

WORK SURFACES

Natural Stone from Norway

MAINTENANCE-FREE
HEAT RESISTANT
UP TO 300 °C

The complex blend of beautiful feldspar crystals creates subtle distinctions that make every Lundhs Real Stone surface unique.

100%

natural stone from Norway

Lundhs Real Stone is a collection of genuine natural stones, crafted by nature millions of years ago. Each slab of stone is cut from a solid block of rock, quarried from mountains in Norway. The composition of Lundhs Real Stone provides you with a completely natural and maintenance-free worktop choice. This translates into a surface that is highly resistant to heat, stains and scratches from daily wear and tear in the kitchen. The complex blend of beautiful feldspar crystals differs from one slab of stone to another, creating subtle distinctions that make every surface unique. Each Lundhs Real Stone is delivered with a certificate of authenticity stating the origin of the stone – your own, unique piece of Norway.

Choose your favourite

With a small but definitive collection of four neutral materials and three distinctive surface finishes, you have the opportunity to choose the backdrop to your kitchen with ease, ensuring that it will complement your individual style.

POLISHED SURFACE

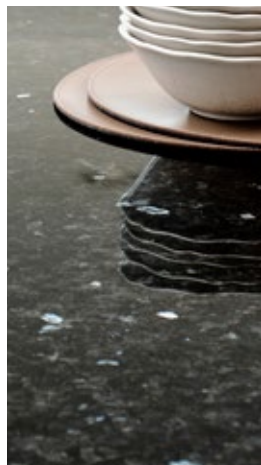

A high gloss, polished surface reflects the light beautifully, mirroring its surroundings making the crystals sparkle.

HONED SURFACE

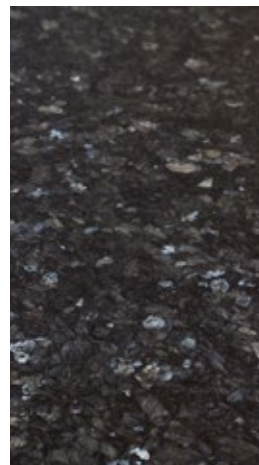

A honed surface has an elegant matte and smooth finish. The crystals sparkle more gently than in a polished surface.

SILK SURFACE

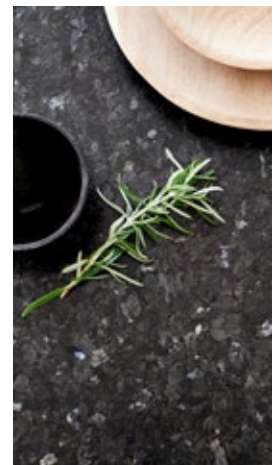

A silk surface has an elegant matte finish that is lightly structured. This provides a softer and subtler look, where the crystals gently reflect the light.

