- :: For use on vertical and horizontal surfaces
- :: Low odor during application

LEARN MORE

BASE COAT/PRIMER, TOPCOAT

ULTRASHIELD® Gloss Epoxy

ULTRASHIELD Gloss Epoxy is a high-performance, high-build, highly chemical- and corrosion-resistant epoxy ideal for use on concrete and steel surfaces.

- :: Excellent chemical and corrosion resistance
- :: Very good abrasion resistance
- :: Outstanding adhesion
- :: Excellent tolerance on marginally prepared surfaces

LEARN MORE

ULTRA-WEATHERABLE TOPCOAT

ULTRASHIELD® Acrylic Polyurethanes

ULTRASHIELD Acrylic Polyurethanes are high-performance, ultra-weatherable coatings engineered to provide superior impact and abrasion resistance. They provide a durable finish that exhibits superior resistance to corrosion and chemical exposure.

- :: Excellent weatherability
- :: Superior impact and abrasion resistance
- :: Superior chemical and corrosion resistance
- :: Indefinite recoatability

VIEW COLORS BEFORE YOU PAINT

SIMPLESWATCH® Peel & Stick Paintable Sheets

This color visualization tool enables paint colors to be viewed directly on a wall and in all lighting conditions, indoors and out. The included instruction sheet shows you how to paint a sheet of the material, peel off the liner, and apply it to the wall. Its low-tack adhesive allows you to easily reposition and remove it without leaving residue behind. Package includes 3 sheets of paintable material.

3-Pack Size	Material #	Box Qty	Notes
8-1/2" x 11"	DE-SS3	25	

Dunn-Edwards 8-oz Interior Paint Samplers

Paint an area up to 2' x 2' with 2 coats to view colors before you paint the room. The decor, lighting and even time of day can affect how colors look.

INTERIOR PRIMERS

Drywall

VINYLASTIC® Premium

- :: Excellent sealing qualities
- :: Excellent hide
- :: Excellent enamel holdout

VINYLASTIC Premium is a Zero VOC, interior, acrylic wall sealer for new drywall.

Material #	UOM	Max VOC Content	Notes
VNPR00	1 Gal 5 Gal	Zero VOC (5 g/L by ASTM Test Method D 6886)*	

*"Zero VOC" means "No organic solvents added." (Trace amounts of VOC may be present as residual components of other ingredients. Dunn-Edwards uses Zero VOC colorants; other additives may increase VOC emissions.)

Drywall

VINYLASTIC® Select

- :: Very good sealing qualities

VINYLASTIC Select is a Zero VOC, interior, acrylic wall sealer for new drywall.

Material #	UOM	Max VOC Content	Notes
VNSL00	5 Gal	Zero VOC (4 g/L by ASTM Test Method D 6886)*	

*"Zero VOC" means "No organic solvents added." (Trace amounts of VOC may be present as residual components of other ingredients. Dunn-Edwards uses Zero VOC colorants; other additives may increase VOC emissions.)

Drywall

VINYLASTIC® Plus

- :: Good hide and coverage
- :: Easy to apply

VINYLASTIC Plus is an interior, acrylic wall sealer designed for use on a Level 5 drywall finish.

Material #	UOM	Max VOC Content	Notes
VNPL00	1 Gal 5 Gal	Low VOC (95 g/L)	

Drywall

PRO-COM® High Build Primer-Surfacer

- :: Helps hide defects such as minor sanding grooves, nicks, pinholes and paper fuzz
- :: Provides a smooth, uniform finish

PRO-COM High Build Primer-Surfacer is an interior drywall primer and sealer designed to transform a properly finished Level 4 drywall surface to a Level 5 in a single application. *For more information please refer to page 29.*

Material #	UOM	Max VOC Content	Notes
PCHB00	5 Gal	Ultra-Low VOC (15 g/L)	

EXTERIOR PRIMERS

Wood Siding

EZ-PRIME® Premium

- :: Excellent tannin stain resistance
- :: Excellent hide and coverage
- :: Excellent enamel holdout

EZ-PRIME Premium is an exterior wood primer, ideally suited for redwood and cedar.

Material #	UOM	Max VOC Content	Notes
EZPR00	1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	

Wood Siding

EZ-PRIME® Select

- :: Very good tannin stain resistance
- :: Very good hide, coverage and enamel holdout

EZ-PRIME Select is an exterior wood primer, ideally suited for redwood and cedar.

