Our brand pillars: What keeps us propped up

Quality

HAGS brings family and friends together in spaces that challenge young minds and welcome old hands. We use our knowledge to educate through play. We create spaces that make people want to move. We develop play equipment, sports equipment and park and urban furniture that encourages all ages to enjoy the great outdoors. There's only one word for it. Quality.

Innovation

Sweden is the home of innovation. Our Scandinavian DNA means clean lines and functional design is all part of our heritage and drives our innovation in play, sport and recreation. Being modularity experts we can creatively deliver exactly what our customers want. Flexible, insightful and never square.

Sustainability

Solving problems comes naturally. We know the future of our planet starts with childhood development which is why our products are sustainably sourced and suit all ages and abilities. Let's inspire young people to be active outdoors, to cherish their environment and to protect our outside spaces for generations to come.

Service

We're here for you. We mean it. HAGS isn't just about providing great customer service every day. The team believes in a culture that supports all; from colleagues to customers to the communities it serves. The expertise, the application of knowledge and years of experience is wrapped up in care. We care deeply about what we say, what we do and how we look.

Inclusion

We believe everyone should have an equal opportunity to enjoy outdoor recreational equipment. When creating our products, we always consider those with physical and mental differences so that we can provide our customers with inclusive facilities that support development.

Play for all.

HAGS playgrounds are meant to bring joy to as many people as possible and inspire children of all ages, regardless of abilities, to interact with each other.

The feeling of **being part** of play and not feeling left out is among the most important things there is.

Social interaction

Play holds immense significance in fostering children's social interaction. Through play, essential social skills such as communication, collaboration, and conflict resolution can be developed.

Encouraging children to explore new activities nurtures the development of courage and self-esteem, particularly crucial for those facing learning difficulties or disabilities.

**Go to
hags.com**

You'll find suggestions for suitable play equipment for some of the most common learning difficulties or disabilities...

- ADHD
- Intellectual disability
- Visual impairment
- Autism
- Hearing impairment
- Gastrointestinal issues

We are happy to help demonstrate the possibilities for creating spaces with play for all.

Play Value

This describes how the environment, product, or play equipment provides children with play experiences. High play value indicates that children can play in many different ways and explore their own ideas and games. We categorise play values into three categories: physical, sensory, and social.

Not everyone can do everything, but there should be **something for everyone.**

Full spin

When children spin, different parts of the brain are stimulated. New neural pathways are created and developed, leading to improvements in learning ability, spatial awareness and rhythm. At the same time, motor skills, balance, and muscle strength are developed.

Sustainability in action

At HAGS, our commitment to sustainability is inherently tied to the wellbeing of children, who not only play a central role in our daily work but also represent our shared future. We are driven by the aspiration to contribute to a world where our children, grandchildren, and generations beyond can thrive in a wholesome environment for both living and playing. Our legacy at HAGS is steeped in a rich history, revealing that sustainability has been a guiding principle long before it became widely embraced.

We dare to say that a genuine concern for both the environment and people has been an integral part of our journey. As a responsible company, we acknowledge the importance to ensure the sustainability of our operations across economic, social, and ecological principles.

Striving to forge active and sustainable outdoor spaces, our aim is to manufacture and deliver products with utmost care and prudence, fostering a gentle and thoughtful approach for both individuals and the environment throughout the entire production chain.

HAGS are committed to making our contributions - one step at a time.

Sustainability principles

Sustainability has become a crucial topic in the climate changes we are currently facing. Creating a sustainable future is embedded into our mission to transform our business and create long-term, profitable growth without impacting the environment.

By building on the 3 sustainability pillars of environmental, social, economical and involving customers, employees, and stakeholders, we have developed a framework to define the principles that will underpin all our sustainability efforts.

