Curvia Additions

WHERE WILL YOU TAKE LIGHT NEXT?

Latest Additions to the Curvia Collection

Building upon the innovations of Curvia HLO and Curvia Prism, the latest additions to the Curvia collection feature cutting-edge technology in high-performance luminaires, all embodying the same sophisticated Curvia aesthetic

Curvia Additions

WHERE WILL YOU TAKE LIGHT NEXT?

From fixtures engineered to withstand the elements to those that reduce noise, to configurations that cross planes or change color to individual lights that illuminate and decorate through size, shape, or pattern, the expanded Curvia collection offers exceptional solutions to meet the ever-growing demand for premium curvilinear lighting.

Declare

Aligned with our Greenwex Initiative, the Curvia collection embodies our eco-conscious innovations and are manufactured in our factory powered entirely by clean, green hydroelectric energy.

The Curvia fixture is at least 50% made from recycled or post-consumer materials, such as our locally sourced aluminum, while the acoustic felt used in Curvia Acoustix fixtures is 60% composed of materials derived from recycled plastic bottles (PET). The luminaires feature Declare labels, reflecting our commitment to transparency regarding the ingredients of our products and their impact on human health and the environment.

ADDITIONS TO THE CURVIA COLLECTION

Curvia Seal

With protection up to IP65, Curvia Seal fixtures bring the Curvia Collection's elegance outdoors, providing superior protection against dust and water.

Curvia XYZ

Curvia XYZ fixtures carry light along curvilinear paths across different planes, creating dynamic and stunning effects.

Curvia Horizon

Curvia Horizon luminaires feature closed shapes that mount horizontally, directing light either inward or outward.

Curvia Perimeter

Curvia Perimeter is precision-engineered to follow curved walls with low-glare, shadow-free, smooth vertical illumination.

Curvia Acoustix

Curvia Acoustix blends curvilinear light with acoustic control, adding a sculptural touch with integrated sound-absorbing properties.

CURVIA NEW FEATURES

Curvia Intersections

Curvia Intersections are Y-, T-, and X-shaped connectors used for creating illuminated curved shapes and patterns.

Curvia RGBW Option

Curvia luminaires are offered with Chromawerx Quadro, our 4-channel RGBW Solution.

Curvia Asymmetric Opal Optic (AOO)

The Asymmetric Opal Optic (AOO) offers targeted illumination with even distribution for Curvia luminaires.

Curvia Seal

ILLUMINATE WITH CONFIDENCE

Curvia Seal fixtures bring the Curvia family's elegance to the outdoors and are designed specifically for applications that demand enhanced protection against dust and water.

ENVIRONMENTALLY PROTECTED OPTIC

The Environmentally Protected Optic features an innovative sealed design with our exclusive Supreme Grip™ Technology and advanced gasketing, ensuring a precise, secure fit on the extrusion while delivering superior protection against dust, water, and UV distortion.

Illuminate with Confidence

Curvia 5 Seal, IP65-Rated, Recessed Mounting, Direct Distribution

Curvia Seal Options

IP65

Engineered for Maximum Protection

Curvia Seal IP65 withstands exposure to the elements with ease, it is dust-tight and sealed against water jets from any direction. For luminaires exceeding 8 feet (continuous runs), our Low Profile Joiner Bridge ensures IP65 sealed protection across the entire installation. Without any visible hardware, it provides a strong dust-and moisture-tight barrier.

- Built for the outdoors and high-maintenance indoor settings
- Direct and Direct/Indirect¹ distributions
- Maintains modern Curvia aesthetic

Low Profile Joiner Bridge

IP54

Continuous line of light with no visible break

Curvia Seal IP54 is ideal for outdoor use under canopies or indoor wipe-down environments. For continuous runs, sealed and gasketed joiners ensure a clean, uninterrupted line of light with no visible breaks throughout the entire installation. Fixture is dust and water-splash protected with reinforced sealed protection for internal electrical components².

- Ideal for outdoor use under canopies or indoor wipe-down environments
- Direct distribution only
- Maintains modern Curvia aesthetic

Gasketed Joiner

¹Direct/Indirect model has IP64 rating

²Internal electrical components are IP65-rated. The driver is fully enclosed, wiring connections are sealed to prevent ingress of dust and moisture, and the LED board is conformal-coated for enhanced protection.

Curvia Seal Perimeter

Curvia Seal Perimeter offers three profile sizes (2", 3", and 4"), two options for protection (IP54 and IP65), and three mounting choices (level for dramatic lighting, shallow for a softer effect, and deep-recessed for a more subtle look).

IP65 - Perfect for outdoor and high-maintenance indoor settings.

IP54 - Ideal for outdoor usage under canopy and indoor wipe-down spaces.

Curvia XYZ

A TURNING POINT IN CURVILINEAR LIGHTING

Curvia XYZ makes a significant technological leap forward by seamlessly carrying light on a curve from one plane to another. The Curvia XYZ family offers full customizability and flexibility to create designs using a combination of linear and curved segments, along with connectors, corners, mounting options, and more.

Curvia XYZ turns your ideas into Striking Curvilinear fixtures using a combination of Mountings, Corners, Intersections, and more.

Curvia XYZ Corners, Intersections & Optic

HLO

Curvia XYZ lets you specify vertical, horizontal, and multi-directional lighting and create unique fixtures by combining modules to form curvilinear installations that smoothly transition between straight sections, arcs, loops, and angles. Curvia XYZ is optically equipped with our High-Efficiency Lambertian Optic (HLO).

Curvia Perimeter

Curvia Perimeter is optically equipped with our High-Efficiency Lambertian Optic (HLO) or Asymmetric Opal Optic (AOO). The HLO delivers wide-angle, uniform illumination with minimal glare, maximizing efficiency and visual comfort. Ideal for general ambient lighting, it ensures even light distribution across spaces. The AOO provides targeted illumination while diffusing light evenly, reducing glare and light spill.

Curvia Perimeter offers three distinct mounting positions: Levelled, Shallow (1" recessed) and Deep (3.25" recessed).

Curvia New Features

PRECISE, POWERFUL, AND BEAUTIFUL

The Curvia Additions come with exciting new features that amplify the family’s flexibility and creative potential. Curvia Intersections —Y-, T-, and X-shaped connectors—enable the design of distinctive curved shapes and patterns. In addition, RGBW is integrated into Curvia fixtures via the Chromawerx Quadro Technology allowing for dynamic color and white light customization. The Asymmetric Opal Optic (AOO) delivers precise asymmetric lighting making Curvia an even more versatile offering.

Intersections

Curvia

Curvia Intersections are versatile Y-, T-, and X-shaped connectors designed to create dynamic curved shapes and patterns. They are fully illuminated without lens breaks or seams, enabling the formation of unique geometric designs.

Curvia Intersections provide both aesthetic appeal and functional efficiency, delivering lighting solutions that range from simple curves to intricate loops to expansive layouts.

Sustainability

Our Greenwerx Initiative

At Lumenwerx, sustainability is at the very foundation of our Greenwerx Initiative, ensuring we prioritize eco-friendly practices throughout our operations from product design to manufacturing.

We are committed to reducing our environmental footprint by utilizing energy-efficient materials, minimizing waste, leading upcycling projects, and using 100% renewable energy sources.

Our luminaires are environmentally responsible, meeting Red List-free or Red List-declared standards, with multiple Declare Labels published for transparency. Our products also conform to LEED and WELL Building Standard certification program requirements.

By integrating sustainability into every aspect of our business, we strive to create a brighter future for generations to come.
