

SUSTAINABILITY YOU CAN FEEL

ENGINEERED PAPER COMPOSITE SURFACES FOR DEMANDING COMMERCIAL ENVIRONMENTS

Richlite® is a durable paper-based composite used in commercial kitchens, retail environments, and architectural applications. Made from renewable paper fiber and engineered for long service life, it brings together material transparency, responsible manufacturing, and proven performance in high-use environments.

LEED® CONTRIBUTION

Supports LEED credits through material transparency, low-emitting performance, and responsible sourcing. Aligned with the Common Materials Framework (CMF).

Paper Composite Surfaces

RESPONSIBLE MATERIAL SOURCING

Made from renewable paper fiber sourced from responsibly managed forests, Richlite panels are built on a foundation of responsible material sourcing.

- Renewable paper fiber content
- Responsible managed forest sourcing
- Chain-of-custody certified supply

- Renewable paper fiber content
- Microplastic-Free
- Meets CDPH Standard Method v1.2 for indoor air quality
- Certified as a food contact surface
- NAUF
- BPA-Free
- Phthalate-Free

HUMAN HEALTH & INDOOR AIR QUALITY

Low-emission chemistry and transparent ingredient disclosure enable Richlite to support healthier indoor environments.

Declare.

CARBON & CLIMATE IMPACT

As a paper-based composite, Richlite combines renewable fiber, lifecycle transparency, and long service life to help reduce embodied carbon.

- Renewable paper-based composition
- Long service life reduces replacement frequency
- Lifecycle transparency

- Refinishable surface
- Structural-through construction
- Durable composite construction resists wear and damage
- Long service life reduces material waste

PRODUCT CIRCULARITY & DURABILITY

With structural-through construction and refinishable surfaces, Richlite is designed to extend service life and reduce material waste.

- Waste-to-Energy, Closed loop energy system for manufacturing
- Closed loop water processing system
- Onsite systems destroy >99% of manufacturing VOC emissions
- Uses low-VOC thermoset resin (Eco Bind Resin Technology™)

MANUFACTURING & SUPPLY CHAIN TRANSPARENCY

Manufactured domestically, Richlite supports a transparent supply chain that reinforces responsible sourcing and material accountability.