Naturally, transparency will be a core component for HAGS going forward as the sustainability space becomes increasingly crowded, therefore, we have taken the step to incorporate the Global Reporting Initiative (GRI) standards into our sustainability efforts to enhance our reporting in the future.

we believe in

Safety first

Safety also means sustainability. All our product development is based on international research and European safety standards. The German Technischer Überwachungs-Verein (TÜV) has the world's most comprehensive and well-functioning testing and approval procedure. That's why we can proudly say that all play equipment from HAGS has been approved by TÜV.

Reaching for the stars

We help young people enjoy the world of play to grow their imagination and creativity. Why create walls when you can move mountains?

Let their ambitions
SOAR 28,000FT
HIGHER THAN
Mount Everest!

Modular Play Systems

A multi-play structure can be the centre piece of your playground, providing opportunities for climbing, sliding, imaginative play and more besides. Most of our ranges are based around modular principles, which means whatever your requirements we can build a structure to match.

Our exclusive UniPlay and UniMini ranges are the most versatile option, offering everything from pirate ship play structures to the very tallest towers, in a whole range of materials.

Why choose a modular play system?

UniPlay and UniMini modular play systems are classic examples of circular design principles. Circular design, also known as the circular economy, is a sustainable approach that aims to minimize waste and promote the longevity and reusability of products.

In the context of these play systems, this design philosophy offers several compelling benefits:

- Adaptability
- Maintenance & care
- Standardisation
- Repair

Adaptability

Modular play systems serve as prime examples of products capable of flexibly adjusting to evolving customer demands. Tailor your perfect solution to harmonize with your particular user preferences, available space, choice of materials, thematic elements, color schemes, and budget constraints.

Standardisation

Designing Modular Play Systems with a focus on standardisation promotes the ease of long-term maintenance, repair, upgrades, refurbishment, remanufacturing, and ultimately, recycling of the products. This approach contributes to a decrease in your total cost of ownership.

Maintenance & care

Choosing a Modular Play System exemplifies commitment to circularity, which entails extending the longevity of products through preventive maintenance and proactive measures, resulting in a reduced overall cost of ownership.

Repair

Modular Play Systems offer simplicity in repair. Circular design focuses on crafting products that can be effortlessly fixed if problems occur, leading to a decrease in your overall cost of ownership.

UniPlay

UniPlay is ideal for children aged 5 to 12 years. UniPlay features standard units that offer varying levels of challenge, suitable for children with diverse abilities.

The UniPlay product range is exceptionally adaptable, featuring components crafted from timber, steel, HPL and the option for customization. Whatever your vision, we can turn it into reality through our Custom Design Studio.

UniMix

UniMix is an exciting merging between the UniPlay and UniMini modular systems. UniMix offers an extended spectrum of play options that can be customized to cater for a wider group of children.

Alternative material, colour & anchoring options are available.

Multi Play Systems

NRG, Agito, PlayCubes and UniMove are packed with Play Values. They offer designs aimed at delivering high calorie expenditure for children aged 5-12. These systems effectively infuse physical activity into playtime to enhance cardiovascular health.

Alternative material,
colour & anchoring
options are available.

Enjoy the great outdoors!

Multi Play Systems emerge as champions for children's development and wellbeing. Revolutionizing the traditional playground, these systems become not just a space for play but a dynamic environment that nurtures both physical health and social development.

Social interaction

Multi Play Systems can accommodate multiple children at once, promoting social interaction and cooperation. Children can play together, take turns, and develop important social skills while using the equipment.

Diverse play opportunities

Multi Play Systems offer a wide range of play options in one structure. This variety can appeal to children of different ages and abilities, making the playground more inclusive and accommodating to a broader range of users.

Promotes physical activity

Multi Play Systems are designed to encourage physical activity among children. They typically include features like climbing walls, slides, monkey bars, swings, and more, which help children develop their motor skills and stay active.

Safety & durability

Multi Play Systems come certified straight out of the box with no additional testing requirements needed to meet safety standards. When assembled using our detailed installation guides with the appropriate safety surfacing, they are instantly ready for the challenges of outdoor use.

