

Lumenwerx 

Globe

BALANCED LIGHT.

Globe

Globe is a fully illuminated sphere designed to deliver balanced illumination within architectural spaces. Crafted from high-quality frosted glass, its internal optic (Isotropic Radiant Optic™) ensures smooth, even light distribution in all directions, providing visual comfort without glare or hotspots.

Available in a range of diameters and mounting options, Globe can be used as an individual luminaire with strong visual presence or deployed in larger architectural arrangements.

ALSO OFFERED WITH THE PIVOT COLLECTION

Globe Module for Pivot Track System

Globe pendant-mounted fixtures are available as modules within the Pivot system—Lumenwerx's architectural magnetic track platform designed to integrate multiple module types within a single framework.

Pivot Track

Pivot is a magnetic track system that accommodates pendant-, recessed-, and surface-mounted fixtures, supporting general, accent, and wall-wash lighting applications. Tool-free installation allows modules to be added or changed easily using a magnetic connection.

Architectural Decorative Collections

Globe sits within a broader range of architectural decorative luminaires from Lumenwerx.

Across pendants, rings, sculptural forms, and acoustic-integrated solutions, these collections support expressive applications while maintaining a consistent architectural language and standard of performance.

Arq Acoustix

Sleek, sound-absorbing luminaires using acoustical felt, offered in three design options.

Obe Collection

Curved shade design with premium finishes and three optical variations.

Cella Collection

Minimal decorative cylinders featuring an acrylic diffuser with fully or partially frosted options.

Rim Collection

Four distinct profiles offered in geometric shapes and sizes for expressive architectural compositions.

Pop Collection

Bright, efficient decorative luminaires offered in various shapes, sizes, and colors.

Shell Collection

Crafted for creative flexibility, Shell is available as a round, square, or linear fixture, in a variety of sizes.

Flair Collection

Cylinder luminaires with refined proportions and detailing.

Minear Collection

Miniature architectural luminaires in linear and ring-shaped profiles.

Acoustix Collection

Architectural luminaires combining light and acoustic control.