POLISHED SURFACE

HONED SURFACE

SILK SURFACE

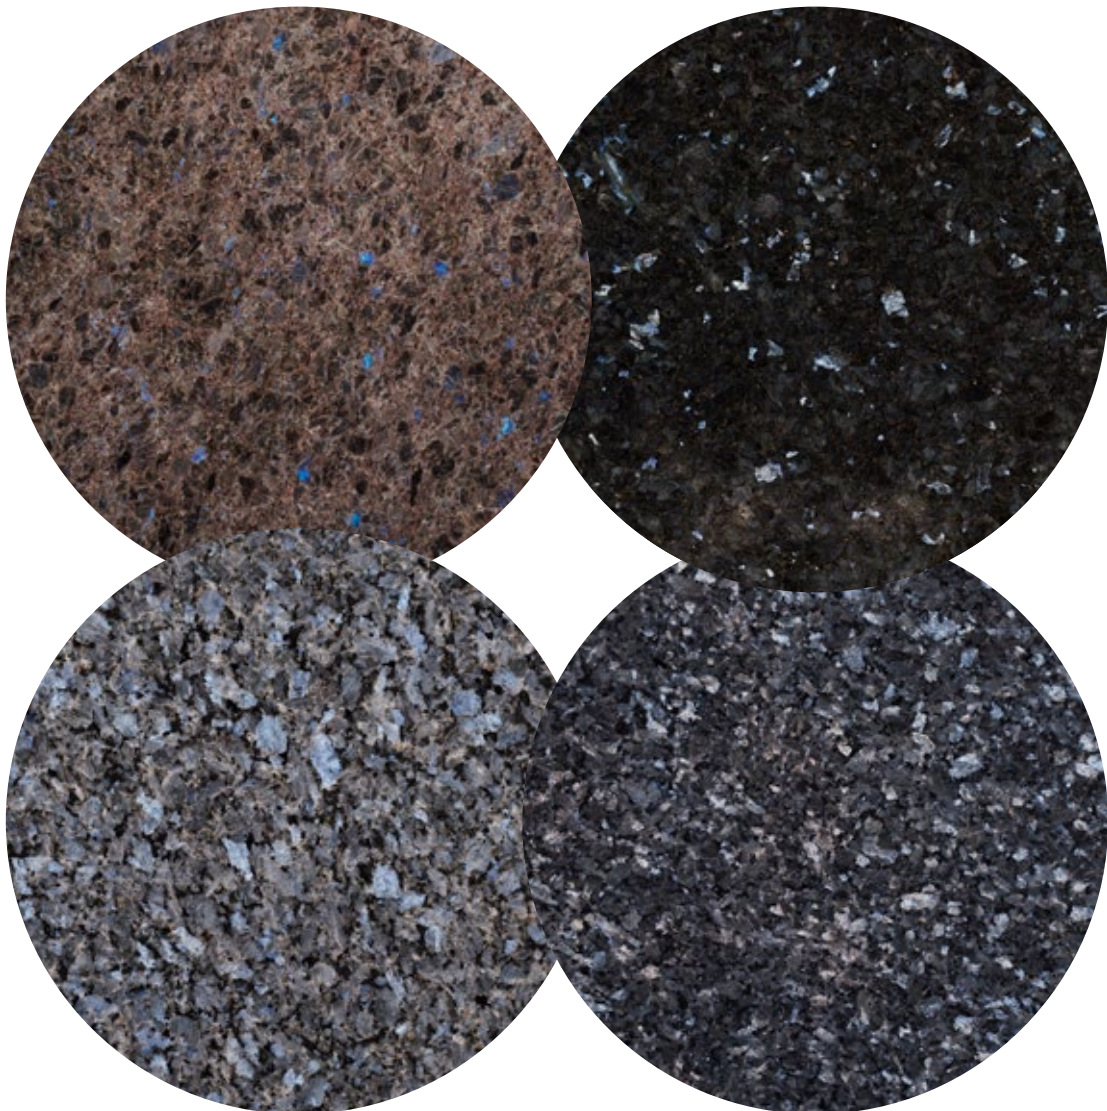

Durable, maintenance-free and unique
- your own piece of Norway.

LUNDHS Antique®

Stone type: Anorthosite

LUNDHS Emerald®

Stone type: Larvikite

LUNDHS Royal®

Stone type: Larvikite

LUNDHS Blue®

Stone type: Larvikite

LUNDHS Antique®

Lundhs Antique introduces an exquisite and visually arresting focal point to the kitchen. A rich and earthy wood-toned brown, the surface is peppered with naturally occurring blue crystals in varying sizes and forms.

Providing you with the gift of stress-free dinner preparations, Lundhs Real Stone materials are heat resistant up to 300 °C.

LUNDHS Antique / Honed

A honed surface gives the stone a matt appearance, and is soft to touch. The crystals sparkle and the colour of the stone appears lighter than a polished stone.

LUNDHS Antique / Honed

The smooth honed surface and a built-in sink highlights the quality of the stone.

LUNDHS Antique®

LUNDHS Emerald®

The darkest of the Lundhs Real Stones, Lundhs Emerald is brought to life by its reflective lustrous crystals.

The unique feldspar crystals in Lundhs Real Stone materials create a natural depth to your surface - unlike artificial materials.

