

Silentia **ArtPanels**TM

Unfold the magic of nature.

Nature provides tranquility in a complex world. Research shows that art with views of nature and animal life has a positive effect on hospital patients' recovery. With the bright colours of nature ArtPanels are designed to give hospital patients a stress-reducing effect by letting them focus on something positive instead of their condition.

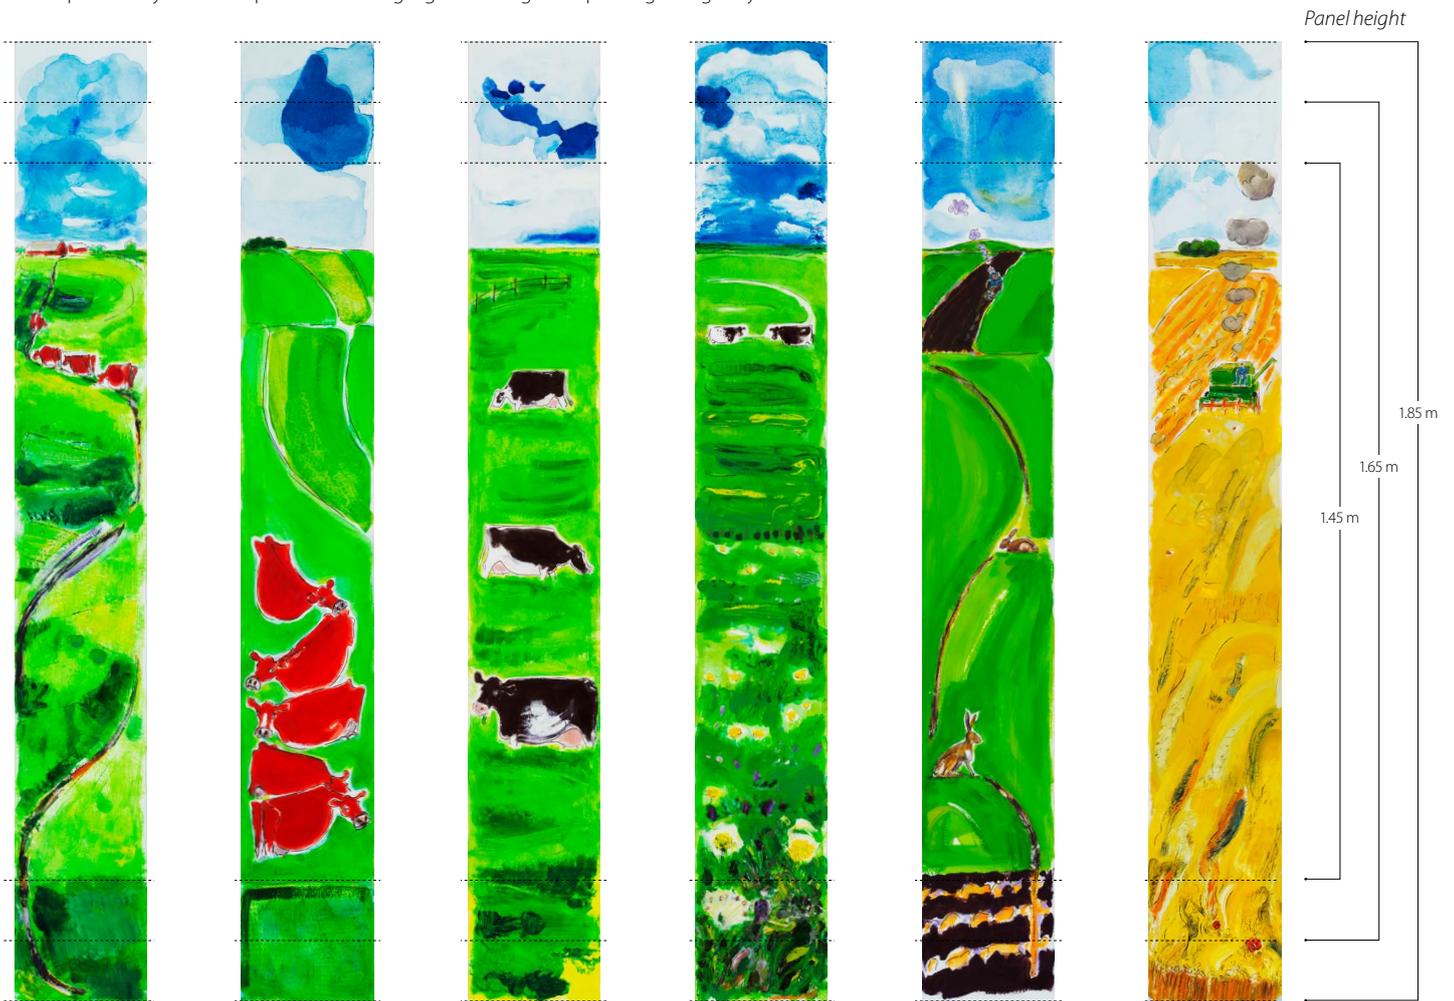

Discover ArtPanels. Let your eyes follow the hills and fields. Notice how the animals give life to the landscape. Cows quietly munching. The farmer ploughs the field. Relax while discovering the many details and focus a little away from the hospital equipment.

"The green soothing colours should inspire people to relax and just be in the moment. To slow down, get well and let things take their time. People often feel calm and safe when looking at cows, surely because they are such restful and gentle animals. That's why my pictures capture cows and nature. It was an exciting challenge to work with the tall, narrow format. I have chosen to place the horizon at the very top so the viewer's eyes follow the lines in the landscape and upwards to the sky."

Magnus Reisne • Swedish landscape artist. The artist behind ArtPanels.

ArtPanels 6 inspiring motifs in harmonious colours. The water-based oil paintings' bright and transparent feel is underlined by the translucent Silentia Daylight Screen where daylight flows through and brings life to the picture. The images are in combination with white panels only. The white panel surfaces highlight the images like paintings in a gallery.

Returning (R)

On the way home. Milking time. Follow the safe path back to home.

Waiting (W)

Gathering and waiting at the gate. In life we also wait, try to just relax while waiting.

Grazing (G)

Cows graze, get fresh air and move around. Basic needs for a strong and healthy life.

Observing (O)

Big brown eyes are signs of a harmonious cow looking at you – even from a distance: I see you. You exist.

Ploughing (P)

Nature and technology works together. New lines are formed as the plough cuts through the landscape.

Harvesting (H)

Nature's reward for patience and work. When we sow a small seed we harvest its fruits later. In nature as in life.

Find the height and number of panels that fits your Silentia Screen solution. ArtPanels are combined with white panels.

The table shows our standard sizes in 0.5 m length increments. Screens are also available in increments of 0.25 m if the total length is between 0.75 m and 3.75 m. The standard heights – 1.45 m, 1.65 m and 1.85 m – can be lowered by –0.1 m by determining the height of the legs of the wheels. The height is decided when you order your Silentia Folding Screen.

Note: The longest screens (12–15 sections) are intended for use in an L-shape around the bed.