Material #	UOM	Max VOC Content	Notes
EZSL00	1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	

INTERIOR/EXTERIOR PRIMERS

Metal

BLOC-RUST® Premium

- :: Excellent corrosion resistance and adhesion
- :: Very good hide

BLOC-RUST Premium is an interior/exterior, rust preventative primer for ferrous metals. For more information please refer to page 26.

Material #	UOM	Max VOC Content	Notes
BRPR00-2-WH	1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	
BRPR00-2-RO	1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	

Available in Red Oxide (for heavy rust and dark-colored topcoats) and White (for light rust and light-colored topcoats).

Masonry

EFF-STOP® Premium

- :: Excellent efflorescence and alkali resistance
- :: Superior adhesion

EFF-STOP Premium is an interior/exterior, epoxy-fortified acrylic primer/sealer for masonry.

Material #	UOM	Max VOC Content	Notes
ESPR00	1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	

Concrete Block

Smooth BLOCFIL™ Premium

- :: Very good alkali resistance
- :: Fills and bridges voids and cracks
- :: Prevents water penetration

Smooth BLOCFIL Premium is an interior/exterior, 100% acrylic, heavy-bodied filler for porous concrete block.

Material #	UOM	Max VOC Content	Notes
SBPR00	5 Gal	Low VOC (65 g/L)	

Concrete Block

Smooth BLOCFIL™ Select

- :: Fills and bridges voids and cracks
- :: Prevents water penetration
- :: Improves appearance

Smooth BLOCFIL Select is an interior/exterior, acrylic, heavy-bodied filler for porous concrete block.

Material #	UOM	Max VOC Content	Notes
SBSL00	5 Gal	Ultra-Low VOC (50 g/L)	

Masonry

EFF-STOP® Select

:: Very good alkali and efflorescence resistance

EFF-STOP Select is an interior/exterior, 100% acrylic primer/sealer for masonry.

Masonry/Crack-Resistant

FLEX-PRIME® Select

:: Bridges hairline cracks in masonry surfaces

:: Very good alkali and efflorescence resistance

FLEX-PRIME Select is an interior/exterior, crack-resistant, acrylic primer for masonry.

Material #	UOM	Max VOC Content	Notes
ESSL00	1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	

Material #	UOM	Max VOC Content	Notes
FPSL00	1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	

Multi-Surface

ULTRA-GRIP® Premium

:: Outstanding stain blocking

:: Tannin stain resistant

:: Excellent adhesion

ULTRA-GRIP Premium is an interior/exterior, acrylic, multi-surface primer. *For more information please refer to page 27.*

Multi-Surface

ULTRA-GRIP® Select

:: Excellent adhesion

:: Great hide and enamel holdout

ULTRA-GRIP Select is a Zero VOC, interior/exterior, acrylic, multi-surface primer.

Material #	UOM	Max VOC Content	Notes
UGPR00	Quart 1 Gal 5 Gal	Ultra-Low VOC (50 g/L)	

Material #	UOM	Max VOC Content	Notes
UGSL00	1 Gal 5 Gal	Zero VOC (3 g/L by ASTM Test Method D 6886)*	

Zero VOC means 'No organic solvents added.' (Trace amounts of VOC may be present as residual components of other ingredients. Dunn-Edwards uses Zero VOC colorants; other additives may increase VOC emissions.)

- :: Exceptional wetting and wicking properties
- :: Excellent adhesion to a variety of substrates
- :: Universal primer and tie-coat accepts a wide range of topcoats
- :: Flexible, high-solids formula

ULTRASHIELD Epoxy Penetrating Sealer* is a high-solids, high-performance, universal tie-coat engineered to provide exceptional wicking characteristics that result in outstanding adhesion to a variety of marginally prepared bare and previously coated surfaces. *For more information please refer to page 43.*

BASE COATS/PRIMERS, TOPCOATS

Drywall/Metal/
Masonry

ULTRASHIELD® Gloss Water-Based Epoxy

- :: Very good chemical and corrosion resistance
- :: Outstanding adhesion
- :: For use on vertical and horizontal surfaces
- :: Low odor during application

ULTRASHIELD Gloss Water-Based Epoxy* is a high-performance, water-based epoxy engineered to provide very good chemical, corrosion and abrasion resistance on drywall, concrete and steel surfaces. For more information please refer to page 43.