LUNDHS Emerald / Silk

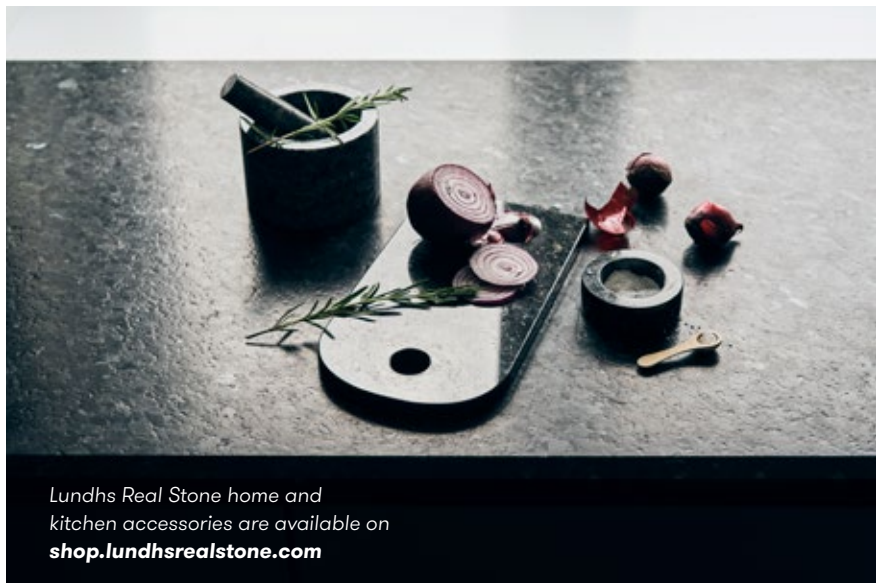

LUNDHS Emerald®

LUNDHS Emerald / Silk

Lundhs Emerald will act as the perfect neutral backdrop for all colour schemes and interior styles.

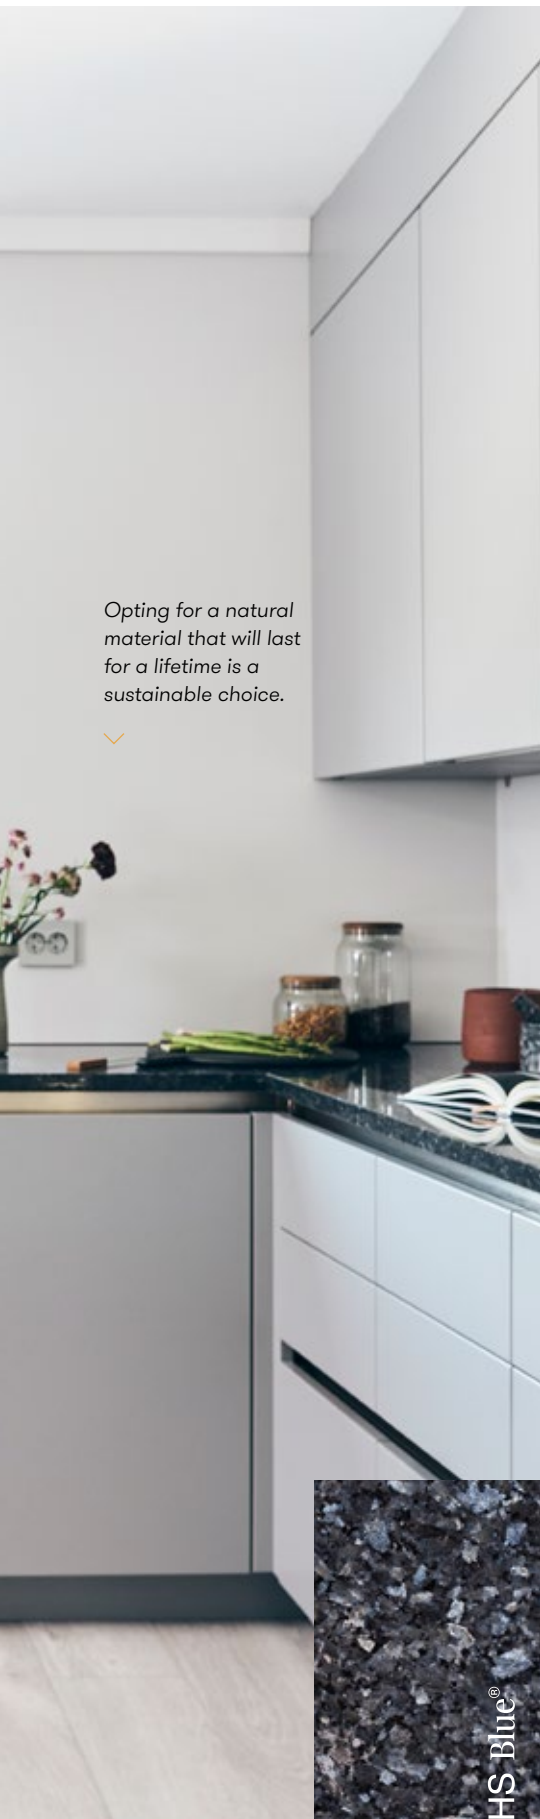

Lundhs Real Stone home and kitchen accessories are available on shop.lundhsrealstone.com

