

Endless possibilities with
VARIETY

ajproducts.co.uk

Make room for creativity and wellbeing

We're more efficient in the company of others. Given the right conditions, we carry out great work and give each other inspiration for new ideas. So, spaces for us to collaborate, gather and work are hugely important, wherever they may be.

A well-thought-out lounge area creates opportunities for effective teamwork but also offers a

natural meeting place for coffee, socialising and relaxation. That's why we've developed VARIETY, an extendable and adaptable modular sofa series that will encourage creativity and bring people together.

The entire VARIETY series is available as BIMobjects - easy to download and place in your digital design environments!

Sofas the way you want them, that's VARIETY

The modules in the VARIETY series can be combined into seating units of any size and placed anywhere in the room: along a wall or in the middle of the room. That means it doesn't matter what size your room is; whether it's a small or a large space, VARIETY can be adapted accordingly. You can design VARIETY to fit your room or design your room around VARIETY!

With lots of options in terms of colour, fabric, shape and size, you can easily create a completely unique meeting place where people of different backgrounds can get together, socialise and collaborate. Let yourself be inspired by the fun and creativity this series has to offer and discover endless possibilities with VARIETY.

Complete solutions

Let our complete solutions lay the foundation for a seating area that can be easily extended with additional modules later on as your needs change.

Pouffe with backrest

Space for six people

Fabrics & colour choices

Multiple fabrics and colours are available for you to create a unique and customised sofa. All of the fabrics meet the requirements of Möbelfakta (a Swedish sustainability reference and labelling system) as well as OEKO-TEX STANDARD 100 and EU Ecolabel. The units can be combined regardless of colour or fabric, which creates endless possibilities.

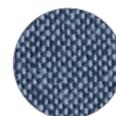

Fabric

Pod CS

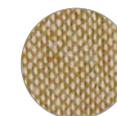

A popular upholstery fabric with modern quality, made of 100% Trevira CS. Soft and elastic in character but also unexpectedly hard wearing. This thinner fabric hugs the VARIETY modules and gives them a sleek look.

Blues CSII

A strong upholstery fabric with high wear resistance, made of 100% Trevira CS. A special weaving technique gives it its characteristic 3D effect, which turns your sofa into a statement piece wherever it's placed.

Turquoise/orange
9306

Focus Melange

A mottled fabric made from 100% New Zealand wool. The natural grain in the colour gives extra character to the fabric, which blends well with a natural-coloured interior.

Imitation leather upholstery

Illusion

A leather imitation upholstery composed of 69% PU leather and 31% cotton. The imitation leather has very high wear resistance and is easy to wipe down. If necessary, it can be disinfected with ethanol (75%) for thorough cleaning.

Tested for high quality

VARIETY is a series designed with use in mind - inside and out.

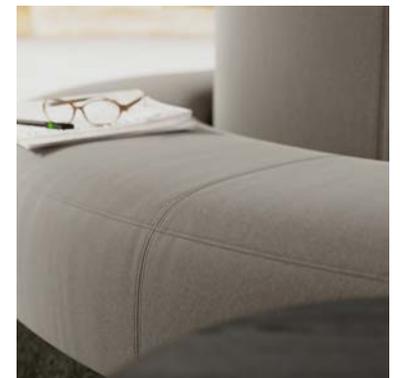

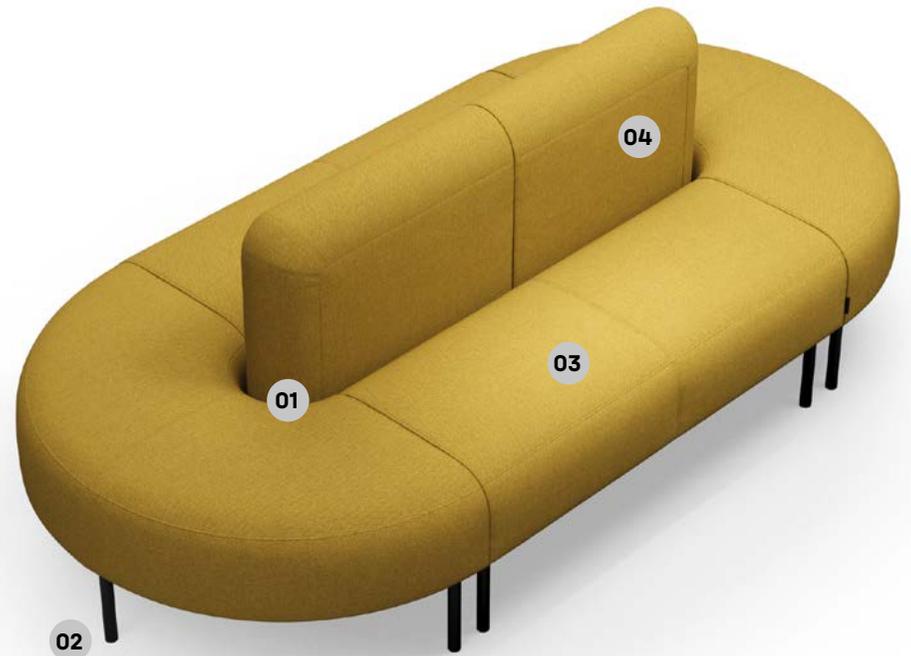

The sofa modules are tested in accordance with EN 16139 and upholstered in hard-wearing fabric that meets the requirements of Möbelfakta (a Swedish sustainability reference and labelling system). The combination of high quality and easy-to-clean design makes the series ideal for lounge areas and offices as well as public spaces.

01 Small gap between the seat and backrest to prevent dust and dirt accumulation between the cushions. Facilitates cleaning which is advantageous in environments where there are a lot of people constantly on the move.

02 Round legs that harmonise visually with the neat design of the frame. The legs are threaded for easy assembly. The height of the legs gives a stylish appearance and facilitates cleaning access.

03 Cold foam padding that ensures comfort whether sitting or lying down. Suitable for short and long periods of sitting, for example in places where waiting time may occur.

04 Durable fabrics that conform to Möbelfakta standards. Carefully chosen with regard to stretch and stiffness and certified to OEKO-TEX Standard 100 and EU Ecolabel. Perfect for lounges, offices, schools and public environments.