Metal/Masonry

ULTRASHIELD® Gloss Epoxy

- :: Excellent chemical and corrosion resistance
- :: Very good abrasion resistance
- :: Outstanding adhesion
- :: Excellent tolerance on marginally prepared surfaces

ULTRASHIELD Gloss Epoxy* is a high-performance, high-build, highly chemical- and corrosion-resistant epoxy ideal for use on concrete and steel surfaces. For more information please refer to page 43.

ULTRA-WEATHERABLE TOPCOAT

Drywall/Metal/
Masonry

ULTRASHIELD® Acrylic Polyurethanes

- :: Excellent weatherability
- :: Superior impact and abrasion resistance
- :: Superior chemical and corrosion resistance
- :: Indefinite recoatability

ULTRASHIELD Acrylic Polyurethanes* are high-performance, ultra-weatherable coatings engineered to provide superior impact and abrasion resistance. They provide a durable finish that exhibits superior resistance to corrosion and chemical exposure. Available in Low Sheen and High Gloss. For more information please refer to page 43.

LACQUERS

GEMINI

Gemini Wood Coatings Systems

Gemini manufactures a complete line of 275-, 550- and 680-VOC wood coatings systems. We offer the professional finisher a wide range of coatings that includes nitrocellulose lacquers, pre-catalyzed lacquers, and conversion varnishes, along with the most advanced 1K and 2K waterborne systems available.

PRIMERS/SEALERS

BLOCK-IT® Interior/Exterior Stain-Blocking Aerosol Primer

Superior hiding, stain-blocking, all-purpose primer seals in tough stains

- :: Seals and blocks stains caused by water, nicotine, smoke, tannin, pencil, ink, grease and felt marker
- :: Seals smoke and pet odor
- :: Use on interior/exterior wood, concrete, drywall and non-galvanized metal
- :: Sticks to hard-to-paint surfaces such as railings, shutters, glossy paint, glass, ceramic tile and outdoor furniture
- :: Sands easily and is perfect for sealing spackle drywall repairs and hiding dark colors
- :: Dries fast; recoat in 30 minutes

Notes:
 * Interior Use Only (exception: B-I-N may be used for exterior SPOT-priming).
 (1) Allow new masonry, plaster and stucco to cure before coating.
 (2) For best results, allow Bulls Eye 1-2-3 to dry 24 hours before applying topcoat.
 (3) Use appropriate cleaner to remove mildew.
 (4) Only B-I-N can be used on floors.

Gallon.....	RG-VG7200-1.....	4	208	

Stocked at select locations

VandlClean Super Graffiti Cleaner is a low-VOC, low-odor, biodegradable, citrus-based product that dissolves paint, marker and pen ink without harming surfaces. It is safe to use on all surfaces including glass, plastic and metal. Spray it directly onto the affected surface, wait 30 seconds, wipe with a rag or use a soft brush, and finish with a water rinse or with a pressure wash. Recommended to be used with other Rainguard VandlGuard products.

APPLICATORS

BRUSHES

TITANIUM-PRO® Brushes

Dunn-Edwards Professional Paint Brushes

Crafted for Peak Performance Dunn-Edwards technicians have invested years in the research and development of brushes in conjunction with our lab's painting professionals and our materials suppliers. Together, we have achieved a level of application performance that is both unique and unprecedented in our industry using proprietary methods and thorough testing protocols. The result is a series of premium-quality brushes with the attributes pros depend on for smooth application and coverage.

AGATE™

- :: Soft formulation
- :: Natural bristle/ox hair blend
- :: Specially suited for all oil-based paints

PERFECTA-PRO®

- :: Firm formulation
- :: Excellent loading and distribution of paint
- :: Delivers a smoother finish
- :: Provides improved coverage and hiding

SILKY-FLO®

- :: Semi-firm formulation
- :: 100% Natural black Chinese bristles
- :: Recommended for oil-based paints, stains and varnishes

SUMMERTIME PRO®

- :: Firm formulation
- :: 100% Tapered, solid filaments
- :: Applies all paints smoothly
- :: Works well in warm weather

TITANIUM-PRO®

- :: Stiff formulation
- :: Maintains stiffness on warm days
- :: Specially designed for applying exterior paints

Determining the Correct Roller Cover

A factor to consider when choosing a roller cover is the surface you'll be painting. The general rule when choosing a roller nap is: the smoother the surface, the shorter the nap; the rougher the surface, the longer the nap. Kitchens and bathrooms generally have walls with a smooth finish, so they require a 1/4" to 3/16" nap. Bedrooms and hallways that may have a light textured surface require a 3/8" to 1/2" nap.