Versatile centrepiece

A **Multi Play System** can be the centre piece of your playground, providing opportunities for climbing, sliding, imaginative play and more besides. Most of our ranges are based around modular principles, which means whatever your requirements we can build a structure to match.

NRG

The NRG playground trail equipment offer various forms of balance training. The numerous activity units in our range offer different challenges for children of all ages and abilities.

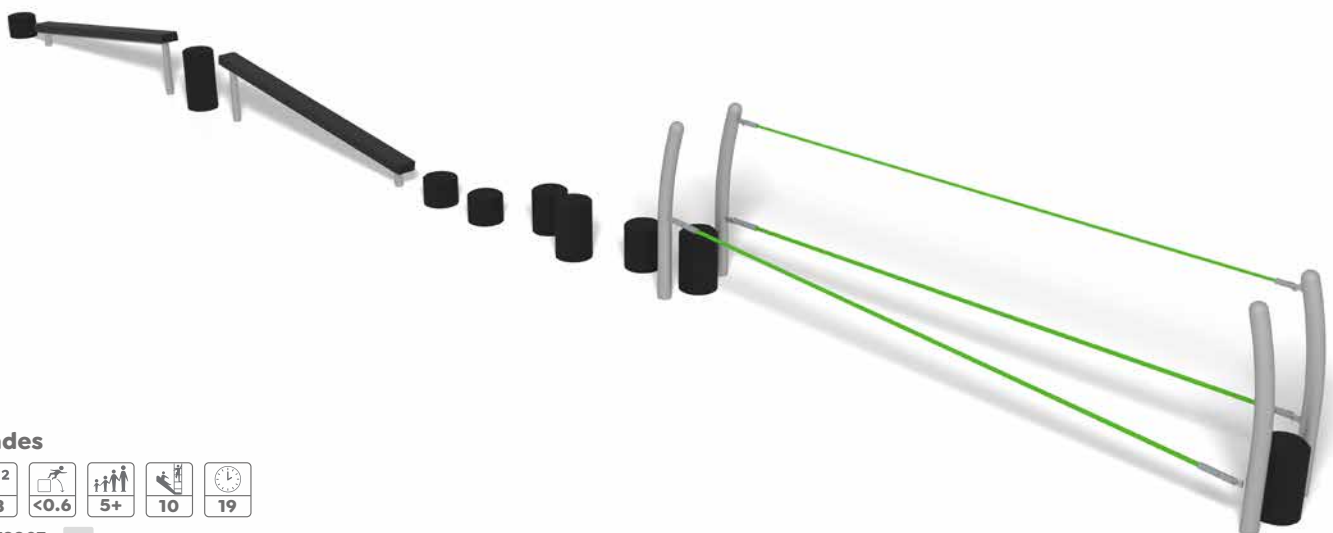

Furthermore, they can be arranged in any configuration to create your own bespoke trail layout or you can choose one of our standard configurations to suit all sizes and budgets.

Alternative material,
colour & anchoring
options are available.

Agito

Movement pulsates at the heart of HAGS Agito. Developed to support natural human movement patterns, HAGS Agito provides maximum returns from every movement performed, with legs, pelvis, and arms moving in a similar way to dancing! In fact, Agito literally means “to set in motion” in Latin.

The primary characteristic of Agito is its rhythmic flow that promotes movement - upon first glance, it awakens a desire to climb, discover, and explore. HAGS Agito is irresistible to children, inviting them to visit and encouraging them to move from one point to another.

For illumination, choose the Agito Aura range. They extend playtime by lighting up at dusk and create a lovely atmosphere during the darker hours of the day.

PlayCubes

In the realm of PlayCubes, there are no right or wrong approaches. Children can play in any manner they choose—whether it involves scaling to the highest peak or surprising others from the bottom.

PlayCubes encourage imagination and facilitate exciting new movements. It's a space to play together, explore together, and be together, offering countless possibilities. Here, children engage their entire bodies, and we believe that's truly remarkable!

