Final appearance and color may vary from these photos.
This document is only a guide and is not intended to replace
practical mock-ups or samples. Work with a contractor to
determine the best color and texture/finish combinations.
Many factors affect appearance, so representative jobsite
samples/mock-ups are recommended prior to construction.
**Solomon Colors/Brickform accepts no responsibility for
color matching or misprints.**

RA 200 Medium Gray

Stamped concrete is the foundational decorative concrete system. Brickform is the leading name in stamped concrete, with half a century of experience in manufacturing professional grade materials for the concrete contractor.

BRICKFORM

Texture – Surface textures are created by patterned stamps and seamless texture skins.

Color – Integral color is mixed in the concrete truck and will create color throughout the concrete. Antiquing colors add definition and variation. Stains are also available to color your new or existing concrete projects. They may be used as accent colors to create a one-of-a-kind final look.

Sealer – Many different sealers are available that provide various levels of color enhancement, surface sheen and protections for your concrete hardscape.

Maintenance & Restoration – Stamped concrete should be periodically cleaned using a broom, water, and mild detergent such as Neutra Clean. Generally, concrete should also be resealed using the same sealer every two to three years, or as conditions dictate.

Choosing Colors

When **CHOOSING COLORS** for stamped concrete, it is recommended to compliment your existing hardscape versus trying to match an existing color. The sample pictures below are to help you identify approximate color ranges for your base color and your release. Look at the samples below and identify which of the combinations of integral color and release agent are similar to what you are looking for. Then on the following pages, find the pattern you like and refer back to these pages to finalize your color selection. Always remember, these are pictures of samples. To ensure the true coloration, request a jobsite sample from your contractor prior to installation.

Seamless

Seamless Texture Skins are feathered edge stamping tools that can be rotated and overlapped for infinite texture variety. Texture skins can be used to touch up and supplement patterned textures, or they can be used as the primary tool for a striking, continuous texture.

Stone

Stone, a naturally beautiful material, has been used for millennia in paving and building. Though timeless, its cost and limitations can be a drawback. Stamped concrete with stone textures offers a more affordable, uniform alternative without losing its visual charm.

Slate

Slate is prized for its rich, layered texture and natural variations, making it a favorite for both traditional and contemporary designs. Its distinctive look adds depth and elegance to patios, walkways, and interior surfaces.

Wood

Wood patterns add warmth and timeless charm, showcasing natural grain and texture. Stamped concrete replicates the beauty of wood with the durability and low maintenance of concrete, offering lasting style for any space.

Brick

Brick has long been a classic choice for paving and building, valued for its timeless charm and durability. However, its cost and labor-intensive installation can be limiting. Brick stamps for concrete provide a cost-effective, uniform solution that captures the traditional look of brickwork while offering greater flexibility and ease.

BRICKFORM

Brickform would like to thank our contractor network that supplied the images in this catalog.

A large, multi-story house with a tiled roof and arched windows, surrounded by palm trees and a stone-paved driveway. The house has a light-colored exterior and a dark tiled roof. There are several arched windows and doorways. The driveway is paved with large, rectangular stone tiles. There are palm trees and other landscaping in the background.