Check the chart for proper nap size recommendations.

NAP SIZES	SURFACE TYPES
1/4" to 3/16"	Smooth Surfaces: Metal, Drywall, Smooth Wood, Smooth Plaster
3/8" to 1/2"	Semi-Smooth Surfaces: Walls, Ceilings, Lightly Textured Drywall
3/4" to 1"	Semi-Rough to Rough Surfaces: Stucco, Medium Texture, Concrete Block
1 1/4" to 1 1/2"	Very Rough Surfaces: Stucco, Brick, Rough Shingles, Corrugated Metal

ROLLER COVERS | Continued

Emerald Roller Covers

Versatile Use
Excellent for flat finishes, primers, stains and water sealers

High Performance
Performs well with oil and latex paints

Improved Pick-Up and Release
Special mix of thin and thick fibers for both improved pick-up and release and to prevent matting

Multi-Surface Application
Contains knitted fabric for high production on medium, rough and extra-rough surfaces

Color-Coded for Nap Size Identification

At Dunn-Edwards, we do our best to carry the products painting professionals need to complete their projects and make it easy to identify which product should be used for a specific job application.

One way we do this is by color-coding our roller covers. Look for the color patch on the endcap of all Dunn-Edwards roller covers.

Refer to the chart at right for nap size and corresponding color.

	1/4" PILE HEIGHT	Recommended for ultra-smooth surfaces like drywall and wood work
	3/8" PILE HEIGHT	Recommended for smooth and semi-smooth surfaces like drywall and light texture
	1/2" PILE HEIGHT	Recommended for semi-rough and rough surfaces like texture and concrete
	3/4" PILE HEIGHT	Recommended for rough and extra-rough surfaces like heavy texture and concrete block

Sheepskin Wool Roller Covers

Premium-Quality Merino Sheepskin

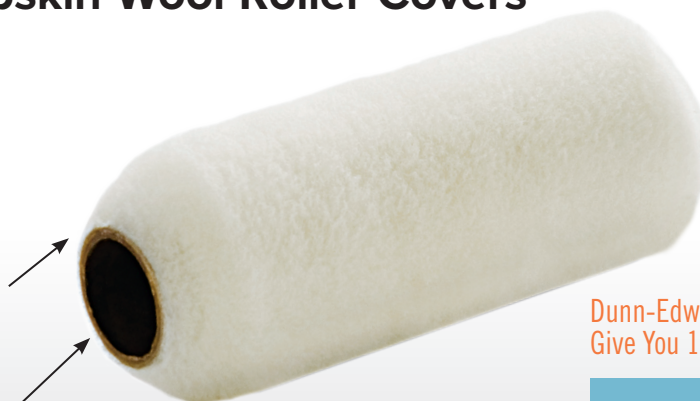

Our 100% handmade sheepskin covers are made from only the most premium-grade skins and are specially tanned to ensure the highest-quality product available

Clean End Product

Each cover is carefully trimmed and vacuumed to ensure a smooth finish every time

Strong, Resistant Core

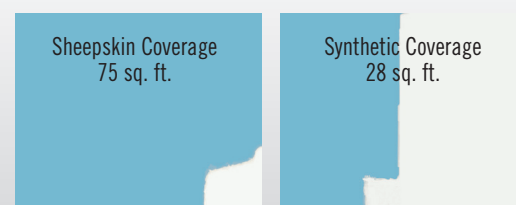

Made of heavy-duty six-ply phenolic material and end-sealed, so it's impermeable to water and solvent-resistant, making it a longer-lasting roller cover

More Fibers Per Square Inch

Sheepskin covers can have up to eight times as many fibers per square inch as the best-quality synthetic covers, and give you two to four times more coverage, so you can spend more time painting and less time dipping

Dunn-Edwards Sheepskin Roller Covers Give You 168% More Coverage

DUNN-EDWARDS

Size x Nap	Material#	Box Qty	Notes
Sheepskin Covers

9" x 1 1/4"	C9GBY	12	

Dunn-Edwards Sheepskin Is Superior

Reason #1—Increased Productivity

Dunn-Edwards sheepskin roller covers provide more pick-up and release of paint in tests against synthetic roller covers. This increases your productivity and allows you to get the job done quicker.

