

| RIBA CPD Seminars

Continue your professional development and book a RIBA approved elZinc CPD.

elZinc offers a comprehensive, RIBA approved CPD seminar to architects and other specifiers that are delivered face to face at your premises or remotely online.

Our CPD provides an understanding of the use of Zinc as an architectural material to fully appreciate its flexibility and design possibilities for traditional and contemporary architecture, from its use as roofing and rainwater systems through to modern rainscreen façade systems, also covering its sustainability profile and inherent fire safety characteristics. The CPD is relevant in the following RIBA subjects:

- Core curriculum subjects
- Design, construction and technology
- Knowledge level
- General Awareness

The Designing with Zinc CPD covers:

- Roofing systems
- Façade systems
- Roof and wall build-ups
- Fire rating and fire safe build-ups
- Zinc near the sea
- Weathering of zinc
- Much more...