LUNDHS Blue[®]

Lundhs Blue brings timeless character to any kitchen design. It is the perfect choice in a room where a softer, more organic look is desired.

Opting for a natural material that will last for a lifetime is a sustainable choice.

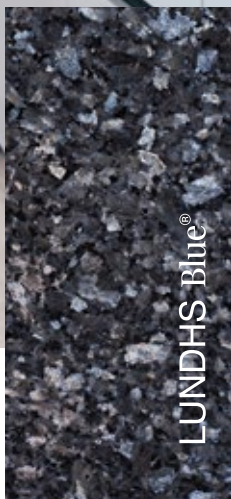

Providing you with the gift of stress-free dinner preparations, Lundhs Real Stone materials are heat resistant up to 300 °C.

LUNDHS Blue / Polished

A truly rare find, the blue tones found in the stone are all completely natural.

LUNDHS Blue / Polished

LUNDHS Blue®

LUNDHS Royal[®]

Lundhs Royal is the lightest of the Lundhs Real Stone materials. The unique blend of large crystals projects hues of the ocean, making Lundhs Royal an irresistible choice.

Incorporating the silk surface into kitchens with an abundance of daylight creates a soft look, where the crystals gently catch the light.

LUNDHS Royal / Silk

Choose a maintenance-free worktop that will stay beautiful - without any need for sealing!

Durable and maintenance-free

High density and non-porosity are two of the key unique qualities of Larvikite and Anorthosite. Extremely durable and maintenance-free, the materials also require no sealing, making them the perfect kitchen worktop material choice.

Thanks to the high density and unique composition of the natural stones in the Lundhs Real Stone collection, the surfaces are highly resistant to heat, stains and scratches from daily wear and tear in the kitchen. It is these qualities that provide you with a maintenance-free, 100% natural worktop.

Did you know that all Lundhs Real Stone surfaces are tested up to 300 °C and achieve the best possible score? For more information and test results, see lundhsrealstone.com

Advantages

SCRATCH RESISTANT

Extremely durable and resistant to scratches from daily wear and tear.

HEAT RESISTANT UP TO 300 °C

Hot pots and pans can be placed directly on to the worktop without any risk of burning the surface.

WATER RESISTANT

Extremely low absorption. Resists water and other food-related liquid stains.

UV RESISTANT

Colour will not fade when exposed to sunlight.

MAINTENANCE-FREE

Requires no regular maintenance. Simply wipe clean with warm water and mild soap.

STAIN RESISTANT

Ultra-high density. Resists stains from coffee, tea, oil, wine, and acid etching from citrus fruits.

Endless possibilities

When you choose a Lundhs Real Stone worktop, you are presented with a variety of possibilities to ensure all the details match your individual style and taste.

Edges

A vital part of the kitchen design is the edge profile of the worktop. There are numerous different edges to choose from. Your kitchen designer or manufacturer can offer you guidance in selecting the perfect edge detail for your kitchen worktop.

POPULAR DESIGNS

3 mm bevel top and bottom

5 mm pencil round

Ogee

Bullnose

Half bullnose

Shark's nose

Thickness

The standard thicknesses of a Lundhs Real Stone worktop are 2 cm or 3 cm. Both thicknesses offer the same level of durability. The choice is yours.

Sizes

Lundhs Real Stone slabs are available in different sizes. Your fabricator/showroom will help you choose the best size available for your kitchen. Please note that the maximum size of a slab is 330 x 180 cm. This is due to the capacity and set up of the processing machines that cut the blocks of stone into slabs. If your worktop or island requires a larger piece, two slabs can be joined together. A skilled fabricator will be able to join the pieces together beautifully.

Details that matter

Most kitchens will require a sink installation. There are a number of options offered by different suppliers regarding both materials and design. Here is an overview of the most common installation methods and what kind of finished look they will achieve in your kitchen.