Reason #2—More Durable

Dunn-Edwards sheepskin roller covers are more durable because of their superior quality construction and, with proper care, will last longer than synthetic roller covers.

Reason #3—Better Value

With increased productivity and more durability, Dunn-Edwards sheepskin roller covers are naturally a better value. See for yourself.

Basics of Airless Spray Tips

Choosing the right spray tip:

- :: Size the spray tip according to the maximum tip size supported by the sprayer
- :: Consider the paint/coating to be sprayed

TYPE OF COATING	TIP SIZE
Lacquer or Stain	.011 to .013
Oil-Based Paint	.013 to .015
Latex Paint	.015 to .019
Heavy Latex and Smooth Elastomeric	.021 to .025
Elastomeric and BlockFiller	.025 to .035

PROTECT WHAT MATTERS

The success of your projects depends on the performance and durability of the products you use. Safeguard your work with coatings engineered to last. You'll be doing your part to protect the planet, too. Made in the USA from domestic and imported ingredients in the world's first and only LEED® Gold-certified paint manufacturing facility, Dunn-Edwards products meet or exceed most environmental standards.

'LEED' and related logo is a trademark owned by the U.S. Green Building Council and is used with permission.

Products bearing this logo are EG-FREE™ and TAC/HAP-FREE. Ethylene glycol (EG), a solvent often used in water-based paints, is listed as a Toxic Air Contaminant (TAC) and Hazardous Air Pollutant (HAP). In 1983, Dunn-Edwards was the first in the industry to voluntarily replace EG with propylene glycol, a nontoxic alternative "generally regarded as safe" by the FDA. Also, every Dunn-Edwards product with the EG-FREE logo is formulated without any other TAC or HAP.

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

COMMITTED TO YOUR SERVICE AND SUCCESS

Professional painters have always been our priority.

Dunn-Edwards was founded by two friends who were succeeded by generations of family members, so relationships have been at the heart of everything we do. We have always valued our relationship with professional painters, and have made your success our priority.

Here are the key milestones that have shaped our commitment to the trade:

1936
The company changed its name to Dunn's, Inc.

1938

As paint sales grew, Frank partnered with his friend Arthur Edwards, whose experience included working as a painter and selling Dutch Boy brand paints to contractors for the National Lead Company. At Dunn's, Arthur worked with chemists to develop problem-solving formulas and tested them on jobsites, using painter feedback to refine each product. His vision was simply to make a good can of paint and sell it at a fair price.

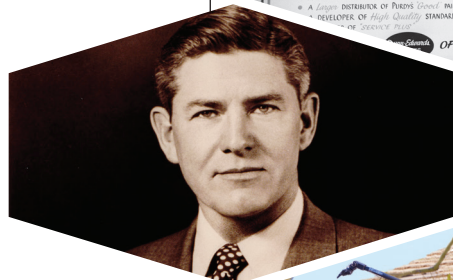

1944

The company was renamed Dunn-Edwards Corporation, and Arthur spent the next two decades improving painter productivity through better tools. He collaborated with Purdy to develop the first brushes for water-based paints, and helped to refine Graco airless sprayers through contractor testing.

Those early advancements continue to benefit professional painters today.

August 1925

Frank Dunn founded the Consolidated Wallpaper Corporation in Los Angeles, which soon after began selling paint.

Today

Dunn-Edwards operates more than 170 locations across the Southwestern U.S. and supplies more than 300 independent retailers across the country and in 12 international markets. We remain committed to serving professionals through premium products, expert service, and industry-leading support. 'APPLY A HIGHER STANDARD' is more than a tagline. It is our promise to help you succeed through every stage of your project, as we have done for 100 years.

1988

Ken stepped into his father's role, becoming CEO. He was the first in a line of family successors to carry forward his father's vision to be an organization of good people who are eager to please.

1958

Arthur's son, Ken Edwards, joined the company. His experience as a chemical engineer enabled Dunn-Edwards to develop some of the industry's first specialty coatings, such as lacquers, and industrial and floor coatings.