Robinia Play

Let nature be the guiding force in shaping your playgrounds. HAGS offers a diverse range of products, drawing inspiration entirely from the natural world. Immerse yourself in the warm hues of wood tones that effortlessly blend in, avoiding dominance with vibrant colors and seamlessly integrating into the environment.

A nature-inspired playground leaves a gentle, lasting impression that resonates with all. Swing sets, playhouses, water play installations, and more are brought to life, where logs maintain their rustic charm, contributing to a robust aesthetic. Fashion a playground within public spaces that exudes beauty and garners admiration across generations.

Freestanding

Step into a world of timeless charm and classic fun with our exceptional range of freestanding playground equipment. Crafted to shine as standalone features or seamlessly complement larger parks, our meticulously designed swings, slides, roundabouts and even zip lines are ready to bring joy to any outdoor space.

With a perfect blend of quality craftsmanship and enduring appeal, our traditional play solutions are ideal for creating intimate playgrounds or enhancing the grandeur of expansive parks.

Alternative material,
colour & anchoring
options are available.

The benefits of our freestanding range

Freestanding products provide a multi-layered platform for children's development. They can help with physical health, social skills, cognitive growth, and emotional wellbeing. They contribute to a holistic approach to childhood development and play. Ideal for any play space.

Motor skills

Playing on these structures enhances fine and gross motor skills. Swinging, for example, helps with balance and coordination, while climbing up and down slides or rock walls develops strength and dexterity.

Physical fitness

These playground items encourage physical activity, helping children build strength, coordination, and balance. Swinging, climbing, sliding, and spinning provide an excellent workout and promote overall physical health.

Social interaction

Freestanding playground items often attract multiple children, promoting social interaction and cooperative play. Children learn to take turns, share equipment, and communicate with peers while enjoying these activities.

Creativity & imagination

Children use these playground items as settings for imaginative play. A simple slide can become a mountain, a castle, or a rocket ship in a child's imaginative world, fostering creativity and storytelling.

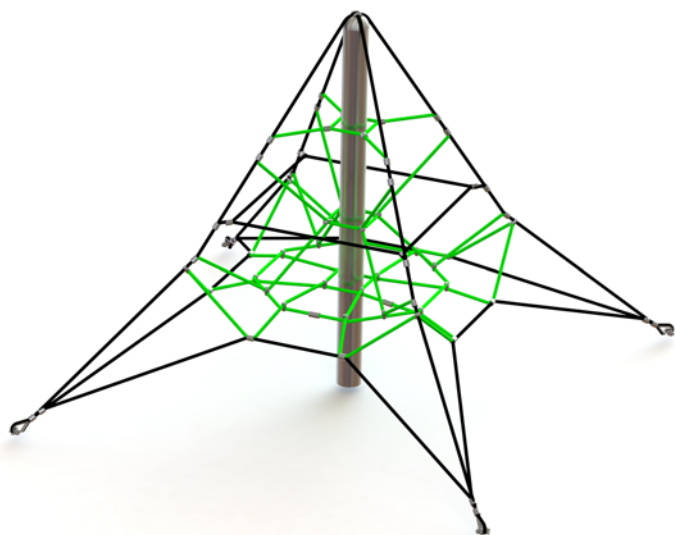

Independence & confidence

Mastering various playground challenges, such as climbing to the top of a slide or swinging high in the air, helps build a child's self-esteem and sense of accomplishment. They gain confidence in their physical abilities.

Our vision: Life through our binoculars

We've been sharing our inspiration for generations, and we've never looked back. With a generous dose of Swedish heritage, genius crafting and a commitment to inclusion, we want to keep pushing and moving forward to be the market leader in creating legendary play and recreation experiences around the world. Come with us. We've got our eyes on the prize.

Play:

Let's create a world
of endless possibilities that
encourages learning, development
and laughter.

Connect: Let's develop amazing spaces
that help people meet, eat and chat more
in their local community.

Move: Let's build strength, fitness,
resilience and team spirit, giving
more people the chance
to move.