INSET SINK

Inset sink is a conventional method of installation. The sink centre is simply inserted from above into a prepared cut out space in your worktop.

FLUSHMOUNT SINK

With this installation method, the sink and the worktop form a level surface – which is perfectly flush and has no joints to get in the way.

UNDERMOUNT SINK

The sink is installed under the worktop, providing a functional extension of the surface and an easy-to-clean area. It also offers the possibility to create draining grooves on one or both sides of the sink if desired.

RECESSED UNDERMOUNT

The installation of a recessed undermount sink is almost the same as for a normal undermount sink. The difference is that the visible stone edge inside the sink is thinner than the worktop. This installation is only possible on worktops that are at least 3 cm thick.

INTEGRATED SINK

If you like the idea of your sink being the same material as your worktop, then an integrated design is a good option, making the sink and worktop into one seamless unit.

Hobs

The hob is a vital part of the kitchen – here are the most common options for installation.

INSET HOB

The worktop is simply inserted from above into a prepared cut out space in your worktop.

FLUSHMOUNT HOB

With this installation method, the cooktop and the worktop form a level surface – which is perfectly flush and easy to maintain.

A GORGEOUS BLEND OF NATURAL MATERIALS

A stunning combination of natural materials, the oak and stone in this kitchen complement each other perfectly to create a contemporary yet delicate scheme. Hexagon tiles in a range of surface finishes in the same stone have been used on the kitchen splashback, reflecting the light differently and creating a unique design statement.

ADD A NEW DIMENSION TO THE KITCHEN

Using the same stone on both vertical and horizontal surfaces will add a new dimension to the kitchen.

WHY NOT OPT FOR A HIGH STATEMENT SPLASHBACK?

Complemented by stunning deep grey cabinetry and a contemporary aesthetic, the silk finish of the Lundhs Emerald surface creates a true focal point in this kitchen scheme.

The final touch

When planning your kitchen design it's important to consider your walls as well as your worktop. Discover some ideas on how you can create a fresh and personal style by incorporating stone into your kitchen in a new and exciting way.

Craftsmanship for generations

The history of Lundhs began more than 100 years ago.
Today, Lundhs is the largest producer of natural stone
in Northern Europe.

The history of Lundhs began more than 100 years ago when Alfred Lundh came from Sweden to Norway to run one of the biggest quarrying companies of the era. In 1962, Thor Lundh, Alfred's grandson, founded his own quarrying company – Lundhs. Throughout the history of the company, innovation has been a Lundhs hallmark. The way natural stone is used has changed a lot over the years. Methods of extracting the stone have been revolutionised. Lundhs has always been at the forefront of these changes. Today the company is still family owned and Thor's grandson, Thor-Anders Lundh Haakestad, is the CEO. He is proud to continue the family's quarrying traditions and does so with the same passion for quality and high precision that his forefathers had.

Certificate of authenticity

When you select and purchase Lundhs Real Stone from authorised suppliers you will have the opportunity to register and receive our certificate of authenticity upon the final installation of your new worktop. In the quarries we make sure that only the best quality is chosen for your Lundhs Real Stone worktop and the block number issued on the certificate can be traced back to the quarries. The certificate is individual to each customer and proof that you are now the owner of a unique piece of Norway, quarried by Lundhs. In addition to the certificate, we will also send you a token gift – our specially designed salt bowl made from the same material as your new kitchen worktop.

Environmental certification

Lundhs is ISO 14001 Certified

Lundhs environmental targets:

- Reduce environmental impact
- Increase employee awareness
- Full resource utilisation
- Reduce energy consumption

ISO 14001 is an international environmental management standard, helping organisations reduce their impact on the environment and promoting sustainable growth. Lundhs has been ISO 14001 certified since 2017.

“For Lundhs, our focus on sustainability is reflected in how we operate our company and take care of the resources we control for present and future generations. Having a sustainable focus means that we continuously need to develop and improve on all areas of our business, respecting the environment, the people involved and the communities we operate in. In this business we have regulations and certifications, but as a company we will always look for improvements beyond the regulations. This is also reflected in our values: Precision, Passion and Respect.”

Thor-Anders Lundh Håkestad
CEO Lundhs AS
