Slight

SLEEK, SLIM AND POWERFUL

Slight

Sleek in design, slim in profile, and powerful in impact, the Slight collection blends effortlessly into any setting. These miniature linear luminaires, equipped with a remote driver, deliver precise, glare-controlled illumination, ensuring exceptional visual comfort.

Suitable for drywall, grid, and wood slat ceiling applications, Slight fixtures enhance every detail they illuminate with high-quality light.

Slight: **Ultra-Low Glare Lighting** with Maximum Performance.

Optical Performance

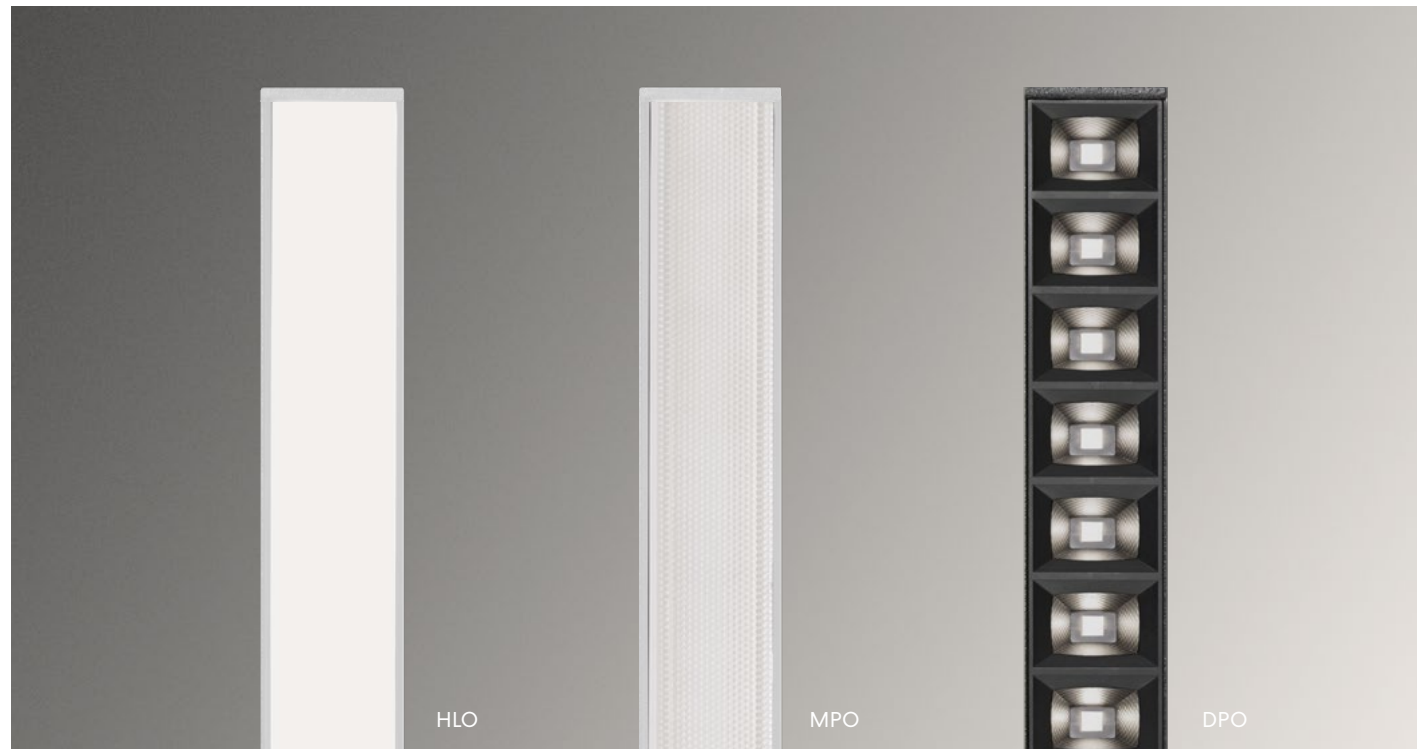

Slight delivers precise, low-glare, and powerful lighting tailored to a variety of needs, and providing exceptional visual comfort in any setting. The collection features three direct optics—HLO, MPO, and DPO (available in Matte Black and Graphite finishes)—and two indirect optics—MWIO2 and MWAI2.

Direct Optics

The **High-Efficiency Lambertian Optic (HLO)** delivers uniform illumination with wide distribution and flawless beam edges. The lens ensures maximum light output and energy efficiency.

The **Micro-Prism Optic™ (MPO)** is meticulously crafted to eliminate glare while maximizing illumination, providing impressive visual comfort.

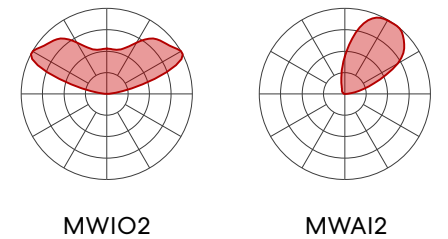

The **Diamond Prism Optic™ (DPO)** is our patented 3-tiered system meticulously crafted to refract and reflect beams with great precision, effectively keeping glare to a minimum while delivering light of exceptional quality and visual comfort.

Indirect Optics

The **Mini Widespread Indirect Optic (MWIO2)** offers an impressive 160° spread and creates uniform illumination on the ceiling.

The **Mini Widespread Asymmetric Indirect Optic (MWAI2)** is engineered for a wide asymmetric light distribution to create precise lighting placements.

Slight Surface on Grid offers infinite rotation and angle possibilities for Tegular and other traditional grid systems.

Slight - A **multitasking maven** that rules the grid.

Pendant Patterns

Adjustable Linx

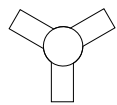

Adjustable Linx Connectors

To create patterns for Slight Pendant-mounted fixtures, use our Adjustable Linx connectors. With a versatile movement range of 60 to 180 degrees, they offer 2-way, 3-way, and 4-way horizontal configuration options, enabling endless design possibilities.

Recessed & Surface Patterns

Fixed Corner

Fixed Corner Connectors

For Recessed and Surface-Mounted luminaires, use Fixed Corner connectors to create patterns, on both horizontal and vertical planes. Whether connecting walls to ceilings or crafting playful geometric shapes, these Fixed Corners offer unique and versatile design opportunities.

CORNER OPTIONS

90° Vertical

90° Horizontal

With Slight, you can design a light pattern that turns **fixtures into features.**
