ALIRO  
COLLECTION

ABI  
INTERIORS

## WHAT IS THE ALIRO COLLECTION?

ABI Interiors' Aliro Collection introduces an appealing range of accessible, ambulant, and assisted living products that combine a beautiful design and delicate detailing with durability, functionality, and safety.

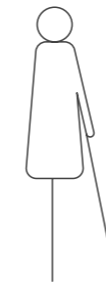

This comprehensive range is thoughtfully designed by ABI Interiors as per AS1428.1:2021 Standards. Available in our four signature finishes, it promotes aesthetic cohesion in the bathroom.

## ACCESSIBLE RANGE

ABI Interiors' Aliro Accessible range features versatile modular products that allow for varied grab rail arrangements.

The range includes a convenient left or right shelf-aligned wall-mounted basin, an easily operated basin mixer and minimal mixer, a customisable shower grab rail set, and both a 90° grab rail and a 140° continuous grab rail. In addition, there's a back-to-wall toilet suite, toilet roll holder, and a backrest that provides ultimate comfort.

## AMBULANT RANGE

ABI Interiors' Aliro Ambulant range includes a highly durable 90° grab rail and a 140° grab rail with flexible configurations.

**Please Note:** All accessible and ambulant products in the Aliro Collection are designed and tested to meet the AS1428.1:2021 Standards. It is the responsibility of the purchaser to consult a professional prior to installation to ensure the products are installed in a manner that maintains their compliance with the relevant Standards. ABI Interiors accepts no liability for any non-compliance with the Standards that occurs as a result of installation that is not in accordance with ABI's installation guidelines or the Standards.

## ASSISTED LIVING RANGE

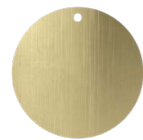

ABI Interiors' Aliro Assisted Living range includes a slim-designed towel rail, a hand towel rail with separate grab rails, and an easily adjustable shower holder.

**Please Note:** Assisted living products are not a category covered under AS1428.1:2021. However, they have been designed with the same high-quality material as our other Aliro products. It is the responsibility of the purchaser to consult a professional prior to installation to ensure this product is suitable within the designated area.

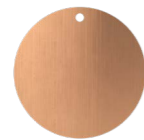

## CONSTRUCTION AND FINISHES

Our Aliro Collection is constructed from highly durable 316 stainless steel — offering superior anti-corrosive properties that include chloride resistance. Aliro is available in four appealing finishes to ensure colour consistency: brushed brass, brushed copper, brushed gunmetal, and stainless steel.

In addition, our Aliro Accessible Wall-Mounted Basin has a solid surface construction, and our Aliro Accessible Back-to-Wall Toilet Suite has a glazed porcelain plastic seat for superior comfort.

## GENERAL FAQS

### What's the difference between 'ambulant' and 'accessible'?

The Australian Standards outlines ambulant and accessible products as meeting the needs of different people. Therefore, the offerings and room requirements vary. 'Ambulant' services people with some mobility, while 'accessible' services individuals with little to no mobility.

### If I incorporate ambulant and accessible products into my space, does this mean it is AS1428.1:2021 compliant?

While our Aliro ambulant and accessible products have been designed and tested to meet AS1428.1:2021 Standards, the physical design of the space and product installation method must also meet specific guidelines for the entire room to be AS1428.1:2021 compliant.

### Are the products in the Aliro Collection tested to applicable circulation spaces and clearance areas?

Our AS1428.1:2021 certified products have been designed to work in the required clearance areas/circulation spaces prescribed by the Standards. However, due to varying room sizes and locations of products, please consult a professional prior to installation.

### Can products in the Aliro Collection be used in an assisted living home?

Yes, however, professional installation and occupational therapist guidance are required to maintain a safe environment.

### What other ABI Interiors products are compatible with ambulant and accessible spaces that are not in the Aliro Collection?

The following ABI Interiors products are compatible with ambulant and/or accessible spaces:

- Lira Soap Bottle Holder
- Milani Robe Hook
- Milani Toilet Roll Holder
- Elysian Robe Hook
- Elysian Toilet Roll Holder
- Elysian Washing Machine Stops
- Sola Robe Hook
- Sola Shower Head
- Sola Shower Arm
- Mini Cistern Stop
- All ABI Interiors Floor Wastes
- All ABI Interiors Shower Channels

### PLEASE NOTE:

The above products have not been designed or tested to meet AS1428.1:2021 Standards but are compatible and aesthetically designed to seamlessly integrate with the Aliro Collection. It is the responsibility of the purchaser to consult a professional prior to installation for guidance.

### Are the products in the Aliro Collection strength-tested?

Yes, all grab rails and the Accessible Backrest in the Aliro Collection have been strength-tested to meet AS1428.1:2021 Standards.

### What's the best way to clean products in the Aliro Collection?

We recommend cleaning weekly using natural or mild cleaning products or a stainless steel-specific cleaning product. Please refrain from using harsh or abrasive products on your items, as this will impact the colour.

### Who can approve the accessible compliance of the building I'm working on?

An accredited or qualified access consultant can provide guidance and approve accessible compliance.

### Warranty

ABI Interiors offers up to 25 years of additional warranty for residential customers and up to 10 years of additional warranty for commercial applications of our products. For more information, please refer to our warranty terms and conditions.
